I am writing to express my strong opposition to the application submitted by Alectra Utilities Corporation to increase electricity rates. Many households and businesses are already struggling with rising costs, and another rate hike will place an unnecessary burden on consumers during a time of economic uncertainty.
While I understand the need for maintaining infrastructure and supporting energy initiatives, these goals should not come at the expense of affordability. There are alternative approaches, such as improving operational efficiency and reducing administrative overhead, that can help manage costs without passing them on to customers.
Ontario residents deserve a fair and transparent process that prioritizes affordability and accountability. Approving this increase would disproportionately impact vulnerable communities and small businesses, making it harder for them to manage essential expenses.
I urge the Board to reject this application and explore solutions that balance sustainability with affordability for all Ontarians.
Thank you for considering my comments.
