Hi Natasha,

Thank you very much for clarifying; that explanation makes perfect sense. We'll plan to notify the Office of the Registrar once both facilities are approaching/ready for commercial operations.

Appreciate your time and guidance on this.

Best,
Godfrey Harrylal
Project Manager

> Some people who received this message don't often get email from natasha.gocool@oeb.ca. Learn why this is important

Good Morning Mr. Harrylal,

I hope that you are doing well today.

Thank you for reaching out and for providing an update on the anticipated timeline for the

full completion of commercial operations.

The decision and order itself does not need to be amended to include the new timeline. There have been instances in the past where facilities have not been able to be completed by the timelines provided in the licence application request. Instead, entities provide an update to the OEB (as you have done below) on the expected timelines and the OEB keeps this information in our records.

Once the facilities are completed and ready for commercial operations, please send an email to the Office of the Registrar (Registrar@oeb.ca) to let the OEB know that the facilities are ready to be in service and OEB staff will review the notification, and either follow up with you or your team, should they have any additional questions or issue the licenses.

If you have any questions, please let me know.

Have a great day!

Thanks,

Natasha Gocool, Advisor, Transmission Policy & Compliance, Consumer Protection & Industry Performance

Subject: EB-2025-0120 & EB-2025-0121

CAUTION EXTERNAL EMAIL: This email originated from outside of the OEB email system. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Susi, Natasha,

Hope you're both doing well.

I wanted to provide an update regarding the following OEB Decision & Orders:

- **EB-2025-0120 – Walker Dairy Resilient Generation Inc.**
- **EB-2025-0121 – Bolton Manor Resilient Generation Inc.**
-

A few exceptions have shifted our commercial operation target to **the end of February 2026**.

- Lead times for a few minor, but essential components are delaying final completion.

For Walker specifically, MTO permitting also impacted timelines earlier in the schedule.

Most major equipment (generators, switchgear, transformer) remains on track, and with the MTO permit now secured, we've scheduled line extension construction.

Based on this, the new **estimated in-service date** for both projects is **end of February 2026**.

Could we please have both project decisions amended accordingly?

Would it also be possible to phrase the revised completion as **"by April 2026"** - so that we have a small buffer into March, in case of any final commissioning delays?

Thanks so much for your help and flexibility on this. Please let us know if you'd anything further from us to facilitate this request. Thank you kindly!

Best,

Godfrey Harrylal
