-- Comments --
After reviewing the increases in the Notice is it at all possible that they don't just show a monitory amount but a percentage amount as well along side of the amount. The average person who is retired or not know the amounts that they receive as increases from their jobs or OAS or CPP. If these increased amounts are higher than what a person receives Approving these increases would be pushing Ontario families down. It is something that I hope that the OEB considers.
