RE: EB-2010-0142 SUITE METERING SUPPLEMENTARY EVIDENCE

1. (Ex. L1/T5/p. 4) The evidence states that THESL's contract with its vendor for the Quadlogic meters will expire at the end of 2011.
 - (a) What is THESL doing in terms of securing another contract?
 - (b) Has an RFP been issued?
 - (c) What is the likelihood that the Quadlogic meters will continue to be used by THESL?
 - (d) If not, are other brands likely to be comparable in terms of cost?

2. (Ex. L1/T5/p. 4) THESL has provided an estimated meter cost of \$550. Please provide a detailed break-down of how that amount was arrived at.

3. The Smart Sub-metering Working Group has filed a motion claiming that THESL's Supplemental Evidence is "inadequate, contrary to and/or inconsistent with the Board's Partial Decision and Order dated June 7, 2011". What is THESL's position with respect to this claim?
