Sheet 4 - Smart Meter Information

The smart meter plan rate adder is a monthly service charge for metered customers equivalent to an amount of \$0.30 per month per residential customer for utilities that do not have a plan. A different amount applied to utilities who had a smart meter plan that was modified in accordance with the Decision with Reasons RP-2005-0020 / EB-2005-0529

Please identify the customer classes and sub-classes that the smart meter funding incremental adjustment applies to by inserting the smart meter rate adder into column D. For most utilities, the rate adder can be located in the Board-approved 2007 IRM model. Clicking the cursor on the Residential cell should show the formula for the monthly service charge including the smart meter adder. The adder is the same for all metered classes and sub-classes of a distributor.

Leave column F blank, and the model will by default use the existing rate adder in the following calculations. If a new value of the rate rider is required by a subsequent decision, Board staff will enter the appropriate values in column F.

**MANAGER’S SUMMARY - MAY 1, 2008
ELECTRICITY DISTRIBUTION RATE ADJUSTMENT –
PENINSULA WEST UTILITIES LIMITED. (THE “APPLICANT”)
FILED NOVEMBER 1, 2007**

1. Introduction:

1.1 On September 28, 2007, the Ontario Energy Board (the “OEB”) issued the Filing Requirements for 2008 Incentive Regulation Mechanism Distribution Rate Adjustments. The Filing Requirements set out that distributor’s applying for distribution rate adjustments for May 1, 2008 based on the 2nd Generation Incentive Regulation Mechanism (“IRM”) policies set out in the Report of the Board on Cost of Capital and 2nd Generation Incentive Regulation Mechanism (the “Board Report” or the “Report”) dated December 20, 2006. Distributors not filing on this basis will need to file a Cost of Service rate application in accordance with the Board’s Filing Requirements for Transmission and Distribution Applications, based on a forward test year.

1.2 The Filing Requirements convey the OEB’s expectation that 2008 electricity distribution rate adjustment applications be filed by November 1, 2007.

The Filing Requirements outline that the 2008 rate adjustments will include the 2nd Generation IRM price cap adjustment; and the removal of the regulatory asset recovery, as applicable.

1.3 The Applicant confirms that it is applying for its 2008 distribution rate adjustment based on the cost of capital and 2nd Generation IRM policies as set out in the OEB’s Filing Requirements. Accordingly, the Applicant has prepared its submission in accordance with the methodology set out in the Filing Requirements, and has used the OEB’s 2008 Incentive Regulation Mechanism Distribution Rate Adjustment Model (the “2008 IRM Model”) issued with the Filing Requirements to calculate its proposed 2008 electricity distribution rates and charges, effective May 1, 2008.

1.4 The Applicant’s requested 2008 adjustments, based on the bill impact analysis incorporated into the 2008 IRM Model, result in the following average bill impacts:

Residential URBAN (1000 kWh before GST)	-5.2%
Residential SUB(1000 kWh before GST)	-5.1%
General Service <50 kW (2,000 kWh before GST)	-4.6%
General Service > 50 kW (310 kW before GST)	-3.0%

Bill impacts related to specific customer classes and consumption profiles are reviewed in detail in the body of this Manager's Summary.

1.5 As this submission is consistent with the policies of the Report and the OEB’s Filing Requirements, the Applicant trusts that this Application will be addressed and determined by the OEB in order that the proposed distribution rates may be implemented for May 1,

2008. In the event that the OEB determines that it will be unable to consider certain of the adjustments requested by the Applicant within the time available prior to May 1, 2008, the Applicant requests that the OEB issue an interim Order which would allow for those adjustments with which the OEB has no concerns to be made effective May 1, 2008.

- 1.6 This Manager's Summary is organized to correspond to the various steps in the 2008 IRM Model, from the identification of the Applicant's 2007 Rate Classes in Sheet 2 (Sheet 1, the "Utility Information Sheet", consists simply of the identification of, and the contact information for the Applicant), through the analysis of bill impacts in Sheets 12-13. The remainder of this submission is set out as follows:

4. Smart Meter Information, and Removal of Smart Meter Charge from 2007 Rates (Sheets 4 and 5):

4.1 In accordance with the Board's Decision RP-2005-0020/EB-2005-0529 and as approved in the Board's Decision and Rate Order for each distribution rate application, smart meter funding is currently included in the Monthly Service Charge for metered customers. The Filing Requirements outline that the current rate adder must be removed and then re-incorporated into the 2008 rate.

4.2 As reported in the Filing Requirements,

“ Based on the methodology set out in Appendix “E” in the Board's Decision EB-2007-0063, prescribed distributors are required to calculate their Smart Meter adder for 2008. This amount should be entered into the Smart Meter Adder Sheet. “

4.3

Sheet 4 of the 2008 IRM Model shows the Applicant's 2007 and 2008 smart meter-related rate adders. Sheet 5 removes the smart meter component of the fixed monthly charge to create a new “Base” monthly service charge. The Applicant's Monthly Service Charges, Smart Meter Charges and Base Monthly Service Charges are set out on Sheet 5.

4.4 The 2008 smart meter-related adder is applied to the Base Monthly Service Charges later in the rate making process, after the price cap adjustment to the “Basic” Distribution Rates. It is discussed in Section 8, below.

5. Conservation and Demand Management:

- 5.1 The Filing Requirements set out that CDM funding approved in rates for 2007 must be removed from the 2008 rates. This adjustment does not apply to funds approved under the third tranche of the Market Adjusted Revenue Requirement, approved in rates in 2005.
- 5.2 The Applicant did not receive any incremental CDM funding in its OEB-approved 2007 distribution rates. Accordingly, the Adjusted Monthly Service Charges at this stage are shown in Table 4-1, and the volumetric rates remain unchanged.

6. K-Factor (Sheet 6):

- 6.1 Sheet 6 of the 2008 IRM Model calculates the K-factor adjustment for the transition to the common deemed capital structure of 60% equity and 40% debt to be used for rate setting, replacing the four capital structures in use since 2000. The calculated K-factor represents the percentage change in revenue requirement (including taxes/PILs) and hence, distribution rates, due solely to changing from the distributor's current deemed capital structure to the 2008 transitional capital structure appropriate for that distributor (the "K-factor adjustment").
- 6.2 The Applicant submits a calculated K-Factor of -03%.

7. Price Cap Adjustment (Sheet 7):

- 7.1 The Filing Requirements (at page 4) provide that “The Board has determined that GDP-IPI [the Canada Gross Domestic Product Implicit Price Index] – for final domestic demand is to be used as the price escalator for the 2nd Generation IRM. The Board expects applicants to use, as a proxy, the current value of 1.9% in their application. When the final 2007 data are published by Statistics Canada in late February 2008, the Board will adjust the inflation index in each distributor’s rate application model, to ensure this final published number is used to adjust rates for all distributors.”
- 7.2 The OEB’s 1% X-Factor is then applied to the price escalator, so that the price adjustment formula is (GDP-IPI)-X, and the –0.3% K-Factor. Based on the current GDP-IPI proxy of 1.9%, the result is a net upward adjustment of 0.6%.
- 7.3 Sheet 7 of the 2008 IRM Model applies this price cap adjustment. The Applicant’s resulting price cap adjusted monthly service charges and volumetric rates are summarized on sheet 7

8. Addback of Smart Meter Amounts (Sheet 8)

- 8.1 Having removed the smart meter adder in Sheet 5, the 2008 IRM Model restores the smart meter adder in Sheet 8.
- 8.2 The 2008 smart meter adder will be \$0.26, once again to be added to the monthly service charge. The price cap adjusted volumetric charge will not change because of the restoration of the smart meter adder.
- 8.3 Sheet 8 generates the “Final” 2008 monthly service charges and volumetric charges, which are then incorporated into Sheet 10 (the Applicant’s proposed Tariff of Rates and Charges.)
- 8.4 The Applicant’s resulting “2008 Final Monthly Service Charges” and “2008 Final Volumetric Rates” are shown in sheet 8

9. Z-Factors and Other Matters

- 9.1 The Applicant confirms that there are no Z-Factor or other adjustments being requested in this Application.

10. Proposed Tariff of Rates and Charges, Effective May 1, 2008 (Sheet 10):

- 10.1 Sheet 10 of the 2008 IRM Model sets out the Applicant’s full tariff of rates and charges, which includes the 2008 Final Monthly Service Charges and Volumetric Rates calculated in Sheet 8 and all other charges that form part of the Applicant’s rate order - these other charges are not changing in the 2008 IRM process. Accordingly, the Applicant has not provided a summary of the tariff here. The 2008 Final Monthly Service Charges and Variable Rates that result from the operation of the 2008 IRM Model has been summarized in Table 8-1.

11. Distribution Rate Change Summary

- 11.1 Sheet 11 of the 2008 IRM Model sets out the Applicant’s Distribution Rate Change summary, which outlines the calculation of rate change for each of the Applicant’s rate classes.

12. Bill Impacts (Sheets 12 and 13)

- 12.1 Sheets 12 and 13 of the 2008 IRM Model calculate the impacts of the 2008 adjustments on customer bills – the sheets include numerous customer profiles, and bill impacts are calculated.
- 12.2 The sheets calculate dollar and percentage changes in respect of individual elements of the bill, and in respect of the total bill. The following briefly summarize the average consumption impacts of the adjustments on the total bill.

- 12.3 The Applicant submits that the anticipated bill impacts in this application are reasonable and that no mitigation measures are necessary.

13. Conclusion

- 13.1 In light of the all of the foregoing, including the minimal bill impacts arising out of its proposed 2008 distribution rate adjustments, the Applicant requests that the OEB adjust its rates in the manner set out in the 2008 IRM Model submitted herewith.
