ONTARIO ENERGY BOARD

NOTICE OF A RATE HEARING

Hydro One Networks Inc. has applied to change the amount it charges to transmit electricity in Ontario and its electricity distribution rates and other charges

Hydro One Sault Ste. Marie LP has applied to change the amount it charges to transmit electricity in Ontario

Hydro One Networks Inc. (Hydro One Networks) and Hydro One Sault Ste. Marie LP (Hydro One Sault Ste. Marie) filed a combined application to the Ontario Energy Board (OEB) for approval of a five-year rate plan for the period January 1, 2028 to December 31, 2032.

Hydro One Networks has applied for approval of the transmission rates it charges for the use of its transmission system and the distribution rates it charges for electricity distribution in each of the five years of the rate plan.

Hydro One Sault Ste. Marie has applied for approval of its charges for using its transmission system on a final basis for 2027 and for the same five-year period.

Hydro One Networks Transmission

The OEB's decision on the transmission portion of this application will have an effect on all electricity consumers in Ontario. The cost of transmission is reflected in the delivery charges included on customer bills.

If Hydro One Networks' transmission portion of the application is approved as filed, a typical residential customer and a typical general service customer would see the following monthly increases:

Customer Class	2028	2029	2030	2031	2032
Residential Medium Density (750 kWh)	$0.50	$1.28	$1.49	$0.89	$1.53
General Service less than 50 kW (2,000 kWh)	$1.12	$2.84	$3.32	$1.98	$3.41

The changes for customers of other electricity distributors across the province may vary

This hearing will be held under section 78 of the ***Ontario Energy Board Act, 1998, c.15, Schedule B.***

Ontario Energy Board

depending on the customer's electricity usage and the electricity distributor that serves them.

Other customers, including businesses, will also be affected.

Hydro One Networks Distribution

The OEB's decision on the distribution portion of this application will have an effect on electricity consumers who receive electricity from Hydro One Networks' distribution system, and those Local Distribution Companies who are embedded in Hydro One Networks' distribution system.

If the distribution portion of the application is approved as filed, in addition to the transmission charges, approximately 60% of residential customers would see the typical monthly bill impacts below, which include the Distribution Rate Protection (DRP) Program. The DRP Program is funded by the provincial government to keep the delivery charges more affordable for year-round medium and low density residential customers.

Customer Class	2028	2029	2030	2031	2032
Residential Medium Density (750 kWh)	**($0.10)**	**$0.00**	**$0.00**	**$0.00**	**$0.00**
Residential Low Density (750 kWh)	**($0.21)**	**$0.00**	**$0.00**	**$0.00**	**$0.00**

For a typical residential urban density and a typical general service customer (GSe) of Hydro One Networks, if the application is approved, they would see the following monthly changes that are in addition to the transmission changes:

Customer Class	2028	2029	2030	2031	2032
Residential Urban Density (750 kW)	**$10.98**	**$5.88**	**$4.62**	**$2.17**	**$2.27**
General Service less than 50 kW (2,000 kWh)	**$49.39**	**$26.34**	**$20.40**	**$8.44**	**$8.89**

Other customers, including businesses, will be affected.

Hydro One Sault Ste. Marie Transmission

The OEB's decision on the transmission portion of this application will have an effect on all electricity consumers in Ontario. The cost of transmission is reflected in the delivery charges included on customer bills.

If Hydro One Sault Ste. Marie's transmission portion of the application is approved as filed, a typical residential customer and a typical general service customer would see the following

monthly increases:

Customer Class	2028	2029	2030	2031	2032
Residential Medium Density (750 kWh)	**$0.02**	**$0.01**	**$0.04**	**$0.00**	**$0.01**
General Service less than 50 kW (2,000 kWh)	**$0.05**	**$0.03**	**$0.08**	**$0.00**	**$0.02**

Other customers, including businesses, will be affected.

Other

Hydro One Networks has also applied to dispose of certain Group 1 (routine) and Group 2 (special purpose) deferral and variance accounts.

It is important to review the application carefully to determine whether you may be affected by these changes.

YOU SHOULD KNOW

There are three types of OEB hearings: oral, electronic and written. Hydro One Networks and Hydro One Sault Ste. Marie have applied for an oral hearing. The OEB is considering this request. If you think a different hearing type is needed, you can write to us to explain why.

During this hearing, we will hear questions and arguments from participants about this case. We will also hear questions and arguments from participants that have registered as intervenors. After the hearing, we will decide whether to approve the application.

HAVE YOUR SAY

You have the right to information about this application and to participate in the process. Visit www.oeb.ca/notice and use file number **EB-2026-0164** to:

- Review the application
- File a letter with your comments
- Apply to become an intervenor

IMPORTANT DATES

You must engage with the OEB on or before **November 24, 2026** to:

- Provide input on the hearing type (oral, electronic or written)
- Apply to be an intervenor

If you do not, the hearing will move forward without you, and you will not receive any further notice of the proceeding.

PRIVACY

If you write a letter of comment, your name and the content of your letter will be put on the public record and the OEB website. If you are a business or if you apply to become an

intervenor, all the information you file will be on the OEB website.
