Dear Nicole,

Re: Enbridge Gas Inc. (Enbridge Gas)
Casselman RNG Pipeline Leave to Construct Application
Ontario Energy Board File Number: EB-2026-0223

Thank you once again for taking time to speak with me and my colleague Preetee Hurree. This letter summarizes our discussions and provides additional information that may be helpful.

During our conversations, we discussed the options available to you for participating in the Ontario Energy Board's proceeding on Enbridge Gas' application. These options are also described on our website at Renseignements sur les intervenants.

As an alternative to becoming an active participant in the proceeding (called an intervenor), you have made your concerns known by filing a letter of comment. Please be assured that your letter has been placed on the record of this proceeding and will be read by the panel of Commissioners hearing this matter. Should you wish, you can file additional letters of comment anytime until the record of the proceeding closes. Enbridge Gas is required to respond to any letters of comment by filing a written document before the record of the proceeding closes.

I also committed to providing you with translated copies of all Ontario Energy Board issued documents related to this proceeding (e.g., procedural orders, letters, decisions). The first of those documents is Procedural Order No. 1, a copy of which is attached to this letter. It is also available on the record of this proceeding OEB's website under case number EB-2026-0223. You have been registered to receive translated copies of all future Ontario Energy Board issued documents related to this proceeding by email.

Procedural Order No. 1 sets out the procedural schedule for this proceeding. This process begins with Ontario Energy Board staff and the intervenor in this proceeding, Pollution Probe, sending Enbridge Gas written questions about its application (called

interrogatories). These questions were due on November 4, 2026. Enbridge Gas is required to provide its written answers to the questions by November 18, 2026. These questions and answers may contain information of interest to you.

Procedural Order No. 1 also sets out a process for written submissions. Ontario Energy Board staff and Pollution Probe - the intervenor, must file their written submissions by December 2, 2026. Enbridge Gas must file its written reply submission by December 16, 2026. These submissions may also be of interest to you.

Once Enbridge Gas files its reply submission, the record will close, unless the panel of Commissioners orders otherwise. The panel will then consider all the evidence on the record of the proceeding (including all letters of comment) and render its decision. The decision will likely be issued in February or March 2027.

As a directly affected landowner, we appreciate your participation in this proceeding. Open and inclusive proceedings at the Ontario Energy Board are critical to making informed decisions that are in the public interest. Providing access and information in French is a key component of ensuring that hearings are fair, transparent and accessible to all Ontarians.

I am available to address any questions or concerns you may have. You can contact me directly at ritchie.murray@oeb.ca or registrar@oeb.ca.

Yours truly,

Ritchie Murray
