

-- Name --
Landon Savell

-- Do you reside in the impacted service area? --
Yes

-- Comments --
I don’t have another 400$ a year for electrical service, this is a threat to my right to life. If you need more money save it by freezing wages of top 15 percent of employees such as ceos and such. Cut your pensions and health plans like the rest of us. Stop going on vacations and stop having dinners and pizza party’s. I’m sorry but you need to think about this. You tryed Solar and wind and cost me more, then you went back to nuclear and cost me more, what next back to coal and acid rain and still ask for more? The bill will never go down, every increase is a life time of additional cost like a tax bill with no relief and pushing many out of home affordability.
