To whom it may concern:
Dear Sir/Madam,
I'd like to vote against increasing hydro bills in anyway. I'm a single resident at above address with middle tier class income. I always use electricity with cautious; i.e. I only use high energy consuming devices at night, have replaced all light bulbs with LEDs, and also equipped them with dimmers and timers to minimize electricity usage/consumption.
With all these measures, my monthly Hydro bills look much higher than what it fairly should be.
I'm not specifically worried about myself, but families of several people. If a household of one with cautious electricity usage feels the bills are excessive then a medium family of larger size for sure will have difficulties covering their bills after the increase.
Therefore, please deny the request.
Thank you,
Sean
