Subject: Formal Comment – Alectra Utilities 2027 Distribution Rate Application (Enersource Service Area)

Dear Ontario Energy Board Registrar,

I am submitting this correspondence as an anonymous resident and ratepayer within the Alectra (Enersource) service area, regarding Alectra Utilities' proposed 2027 electricity distribution rate adjustments currently before the Ontario Energy Board.

While the projected residential increase of approximately $3.41 per month (based on typical usage of 750 kWh) may be characterized as incremental, I request that the Board evaluate the cumulative affordability impact in the context of broader cost-of-living pressures. Electricity supply rates, municipal water charges, housing costs, and general inflation have collectively placed substantial strain on household budgets. Even modest increases in regulated distribution charges can materially affect affordability when layered alongside these other rising expenses.

Accordingly, I request that the Board:

1. **Scrutinize the underlying cost justifications** to ensure the proposed adjustments reflect only prudent and necessary expenditures;

2. **Consider phased or moderated implementation** in recognition of current

economic conditions; and

3. **Assess consumer impact metrics** as part of its determination, consistent with the Board's statutory mandate to protect the interests of consumers with respect to prices and the adequacy and reliability of electricity service.

Thank you for the opportunity to submit this comment under the Board's established public participation process.

Sincerely,
A Resident of [redacted], ON
