

**EB-2010-0117**

**NOTICE OF APPLICATION AND HEARING FOR AN  
ELECTRICITY DISTRIBUTION RATE CHANGE**

**Veridian Connections Inc. - Veridian**

Veridian Connections Inc. - Veridian ("Veridian - Main") filed an application with the Ontario Energy Board (the "Board") on October 5, 2010 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15 (Schedule B), seeking approval for changes to the rates that Veridian - Main charges for electricity distribution, to be effective May 1, 2011. The application was filed under the Board's guidelines for 3<sup>rd</sup> Generation Incentive Regulation, which provides for a mechanistic and formulaic adjustment to distribution rates between cost of service applications. Veridian - Main's application also includes a request to recover the costs of testing non pole-top transformers required for compliance with Environment Canada PCB Regulations effective September 5th, 2008. The Board has assigned the application File No. EB-2010-0117. The Board's decision on this application may have an effect on all of Veridian - Main's customers.

Any change to Veridian - Main's distribution rates will cause Veridian - Main's delivery charges to change. Delivery charges are one of four regular items on residential and general service customers' electric bills and vary depending on the amount of electricity consumed.

Veridian - Main indicates that if the application is approved as filed, residential customers consuming 800 kWh per month would experience an approximate 6.7% decrease in their current delivery charges. This is a \$2.19 per month decrease on their total bill. General Service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW would experience an approximate 8.9% decrease in their current delivery charges. This is a \$5.63 per month decrease on their total bill.

The proposed changes to the delivery component of the bill are separate from other potential changes to the electricity bills, which could include changes to the electricity component and other charges included on the bill. This application deals only with the potential change in the delivery component of the bill that may result from changes in the delivery rates.
