LETTER OF COMMENT

Comments:
Case Number: EB-2026-0164 Applicant: Hydro One Networks Inc. To the Ontario Energy Board Commissioners, I am writing as a Hydro One customer to formally register my strong objection to the proposed multi-year joint rate application for 2026–2030. While I understand the ongoing requirement to maintain grid infrastructure and invest in system reliability, consecutive annual rate hikes place an unsustainable financial burden on everyday Ontario households. The steady rise in delivery and transmission charges directly erodes the affordability of a vital utility, forcing families to make difficult trade-offs in their monthly budgets. I urge the Board to thoroughly scrutinize Hydro One's capital spending requests, demand greater operational efficiencies, and protect consumers by rejecting regular, compounding rate increases over this five-year period. Thank you for ensuring my concerns are included in the public record and carefully considered during this hearing. Sincerely,

Name: Derrick Lobo
