OSEA Interrogatory #9

Interrogatory

Reference: Exhibit A2-2-1, page 8

1 Please provide a detailed breakdown of annual costs that OPG is incurring related to Small Modular Reactors ("SMRs").

2 Please provide a summary of external funding committed to or received for SMRs (e.g., provincial or federal grants, loans, etc.).

Response

1. For the purposes of this rate setting application OPG is seeking approval of annual OM&A costs of $2.2M, $2.2M, $2.3M, $2.3M, and $2.3M for the years 2022-2026, respectively, as presented in Ex. F2-1-1, Table 1. The forecast OM&A costs in the IR term are for work to preserve the option to build new nuclear at the Darlington site, and are not predicated on the development of an SMR

2. See Ex. L-F2-08-AMPCO-159.
