CCC Interrogatory #21

Interrogatory

Reference: Exhibit A2/T2/S1 and 2019 Annual Report

In the 2019 Annual Report it states that OPG will be a leading energy innovation company, advancing clean technologies and solutions to help the markets where we operate achieve net-zero carbon economies by 2050. This includes being the catalyst for efficient, economy wide decarbonization, nurturing new industries and new careers for Ontarians, ensuring province-wide chargers for electric vehicles, advancing the potential for vehicle grid integration and by making sure customers benefit from electrification. As part of this OPG plans to facilitate the transition of two million electric vehicles to Ontario's roads through electrification. OPG also entered into a partnership with Hydro One to develop the Ivy Charging network.

a) Please indicate which business unit is involved in developing the EV projects referred to above;
b) Is OPG seeking any relief through this Application regarding EVs and grid integration.

Response

a) OPG is pursuing the development of EV projects through an unregulated business unit.

b) OPG is not seeking any relief with respect to EVs and grid integration as part of this application.
