2026-0056	Electricity – Rates	Granted

Issues:

Pollution Probe represents a consumer and policy interest related to this Hydro One 2028-2032 Custom Incentive Rate-Setting Application for Transmission Revenue Requirements and Distribution Rates. This Application relates to Hydro One proposed plans and budgets (transmission, distribution and Hydro One Sault Ste. Marie) intended to meet electricity demand driven by population growth, housing development, economic expansion,

electrification, and new energy resources. The Application also includes investments intended to serve utilities and communities across Ontario and enable distributed energy resources (DERs) in aligment with Provincial policy and OEB requirements.

Policy Interests:

Please see above

Hearings:

Pollution Probe supports Hydro One's request for an oral hearing.

Evidence:

Pollution Probe does not intend to commission expert evidence at this time. However, based on the issues outlined in the application Pollution Probe may provide relevant materials to the OEB during the proceeding. No specific approvals are required to enable this approach.

Coordination with Other Intervenors:

Pollution Probe has been an active and valuable participant in OEB proceedings and will continue to coordinate its activities with impacted consumers, intervenors and other parties as appropriate.

Cost Awards:

Pollution Probe respectfully requests your acceptance of this intervenor request and confirmation that it will be eligible for its costs. Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects. Without the prospect of an award of costs, Pollution Probe’s ability to participate in this proceeding would not be possible.

Language Preference:

English
