Re: Stakeholder Meeting | 2027 Filing for the Electricity Reporting and Record-keeping Requirements (RRR), Ontario Energy Board File Number: EB-2022-0267

What You Need to Know

- **The OEB will host a stakeholder meeting to provide updates on planned changes to the Electricity Reporting and Record-Keeping Requirements (RRR) for licensed electricity distributors.**
- **While some voluntary data will become mandatory, the net result due to all changes in RRR is an overall reduction in reporting volume for electricity distributors**
- **Stakeholders are invited to attend a virtual meeting on December 8, 2026, from 9:30 a.m. to 11:30 a.m. to learn about the proposed changes and provide feedback.**

The OEB will host a stakeholder meeting to provide updates to the Electricity Reporting and Record-keeping Requirements (RRR) for Ontario's licensed electricity distributors.

The meeting will take place on **December 8, 2026,** from **9:30 a.m. to 11:30 a.m.**

Its purpose is to:

a) Provide updates on planned changes to Electricity RRRs for the April 2027 annual filing, including:

New mandatory reporting requirements

- 2.1.5.5 e) - Secondary circuit kilometer reporting, currently voluntary, will become mandatory to improve productivity and benchmarking analysis.
- 2.1.5.8 - Activity and Program-Based Benchmarking fields, currently voluntary, will become mandatory to improve data quality and support

more definitive analysis. The expectation of an eventual transition to mandatory reporting of this information was communicated in the 2025 Annual RRR and Filing Update.

Other reporting changes

- 2.1.4.2 - SAIFI and SAIDI reporting resolution will be reduced from monthly to annual to reduce regulatory burden.
- 2.1.19 e) Distribution System Plan progress values for the Scorecard will be standardized, enabling consistent measurement across distributors.
- 2.1.7 - A voluntary comments field will be added for specific USoA accounts to reduce follow-up requests after submission.

The reduction in reliability reporting requirements more than offsets the incremental reporting volume attributable to the shift in APB-related data from voluntary to mandatory. The result is a net decrease in overall data volume to be submitted in RRR by distributors.

b) Provide an update on proposed reporting changes for the 2028 filing year:
   - 2.1.7 - Deferral and Variance Accounts established through EB-2026-0196

c) Obtain input from industry participants on potential changes to the RRRs in the future.

A PowerPoint presentation is attached for discussion at the stakeholder meeting. The presentation outlines in greater detail these proposed changes to the Electricity RRR for the 2027 filing year.

Participation

Stakeholders intending to participate in the meeting are requested to notify Connie.Ellison-Johnson@oeb.ca by **December 4, 2026**. Please include **"EB-2022-0267 - RRR Consultation"** in the subject line of your email.

Cost Award Matters

Cost awards will not be provided for this stakeholder meeting and comment process given the limited scope of proposed changes.

Any questions relating to this letter can be directed to Performance Analytics and Reporting at performance_reporting@oeb.ca. The OEB's toll-free number is 1-888-632-6273.
