EB-2024-0193	Natural Gas – Rates	Denied

Issues:

Energy Probe was an intervenor in Tillsonburg Hydro's last rate proceeding, EB-2023-0053, where there was a complete settlement of all issues. One of the settled issues dealt with the concerns of Energy Probe regarding the virtual utility structure of Tillsonburg Hydro. Energy Probe's main concern in this proceeding is the impact of the acquisition by ERTH of Tillsonburg Hydro on the commitments made by Tillsonburg Hydro in the EB-2023-0053 Settlement Agreement.

Policy Interests:

Tillsonburg Hydro Inc. is a virtual utility. It has no employees. All its work is performed by employees of the Town of Tillsonburg or is contracted out by the Town. Energy Probe is concerned that under this type of corporate organization, costs that should properly be the responsibility of the town and collected from property taxpayers may be charged to the ratepayers of Tillsonburg Hydro.

Hearings:

Energy Probe believes that a written hearing would be appropriate to minimize regulatory costs.

Evidence:

Energy Probe does not intend to file evidence.

Coordination with Other Intervenors:

Energy Probe intends to coordinate its efforts with intervenors with similar interests by sharing plans for interrogatories, technical conference, and the hearing to avoid duplication.

Cost Awards:

Energy Probe applies for recovery of its reasonably incurred costs during its intervention in this proceeding. Energy Probe is a non-profit organization which relies on individual donations to help protect the public interest. Without the prospect of an award of costs, Energy Probe's ability to participate in OEB proceedings would be limited. Energy Probe's members and supporters are electricity consumers and are eligible for an award of costs according to the Practice Directions on Cost Awards. Energy Probe has participated in many past electricity proceedings in Ontario, including consultations, rate cases, and other processes and hearings, and has been found eligible to be paid its reasonably incurred costs.

Language Preference:

Energy Probe does not intend to participate using the French language.
