EB-2026-0051 Hydro Ottawa 2027 Rates
Pollution Probe Interrogatories to Applicant

Dear Mr. Murray:

In accordance with OEB direction, please find attached Pollution Probe's interrogatories to the Applicant, including coordination with CAFES Ottawa as proposed and accepted by the OEB.

Pollution Probe also appreciates OEB Staff filing their interrogatories early and it has enabled us to removed duplication to support an efficient process.

Respectfully submitted on behalf of Pollution Probe.

PP-1

Please confirm that all information, elements and requests in the Application are in compliance with the OEB Decision(s) and the OEB approved settlement agreement from EB-2024-0115. If there is any variance, please identify and explain the variance.

PP-2

Reference: [EB-2024-0115 dec_order_Hydro Ottawa_2026 CoS_20260512, Settlement Proposal December 19, 2025 Page 59]. Please note that this commitment relates to a large range of stakeholders and Pollution Probe and CAFES Ottawa were only two such stakeholders.

NWS/DER Stakeholder Engagement*: Hydro Ottawa will create an NWS stakeholder group, open to customers and non-customer stakeholders, including but not limited to all parties to this Settlement Proposal, to stay informed and engaged in Hydro Ottawa's NWS programs and DER-related activities. This group will engage interested stakeholders at least annually to showcase Hydro Ottawa's non-wires customer solutions (including customer programs and DERs) and to solicit feedback and input. This engagement may be in the form of customer events, focus groups, forums, or open houses, and may be in-person or virtual. NWS stakeholder group engagement activities will be advertised to customers and community groups in eligible areas, as well as through public channels where applicable.*

a) Please provide a summary of the (at least) annual engagement activities undertaken to-date by Hydro Ottawa in relation to this commitment. Please also provide the dates and scope of the annual stakeholder engagement conducted to-date and those scheduled for the remainder or 2026.

b) Please summarize the feedback received through the NWS stakeholder engagement to-date and highlight any actions for 2027 that resulted from that feedback.

c) Please provide the proposed dates and scope of the (at least) annual stakeholder engagement planned for 2027.

d) Please provide a copy of the communication materials sent to NWS stakeholders to notify them of the NWS stakeholder engagement and how they can participate.

e) Please provide a copy of any stakeholder plan developed (including customer events, focus groups, forums, or open houses, and in-person or virtual events) to meet this commitment in 2027 (or over the rate term if it was developed more broadly than just for 2027).
