Centre Wellington Hydro Ltd.
OEB Staff Question - EB-2026-0030
October 21, 2026

Please note, Centre wellington Hydro Ltd. (Centre Wellington) is responsible for ensuring that all documents it files with the OEB, including responses to OEB staff questions and any other supporting documentation, do not include personal information as that phrase is defined in the *Freedom of Information and Protection of Privacy Act*, unless filed in accordance with rule 9A of the OEB's *Rules of Practice and Procedure*.

2-Staff-1

Update to Uniform Transmission Rates (UTRs) and Hydro One Sub – Transmission Rates

Ref 1: 2027 IRM Rate Generator Model, Tab 11, RTSR – UTRs & Sub Tx

Ref 2: EB-2026-0246, Letter for 2027 Preliminary Uniform Transmission Rates and Hydro One Sub-Transmission Rates, October 14, 2026.

Preamble:
In the above reference, on October 14, 2026, the OEB announced the updated Uniform Transmission Rates (UTRs) effective January 1, 2027.[1] The OEB has also issued the proposed Hydro One Networks Inc.'s (Hydro One) Sub-Transmission Rates.[2]

Question(s):

OEB staff has updated the Rate Generator Model with the updated UTRs and proposed final Hydro One Sub-Transmission Rates.

Table 1: Updated Uniform Transmission Rates

Uniform Transmission Rates	Unit	2025 Jan to Jun	2025 Jul to Dec	2026 Jan to Jun	2026 Jul to Dec	2027
Rate Description		Rate		Rate		Rate
Network Service Rate	kW	$ 6.37	$ 6.37	$ 6.39	$ 6.39	$ 6.75
Line Connection Service Rate	kW	$ 1.00	$ 1.00	$ 1.03	$ 1.03	$ 1.09
Transformation Connection Service Rate	kW	$ 3.39	$ 3.39	$ 3.47	$ 3.47	$ 3.70

[1] EB-2026-0246
[2] *Ibid*

Table 2: Updated Hydro One Transmission Rates

Hydro One Sub-Transmission Rates	Unit	2025	2026	2027
Rate Description		Rate	Rate	Rate
Network Service Rate	kW	$ 5.3280	$ 5.4708	$ 5.4491
Line Connection Service Rate	kW	$ 0.6882	$ 0.7054	$ 0.7079
Transformation Connection Service Rate	kW	$ 3.4894	$ 3.5764	$ 3.5892
Both Line and Transformation Connection Service Rate	kW	$ 4.1776	$ 4.2818	$ 4.2971

Question:

OEB staff has updated the Rate Generator Model with the updated UTRs and proposed final Hydro One Sub-Transmission Rates.

a) Please confirm that all tabs are updated accordingly.

CWH Response:

a) CWH confirms that the UTRs have been updated accordingly.

2-Staff-2

Time of Use Regulated Price Plan and the Ontario Electricity Rebate

Ref: 2027 IRM Rate Generator Model, Tab 18, Regulatory Charges

Preamble:
On October 16, 2026, the OEB issued the Regulated Price Plan (RPP) Report, which established the RPP prices effective November 1, 2026, through October 31, 2027.

Effective November 1, 2026, the Ontario government's Ontario Electricity Rebate (OER) will also change to 15.7%. The OER provides a rebate on the electricity bills of eligible residential, small business, and farm customers.[3]

Table 3: Time of Use RPP Prices and Percentages

[3] Regulatory Price Plan Report, October 16, 2026

Time-of-Use RPP Prices and Percentages

As of		November 1, 2026	
Off-Peak	$/kWh	0.0910	64%
Mid-Peak	$/kWh	0.1460	18%
On-Peak	$/kWh	0.1890	18%

Table 4: Update Ontario Electricity Rebate

Ontario Electricity Rebate (OER)

Ontario Electricity Rebate (OER)	$	15.70%

Question:

OEB staff has updated the Rate Generator Model with the updated Time of Use RPP prices and the OER.

a) Please confirm that all tabs are updated accordingly.

CWH Response:

a) CWH confirms TOU RPP prices and OER have been updated accordingly.

2-Staff-3

Residual Account 1595 Allocation

Ref 1: 2027 IRM Rate Generator Model, Tab 4, Disposition and Recovery/Refund of Regulatory Balances (2023).

Ref 2: 2023 IRM Rate Generator Model, Tab 5, Allocating Deferral and Variance Account Balances

Preamble:
OEB staff notes that Tab 4 of the 2027 IRM Rate Generator Model allocates the residual Account 1595 balance using the "1595 Recovery Proportion (2023)." Tab 4 further states that:

"Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented."

OEB staff compared the recovery proportions reflected in the 2027 IRM model with the recovery shares used in the distributor's 2023.

Table 5: Account 1595 Recovery Proportion Comparison

Rate Class	2027 IRM Tab 4 1595 Recovery Proportion (2023)	2023 IRM Tab 5 % of Total kWh
Residential	33.0%	34.1%
GS < 50 kW	16.0%	16.3%
GS > 50 kW	49.0%	38.1%
Sentinel Lighting	0.0%	10.7%
Street Lighting	0.0%	0.4%
Unmetered Scattered Load	0.0%	0.4%
Total	**100.0%**	**100.0%**

Questions:

a) OEB staff notes that the 1595 Recovery Proportion (2023) values in the 2027 IRM Rate Generator Model appear to differ from those reflected in the 2023 IRM Rate Generator Model. Please explain the basis for these differences and update the 2027 IRM Rate Generator Model, if applicable.

CWH Response:

a) In 1595 Recovery Proportion (2023), the recovery for Residential Service, General Service Less Than 50 kW, and Unmitered Scattered Load service were based on kWh to allocate. The allocation for General Service 50 to 4,999 kW Service, Sentinel Lighting Service, and Street Lighting Service was using kW as a basis.

The percental of Total kWh on 2023 IRM Tab 5 was based on kWh for all class. It was not the actual recovery share because the recovery for some classes was based on kW, not kWh. Therefore, CWH uses dollar amount for each class on 2023 IRM Tab 5 to calculate the recovery share for 2023, which shows in 2027 IRM Tab 4.
