Subject: Letter of Comment – EB-2025-0163 (Enbridge Rate Application)

Dear Board Members,

I am writing to strongly object to the Enbridge rate application under case number EB-2025-0163.

Enbridge already charges rates that are far too high for many Ontarians, and the company is now engaging in overseas export activities. This raises serious concerns about whether Canadian consumers are being placed second to corporate profit. At a time of economic uncertainty, households and businesses are struggling to absorb rising costs across the board.

Energy is a basic necessity. We should be seeing efforts to stabilize or reduce prices for Canadians, not increase them, especially when the resources in question originate here. Approving this increase would undermine public trust in both our energy sector and in the Ontario Energy Board's role as a regulator tasked with protecting consumers.

I urge the OEB to reject this application and to work toward policies that prioritize Canadian companies serving Canadian consumers at fair, stable prices.

Thank you for your consideration of my comments.

Thank you,

Todd Miller
