Issues:

SEC is materially impacted by the application as its members are customers of Hydro One Distribution and pay transmission rates, which include Hydro One Transmission and Hydro One SSM costs. SEC has an interest in all issues identified in the Applicant's draft issues list included in Exhibit A, Tab 9, Schedule 1.

Policy Interests:

Hearings:

Until interrogatories have been answered and any settlement conference has concluded, we believe it is premature to assess whether a written or oral hearing is more appropriate in this

proceeding. However, if the OEB is to make a determination now regarding the format of the hearing at this stage, considering the size of the utility, the request for early rebasing, the complexity of the issues, and the bill impacts, we believe that an oral hearing is appropriate.

Evidence:

SEC had some initial discussions with other potential intervenors about filing evidence and so is unable to answer this question at this time.

Coordination with Other Intervenors:

SEC will coordinate with other intervenors with similar interests, where appropriate, to promote responsible participation in the proceeding.

Cost Awards:

SEC applies for recovery of its costs reasonably incurred in the course of its intervention in this matter. SEC's members are customers of the Applicant and eligible for an award of costs pursuant to section 3.03(a) of the Practice Direction. SEC has participated in many past natural gas and electricity proceedings in Ontario, including consultations, rate cases, and other processes and hearings, and has been found eligible to be paid its reasonably incurred costs in all of those proceedings.
