Subject: Application for increased rates by Enbridge and Union Gas

To whom it may concern: While the application regarding rates pertaining to Biomethane gas recoveries is commendable by Enbridge and Union Gas companies, this should not translate into increased rates by consumers as a consequence. Consumers already pay enough to cover such developments which can be a ready excuse to increase profit by the companies. Please pass onto the public any rational pertaining to their business plan that can justify any increase. Thank you. Jack Roberts.
