LETTER OF COMMENT

Comments:

Following are major concern to be discussed during meeting :- 1.Not to increase the Energy production rate and Energy supply rate during this undeclared recession time all over Canada and under these tariff fear having more unemployment rate and job loss scenario. 2.More importantly Efforts has been put in place to prevent any kind of power shut down during the harsh weather like extreme hot or cold. 3.Last but not the least any property damaged happened during undeclared power shut down or more power blips resulting in equipment damaged or property damaged should be considered as first priority and provide shelter or alternative solution to the affected community at the best level or satisfaction.
