THE ONTARIO ENERGY BOARD

IN THE MATTER OF the *Ontario Energy Board Act*,  
1998, S.O. 1998, c. 15, (Schedule B);

AND IN THE MATTER OF an application by Horizon  
Utilities Corporation for an order approving  
just and reasonable rates and other charges for  
electricity distribution to be effective May 1,  
2011.

Hearing held at 2300 Yonge Street,  
25<sup>th</sup> Floor, Toronto, Ontario,  
on Friday, April 8th, 2011,  
commencing at 9:12 a.m.

UNDERTAKING NO. J2.7: TO EXPLAIN VARIANCE IN ACCOUNT 5020 FROM 2009 TO 2011.	106

1 Friday, April 8, 2011

2 --- On commencing at 9:12 a.m.

3 MS. HARE: Please be seated.

4 Good morning. This is the second day of our hearing  
5 in the case of Horizon Utilities, requesting new rates for  
6 January 1st, 2011, EB-2010-0131.

7 Are there any preliminary matters?

8 **PRELIMINARY MATTERS:**

9 MR. SIDLOFSKY: Good morning, Madam Chair. I have  
10 two.

11 The first one, we provided hard copies of Exhibit  
12 K1.3, which was an updated version of Horizon's revenue  
13 requirement work form.

14 Unfortunately, in the hard copies - not in the  
15 electronic versions that were sent to parties, but in the  
16 hard copies - one page was missing. That was page 5. I  
17 understand that my friend Ms. Helt has provided copies to  
18 the Panel, but I just wanted to mention that we have also  
19 provided copies to the parties.

20 MS. HARE: Thank you.

21 MR. SIDLOFSKY: The second preliminary item has to do  
22 with one of the undertakings. Ms. Lerette yesterday  
23 responded, in part, to undertaking J1.6, and that had to do  
24 with whether any of the capital expenditures for vehicles  
25 in 2011 were related to hybrid vehicles.

26 Ms. Lerette's response was that there are three  
27 vehicles planned for 2011 with hybrid technology.

28 Ms. Taylor, you asked -- you added a question about

1 that with respect to the premium on those vehicles, and Ms.  
2 Lerette has an answer on that for you.

3 MS. LERETTE: So three of the hybrid vehicles, which  
4 are the small passenger vehicles, are scheduled for 2011.

5 The premium for the hybrid vehicles ranges from \$5,000  
6 to \$7,000, and we expect that this premium will be offset  
7 by fuel savings in the future.

8 We are also moving to hybrid vehicles really just to  
9 reduce emissions, because it is important for Horizon from  
10 a sustainability perspective.

11 I can also respond to the other undertaking on fleet,  
12 J1.5.

13 MS. HARE: Can I just clarify? Five to 7,000 per  
14 vehicle?

15 MS. LERETTE: Yes, correct.

16 MS. HARE: Thank you.

17 MR. SIDLOFSKY: Sorry, Madam Chair, if Ms. Lerette  
18 could go on and deal with J1.5, that would be great.

19 MS. HARE: Yes, that's fine.

20 MS. LERETTE: J1.5, you requested the budget for the  
21 rebuilds and refurbishments for 2011, and the budget is  
22 \$130,000.

23 MR. SIDLOFSKY: Thank you, Ms. Lerette. Madam Chair,  
24 those are my preliminary items.

25 MS. HARE: Thank you. Are there any other preliminary  
26 matters, Ms. Helt?

27 MS. HELT: I do not believe so.

28 MS. HARE: Then we are ready to proceed with panel 2.

1 I believe there is one witness to be sworn in. Maybe  
2 before we do that, if I could just get a sense of the  
3 order.

4 Will there be confidential information being discussed  
5 so we have to go in camera? Who will have in camera cross-  
6 examination?

7 MR. WARREN: I have a very little, Madam Chair,  
8 perhaps five minutes or thereabouts.

9 MS. HARE: And do you have cross that will not be in  
10 camera?

11 MR. WARREN: I do, and it will be somewhat longer,  
12 although not a great deal longer.

13 MS. HARE: Thank you. And Mr. Shepherd?

14 MR. SHEPHERD: I have both, and it is about equal, 50-  
15 50.

16 MS. HARE: Okay, fine. Nobody else?

17 Okay, so we will proceed with the cross that can be on  
18 the public record, and I don't know if parties have  
19 discussed -- well, no, sorry. I am jumping ahead. Let's  
20 swear in the witness first.

21 MR. SIDLOFSKY: Thank you.

22 **HORIZON UTILITIES - PANEL 2**

23 **John G. Basilio, Previously Sworn**

24 **Indy J. Butany-DeSouza, Previously Sworn**

25 **Kathy Lurette, Previously Sworn**

26 **Sarah Hughes, Previously Sworn**

27 **Eileen Campbell, Previously Sworn**

28 **Lise Galli, Sworn**

1 MS. HARE: Mr. Sidlofsky, do you have...

2 MR. SIDLOFSKY: Madam Chair, really just  
3 introductions.

4 MS. HARE: Thank you.

5 **EXAMINATION-IN-CHIEF BY MR. SIDLOFSKY:**

6 MR. SIDLOFSKY: Some of the faces will look familiar  
7 to you, so I won't really take any time on that, but I will  
8 just note that this panel consists of Mr. Basilio, Ms.  
9 Butany-DeSouza, Ms. Lerette, Ms. Hughes, Ms. Campbell, and  
10 the new member of the panel is Lise Galli, G-A-L-L-I.

11 Just a couple of introductory questions for Ms. Galli.

12 Ms. Galli, you're the director of human resources and  
13 organizational development for Horizon Utilities; is that  
14 correct?

15 MS. GALLI: Correct.

16 MR. SIDLOFSKY: And you have been with the utility for  
17 how long?

18 MS. GALLI: Five years.

19 MR. SIDLOFSKY: And you hold a bachelor of commerce  
20 degree and an MBA; is that right?

21 MS. GALLI: That's correct.

22 MR. SIDLOFSKY: Could you briefly tell me your area of  
23 responsibility with respect to the application?

24 MS. GALLI: Human resources.

25 MR. SIDLOFSKY: Generally?

26 MS. GALLI: Generally.

27 MR. SIDLOFSKY: Thank you.

28 And I would also -- although they're well aware of it,

1 but I would simply remind the panel that they're still  
2 under oath.

3 MS. HARE: Thank you.

4 MR. SIDLOFSKY: Thank you, Madam Chair. The panel is  
5 available for cross-examination.

6 MS. HARE: Thank you. So was there an order  
7 established, Ms. Helt?

8 MS. HELT: Yes, Madam Chair. I have spoken with the  
9 parties. Mr. Aiken will proceed first, to be followed by  
10 Mr. Buonaguro, and then perhaps Board Staff could go third,  
11 as we do not have any confidential questions or questions  
12 on confidential material, to be followed by Mr. Warren, and  
13 then Mr. Shepherd, if that is agreeable to all of the  
14 parties?

15 MS. HARE: Thank you. So, Mr. Aiken.

16 **CROSS-EXAMINATION BY MR. AIKEN:**

17 MR. AIKEN: Thank you, Madam Chair. Good morning,  
18 panel.

19 MS. LERETTE: Good morning.

20 MS. HUGHES: Good morning.

21 MR. AIKEN: I have two brief areas of questions on the  
22 OM&A. The first area is related to the management fee, and  
23 some of this will overlap with the revenue forecast,  
24 miscellaneous revenues.

25 So if you could turn to page 42 of the compendium -  
26 this is the Energy Probe compendium, Exhibit K1.4 - you  
27 will find there table 3-28 from your original evidence that  
28 deals with the management fee revenue that has been

1 forecast for the test year, and it is in an amount of  
2 \$772,376.00. It also shows a breakdown from the various  
3 affiliates.

4 So then if you would turn to pages 43 and 46 in the  
5 compendium, this is a response to Energy Probe  
6 Interrogatory No. 14 that deals with the costs associated  
7 with the services. In part (c) of the response, you have  
8 provided calculations of the management fee associated with  
9 each of the affiliates in pages 2 through 4 of that  
10 response.

11 When I compare these figures with those included in  
12 the management fee in miscellaneous revenues, I can match  
13 up most of the figures. As an example, you will see  
14 \$600,490 in table 3-28 from Horizon Utilities' non-  
15 regulated billing services and on the cost side. That is  
16 on page 46 of the compendium in the first box at the top of  
17 the page. So that I understand.

18 There is one exception, however, and that is the  
19 revenues from St. Catharines Hydro Inc. In table 3-28,  
20 that amount is shown as \$71,976, whereas on page 46 of the  
21 compendium, in the bottom box, the cost is shown as  
22 \$84,155.

23 So my question is: Can you explain why the revenue  
24 figure is lower than the cost for this particular  
25 affiliate?

26 MS. HUGHES: Yes. I would just -- I would like to  
27 point out that we actually provided a revised table 3-28  
28 and corrected the figure of 71,976 to be 84,115. That is a

1 response to one of the interrogatories. You can also see  
2 that, I believe, in response to VECC question number --  
3 VECC IR Question No. 26. We provided the full table.

4 MR. AIKEN: Okay, thank you.

5 So subject to check, is the total OM&A expenses, then,  
6 \$784,515?

7 MS. HUGHES: Yes, it is.

8 MR. AIKEN: Okay. Now, my real issue with respect to  
9 the management costs is how they have been recorded. If  
10 you could turn back to the first page of the Energy Probe  
11 IR, which is page 43 of the compendium, in part (b) of  
12 the -- part (b) of a question asked if there was any  
13 depreciation or return on capital included in the  
14 management fee recovery.

15 The response refers to VECC 27. So just for the  
16 record, can you confirm that the VECC response indicates  
17 that there is no recovery of either depreciation or a  
18 return on capital associated with the assets used to  
19 provide the services for which the management fee is  
20 charged?

21 MS. HUGHES: That is correct.

22 MR. AIKEN: And I think somewhere in the  
23 interrogatories, you attempted to quantify it and it was a  
24 relatively small number.

25 MS. HUGHES: Yes, that's correct. We attempted to do  
26 that.

27 MR. AIKEN: Okay. Now, you have indicated -- included  
28 the \$784,000 in costs as OM&A expenses; is that correct?

1 MS. HUGHES: Yes. The costs associated with each of  
2 these departments that makes up the expenditures that are  
3 also provided to the affiliates are incorporated in our  
4 OM&A expenditures, and then we have recorded the offsetting  
5 revenue in other revenue.

6 MR. AIKEN: Yes. By including these costs in OM&A, do  
7 you agree that your rate base has increased through the  
8 working capital allowance calculation?

9 MS. HUGHES: Yes. It would be included in OM&A for  
10 working capital purposes, yes.

11 MR. AIKEN: And do you agree that you have not  
12 recovered the cost of capital associated with this portion  
13 of rate base through the management fee?

14 MS. HUGHES: Yes, we would agree with that.

15 MR. AIKEN: You have indicated that you actually have  
16 included the management fee revenues in account -- I think  
17 it is in account 4390, miscellaneous revenues?

18 MS. HUGHES: Yes, I believe that's correct.

19 MR. AIKEN: And my question is this: Why would you  
20 not include this revenue in account 4375, revenue from non-  
21 utility operations, and then at the same time record the  
22 costs associated with providing these services in account  
23 4380, expenses of non-utility operations?

24 [Witness panel confers]

25 MS. HUGHES: So historically we have recorded our  
26 expenses and the revenue on this basis.

27 We do understand that there are other LDCs -- and that  
28 we could, in fact, use these other accounts.

1           We don't have any issue if that is the way in which we  
2 should be doing it.

3           MR. AIKEN: So you're agreeing that if you included  
4 the costs as an offset to revenues, rather than in OM&A,  
5 the net result of that is that regulated rate base would be  
6 lower?

7           MS. HUGHES: Yes.

8           MR. AIKEN: Yes. Okay.

9           MS. HUGHES: We do understand that, yes.

10          MR. AIKEN: Okay. Thank you. I am now moving on to  
11 my second topic, and that is the topic of the tax  
12 calculations.

13          First of all, I want to thank you for providing the  
14 corrected evidence on Wednesday. I think conservatively,  
15 that has shortened my cross on taxes by at least 20  
16 minutes, so I thank you for that. And I am sure the Board  
17 Members thank you for that, as well.

18          If we could start with the updated evidence filed on  
19 March 14th, so if you could turn to page 35 of the  
20 compendium, there you will find the revised version of  
21 table 4-37, the detailed tax calculations.

22          In the bottom half of that table, you've got the 2011  
23 calculations. And the total income taxes there are shown  
24 to be \$6,062,332.

25          So I want everybody to keep that number in mind.

26          Then if we can move to the final calculation of taxes,  
27 and this is found on the taxes/PILs sheet from the revenue  
28 requirement work form in Exhibit K1.3. This is the one-

1 page addition.

2 On this schedule, we can see that the PILs tax  
3 allowance is now 5,921,337. So that is a reduction of  
4 approximately \$141,000.

5 So that is another number I want you to keep in mind.

6 If now you could turn to page 6 of 7 of the April 6th  
7 revised response to VECC IR 37, which is Exhibit K1.2, and  
8 page 6 of 7 is the revised table that shows the change in  
9 the revenue deficiency.

10 On this page, you will see that item number 4 --  
11 labelled "tax updates" -- shows an increase in taxes of  
12 \$510,726.00, and item number 7 near the bottom shows a  
13 reduction of 526,899 -- or sorry, 829, in taxes for the  
14 inclusion of the apprenticeship credits. That was the  
15 correction that was filed.

16 So from is a net reduction there in taxes of \$16,000,  
17 approximately.

18 So the first is: Can you reconcile the difference  
19 between the 16,000 reduction and the 140,000 reduction in  
20 the previous two schedules we were looking at?

21 MR. BASILIO: I believe I can. You will excuse me if  
22 I can't do it on the fly. Perhaps we could prepare an  
23 undertaking to perform that reconciliation.

24 MR. AIKEN: That would be fine.

25 MS. HELT: Mr. Basilio, the undertaking is  
26 sufficiently clear for you to be able to answer? Or would  
27 you like it restated?

28 MR. BASILIO: If we could just hear it -- can I try

***ASAP Reporting Services Inc.***

***(613) 564-2727***

***(416) 861-8720***

1 and play it back?

2 MR. AIKEN: Sure.

3 MR. BASILIO: I don't have -- excuse me for a second.

4 [Witness panel confers]

5 MR. BASILIO: To reconcile the... No. Sorry, one  
6 more second.

7 [Witness panel confers]

8 MR. BASILIO: To reconcile revised table 4-37 to the  
9 PILs amount, the total PILs for 2011, and revised table 4-  
10 37 to line number 9, "PILs tax allowance," in the revenue  
11 requirement work form, and to reconcile that to the two  
12 items, 4 and 7, on page 6 of 7 to the response to VECC 37?  
13 Was it 37? Yes, 37.

14 MR. AIKEN: That's good.

15 MR. BASILIO: Got it. Thank you.

16 MS. HELT: That will be Undertaking J2.1.

17 **UNDERTAKING NO. J2.1: TO RECONCILE REVISED TABLE 4-37**  
18 **TO TOTAL PILS AMOUNT FOR 2011 AND REVISED TABLE 4-37**  
19 **TO LINE NUMBER 9, "PILS TAX ALLOWANCE," IN THE REVENUE**  
20 **REQUIREMENT WORK FORM, AND RECONCILE THAT TO ITEMS 4**  
21 **AND 7 ON PAGE 6 OF 7 TO THE RESPONSE TO VECC NO. 37.**

22 MR. AIKEN: Now, back on Exhibit K1.3, the 5,921,337,  
23 have you filed a corrected table 4-37 that shows a  
24 calculation of that number somewhere in the evidence?

25 MR. BASILIO: We have not.

26 MR. AIKEN: Would you undertake to file not only table  
27 4-37 that shows the calculation of this final tax amount,  
28 but also any changes in tables 4-38, -39 and -40?

1           These tables relate to the tax adjustments to  
2 accounting income in the CCA. for 2010 and 2011. If there  
3 are any changes to that?

4           MR. BASILIO: Yes, we will.

5           MR. AIKEN: Thank you.

6           MR. BASILIO: We will take that as...

7           MS. HELT: That will be Undertaking J2.2.

8           **UNDERTAKING NO. J2.2: FILE CORRECTED TABLE 4-37**  
9           **SHOWING CALCULATION OF FINAL TAX AMOUNT, AND ANY**  
10          **CHANGES IN TABLES 4-38, 4-39 AND 4-40.**

11          MR. AIKEN: If you could turn to page 37 of the  
12 compendium, this is an Energy Probe interrogatory that  
13 dealt with the small business deduction, which reduces  
14 provincial income taxes by \$36,250.

15          The response to part (b) appears to indicate that  
16 Horizon agrees that this reduction in tax is appropriate;  
17 is that correct?

18          MR. BASILIO: Yes, we did.

19          MR. AIKEN: Has this reduction been reflected in the  
20 revenue requirement work form in Exhibit K1.3?

21          MR. BASILIO: No, it has not.

22          MR. AIKEN: Okay. But do you agree that it should be?

23          MR. BASILIO: I agree that it should be, and perhaps  
24 if I could clarify, then, with respect to those two last  
25 undertakings, we would prepare those reflecting that  
26 adjustment, as well.

27          MR. AIKEN: Yes. Okay. Thank you.

28          Thank you, panel. Those are my questions.

1 MS. HARE: Thank you. Mr. Buonaguro.

2 **CROSS-EXAMINATION BY MR. BUONAGURO:**

3 MR. BUONAGURO: Thank you. I am actually going to try  
4 to use the monitor.

5 MS. HARE: We're not surprised.

6 MR. BUONAGURO: It is my desperate attempt to stay as  
7 paperless as possible. I think you will need to, on the  
8 presentation system, hook into PC number 11.

9 MS. HARE: I think we need technical support here.

10 MR. BUONAGURO: I also have an exhibit, so I can come  
11 and grab the controller from you while I do that.

12 [Mr. Buonaguro passes out exhibit]

13 MS. HELT: Is that it? Everybody have it?

14 [Technical difficulty]

15 MR. BUONAGURO: I usually set this up during the break  
16 so it is much more magical, but...

17 [Laughter]

18 MR. BUONAGURO: Like watching behind the curtain.

19 MS. HELT: Perhaps while you are setting up, Mr.  
20 Buonaguro, we could have the table that you have just  
21 circulated, a hard copy, table 1, employee compensation,  
22 marked as Exhibit K2.1.

23 **EXHIBIT NO. K2.1: TABLE 1, EMPLOYEE COMPENSATION.**

24 MR. BUONAGURO: Thank you. Yes. So this is K1.1.  
25 There are actually two exhibits. I had originally  
26 contemplated them being separate exhibits, and you can see  
27 that I have put little pre-labels on them. I don't know if  
28 you want them separately or not, but the first page is an

1 extract from Toronto Hydro's EB-2010-0142 proceeding, and  
2 the second one is an extract from Hydro Ottawa Limited,  
3 their application in EB-2010-0133.

4 MS. HELT: Why don't we mark them as two exhibits?

5 MR. BUONAGURO: Sure.

6 MS. HELT: So the exhibit from Hydro Ottawa EB-2010-  
7 0133, employee compensation breakdown, will be marked as  
8 Exhibit K2.2.

9 **EXHIBIT NO. K2.2: EXTRACT FROM HYDRO OTTAWA**  
10 **PROCEEDINGS, EB-2010-0133, EMPLOYEE COMPENSATION**  
11 **BREAKDOWN.**

12 MR. BUONAGURO: Thank you.

13 So I think I've got my presentation centre here set  
14 up. Good morning, panel.

15 MR. BASILIO: Good morning.

16 MR. BUONAGURO: I only have a couple of areas to cross  
17 on, and you will see I will -- I am going to pull up the  
18 exhibits that I am referring to here, so we're all looking  
19 at the exact same thing. But if you want to look at your  
20 original records, which I tend to find a lot of the  
21 utilities want to, feel free and I will give you time for  
22 that.

23 I am starting with VECC IR No. 19, part (a). In this  
24 particular IR, we were asking about the business  
25 development costs.

26 And, in particular, we were asking for the allocation  
27 of those costs for each year that the business development  
28 unit existed. And from the response, we can see - and I

1 have highlighted on the screen - that the business  
2 development unit started in 2007.

3 MS. HUGHES: That is correct.

4 MR. BUONAGURO: And the forecast allocation of costs  
5 from that unit to the regulated utility is \$344,000 for the  
6 test year?

7 MS. HUGHES: That's correct.

8 MR. BUONAGURO: Now, the Board disallowed costs of  
9 what was referred to as the mergers and acquisition unit in  
10 2008, and my understanding is that is this business  
11 development unit. And, as a result of the decision, there  
12 were no costs allocated to the utility during 2008 and  
13 2009?

14 MR. BASILIO: That's correct.

15 MR. BUONAGURO: Okay. And then in response -- I think  
16 that is summarized in response to VECC technical conference  
17 number 9(b), which I will pull up for you, where you state:

18 "While the Business Development resource was not  
19 allocated to Horizon Utilities in 2009 and 2010  
20 as a result of the Board's decision in the 2008  
21 EDR Cost-of-service Application ..., the role was  
22 generally designed to add to the strategic  
23 planning and corporate development capacity of  
24 Horizon Utilities. Since the 2008 EDR COS  
25 Application Decision, the organizational  
26 priorities of Horizon Utilities have changed with  
27 the recognition that meaningful merger and  
28 acquisition ... activity is unlikely without an

1 external catalyst such as a change in Board  
2 policy with respect to such or a more direct  
3 inducement by the provincial government. As a  
4 result, the Business Development Group has  
5 focused on the more general strategic planning  
6 and corporate development objectives of Horizon  
7 Utilities."

8 And for the reporter, that was on -- it ended on the  
9 second page. I have lost my control for that.

10 So my understanding is that after the costs of the  
11 unit were disallowed, Horizon refocuses its attention away  
12 from mergers and acquisition activity and towards "more  
13 general strategic planning and corporate development  
14 objectives". Is that a fair summary?

15 MR. BASILIO: Well, maybe I could just elaborate. The  
16 resource -- initially, the purpose of the resource was to  
17 enhance the strategic planning capacity of Horizon  
18 Utilities.

19 At the time we filed the application in 2007, the  
20 principal focus of that resource was on M&A activity. That  
21 was the strategy we were pursuing, and I recall in 2008  
22 there was considerable discussion about the benefits to the  
23 utility of M&A in terms of savings efficiencies, those sort  
24 of things.

25 That's why it is a principal strategy of Horizon  
26 Utilities. There was also discussion of the Board's policy  
27 that -- which we supported, that merger benefits, to the  
28 extent generated, are for the account of the utility for a

1 period up to five years. However, the risks related to the  
2 costs should be borne by the shareholder.

3 So there was discussion around the business  
4 development in that context. Its principal focus at the  
5 time was M&A, and are those costs in the context of the  
6 Board's guidelines -- I can't remember if it was a  
7 guideline or policy. Are they properly borne by the  
8 shareholder or the customer?

9 And the determination at that time was, for that  
10 department, so specifically focussed on that aspect of  
11 Horizon's strategy, should be borne by the shareholder was  
12 the outcome of the decision.

13 Since that time -- but that was not the only focus of  
14 that department.

15 Since that time, and I think as we have seen, M&A  
16 activity hasn't been terribly robust; in fact, quite the  
17 opposite in the sector. That is not for a lack of trying.  
18 As you know, we tried to merge with Guelph a couple of  
19 years ago, and that did not succeed.

20 But this group has been very involved in LDC strategy,  
21 in general, and supporting the executive team in that  
22 capacity. One of the reasons it was brought on is because,  
23 for any -- we were finding as an executive team that  
24 strategy, business strategy, operational strategy, was  
25 requiring more focus, and it was difficult for any one  
26 resource to devote the amount of time necessary to  
27 facilitate that process in the organization.

28 So that's one reason for the resource.

1           Since that time, M&A activity less focussed this  
2 resource as being more supportive of, generally speaking,  
3 strategic and other planning related to the LDC.

4           MR. BUONAGURO: Okay. So the costs of providing that  
5 additional support to the general strategic planning and  
6 corporate development objectives is \$344,000?

7           MR. BASILIO: It is 80 percent of the wages, is what  
8 is being allocated.

9           The resource actually resides, from a payroll  
10 perspective, in Horizon Holdings Inc. It continues to have  
11 responsibility for the non-regulated affiliates of Horizon  
12 Utilities, but as provided in the evidence, and I think as  
13 supported by information we have provided on the prior  
14 years, its focus has largely been on the LDC, and we are  
15 proposing in 2011 that 80 percent of the wages of that  
16 group are properly allocated to the LDC.

17           MR. BUONAGURO: Okay. Now, I think the answer to this  
18 next question, I think, was part of your rather longer  
19 answer to the first question, but I will ask it again, just  
20 to isolate it.

21           Can you describe who and which business unit was  
22 carrying out the planning and development activities before  
23 this business development group started to support that  
24 function?

25           Presumably, it was being done before, and now you have  
26 added the business development group support to that. I  
27 just want to get a clear understanding of how it was being  
28 done before this business unit came into effect, and then

1 presumably we shifted more focus onto this activity.

2 MR. BASILIO: Right. The executive team generally,  
3 with the support of consultants, was -- and depending on  
4 the year, strategic planning, the level can vary from year  
5 to year. But generally speaking, it was the existing  
6 management team had elements of it, and often supported by  
7 consulting resources.

8 MR. BUONAGURO: Okay. Thank you.

9 Now, at VECC IR No. 19(d), we asked about the -- we  
10 asked about the budget versus actual costs for the unit,  
11 and I will make this readable.

12 So for 2008, you see I have highlighted there, for the  
13 2008 budget amount for this unit, it was a total of  
14 \$854,000.

15 Do you see that? Under line number --

16 MR. BASILIO: Yes, I do.

17 MR. BUONAGURO: Thank you. And on the actual, it was  
18 552,000.

19 Do you see that?

20 MR. BASILIO: Yes, I do.

21 MR. BUONAGURO: And then going over the page for 2009,  
22 a similar difference between budget and actual. So 2009  
23 budget was 818,000 total, and the actual was 572,000;  
24 correct?

25 MR. BASILIO: That's correct.

26 MR. BUONAGURO: Now, you had mentioned about the costs  
27 being related to the salaries. Is the salaries for the  
28 three people -- I believe it is -- the total here of 572

1 for 2009 and 552 for 2008? Is that simply what that cost  
2 is?

3 MS. HUGHES: So you can see that on this schedule,  
4 we've separated the salaries and benefits in the first  
5 column, so 411,000 for the actuals. So that would be for  
6 the three people, yes.

7 MR. BUONAGURO: Okay. So then, for example, I've got  
8 2009 on the screen. The difference between salaries and  
9 benefits 2009 and -- actual in 2009 budget would simply be  
10 variations in the projected benefits, presumably? Or in --

11 MS. HUGHES: The difference between the 446 and the  
12 411, you mean --

13 MR. BUONAGURO: Right.

14 MS. HUGHES: -- in terms of salaries and benefits?

15 MR. BUONAGURO: Yes.

16 MS. HUGHES: Yes, I mean, it could be a factor, just  
17 in terms of benefits.

18 MR. BUONAGURO: Okay. Thank you.

19 And just to be clear, when we're talking about the  
20 people that are in the business development department,  
21 Exhibit 1, tab 2, schedule 2, appendix 1-9a -- which I will  
22 pull up -- and this is page 4 of the appendix.

23 It talks about there being a business development  
24 vice-president overseeing a financial advisor and a policy  
25 advisor?

26 MR. BASILIO: Yes. That's in our evidence, of course.

27 MR. BUONAGURO: Okay. Thank you.

28 Now, on a slightly different topic, I am going to ask

1 you about executive salaries and expenses generally.

2 Now, starting with Exhibit 4, tab 2, schedule 1, page  
3 2 -- which I will pull up -- this is table 4-1 of that  
4 exhibit.

5 The table actually starts on page 1 and spills over to  
6 page 2. I am particularly focussed on account 5605, which  
7 sets out the executive salaries and expenses.

8 And from this, I can tell that the 2008 OEB-approved  
9 amount was \$1,784,407. Then the actual 2008 amount was  
10 \$1,377,566.

11 Do you see that?

12 MR. BASILIO: Yes, we can.

13 MR. BUONAGURO: Okay. Now, for 2011 the proposal is  
14 an amount of \$1,926,964, which would be an increase of  
15 approximately 39.9 percent over the actual 2008 amount?

16 Would you agree with that math, subject to check?

17 MR. BASILIO: Yes.

18 MR. BUONAGURO: And my understanding is that this is  
19 largely attributed to the addition of two new VPs,  
20 regulatory and finance, plus merit and inflationary  
21 increases for all other executives?

22 Is that a fair summary?

23 MS. GALLI: That is correct.

24 MR. BUONAGURO: Now, just to see that on the  
25 organizational chart -- which I will pull up -- this is  
26 Exhibit 1, tab 1, schedule 12, well -- this shows two new  
27 VPs, along with the business development VP, being added to  
28 your organizational chart?

1 MS. GALLI: That's correct.

2 MR. BUONAGURO: Okay. Now, I just wanted to look at  
3 the base component of the compensation and the incentive  
4 component of the executive compensation.

5 So I am turning to Exhibit 4, tab 2, schedule 10, page  
6 11, table 4-25, which is compensation in general.

7 And you will see this as being, I think, a standard  
8 filing requirement; right?

9 I will focus on the parts I am actually going to look  
10 at in a second.

11 You will see the copy that I put on the screen is the  
12 redacted copy. I believe the column for the test year was  
13 redacted in several columns, because this was prepared at  
14 the time that a collective agreement was being negotiated?

15 MR. BASILIO: That's correct, and we're still in the  
16 midst of those negotiations.

17 MR. BUONAGURO: All right. I will tell you as a  
18 general rule, the stuff I put on the screen I pull off the  
19 RESS system, so if it is confidential, it is because you  
20 already posted it on the Internet.

21 So I think I am waiting for you to pull up your copy.  
22 Is that what I am waiting for?

23 MS. BUTANY-DESOUZA: We're done.

24 MR. BASILIO: We're good. We have it.

25 MR. BUONAGURO: Okay? Oh, you're good? Sorry, I  
26 thought I was waiting for you. Sorry.

27 Now, if we look under the row "Compensation average  
28 yearly base wages" it shows that for the "Executive" row

1 that between 2009 and 2010, the average base wage went from  
2 \$180,450 in 2009 to \$214,206 in 2010, which is about a  
3 20 percent jump, subject to check, for the math?

4 If we can be a little more specific, it is almost  
5 exactly a \$34,000 jump on average, and I think the  
6 percentage is in the order of 20 percent?

7 [Witness panel confers]

8 MR. BASILIO: Subject to check. Your -- I am sure  
9 your math is correct as to what the percentage increase is  
10 between those two numbers.

11 However, what also needs to be considered is, in the  
12 year, the timing of additions of hires, as well as the  
13 nature of the hires, to make a statement that wages  
14 increased -- total wages may have increased, subject to  
15 some of those changes, by 20 percent.

16 However, we added two executives, generally speaking.  
17 Like, it is no surprise of course, but executives should --  
18 well, I am just going to say they should get paid more  
19 perhaps than other additions.

20 So that would have an increase on the weighting in the  
21 following year.

22 MR. BUONAGURO: Okay. That is the kind of discussion  
23 I think we're going to have in a second, so thank you for  
24 that.

25 MR. BASILIO: Yes.

26 MR. BUONAGURO: I note, though, before I forget that  
27 particular point, I am isolating my review to the executive  
28 category. So the fact that you are adding executives, in

1 particular, shouldn't necessarily have a disproportionate  
2 effect on the average, because you're adding executives.

3 MR. BASILIO: If I could just clarify that point, the  
4 executive category, what that includes is not just the  
5 executive management team. I would like to clarify two  
6 things, actually.

7 Going back to the exhibit where we showed the  
8 organizational chart of the executive management team --

9 MR. BUONAGURO: Sure.

10 MR. BASILIO: Neil Freeman, the vice president of  
11 business development, is an employee of Horizon Holdings  
12 Inc. We should have provided a chart that did not include  
13 him here. He is not part -- he is part by way of an  
14 allocation of his expense, but he's not an employee of  
15 Horizon Utilities Corporation.

16 MR. BUONAGURO: Okay.

17 MR. BASILIO: Going back to the executive chart that  
18 you referred to with the averages, in the executive number  
19 at the top of that chart, number of employees, executive,  
20 the vice president of business development would not be  
21 included in that number, just for clarity.

22 MR. BUONAGURO: Okay.

23 MR. BASILIO: And, lastly, the executive line  
24 includes -- includes those employees that were in the chart  
25 previously referred to, plus the next level of management  
26 in the organization, which is our director level.

27 So it is not just executives. It is directors. And  
28 more commonly in the organization we refer to that as the

1 senior leadership team of the organization.

2 So it is a blend of the CEO, the CFO, vice presidents,  
3 and then the next level of senior management in the  
4 organization, which is our director level.

5 MR. BUONAGURO: Okay. So I think based on your  
6 previous answer you're saying that within that -- within  
7 that span, hiring, you have added two new executives. I  
8 guess I don't know if you call that capital "E" executives  
9 versus small "E" executives, and if they had been  
10 directors, they could have appeared in this line, but they  
11 would be at the average or below the average. Anyway, the  
12 composition would have been a different effect.

13 MR. BASILIO: Correct.

14 MR. BUONAGURO: So thank you for that.

15 MS. HARE: Can I just jump in, because I want to make  
16 sure I understand this? I am not looking at the number of  
17 employees, and I see, for 2009, 17; 2010, 17, same number.  
18 And yet the salary, the average salary, is very different.

19 So I don't understand what you had just said.

20 MR. BASILIO: If I could just have a moment, because  
21 the timing of when those employees actually enter the  
22 organization in the year would have an impact on the  
23 weighting. It is a simple average. So if I could just  
24 confer with my colleagues?

25 MR. BUONAGURO: Before you go down that, this may be  
26 relevant to what you are about to discuss.

27 MS. HARE: Please do.

28 MR. BUONAGURO: Looking at the top of the table, the

1 first column, it says number of employees, FTE, including  
2 part time. My understanding - and it may be wrong - is  
3 that this is an FTE chart, not a head count chart, and it  
4 projects the FTEs per year. Is that incorrect?

5 [Witness panel confers]

6 MR. BUONAGURO: I don't know if it is FTEs being  
7 referred to on the record -- but full-time equivalent.

8 MS. GALLI: At Horizon, we refer to FTEs and head  
9 count interchangeably, so we actually mean FTEs.

10 MR. BUONAGURO: Okay. You have no idea what kind of a  
11 headache that is going to give me, because for the  
12 utilities I will tell you that when they -- they don't use  
13 head count and FTEs interchangeably. They are, in fact,  
14 very distinct things, and we have run into a problem in  
15 other cases where we thought we were looking at FTEs and it  
16 turned out to be head count, and it has the similar effect  
17 that you're talking about.

18 If you are talking about head count, then really you  
19 are talking, I think, about a snapshot of a particular  
20 point in the year versus what the actual year would look  
21 like if everybody had been hired and what their actual  
22 compensation would be.

23 So it is very important, I think, to know what this  
24 table represents.

25 MR. BASILIO: Understood. If you can give us a moment  
26 for your question, as well, Ms. Hare?

27 [Witness panel confers]

28 MS. GALLI: Mr. Buonaguro, we responded to -- I

1 believe we responded to this question in Energy Probe 47,  
2 and I just want to get your definitions correct, because I  
3 was using those two terms interchangeably.

4 In 2009, the figures reported are actuals. So  
5 although the head count in 2009 and 2010 has not changed,  
6 in fact, the 2009 figure or average would be driven down  
7 based on timing of hires.

8 So during that time, although we had 17 employees in  
9 that category, we had some turnover. So there would have  
10 been several months in between of hires, which would drive  
11 that average down.

12 2010 represents the budgeted figure, which assumes  
13 full head count -- well, I won't use that term -- full  
14 employee base for the full duration of the year. So that  
15 would be the difference in that situation.

16 MR. BUONAGURO: Okay. And you will see that I am not  
17 a wizard. I was going to go through this with that  
18 particular interrogatory, so I pulled up Energy Probe  
19 47(a).

20 I was looking, in particular, at part (a), but I think  
21 this is important. I am pulling it up for a different  
22 reason, but I am going to go back to this table, then.

23 So then, for example, what you're telling me is that  
24 when I look at the historical year 2009, that's actual head  
25 count - I think that is what you're telling me - and that  
26 the bridge year 2010 was a forecast. So it would be an  
27 FTE, assuming full employment column. Is that what you're  
28 telling me?

1 MS. GALLI: 2010, yes, would be budgeted, assuming  
2 full employment.

3 MR. BUONAGURO: Okay. So the -- because when I look  
4 at a table like this, I assume all of the columns are done  
5 on the same basis and they're put next to each other so I  
6 can compare them. What you're telling me is I can't do the  
7 kind of meaningful comparison using this table, because if  
8 you were to redo 2009 based on what the FTE was, equivalent  
9 for 2010, I could compare them. But you haven't done that,  
10 is what you're telling me?

11 MS. GALLI: That's correct.

12 MR. BUONAGURO: Okay. Great. Well...

13 MR. BASILIO: Sorry, I just want to clarify. Madam  
14 Chair, did we address your question, as well, in that  
15 response?

16 MS. HARE: Yes. I think Ms. Galli's explanation is --

17 MR. BASILIO: Thank you.

18 MR. BUONAGURO: My understanding of that is that at  
19 some point in 2009, the head count would have been 15, and  
20 it became 17 by the end of the year, so that when you did  
21 it on an actual point in time, it became 17.

22 But you're saying that because that is head count  
23 versus FTE in 2010, when you look at it in this chart, it  
24 looks like there was no hires, but there was. It just  
25 didn't have the same impact on the total compensation in  
26 2009. Am I correct?

27 MS. GALLI: That's correct.

28 MR. BUONAGURO: Thank you. All right. Now, I will go

1 to -- so you're telling me that what appears, on the face  
2 of it, as a discrepancy -- sorry, I wouldn't say a  
3 discrepancy, but a large increase in the average yearly  
4 base wages for executive between 2009 and 2010 is largely  
5 due to the way -- what those two columns represent. In  
6 fact, they represent different ways of viewing those two  
7 years.

8 I will go to Energy Probe 47, where you were asked --  
9 we asked an interrogatory at IR No. 35, VECC IR 35, about  
10 how do you explain the difference between the two columns,  
11 in terms of the average annual base salary.

12 We were referred to Energy Probe 47(a), which is why I  
13 had it prepared. And there were a number of things listed  
14 here, bullet points.

15 The part that we understood very clearly was employees  
16 in this category also received an average merit increase of  
17 3 percent, equivalent to approximately \$120,000.

18 Now, I think I more fully understand bullet point  
19 number 2. You're saying a large chunk of that would have  
20 been this difference in what the two columns represent.

21 Are those really the two drivers for the difference,  
22 are you telling me? Absent that particular difference in  
23 what the two columns represent, the difference would be  
24 about three percent?

25 MS. GALLI: That's correct.

26 MR. BUONAGURO: Okay. Thank you for that.

27 Now, I am turning to the issue of incentive pay, and  
28 for that, we asked about it in VECC Tech Conference

1 Question No. 10.

2 And at part (a) of the response, you put in a table  
3 here, which shows the total incentives paid for 2010. And  
4 what we see there is executives 92,000, management 203,000,  
5 and non-union 88.5 thousand.

6 Do you see that?

7 MS. GALLI: Yes.

8 MR. BUONAGURO: And then for 2011, the budget amounts  
9 are -- and this is over the -- over to page 4 of the  
10 technical conference question answer.

11 We see that for executive, it has gone to \$279,000.,  
12 \$255,000 and \$133.5 thousand?

13 Do you see that?

14 MS. GALLI: Yes, we do.

15 MR. BUONAGURO: Sorry, I have to do it that way, but  
16 that is how I get it on the record.

17 So the difference between the 2010 and 2011 figures,  
18 by our math, is approximately 383 -- sorry.

19 You are going from 383.5 thousand to 667.5 thousand,  
20 which is about a 74 percent increase?

21 Would you take that, subject to check?

22 MS. GALLI: Yes, we do.

23 MR. BUONAGURO: Now, can you -- you have put in the  
24 metrics here in this particular interrogatory response  
25 about how incentive pays are calculated.

26 Can you briefly describe what the drivers are that is  
27 causing that jump in the incentive payments?

28 MR. BASILIO: I would just like to point out that the

1 total incentive paid for 2010 gross is the amount actually  
2 paid.

3 And the total incentive budgeted for 2011 is a budget,  
4 but it also assumes full headcount --

5 MR. BUONAGURO: Okay.

6 MR. BASILIO: -- in the year. So there are, again,  
7 some reconciling factors causing the difference.

8 MR. BUONAGURO: Okay.

9 MR. BASILIO: That explain a component of the  
10 difference.

11 MR. BUONAGURO: So the problem I had in the previous  
12 table was that 2009 were headcount numbers and 2010 was FTE  
13 numbers, and the problem I am going to have here is that  
14 the 2010 number is headcount numbers and the 2011 is a full  
15 FTE number? Is that what you are telling me?

16 MS. GALLI: Yes. That would be correct.

17 In addition to that, I just want to point something  
18 out, as well.

19 In terms of reporting the 2010 executive incentive, we  
20 have made a note in the response to that interrogatory,  
21 that at that time, the executive incentive was not  
22 available to be included in that figure. And therefore the  
23 2010 is much lower than 2011, because it does not reflect  
24 the executive incentive.

25 MS. TAYLOR: Before you go on, perhaps Michael -- Mr.  
26 Buonaguro would get to that question, but if it wasn't in  
27 that number, where was it?

28 MR. BASILIO: At the time, incentives for the

1 executive management team were still being contemplated by  
2 our board of directors, at the time of the -- the response  
3 was prepared, that those final determinations for the  
4 executive management team had not been -- had not been  
5 approved.

6 MR. BUONAGURO: Maybe I can follow up on that.

7 So when I put up the first table, which is the 2010  
8 numbers here, on the page or on the computer screen, you  
9 have executive 92,000. What you're telling me is that is  
10 the -- I can't remember which one labelled it, but that is  
11 either the large-E or the small-E executive, which doesn't  
12 include the actual executives; that includes the other  
13 people in the executive class when you do your compensation  
14 table?

15 MR. BASILIO: That's correct. It would have been the  
16 director-level only, that next layer of small-E executive  
17 management is, I think, the analogy you used.

18 MR. BUONAGURO: Okay. So then it says here that the  
19 payouts are not calculated and approved until late March  
20 2011. Presumably they have been done now?

21 MR. BASILIO: They have been.

22 MR. BUONAGURO: Okay. So we can, then, correct this  
23 table?

24 MR. BASILIO: Yes, we can.

25 MR. BUONAGURO: Okay. Is that something you can do  
26 now, or do you want to do that by way of undertaking?

27 MR. BASILIO: Undertaking, please.

28 MR. BUONAGURO: Okay.

1 MS. HELT: I take it, Mr. Basilio, that is  
2 sufficiently clear for you, what the undertaking is?

3 MR. BASILIO: It is the incentive -- to correct the  
4 table for the incentive payment for executive management,  
5 meaning the vice-presidents, the CFO and the CEO for 2010,  
6 to update the table for those amounts.

7 MS. HELT: That will be Undertaking J2.3.

8 **UNDERTAKING NO. J2.3: TO PROVIDE UPDATE OF TABLE IN**  
9 **RESPONSE TO VECC TECHNICAL CONFERENCE QUESTION**  
10 **NO. 10(A) TO INCLUDE EXECUTIVE PAYOUTS THAT WERE**  
11 **ORIGINALLY EXCLUDED.**

12 MR. BUONAGURO: I think for the sake of the reporter,  
13 I will add that what we're looking at is an update of the  
14 table to VECC Tech Conference No. 10, part (a), to include  
15 the executive payouts that were originally excluded.

16 That is for the reporter; that will help them describe  
17 the undertaking.

18 Thank you for that.

19 Now, so you can see I am getting caught up in some --  
20 trying to compare year over year, and having found that  
21 these years are now not compared on the same basis, which  
22 means I can't actually compare them. It is not the first  
23 time that has happened to me, so you don't have to feel too  
24 special about it.

25 Going back to the "employee cost, total company"  
26 table, which is appendix 2k to Exhibit 4, tab 2, schedule  
27 10, this caught us, in terms of the executive salaries in  
28 particular -- but presumably that is the same for all of

1 the entire column. The entire column is based on  
2 headcount, not FTEs?

3 MS. GALLI: That is correct.

4 MR. BUONAGURO: Okay. Are you able to redo the 2009  
5 column as an FTE amount so I can compare them?

6 And conversely, can you redo the 2010 as a headcount  
7 so I can correct 2009?

8 [Witness panel confers]

9 MR. BASILIO: I am hearing from my team that to redo  
10 the entire table is a great deal of work, given the  
11 magnitude of ins and outs, meaning determining the time at  
12 which employees have come on or exited the organization.

13 If there were one or two categories in particular you  
14 preferred to focus in on, that might be easier. Otherwise,  
15 it would be -- it is a great deal of time, in terms of  
16 extracting the information from our systems and reconciling  
17 it between payroll and accounting records and the exhibits.

18 It would be a great deal of time.

19 MR. BUONAGURO: Okay. Let me -- we will just discuss  
20 it for a second, so I understand the magnitude of it.

21 In terms of redoing 2009 so that it matches 2010,  
22 presumably what we're looking at is what was budgeted for  
23 2009 as a whole, like, what you wanted for 2009. And then  
24 what actually happened in that year is what you put down,  
25 but you are really just going back to what was budgeted, I  
26 think?

27 MS. HUGHES: Yes. We could do the 2009 budget on this  
28 basis.

1 MR. BUONAGURO: All right. Then what I am asking  
2 for - I think this is where you're talking about - 2010 it  
3 is more difficult, because you are then actually going into  
4 what actually happened in 2010?

5 MS. HUGHES: So we could leave the 2010 on a budgeted  
6 basis, as well, with the --

7 MR. BUONAGURO: I got 2010.

8 MS. HUGHES: Yes.

9 MR. BUONAGURO: You're telling me 2009 on the same --

10 MS. HUGHES: On the same basis as 2010.

11 MR. BUONAGURO: I am now asking the second question,  
12 which is also of interest, is: What actually happened in  
13 2010 versus 2009, because then you are asking for an  
14 escalation from what actually happened in 2010 to 2011 as  
15 part of the application?

16 I am not asking for 2011, because it hasn't happened  
17 yet.

18 MS. HUGHES: So just to clarify, then, consistent with  
19 how we've done the 2009, you are asking could we do 2010 on  
20 the same basis?

21 MR. BUONAGURO: Right.

22 MS. HUGHES: That is one comparison which is sort of  
23 actuals.

24 MR. BUONAGURO: Right.

25 MS. HUGHES: Then the other would be the 2009 budget,  
26 in which case then you could compare to the 2010 budget?

27 MR. BUONAGURO: As it exists on this page already.

28 MS. HUGHES: As it exists, yes.

1 MR. BUONAGURO: Those are two things.

2 MS. HUGHES: I believe we could do that, yes.

3 MR. BUONAGURO: Thank you very much. That is with  
4 reference to Exhibit 4, tab 2, schedule 10, appendix 2K for  
5 the undertaking.

6 MS. HELT: Mr. Buonaguro, that will be undertaking  
7 J2.4.

8 **UNDERTAKING NO. J2.4: TO RE-PRESENT THE 2009 COLUMN**  
9 **ON AN FTE BASIS AND THE 2010 COLUMN ON AN ACTUAL**  
10 **BASIS, WITH REFERENCE TO EXHIBIT 4, TAB 2, SCHEDULE**  
11 **10, APPENDIX 2K; TO ENSURE THAT THE CALCULATION UNDER**  
12 **AVERAGE YEARLY BASE WAGES IS ONLY BASE WAGES (SEE PAGE**  
13 **141 OF THIS TRANSCRIPT)**

14 MR. BUONAGURO: Thank you. Now, you will have seen  
15 that I produced an exhibit, so we have Exhibits K2.1 and  
16 2.2. And I will briefly explain why I produced these and  
17 what I wanted to discuss about them.

18 So the first one is K2.1, and it is Toronto Hydro's  
19 last filing in EB-2010-0142, and it's the equivalent table  
20 to your appendix 2K, which we have been talking about. I  
21 have also included Hydro Ottawa's EB-2010-0133 exhibit,  
22 again equivalent to your Exhibit -- appendix 2K. If you  
23 look at them briefly, you will see that they have identical  
24 columns, and such, would you agree, subject to check? I  
25 think this is a mandatory filing requirement. That's why  
26 it looks the same. That's all I'm saying.

27 MS. GALLI: Yes, we do.

28 MR. BUONAGURO: Thank you. I can pull it up. This is

1 I guess one of the benefits and one of the curses of being  
2 in all of these applications. I get to see these and see  
3 how different companies compare in terms of their filings.

4 The thing, to tell you the truth, that leapt out at me  
5 and what I wanted to talk to you about was the executive  
6 numbers.

7 And you will see I put up on the screen, for example,  
8 the Toronto Hydro, and if you look at their executive  
9 column -- or, sorry, their executive row in terms of the  
10 head count through 2008 to 2011, we have ten people in 2008  
11 to a high of 12 in 2010, and then down to ten in 2011.

12 And, similarly, for Hydro Ottawa, executive, it is  
13 stable at six people in the executive row throughout the  
14 period that they're reporting on.

15 But when you look at Horizon, we have 15 in --  
16 starting in 2007, and it ranges from 15 to the test year,  
17 18 in 2011.

18 So on the face of it, what I am seeing is that as  
19 compared to Toronto Hydro, which has a total employee count  
20 for the test year of 1,944 with ten executives, it appears  
21 on the face of it that you have almost twice as many  
22 executives, even though there is only about a quarter of  
23 the total staff.

24 Similarly, for Hydro Ottawa, who has six executives  
25 for a total employee count of 592, you have triple the  
26 number of executives, at least on the face of it.

27 So I want to have a discussion of what is it about  
28 Horizon, on the face of it, that requires 18 executives

1 versus ten versus six for utilities which I think both are  
2 larger than Horizon in various ways.

3 If it is not the case that I am reading this  
4 correctly, you can provide an explanation as to why I am  
5 not doing that. That is the discussion I want to have.

6 MS. GALLI: As Mr. Basilio explained, the executive  
7 employee category actually includes our director level  
8 employees, as well.

9 So, in fact, of the 18 executives noted for 2011,  
10 seven are in fact executive employees.

11 MR. BUONAGURO: So are you telling me that in order to  
12 properly compare the three tables, we would have to redo it  
13 so that the first row, where it says "executive" for  
14 Horizon, be reduced to seven?

15 MS. GALLI: Actually, in fact, I am not sure we could  
16 properly compare these tables, because I did a cursory  
17 review of Toronto's table, and it seems that we have  
18 reported differently in the management category, as well.

19 MR. BUONAGURO: How so?

20 MS. GALLI: Our management category includes any  
21 supervisory employee at Horizon.

22 MR. BUONAGURO: Whereas what is the difference for  
23 Toronto Hydro?

24 MS. GALLI: I can't say for certain, but it looks as  
25 if in Toronto's case there might be a difference in the way  
26 they have reported the management and non-union categories.

27 MR. BUONAGURO: Okay. I am actually focussed on the  
28 executive. So that is a problem --

1 MS. GALLI: In the executive, yes, definitely we have  
2 reported differently.

3 MR. BUONAGURO: Okay. So could you, then, break out  
4 in your appendix 2K -- take out the people that you are  
5 telling me shouldn't be there in order that I can properly  
6 compare it to Toronto Hydro, which will flow down?

7 So basically you are adding a subclass here, executive  
8 -- we can call it "real", and then executive -- I didn't  
9 mean it in any pejorative way. I have people laughing  
10 here.

11 But, I mean, executive, large "E" executive versus  
12 small "E" executive, I guess we can put it, and then put  
13 the small "E" executives, I guess you call them directors,  
14 below that, so the first executive column is actually  
15 comparable to Toronto Hydro and to Ottawa, and then that  
16 way I can get a real comparison of what is happening in  
17 those categories. Can I get that?

18 MR. BASILIO: You certainly can. If it is helpful, we  
19 do have some comparative information between Toronto and  
20 Horizon that we can offer now.

21 MR. BUONAGURO: Sure.

22 MR. BASILIO: So Toronto -- and this isn't going to  
23 fully satisfy your answer, but I think it is relevant and  
24 perhaps it will help.

25 Toronto Hydro just published its annual information  
26 form, which is available publicly on SEDAR, and it  
27 disclosed the compensation, salary, bonus and perquisites  
28 for the top five named executive officers, which aggregated

1 for 2010 approximately \$1.9 million. There were five named  
2 executive officers for an average of \$373,785.00.

3 If we look at the entire executive -- big "E"  
4 executive team, so vice president, CFO, CEO for Horizon  
5 Utilities Corporation for 2010, and this would be base,  
6 bonus, and car allowance - that's the perquisite for the  
7 executive team - that aggregates for the entire team  
8 \$1.627 million for an average of \$232,533.00.

9 MR. BUONAGURO: Sorry, was that total compensation?

10 MR. BASILIO: Total compensation. Total compensation,  
11 comparative compensation: Base, bonus and comparable  
12 perquisites, so car, car allowance. Toronto, I don't know  
13 the full extent of their perquisites, but there are car  
14 leasing costs. They're basically disclosed in their annual  
15 information form.

16 MR. BUONAGURO: Just so I understand, I put in the  
17 Toronto Hydro evidence in their last case. This is from K  
18 -- Exhibit K2.1 now in this case. I can actually pull up  
19 the equivalent executive category, and for 2011 they have  
20 ten executives and they've got -- I have all of this  
21 information. I've got -- at least as it was filed in their  
22 case, and it is average annual base salary, average annual  
23 benefits, average annual -- so I have all of that  
24 information on the basis of the entire executive category.

25 What I am missing now, in this case, is the equivalent  
26 measure for Horizon, and I think you are -- I don't think  
27 you have actually undertaken to do it, but it sounded like  
28 you were about to undertake to do that.

1 MR. BASILIO: We will undertake. I guess the point I  
2 am trying to make is they have an executive team. In fact,  
3 if you look on their website, they have eleven executives,  
4 not ten, that seem to all be related to the utility.

5 I am saying for five of their executives, the payroll  
6 related to those five executives - not the full 11, but  
7 just the five - is significantly greater than the  
8 compensation for our entire executive team.

9 MR. BUONAGURO: So you're saying that -- when I look  
10 at the average -- because what I get from the filing is the  
11 average. You're just telling me that this is  
12 disproportionately weighted to four, and that they have,  
13 presumably, another five or six executives, which pull down  
14 the weighting on the average calculation?

15 But that is implicit in what you're telling me, based  
16 on the numbers?

17 MR. BASILIO: I don't have the full average.

18 MR. BUONAGURO: Right.

19 MR. BASILIO: I am not referring to the average for  
20 Toronto. I am saying from a budget perspective, the total  
21 cost of their executive team is far and away greater than  
22 that for the Horizon team, and in fact, for their top five  
23 it is significantly greater than the entire executive team  
24 of Horizon Utilities.

25 MR. BUONAGURO: So can I get the actual undertaking to  
26 break out the executive class into -- we'll just call it  
27 big-E and small-E?

28 MS. HUGHES: Yes, we can do that.

1 MR. BUONAGURO: Maybe you can do it -- under the  
2 small-E, you can put "[directors]"? I think is what you're  
3 referring to them as?

4 MS. HUGHES: Yes. We can do that.

5 MS. HELT: Mr. Buonaguro, just given the amount of  
6 discussion on that particular undertaking, if you wouldn't  
7 mind re-articulating it for the purpose of the record,  
8 please?

9 MR. BUONAGURO: Sure. With respect to Exhibit 4, tab  
10 2, schedule 10, at page 11 of 25, appendix 2K, the  
11 undertaking is to break out the -- within the named  
12 executive category of costs -- what we're calling the big-E  
13 executives, which are what Horizon would call the true  
14 executives, versus what we're calling the small-E  
15 executives, which would -- it has sometimes been referred  
16 to as directors, as a sub-column or sub-row within the  
17 table, so that we get a better picture for comparison  
18 purposes to other utilities who are reporting in that way.

19 MR. BASILIO: Just for clarification, and while I was  
20 conferring with Ms. Galli, we're still not sure that that  
21 will provide a true basis of comparison. We have some  
22 doubt, and we can't verify whether Toronto include bonuses,  
23 for example, in this table.

24 We think that perhaps they didn't. We can't verify  
25 that.

26 MR. BUONAGURO: Sorry, just -- when you say "bonuses"  
27 do you mean incentive pay?

28 MR. BASILIO: Yes, I do.

1 MR. BUONAGURO: I think they have incentive pay on  
2 their table. You can look at their exhibit, and if you  
3 think there are any differences that you want to highlight  
4 in the undertaking response, that's fine.

5 MR. BASILIO: Okay. Thank you.

6 MR. BUONAGURO: I am just trying to get a picture --

7 MR. BASILIO: Of course. I know. And we want to  
8 provide you with that. We want to provide you with that  
9 picture, of course.

10 MR. BUONAGURO: Thank you.

11 MS. HELT: That will be Undertaking J2.5 --

12 MS. HARE: Is that not the same as 2.4?

13 MS. HELT: No. J2.4.

14 MS. HARE: Sorry, was J2.4 not to redo appendix 2K?

15 MR. BUONAGURO: I see your point. We already have an  
16 undertaking to redo 2K. Presumably, you can provide the  
17 two undertakings and do the breakout at the same time.

18 That is a good idea. Thank you.

19 Thank you. Those are my questions.

20 MS. HARE: Thank you. We will take our morning break  
21 now, and come back at 10:45.

22 --- Recess taken at 10:26 a.m.

23 --- On resuming at 10:49 a.m.

24 MS. HARE: Please be seated.

25 Ms. Helt, I believe you are next.

26 **CROSS-EXAMINATION BY MS. HELT:**

27 MS. HELT: Thank you, Madam Chair.

28 Good morning, members of the panel.

1 MS. BUTANY-DESOUZA: Good morning.

2 MS. HELT: I am going to start my questions following  
3 up from where Mr. Buonaguro left off.

4 Yesterday, Board staff filed a compendium of  
5 documents, Exhibit K1.5, and I will be making reference to  
6 those documents in my cross-examination. So if you pull it  
7 out, that will be helpful.

8 The first document I would ask to direct your  
9 attention to is at page 23 of the compendium. It is a  
10 response to Energy Probe Technical Conference Question  
11 No. 10, and you will note it deals with full-time  
12 equivalent employees, similar to what Mr. Buonaguro was  
13 asking about.

14 Do you have that before you?

15 If you look at the total numbers, which is the third  
16 line from the bottom, you will see that the total number of  
17 employees for 2010 budgeted was 401. The 2010 forecast is  
18 384, and 2011 is 428. Do you see those numbers?

19 MS. BUTANY-DESOUZA: Yes.

20 MS. HELT: So that will -- if I am correct, between  
21 2010 forecast and 2011, that is approximately a 10 percent  
22 increase. Would you agree with that?

23 MS. BUTANY-DESOUZA: Yes, subject to check.

24 MS. HELT: And that 10 percent, do you have a number  
25 or an estimate for the December 31st, 2010 FTEs that you  
26 can provide?

27 MS. GALLI: The final count as at December 31st, 2010  
28 was 384.

1 MS. HELT: And these are full-time equivalent  
2 employees?

3 MS. GALLI: Yes, they are.

4 MS. HELT: So with the 10 percent increase, how do you  
5 account for that?

6 MR. BASILIO: It is a combination of positions we had  
7 expected or planned to hire in 2010, plus new additions for  
8 2011.

9 MS. HELT: And can you just break that down for me?  
10 Do you know how many new additions there are for 2011?

11 MS. GALLI: The new additions for 2011 are 27.

12 MS. HELT: Thank you. That is what you had filed in  
13 your evidence?

14 MS. GALLI: Correct.

15 MS. HELT: If you turn now to compendium document 22 -  
16 page 22, what I am interested in with respect to this  
17 document is the bad debt expense.

18 Now, Mr. Buonaguro had this on his screen and was able  
19 to nicely zoom in on the various lines. Unfortunately, I  
20 only have the paper copy. But bad debt expense is about  
21 seven lines from the top. Have you located that?

22 MS. HUGHES: Yes, we have.

23 MS. HELT: And you will see that for 2008 OEB  
24 approved, it is approximately 1,050,000. 2008 actual was a  
25 little below that, 1,027,876; 2009 actual, approximately  
26 1.3 million.

27 For the bridge year, 2010, we have 970,000, and in  
28 2011 test year, 1,350,000.

1 Can you explain what the reason was for the higher bad  
2 debts in 2007 and 2009, and then again here in the test  
3 year?

4 MS. HUGHES: So in terms of our bad debts, in terms of  
5 the trending, we -- in 2007, I believe we had a couple of  
6 smaller commercial customer bad debts that we had to write  
7 off.

8 I think generally the economy, we have seen an  
9 increase in our bad debts, in general, in terms of both our  
10 residential and commercial customer base.

11 One of the things that I would actually like to point  
12 out is in the 2010, the bridge year, we filed of 970 was in  
13 fact our budget for 2010. And I can advise the Board that,  
14 in fact, for the year ended December 31st, 2010, our actual  
15 bad debts were approximately \$1.4 million. So we have been  
16 experiencing a significant increase in our bad debt  
17 expenditures.

18 The 2011 test year, we used a three-year average of  
19 the actuals for 2008, 2009 and our 2010, and then we  
20 forecasted a slight increase on that basis.

21 Given what we've seen as changes coming through with  
22 respect to the -- what is it called -- sorry, the customer  
23 standardization policies and the impact that we believe  
24 that will have with respect to the amount of deposits that  
25 we can take, as well as the introduction of the arrears  
26 management program, we do anticipate that we will see --  
27 you know, we may in fact see an increase in our bad debt  
28 expenditures.

1 MS. HELT: Can you clarify for me why there was such a  
2 difference, then, in the amount budgeted for the bridge  
3 year? You said it was 970,000, but in fact the actual is  
4 \$1.4 million.

5 So that is a difference of about \$430,000. What  
6 accounted for that?

7 MS. HUGHES: So a couple of things. One is we did see  
8 a significant take-up, in terms of 2010, in the number of  
9 customers actually adopting the arrears management program,  
10 and so we did, in fact, see an increase in that.

11 Our policies in terms of how we move towards writing  
12 off these receivables, we didn't have, you know, a  
13 guaranteed expectation of collection. So we did, in fact,  
14 increase our allowance for doubtful accounts at the year  
15 end. So that is a component, as well as just a general  
16 rise.

17 We obviously also have higher bills in 2010 than  
18 anticipated with the introduction of HST, and higher bills  
19 for the summer months, as well.

20 MS. HELT: So do you forecast or see this as a trend  
21 continuing in the future in terms of increasing bad debt  
22 expenses?

23 MR. BASILIO: I believe so. Again, the arrears -- the  
24 arrears management program reduces our ability to secure  
25 against a group of customers that, for economic reasons, it  
26 is difficult for them to pay. Previously we had a means of  
27 securing ourselves against a portion of those losses. We  
28 are losing that ability, as well as the ability to recover

1 interest and other items.

2 So we see credit risk generally -- an uptick of credit  
3 risk due to changes in policy -- credit-related policies.

4 So we do expect an uptick on bad debt expense.

5 MS. HELT: In response to Board Staff IR 22, Horizon  
6 indicated it had not yet prepared its unaudited financial  
7 year end balance. So that is why, at that time, you didn't  
8 have a final total or actual amount for 2010.

9 You now do have the amount, and that is \$1.4 million.  
10 Is that an audited amount?

11 MS. HUGHES: Yes, it is. I can get the exact figure,  
12 if you would like me to. I rounded it to 1.4.

13 MS. HELT: If you could give an undertaking to provide  
14 the exact amount for the audited bad debt expense for the  
15 year 2010?

16 MS. HUGHES: I will.

17 MS. HELT: That will be undertaking J2.7 -- no, 2.6.  
18 I'm sorry.

19 MS. BUTANY-DESOUZA: Sorry, isn't it 2.5?

20 MS. HELT: That's correct. So that will be J2.5. My  
21 mistake. Thank you.

22 **UNDERTAKING NO. J2.5: TO PROVIDE EXACT FIGURE FOR**  
23 **AUDITED BAD DEBT EXPENSE FOR THE YEAR 2010.**

24 MS. HELT: Mr. Basilio, I believe you touched on this  
25 with respect to credit risks, but what efforts or projects  
26 has Horizon undertaken in recent years or is proposing to  
27 take in 2011 to better identify and manage your credit  
28 risks?

1 MS. CAMPBELL: So in the past few years, in fact for a  
2 number of years now, Horizon has been working very closely  
3 with our social agencies, and we have been -- we have  
4 implemented the customer service standardization programs,  
5 as Mr. Basilio had said, the AMP program, and also the  
6 enhancements to the equal payment program are underway as  
7 well.

8 So we are seeing a larger number of our customers  
9 taking advantage of the equal payment plan, to allow them  
10 to make monthly payments against their account.

11 And we are actually reviewing, now, balances on a  
12 quarterly basis versus an annual basis, to see if the  
13 amounts that have been estimated are matching consumption  
14 patterns, so that there isn't a big rollover of dollars  
15 into the next year, which could be an affordability issue  
16 and could contribute into credit risk, as well, if that is  
17 the case.

18 So we have done some significant work around this area  
19 to make that plan run a lot smoother for customers, and  
20 also to minimize credit risk, as well.

21 What Mr. Basilio was talking about with the AMP  
22 program, we have had 1,300 customers plus take advantage of  
23 this program since October.

24 The one thing that is concerning us is we have seen  
25 520 of these customers unfortunately not meet their  
26 obligations for payment. So we have now implemented  
27 programs, as well, for tracking of these, for automated  
28 notices so that we have early detection of these programs

***ASAP Reporting Services Inc.***

***(613) 564-2727***

***(416) 861-8720***

1 not being met. And we're closely monitoring the dollar  
2 values, which is up over \$130,000 in deferred payments  
3 within this program, and we do review this on a quarterly  
4 basis with our credit risk committee, to see where we're  
5 struggling, as well, to mitigate some of this credit risk.

6 MS. HELT: In your view, does the implementation of  
7 the Ontario Clean Energy benefit impact on your bad debt  
8 expense?

9 MS. CAMPBELL: With the 10 percent credit on the bill,  
10 we're just seeing the -- now the first set of bills go out  
11 as far as customers receiving a full credit, because it was  
12 a prorated dollar value.

13 So I think what we've seen with the implementation of  
14 HST and the increased tax and now the 10 percent credit, it  
15 sort of balances itself out.

16 So I don't see it as a concern towards credit risk,  
17 but I also don't see it as a mitigation of credit risk.

18 MS. HELT: So you see it as being neutral?

19 MS. CAMPBELL: Correct.

20 MS. HELT: Then with the implementation of smart  
21 meters and time-of-use pricing, do you see that as having  
22 any impact on Horizon's bad debt expense?

23 MS. CAMPBELL: So over the past year, we've been  
24 monitoring the customers that we have been transferring  
25 over to TOU, and year-to-date now or for the last 12  
26 months, the increase to customers' bills is fairly neutral.  
27 It's been around the -- just under a half a percent in the  
28 total year for the customers that are around 1,000 or so

1 kilowatt-hours.

2 But where I see the time-of-use rates being factored,  
3 a credit risk, are some of our vulnerable and lower-usage  
4 customers.

5 So on average, Horizon's usage is about -- is 660, 660  
6 kilowatt-hours. And those customers are seeing  
7 fluctuations and increases in their energy bill, on the  
8 energy side of their bill, of five to eight and some up to  
9 15 percent, we have seen.

10 So it is definitely a concern, from an affordability  
11 issue, for some of the lower-use end customers.

12 The average customer, it is -- it wouldn't be a  
13 concern for credit risk.

14 MS. HELT: All right. Thank you. Next I just have a  
15 couple of questions with respect to HST. If you turn to  
16 Board staff's compendium, page 99, this is a -- Board staff  
17 Interrogatory No. 57.

18 In its response to this interrogatory, Horizon  
19 instructed its operating units to implement -- or to  
20 reflect the implementation of the HST on July 1st in 2010  
21 in developing the 2011 budget.

22 As a result, Horizon also indicates it has not been  
23 able to quantify the savings reflected in the 2011 budget,  
24 as these were built into the budget deviation, from  
25 probably a bottom-up approach.

26 My question is, as a proxy, can you indicate what the  
27 balance of account 1592, PILs and tax variances, would be  
28 as of December 31st, 2010?

1 MS. HUGHES: I just wanted to clarify. That is the  
2 account where we were required to record the savings from  
3 HST for the year-end purposes?

4 MS. HELT: Yes.

5 MS. HUGHES: Yes. So I can tell you we made an entry  
6 for 200,000 at the end of December 31.

7 MS. HELT: And what about -- okay. That's fine.

8 Has Horizon done any study to estimate what capital  
9 and operating costs would be subject to PST?

10 The point of that is to try and determine what savings  
11 there may be.

12 MS. HUGHES: so we haven't done a specific study, but  
13 in terms of being able to track the expenditures from July  
14 to December, we did itemize those items, whereby we would  
15 have savings on the capital side.

16 You know, we did identify computer hardware, for  
17 example, where they would have been subject to PST in the  
18 past and now subject to HST, in which case we would get the  
19 full input tax credit

20 So we did, in fact, go through some of those line  
21 items to identify, but we didn't do a study, per se.

22 MS. HELT: And was there any reason for not doing a  
23 study?

24 [Witness panel confers]

25 MS. HUGHES: I guess we did it on a transactional  
26 basis so that we can ensure that we were following the  
27 proper tracking mechanism.

28 In terms of the study, you know, in terms of direction

1 as sort of we're building the bottom-up budget for 2011, we  
2 -- I guess we didn't specifically identify those items,  
3 where they might have changed.

4 MS. HELT: Thank you.

5 Next I would like to move on to some questions with  
6 respect to your Green Energy plan. I will be referring to  
7 the compendium, page 27. This is Question 31, a Board  
8 Staff interrogatory with respect to Horizon's basic Green  
9 Energy Act plan.

10 I would just like to confirm. Horizon did file a  
11 basic Green Energy Act plan; is that correct?

12 MS. LERETTE: Yes, that's correct.

13 MS. HELT: And in that plan, Horizon included in its  
14 operating expenditures in 2011 an amount of 530,000; is  
15 that correct?

16 MS. LERETTE: That's correct.

17 MS. HELT: Just for the purposes of clarification, is  
18 Horizon seeking a finding of prudence with respect to the  
19 2011-2013 Green Energy plan costs?

20 MS. LERETTE: Yes, we are.

21 MS. HELT: Is Horizon seeking a finding of prudence of  
22 expenditures with respect to any subsequent years of the  
23 plan at this time?

24 MS. LERETTE: I believe in one of the IR responses, we  
25 noted that we were looking for a prudency review for all  
26 five years in the GEA plan.

27 MS. HELT: On page 28 of the compendium, in the answer  
28 or the response to Board Staff Interrogatory 31(c), it

1 states, and it is quoted:

2 "Horizon has submitted a basic Green Energy Act  
3 plan that includes capital and seeking operating  
4 expenditures for the period of 2011 through 2015.  
5 Horizon Utilities is seeking approval for 2011  
6 through 2013 expenditures."

7 So is your answer to the previous question with  
8 respect to a finding of prudence, that Horizon is seeking a  
9 finding of prudence for the plan costs for the years 2011  
10 through to 2015?

11 [Witness panel confers]

12 MS. LERETTE: So just to clarify my previous answer,  
13 we are looking for approval of costs and prudence for 2011  
14 through 2013. Costs after 2013 would be re-filed with our  
15 next cost-of-service application.

16 MS. HELT: Thank you. So your next cost-of-service  
17 would be in 2015, so what would happen, then, for the year  
18 2014?

19 [Witness panel confers]

20 MS. BUTANY-DESOUZA: Maybe I will give it a try. We  
21 did file the response to the interrogatory, as you have  
22 noted, and in that response it does say to 2013.

23 Frankly, at this time, as we have just said, we  
24 anticipate that our next cost-of-service will be filed for  
25 2015 rates. Therefore, we would be seeking prudence for up  
26 till and including 2014, so there isn't a year missing, and  
27 that a subsequent GEA plan as necessary, should that be  
28 necessary, would be filed with the next cost-of-service

1 application.

2 MS. HELT: Thank you. That makes sense.

3 MS. BUTANY-DESOUZA: I hope that is clear.

4 MS. HELT: Yes.

5 MS. BUTANY-DESOUZA: Thank you.

6 MS. HELT: I would like to now move on to questions  
7 with respect to Green Energy Act direct benefits, and I  
8 will be referring to the compendium starting at page 32 and  
9 going on to page 41.

10 At page 32 of the compendium is a response to Board  
11 Staff Interrogatory Question 36, which refers to the  
12 "Report of the Board: Framework for Determining the Direct  
13 Benefits Accruing to Customers of a Distributor under  
14 Ontario Regulation 330/09."

15 Do you have that in front of you?

16 MS. LERETTE: Yes, I have the IR response in front of  
17 me.

18 MS. HELT: Thank you. And I am just going to read the  
19 first paragraph of that response, where:

20 "Horizon states at page 32 of its GEA plan that,  
21 'The tables [outlining costs] indicate a zero  
22 provincial recovery because at this point in time  
23 the calculation for direct benefits for Horizon  
24 is not defined.' Staff concludes from the tables  
25 provided that Horizon is requesting that  
26 provincial ratepayers contribute 0% of the cost  
27 of renewable enabling investments, and 0% of the  
28 cost of expansion investments."

1           Then also in the report of the Board on pages 38 and  
2 39 -- and I apologize, 38 is actually, you will note, page  
3 15 of the report and 38 is actually page 16. So I will be  
4 referring to page -- the bottom of page -- compendium page  
5 39. The last sentence reads:

6           "As such, the Board is of the view that the  
7 percentages that are ultimately approved for  
8 Hydro One Distribution in relation to Expansion  
9 and REI investment should provide a reasonable  
10 estimate for other distributors until more  
11 distributors complete detailed benefit  
12 assessments and a rolling weighted average can be  
13 used, particularly given the limited amount of  
14 eligible investments expected in Basic GEA  
15 Plans."

16           Do you see that? I'm sorry, it is a little confusing,  
17 since the compendium pages are in reverse order.

18           MS. LERETTE: Yes. Yes, we have it.

19           MS. HELT: Were you aware of this report of the Board,  
20 or are you aware of it?

21           MS. BUTANY-DESOUZA: Yes, we were aware of the report  
22 of the Board. It did come out prior to our filing the  
23 application.

24           We weren't aware of the -- we weren't aware of the  
25 specific application to our circumstances, but subsequently  
26 - and I note that it is in the compendium, I am sure you  
27 are coming to it - we did do the calculations in response  
28 to an interrogatory.

1 MS. HELT: Correct.

2 MS. BUTANY-DESOUZA: Yes.

3 MS. HELT: So you are, then, aware of the default  
4 direct benefit percentages to be initially used by  
5 distributors are those in the Hydro One decision; namely,  
6 the 17 percent for expansion investments and 6 percent for  
7 REI; is that correct?

8 MS. LERETTE: Yes, we are, and we have used those  
9 percentages on the tables in response to IR 36 to  
10 recalculate those amounts.

11 MS. HELT: So would Horizon then have any objection or  
12 difficulty in implementing and tracking the direct  
13 benefits, if the Board were to set percentages other than  
14 zero for provincial recovery of amounts related to its GEA  
15 plan?

16 MS. LERETTE: No, we would not. Under the current  
17 calculations, the direct benefit -- provincial benefit  
18 numbers are quite small, so we wouldn't have any opposition  
19 to that.

20 In 2011, we have calculated a zero benefit, and in  
21 2012 \$135,000.

22 MS. HELT: All right, thank you.

23 Next, if we can go to page 43 of the compendium, I am  
24 just going to ask a few questions on the report -- or, no,  
25 it is the decision with reasons with respect to Renewable  
26 Generation Connection Rate Protection Compensation Amount  
27 of the Board, EB-2010-0191.

28 This basically sets out the amount that is to be

1 collected by the IESO, and then paid out to Hydro One. Are  
2 you familiar with this decision?

3 MS. BUTANY-DESOUZA: I would offer that we have  
4 limited familiarity.

5 MS. HELT: All right. If we look at page 1, which is  
6 compendium page 45, there is a paragraph that sets out how  
7 to determine the 2010 RGCRP compensation amount.

8 I will just read it into the record:

9 "In accordance with Ontario Regulation 330/09 the  
10 RGCRP amount to be collected by the Independent  
11 Electricity System Operator ('IESO') from all  
12 electricity market participants on the IESO-  
13 controlled grid, as determined in accordance with  
14 the market rules so that the total amount of  
15 RGCRP compensation to be collected is equal to  
16 the total amount of rate protection to be  
17 provided."

18 So this decision basically sets out a mechanism for  
19 recovery of GEA plan costs collected from provincial  
20 ratepayers via payments collected from and paid out by the  
21 IESO to eligible distributors.

22 Are you aware of that general principle?

23 MS. BUTANY-DESOUZA: Yes.

24 MS. HELT: All right. Then can Horizon see that the  
25 provisional amounts -- provincial amounts in respect of its  
26 GEA plan are collected from the IESO at regular intervals  
27 in Hydro One's case?

28 MS. BUTANY-DESOUZA: Sorry, yes.

1 MS. HELT: All right. That's fine, then.

2 We will move on to page 40 of the compendium, which is  
3 page 3 of the report of the Board in EB-2009-0349, and at  
4 the top of the page it just deals with Regulation 330/09.

5 Do you have that?

6 MS. BUTANY-DESOUZA: Yes.

7 MS. HELT: All right. The first bullet deals with  
8 eligible investment costs. It notes that initial eligible  
9 investment costs:

10 "...are not limited to only the initial capital  
11 investment costs, but also includes the *up-front*  
12 OM&A costs necessary for the purpose of 'enabling  
13 the connection of a qualifying generation  
14 facility'. However, given that section 79.1  
15 focuses solely on the initial investment, *ongoing*  
16 OM&A costs that are incurred by the distributor  
17 after the investment has been made will not be  
18 eligible for provincial recovery."

19 Was Horizon aware of the distinction between the  
20 upfront and ongoing OM&A costs when it prepared its GEA  
21 plan?

22 [Witness panel confers]

23 MS. BUTANY-DESOUZA: No, we didn't -- when we prepared  
24 our GEA plan, we didn't include this.

25 MS. HELT: The distinction between upfront and ongoing  
26 costs?

27 MS. BUTANY-DESOUZA: That's correct.

28 MS. HELT: Okay. I am just going to move to another

1 question first, and I may come back to this.

2 If we go to compendium page 62, this is Board Staff  
3 Interrogatory Question 38.

4 In this question, Board Staff asks, for clarification  
5 purposes, whether or not certain labour expenses expected  
6 in 2010 -- '11 and 2012 are a reflection that Horizon  
7 intends to hire the employees or not.

8 My question to you is: In your responses, the  
9 consultative costs appear to be upfront costs. However,  
10 I'm not sure whether the full-time equivalent engineer  
11 appears to be charged with the ongoing activities. It  
12 certainly looks like that to me.

13 Can you just clarify that for me?

14 [Witness panel confers]

15 MS. LERETTE: The headcount in response to Question  
16 38, the Board Staff interrogatory, is for the upfront and  
17 the ongoing work.

18 MS. HELT: All right. So the full-time engineer would  
19 be charged with ongoing activities?

20 MS. LERETTE: Yes.

21 MS. HELT: And then Board staff Interrogatory Question  
22 39, which is at page 63 of the compendium, it is a similar  
23 sort of question with respect to -- Horizon indicates that  
24 the costs of two dedicated full-time equivalents and  
25 consultant support are included for smart grid  
26 investigations.

27 Would you agree with the characterization that these  
28 two dedicated full-time equivalents are doing ongoing work,

1 as opposed to upfront work?

2 MS. LERETTE: Again, these FTEs would do upfront work  
3 and ongoing work.

4 MS. HELT: All right. Thank you.

5 Next, a couple of questions with respect to deferral  
6 accounts and tracking of revenues and costs.

7 If we look at the compendium, page 64, this is an  
8 excerpt from part of the filing requirements on  
9 distribution system plans, EB-2009-0397.

10 And the Board in this, in their filing requirements,  
11 indicates on the first paragraph of page 64 of the  
12 compendium:

13 "The Board will assess the prudence of the  
14 activities and costs to the extent permitted by  
15 the level of detail provided. The GEA plan  
16 should contain sufficient evidence to allow the  
17 Board to conduct this examination."

18 And at page 65, the Board sets out certain capital  
19 OM&A deferral accounts for RGC, renewable generation  
20 connection, or smart grid development.

21 And there is a reference at the bottom of the page to  
22 account 1532, renewable generation connection OM&A deferral  
23 account.

24 My question is: Just generally speaking, how does  
25 Horizon intend to track its revenue and costs incurred with  
26 respect to its GEA plan?

27 [Witness panel confers]

28 MS. HUGHES: So for reporting purposes, we would

1 expect that we would track these expenditures from an OM&A  
2 perspective through operations and maintenance accounts.  
3 But then our practice would be to move them to the deferral  
4 account.

5 So internally, we would track them within the deferral  
6 account.

7 MS. HELT: But there is nothing included in the  
8 evidence where these amounts would be tracked; is that  
9 correct?

10 MS. BUTANY-DESOUZA: Yes.

11 MS. HUGHES: I believe that's correct.

12 MS. HELT: All right. If I could just have a moment,  
13 please.

14 Just one question, one further question, which related  
15 to my initial line of questioning that I failed to ask at  
16 the time with respect to employees.

17 I'm sorry, I don't have a reference in the compendium,  
18 but can Horizon just indicate to me the number of non-  
19 unionized management employees it has? I am not sure if it  
20 was included in the table that was being referred to by Mr.  
21 Buonaguro, or not.

22 If it is, that's fine, but if you can just indicate  
23 that for me?

24 MS. GALLI: Just to clarify, when you say management,  
25 do you mean supervisory?

26 MS. HELT: Yes.

27 MS. GALLI: Okay. So in terms of supervisory  
28 management --

1 MS. HELT: Non-unionized.

2 MS. GALLI: -- non-unionized, would be 59.

3 MS. HELT: Is that somewhere in the evidence?

4 MS. GALLI: Yes. It is included in appendix 2K.

5 MS. HELT: Appendix 2K. Oh, I see, all right.

6 MS. BUTANY-DESOUZA: Exhibit 4, tab 2, schedule 10.

7 MS. HELT: I see it. Okay, thank you very much.

8 Those are my questions.

9 MS. HARE: Thank you. Mr. Warren.

10 Mr. Warren, how long do you expect to be?

11 MR. WARREN: Half an hour, perhaps.

12 MS. HARE: We will have to break at five to 12:00, as  
13 Ms. Spoel has another meeting at noon, but we can pick it  
14 up after lunch, if you are not finished.

15 **CROSS-EXAMINATION BY MR. WARREN:**

16 MR. WARREN: Thank you. Mr. Basilio, I would like to  
17 start, as a prelude to some of my questions, on your  
18 decisions about hiring with a little bit of ground that was  
19 covered yesterday afternoon. I want to make sure, in  
20 fairness to you, that I have understood it correctly.

21 In connection with the decision to merge with St.  
22 Catharines and create Horizon, as I understood the exchange  
23 yesterday, you retained Kinectrics to do an asset  
24 evaluation; is that correct?

25 MR. BASILIO: That's correct.

26 MR. WARREN: And in response to questions that were  
27 asked by my friend, Mr. Shepherd, you said that this was  
28 part of the due diligence in connection with that merger;

1 is that correct?

2 MR. BASILIO: That's correct.

3 MR. WARREN: And in addition to that, you said that  
4 you recognized Kinectrics as experts in that field; is that  
5 correct?

6 MR. BASILIO: That's correct. That was the basis on  
7 which we engaged them.

8 MR. WARREN: And on the basis of that --

9 MS. HARE: Ms. Taylor is wondering whether or not you  
10 are examining on confidential information?

11 MR. WARREN: I don't believe I am. I don't intend to  
12 rely on any numbers, Ms. Taylor.

13 MS. TAYLOR: I was trying to think when this was going  
14 into camera or out of camera yesterday afternoon when this  
15 was discussed. I want to be careful.

16 MS. HARE: I think if you are not using numbers, it's  
17 fine.

18 MR. WARREN: I have no reference to numbers at all in  
19 the course of this exchange.

20 MS. HARE: Are you okay with that, Mr. Sidlofsky?

21 MR. SIDLOFSKY: Sorry. I think I am. We may have to  
22 see how things go as Mr. Warren progresses.

23 MS. HARE: Thank you.

24 MR. SIDLOFSKY: But, sorry, I should note that the  
25 material prepared by Kinectrics has been taken off of the  
26 record, because the Board determined it was irrelevant.  
27 That was -- oh, I'm sorry.

28 MS. HARE: There are two pieces, so it was the --

1 MR. SIDLOFSKY: I'm sorry, that's right. Mr. Warren  
2 is referring to the St. Catharines material.

3 MS. HARE: Right.

4 MR. SIDLOFSKY: I apologize.

5 MR. WARREN: Would I be correct, Mr. Basilio, in  
6 understanding that in retaining Kinectrics to perform the  
7 asset evaluation as part of the due diligence, it was  
8 necessary, in order to satisfy your board, the Hamilton  
9 board, and indeed this regulator, that the decision to  
10 merge was a prudent one? Is that fair for me to conclude  
11 that?

12 MR. BASILIO: Certainly for our board of directors,  
13 and I can't speak on the basis on which the board would  
14 have evaluated, but we would have provided all of the  
15 materials as part of the MADDs application, or they would  
16 have been available. That would have been -- it would have  
17 been something available to the board for its  
18 determination.

19 MR. WARREN: Is it also reasonable for me to conclude  
20 that had Kinectrics concluded that the assets were in poor  
21 condition, that that would have been a factor in a decision  
22 by your board, and perhaps by this Board, in determining  
23 whether (a) the price was correct, and (b) it was a prudent  
24 transaction? Is that not fair?

25 MR. BASILIO: What Kinectrics -- this is my view of  
26 what Kinectrics' contribution was to the determination of  
27 price --

28 MR. WARREN: If you could just answer my question, Mr.

1 Basilio? If you could just answer my question first, and  
2 then you can put whatever gloss you want on it. I want an  
3 answer to my question. I will repeat it if you need it.

4 My question was: If the assets had not been as they  
5 were reported by Kinectrics, then that might have been a  
6 factor in influencing (a) your board, and (a) perhaps this  
7 Board, in determining (a) whether the merger price was  
8 correct, and (b) whether the transaction was prudent? Yes  
9 or no?

10 MR. BASILIO: It might have been correct, but in this  
11 case, as I discussed yesterday, the outcome of that report,  
12 in retrospect, would not have been a determinative factor  
13 of the relative contribution.

14 I think it is important for the Board to know that the  
15 purpose of the report, it's a condition of asset assessment  
16 in the context of determining the appropriate relative  
17 contribution of each utility to the merged entity.

18 Despite the fact that our view is that, looking back,  
19 the outcome of that report is not correct, the relative  
20 state of the distribution utilities at the time supports  
21 the outcome of that transaction, and our board of directors  
22 and our respective shareholders in the transaction would  
23 support that notion.

24 MS. HARE: Mr. Basilio, with respect, I don't think  
25 you answered the question.

26 MR. BASILIO: It might. It might have at the time.

27 MR. WARREN: Now, Mr. Basilio, in response yesterday  
28 to -- first Ms. Lerette, and, Ms. Lerette, you will correct

1 me if I've got -- if I have applied an incorrect gloss to  
2 your testimony. You indicated that the Kinectrics report  
3 had some deficiencies.

4 And then at page 177 of yesterday's transcript, Mr.  
5 Basilio offered, in response to a question from Panel  
6 Member Ms. Taylor, the following. It appears at page 177.  
7 He volunteered, and I quote:

8 "If I might on the first part, I would use a bit  
9 stronger language than Kathy -- Ms. Lerette used  
10 earlier. This report is simply wrong."

11 Do you remember saying that?

12 MR. SIDLOFSKY: I'm sorry, if I could stop my friend  
13 there, I believe that is in the in camera portion of the  
14 transcript. I am concerned that even if no numbers are  
15 being given by my friend, I have some concerns about this  
16 leaking into the public portion of the hearing at this  
17 point.

18 MS. HARE: Mr. Warren?

19 MR. WARREN: I understand that there may be some  
20 structural question about what is in camera and what is  
21 not, but the issue -- I can't imagine there is anything  
22 remotely confidential about this exchange, Madam Chair, but  
23 I am in your hands whether structurally you would prefer  
24 that this exchange be done in the in camera portion of it.

25 MS. HARE: Along the lines of how you are proceeding,  
26 I don't see that it is a problem. It would not be redacted  
27 from the transcripts, in any event. We are not talking  
28 about numbers.

1 MR. SIDLOFSKY: That's fine, Madam Chair, except the -  
2 - that material was provided in confidence, the entire --  
3 that due diligence material as a whole was provided in  
4 confidence in this proceeding.

5 I am concerned that no claim to confidentiality has  
6 been either challenged or waived at this point, and I am  
7 concerned that if Mr. Warren is going to be asking more  
8 questions about the Kinectrics report, then that should be  
9 done in camera.

10 MR. WARREN: I am not asking questions about the  
11 Kinectrics report. I am asking questions about this  
12 witness's attitude to the Kinectrics report, which is a  
13 different matter, and I am actually finished with the  
14 questions about the Kinectrics report itself.

15 I am not sure I asked any, but I am certainly finished  
16 now with the Kinectrics report.

17 MS. HARE: Mr. Shepherd, did you want to add? No.  
18 Okay.

19 MR. WARREN: I should proceed, Madam Chair?

20 MS. HARE: Yes, please.

21 MR. WARREN: Can you tell me, Mr. Basilio, when it is  
22 that you first reached the conclusion that the Kinectrics  
23 report, in connection with the merger, was, to use your  
24 term "simply wrong"? When did you come to that conclusion?

25 MR. BASILIO: Personally I came to that conclusion  
26 through the work that was commenced as part of the Guelph  
27 Hydro transaction, and, again, we performed similar due  
28 diligence. We were performing that, and at the time - I

1 believe Ms. Lerette made this point - we had much better  
2 information.

3 An issue with the original Kinectrics report -- and  
4 again, I don't want to attribute the report being wrong  
5 necessarily to the Kinectrics methodology. There were  
6 information deficiencies underlying that report.

7 The information was much better, was evolving, as part  
8 of the Guelph work. And what we were seeing is that  
9 Horizon was having -- had far greater asset renewal  
10 requirements than was originally contemplated in the  
11 Hamilton-St. Catharines merger.

12 So at the time, personally -- others may have had it  
13 earlier. I'm not directly involved in the development of  
14 asset plans or strategies. I am an accountant. The  
15 engineers are doing this work on a continuous basis.

16 But I would say that was the first point for me, where  
17 it became apparent that our renewal requirements were far  
18 greater than what was originally contemplated.

19 However, the organization may have had an awareness,  
20 prior to --

21 MR. WARREN: Can you remind me, sir, when it is that  
22 Guelph -- consideration of the Guelph merger was? Was it  
23 two years ago?

24 I just don't remember the chronology.

25 MR. BASILIO: The work... 2007, that work was being  
26 performed, I believe -- and subject to check -- I believe  
27 in the fourth quarter of 2007.

28 MR. WARREN: Am I right, then, to conclude that some

1 time in 2007, you became aware that one of the premises  
2 upon which the merger had taken place was simply wrong?

3 Is that a fair conclusion on my part?

4 MR. BASILIO: With respect to the renewal requirements  
5 of the combined service territories of Hamilton and St.  
6 Catharines, yes. That was my -- that was my evolving view  
7 at the time, that that report was not -- the original  
8 Kinectrics report. I just want to make sure we're talking  
9 about the right report.

10 That the 2004 report, the outputs of that report, in  
11 my view, were not holding true to what was projected at the  
12 time that report was prepared some three, three and a half,  
13 four years earlier.

14 MR. WARREN: In the three years since that time, have  
15 you notified your board that one of the premises underlying  
16 the original merger was simply wrong?

17 MR. BASILIO: The board -- what would have been  
18 presented to the board was not something that specific.  
19 What would have been presented to the board, through that  
20 period, would have been: Here are our revised renewal  
21 requirements. And they received a fair bit of detailed  
22 information on that subject.

23 The board would have been aware that this is -- this  
24 is a change in view. That is the information and  
25 discussion with -- that I recall with the board.

26 Again, it is some time ago, but certainly the board  
27 would have been fully aware that our view on renewal is  
28 changing.

1 MR. WARREN: Have you, at any time, in any of the  
2 filings you made with the Board, this Board, since 2007, to  
3 and including this application, have you notified this  
4 Board directly that one of the premises underlying the  
5 merger was, quote, "simply wrong"? Have you done that?

6 MR. BASILIO: No, I did not, because I did not think  
7 it relevant to the contribution analysis that was  
8 performed, and the ultimate outcome of that transaction.

9 MR. WARREN: Now, in this particular application, you  
10 are asking the Board to, among other things, approve  
11 capital expenditures on the premise that your assets are  
12 older than you thought, and in greater need of repair than  
13 you thought; is that correct?

14 MR. BASILIO: That's correct.

15 MR. WARREN: Okay. And when you are offering that  
16 premise to the Board, you still didn't tell them that one  
17 of the premises underlying the merger, that they approved,  
18 was simply wrong? You didn't do that, did you?

19 MR. BASILIO: No, I did not.

20 In fairness, I am unsure of an obligation to do so.

21 We did advise the Board of our growing renewal  
22 requirements. I think the earliest might have been the Z-  
23 factor application?

24 MS. BUTANY-DESOUZA: It was the Z-factor.

25 MR. BASILIO: Z-factor application, 2000 and -- we  
26 filed that application --

27 MS. BUTANY-DESOUZA: It was filed in September of  
28 2009.

1 MR. BASILIO: September 2009.

2 MR. WARREN: And as I understand what you are asking  
3 us -- not us, but the Board to accept now is that there was  
4 a flawed premise underlying the merger that they approved,  
5 but that the Board should place -- sorry, from a recognized  
6 independent expert, but that the Board should believe your  
7 own condition assessment in support of your request for the  
8 capital expenditures; is that what you are asking this  
9 Panel to accept?

10 MR. BASILIO: I am asking this Panel to accept that,  
11 but again, in the context that we have much better and more  
12 detailed information to support that request.

13 There is a lot of information provided in evidence,  
14 and we have had -- we have better systems and processes.

15 Far more work has been done this time around.

16 MR. WARREN: Now, as I understand it, Mr. Basilio,  
17 sticking with -- staying with the premise that the asset  
18 condition requires the expenditures that you are proposing,  
19 let's turn to the number of additional employees that you  
20 are proposing.

21 Now, if you could turn up the Exhibit 4 -- Exhibit 4,  
22 tab 2, schedule A (sic), this is one of a number of  
23 exhibits which deal with the headcount, if I can call it  
24 that.

25 MR. BASILIO: Sorry, Mr. Warren, could you repeat the  
26 exhibit?

27 MR. WARREN: Exhibit 4, tab 2, schedule 8. This is  
28 actually under the heading "OM&A cost per customer and per

1 FTE."

2 But it has some numbers which generally inform this  
3 line of cross-examination.

4 MS. HELT: I note Mr. Buonaguro has been so kind to  
5 put it on the screen for everyone. Thank you, Mr.  
6 Buonaguro.

7 MR. WARREN: I am not sure Mr. Buonaguro is just a  
8 lawyer. He may be a character from Harry Potter, as well.

9 [Laughter]

10 MR. WARREN: Thank you, Mr. Buonaguro.

11 Now, when I look at this chart, I see, first, that the  
12 number of customers that you have from actual 2007 to test  
13 year 2011 is essentially the same; correct?

14 MR. BASILIO: That's correct.

15 MR. WARREN: And what you are proposing to have the  
16 Board accept is that you require an additional 60 employees  
17 to serve the same number of customers; have I got those  
18 numbers right?

19 MR. BASILIO: Correct. An additional 60 since 2008.

20 MR. WARREN: So we have 60 additional employees to  
21 serve the same number of customers.

22 And as I understand it, if -- just take this subject  
23 to check -- in the appendix 2K that was up on the screen  
24 before -- and this is not confidential information -- of  
25 the 60, there are some three in the executive class, 17 in  
26 the management class and 21 in the non-union class.

27 Will you take that, subject to check?

28 MR. BASILIO: Yes.

1 MR. WARREN: Okay. So two-thirds of the people, the  
2 additional 60, may I suggest with respect, have nothing to  
3 do with asset renewal and fixing aging assets?

4 Is that not -- is that an unfair conclusion on my  
5 part?

6 MR. BASILIO: I believe it may be, to some extent.  
7 And I would -- I will offer a comment, and then ask Ms.  
8 Lerette to elaborate.

9 Certainly of those non-union positions, a great number  
10 of them are involved in the planning, design -- planning  
11 and design of the capital programs that we're asking to  
12 undertake.

13 MR. WARREN: Now, as I understand the information  
14 that's been filed in this case, that of the 60 additional  
15 employees, some 13 are in information systems and  
16 technology; have I got that number right?

17 MR. BASILIO: That's correct. Subject to check, but I  
18 believe that is correct.

19 MR. WARREN: And is that -- do you need 13 extra  
20 people to fix aging assets in that category?

21 MR. BASILIO: I need them for the purposes that are  
22 outlined in the evidence, which I am pleased to review.

23 MR. WARREN: Now, I am stuck and I need your help on  
24 this, Mr. Basilio, because it strikes me as, may I say with  
25 respect, counterintuitive that you've got the same number  
26 of customers and you need 60 more employees to serve the  
27 same number of customers.

28 Did you give some consideration, in light of the

1 obvious downward pressure on your revenue, to not hire as  
2 many people, Mr. Basilio?

3 MR. BASILIO: Of course, but I think it is important  
4 to note that in 2008 our actual number reflects a great  
5 number of open positions that we were holding open in the  
6 hope of merging with Guelph.

7 As we prepared -- I think this requires some  
8 elaboration, because it helps explain the variance between  
9 2008 and 20 -- and our request in 2011.

10 I am hoping one of my counterparts can help me with  
11 the number of open positions that we held, but there were a  
12 great many. The Guelph merger business case obviously  
13 provided for some synergies, both -- and one of the -- I  
14 mean, it is no secret. Part of the principal savings in a  
15 merger is the, for lack of a better word, elimination of  
16 redundant positions.

17 And in order -- as we were seeing attrition through  
18 that transaction, we decided not to fill those open  
19 positions, so that those employees in both organizations  
20 would have the greatest chance of filling those positions.  
21 There were a great many of them in 2008, and into 2009, I  
22 believe, the transaction -- that concluded in 2009? And  
23 into 2009.

24 So between 2008 and 2009, we were holding many open  
25 positions that we required, but in contemplation of the  
26 Guelph transaction.

27 Beyond that, we have, again, in my remarks yesterday,  
28 belt tightening. Belt tightening, from my perspective, has

***ASAP Reporting Services Inc.***

***(613) 564-2727***

***(416) 861-8720***

1 been the story of Horizon over the past three years in  
2 relation to its revenue challenges, its inflation  
3 challenges and pressure on capital expenditure.

4 And it is not -- as we've said before, it is not a  
5 position we view as sustainable, and we need to address  
6 these positions, some of which support growth in capital  
7 projects, some of which address other deficiencies or  
8 requirements in the organization.

9 As I also said yesterday, I can tell you that this  
10 budget underwent several iterations, and it started out at  
11 a much higher level. Customers were considered in the  
12 budget that underlies this application.

13 MR. WARREN: Am I to understand it the answer you have  
14 given me is that the ratepayers in Horizon's service  
15 territory will be paying an increase in rates attributable,  
16 in part, to an increase in the number of employees as a  
17 result of a failed merger proposal?

18 MR. BASILIO: No, not at all. Not at all. These were  
19 positions that were required to sustain the existing  
20 Horizon Utilities Corporation, but were held open -- held  
21 open under a great deal of stress to the rest of the  
22 organization, in trying to support those open positions  
23 while doing their own day-to-day jobs.

24 MR. WARREN: I thought your answer to my earlier  
25 question was that you'd held some of the positions open in  
26 the prospect of the efficiencies that would derive from the  
27 Guelph merger. Did I miss that?

28 MR. BASILIO: That's right. Sorry if I have

1 misinterpreted your question.

2       The merger failed. The merger, had it happened, would  
3 have delivered a great deal of synergies. In the absence  
4 of that merger, each utility continues to require what it  
5 had prior to the transaction.

6       MR. WARREN: So I am correct that the addition -- that  
7 the ratepayers are paying a burden, in the form of  
8 additional employees, because of a failed merger. Is that  
9 not fair on my part?

10       MR. BASILIO: No, I don't believe that is a fair  
11 characterization.

12       MR. WARREN: Can we go back to Exhibit 4, tab 2,  
13 schedule 8, which was the OM&A per customer?

14       I asked you some questions about the number of FTEs,  
15 the 60 that are being added. On that same chart, let's  
16 look at the third category, which is OM&A per customer.

17       It has gone from roughly \$160 per customer in 2007 to  
18 \$202 forecast for 2011. Have I got those numbers right?

19       MR. BASILIO: Yes.

20       MR. WARREN: So at the Dick and Jane level of  
21 mathematics at which I am comfortable, it is about \$44 per  
22 customer increase from 2007 to 2011; correct?

23       MR. BASILIO: That's correct.

24       MR. WARREN: And so we have \$44 more per customer and  
25 the same number of customers, static? Have I got those  
26 numbers right?

27       MR. BASILIO: Those two comments are correct.

28       MR. WARREN: Okay. Now, can you tell me, sir, whether

1 or not you think it reasonable for the ratepayers in the  
2 service territory of Horizon to be paying \$44 more per  
3 customer, when there are the same number of customers?

4 MR. BASILIO: I think I have answered that question  
5 previously. Yes, we have considered the impact on our  
6 customer in the context of utility requirements. The  
7 answer is "yes".

8 If the answer was not "yes", we would have not brought  
9 this application forward.

10 MR. WARREN: I have just a couple of detailed  
11 questions for you, panel. First of all --

12 MS. HARE: Mr. Warren, I hate to cut you off, but Ms.  
13 Spoel has to go to another meeting.

14 MR. WARREN: Fine.

15 MS. HARE: So maybe actually you will take advantage  
16 of the break and come back with some more questions.

17 MR. WARREN: Or fewer.

18 MS. HARE: Or fewer. I was hoping you would say that.  
19 We will return at 1:15.

20 --- Luncheon recess taken at 11:55 a.m.

21 --- On resuming at 1:20 p.m.

22 MS. HARE: Before we start, I just wanted to mention  
23 there were a fair number of undertakings given this morning  
24 that may cause parties to want to ask additional questions,  
25 once we see the undertaking response.

26 So to the extent possible, if those could be filed as  
27 soon as possible and preferably no later than Monday  
28 morning, so that then we leave time at the end of the

1 examination of panel 3 to see if there are any follow-up  
2 questions to those undertakings. Thank you.

3 Mr. Warren, sorry that I had to cut you off with just  
4 a few minutes to go. So please proceed.

5 MR. WARREN: Not at all.

6 Panel, I have just a very few questions left.

7 Before the break, we were talking about the increment  
8 of 60 employees since 2008.

9 Can you tell me -- and this may well be in the  
10 evidence, and I apologize if I have missed it -- what is  
11 the net impact on the 2011 deficiency of the employee  
12 additions?

13 [Witness panel confers]

14 MR. BASILIO: In the manager's summary, we report that  
15 the approximate value of the 60 headcount additions since  
16 the -- since 2008 are approximately \$5.5 million in  
17 aggregate, of which \$2.8 million is allocated to OM&A, and  
18 with the remainder allocated to capital.

19 I don't have -- I suppose we could compute the amount,  
20 the impact on the deficiency. It would be 2.8 plus an  
21 amortization of the remaining 2.7, plus, say, cost of  
22 capital, I suppose.

23 So I'm guessing probably in the ballpark of 3.1,  
24 \$3.2 million, if we assume are assets are amortized over,  
25 on average, an 18 -- well, these would be employees  
26 dedicated largely to capital projects, so over 25 years.

27 I am guessing three to 3.2 million, somewhere in  
28 there.

1 MR. WARREN: Thank you, Mr. Basilio. That is  
2 sufficient for my purposes.

3 I have a question on regulatory costs, and in that  
4 connection, panel, it would -- could you turn up a response  
5 to an interrogatory from my client? It is Interrogatory  
6 Response 20, delivered on the 24th of January.

7 I apologize, panel. I do not have an exhibit number  
8 for it, for which I apologize.

9 What it consists of, panel, is a breakdown over the  
10 period of three years of the components of the regulatory  
11 budget.

12 Do you have it, panel?

13 MS. BUTANY-DESOUZA: Yes. Thank you.

14 MR. WARREN: And my questions are directed to  
15 understanding what is in the various categories. Let's  
16 look at the 2008 budget for a moment.

17 The salaries are for the in-house staff at Horizon,  
18 the regulatory staff; is that correct?

19 MS. BUTANY-DESOUZA: Yes, that's correct.

20 MR. WARREN: The legal fees, are those external legal  
21 fees?

22 MS. BUTANY-DESOUZA: Yes.

23 MR. WARREN: And then you've got a category of  
24 "regulatory costs" which appears to be a standalone figure  
25 of, for that year, a million and change.

26 What does the standalone category "regulatory costs"  
27 refer to?

28 [Witness panel confers]

1 MS. BUTANY-DESOUZA: The standalone regulatory costs  
2 that you have just referenced are related to the OEB fees  
3 that we pay on an annual basis, as well as costs related to  
4 the 2008 EDR cost-of-service application.

5 MR. WARREN: And those 2008 EDR costs would be in what  
6 category? Would they be different from legal fees, for  
7 example, or would they include something for legal fees?

8 [Witness panel confers]

9 MS. BUTANY-DESOUZA: Yes, it would have included --  
10 the standalone regulatory costs that you have just  
11 referenced would have included legal costs for the  
12 application.

13 MR. WARREN: So that when we look at the budget for  
14 legal fees in 2008, it would be \$99,900, plus some  
15 component of the regulatory costs; is that correct?

16 MS. BUTANY-DESOUZA: Yes, that is correct.

17 MR. WARREN: And just out of curiosity, why would you  
18 distinguish? Why would you not have all of the legal costs  
19 in one category, identified as such?

20 MS. BUTANY-DESOUZA: Because we have legal costs  
21 related to other items, other than, necessarily, the  
22 matters related to the Board, which are lumped in the  
23 regulatory costs as well as the legal costs related to the  
24 application that was in that year.

25 MR. WARREN: So would the component of the legal fees  
26 in the "regulatory" category -- those would be only related  
27 to the EDR application?

28 MS. BUTANY-DESOUZA: Yes.

1 MR. WARREN: All right. Could I ask you, then, to  
2 turn to 2009, which is the next page?

3 And in 2009, you have a separate category for  
4 something called "contract labour."

5 Can you tell me what that is?

6 MS. BUTANY-DESOUZA: We had engaged -- we had engaged  
7 a consultant in one of the roles that is now occupied by a  
8 full-time person, and that would have been the related  
9 contract labour.

10 MR. WARREN: And what role was that?

11 MS. BUTANY-DESOUZA: The manager of regulatory  
12 compliance. The role is now occupied by Mr. Brooker. And  
13 -- so Mr. Brooker's role is manager, regulatory compliance,  
14 and chief privacy officer.

15 MR. WARREN: The legal fees component of that -- that  
16 would be on the same page -- that is unrelated to any --  
17 you didn't have an EDR application that year, as I  
18 recollect.

19 MS. BUTANY-DESOUZA: No. We had a Z-factor  
20 application, an LRAM application, and a smart meter adder  
21 application.

22 MR. WARREN: And would -- the legal fee component,  
23 would they have covered those, or are they to be found in  
24 the regulatory costs?

25 MS. BUTANY-DESOUZA: No. They're in the legal fees  
26 component.

27 MR. WARREN: Okay. And is there a legal fees  
28 component of regulatory costs?

1 MS. BUTANY-DESOUZA: Subject to check, my recollection  
2 is no.

3 MR. WARREN: Finally, on the 2010 budget, the salary  
4 component has increased materially by roughly \$170,000?

5 MS. BUTANY-DESOUZA: Yes.

6 MR. WARREN: Sorry, and the reason for that is?

7 MS. BUTANY-DESOUZA: If we cast back to 2009 -- which  
8 is when I joined Horizon -- at that time, I -- we had two  
9 rates analysts. One was a contract person and a director  
10 and a manager -- director of regulatory and a manager.

11 And over the course of 2009, we had a director leave  
12 and a manager leave, and so in 2010, we -- well, late 2009,  
13 we gained Mr. Brook, which I have just referenced, and then  
14 also three more rates analysts, and manager of -- gosh,  
15 what is Lynn's title? Manager of rates.

16 MR. WARREN: So we --

17 MS. BUTANY-DESOUZA: One was a replacement to the  
18 manager that we lost, and three analysts joined our  
19 complement.

20 MR. WARREN: So we have three additional salaries.

21 MS. BUTANY-DESOUZA: And this is fully annualized.

22 MR. WARREN: These are three additional salaries that  
23 account for the \$175,000; is that right?

24 MS. BUTANY-DESOUZA: As well as my full salary in  
25 there, as well, because I joined at mid point of -- just  
26 after mid point 2009, and so this -- the variance that you  
27 have noted reflects the difference in my half salary in  
28 2009 versus full salary in 2010.

1 MR. WARREN: Then I see, when we move to 2011 in the  
2 category of salaries and services, it's gone up by 250,000  
3 or thereabouts. Again, am I reading the numbers right?  
4 From 2010 to 2011 salaries go from 683 to 924?

5 MS. BUTANY-DESOUZA: I'm following you, yes.

6 MR. WARREN: And the reason for that material increase  
7 would be what?

8 MS. BUTANY-DESOUZA: Just one second.

9 [Witness panel confers]

10 MS. BUTANY-DESOUZA: It can't be that complicated,  
11 panel. It is your exhibit. You have the numbers in there.  
12 It has to be easier than this. I apologize.

13 MS. BUTANY-DESOUZA: Perhaps I should apologize. I am  
14 not meaning to make it more difficult.

15 In 2011 we're proposing two additional head count for  
16 regulatory, and so the number reflected here is -- are  
17 inclusive of those additions, as well as increases in  
18 salaries, 2010 over 2011, for existing staff.

19 MR. WARREN: Sorry, you are adding yet another two  
20 people to the regulatory affairs department at Horizon, is  
21 that right, in 2011?

22 MS. BUTANY-DESOUZA: Yes, that is correct.

23 MR. WARREN: In what category will they be?

24 MS. BUTANY-DESOUZA: Manager of applications, and a  
25 rates analyst.

26 MR. WARREN: Manager of applications, but you are  
27 going into an IRM period. You don't need anybody to deal  
28 with applications for a while, or are you planning

1 something different, folks?

2 MS. BUTANY-DESOUZA: To be fair, a cost-of-service  
3 application isn't the only application that a regulatory  
4 team manages. And so we anticipate that we do have the  
5 potential for other applications that the Board will --  
6 that we'll bring forward before the Board.

7 MR. WARREN: Mr. Shepherd is taking a careful note of  
8 that.

9 MS. BUTANY-DESOUZA: I imagine that he is.

10 MR. BASILIO: Further on that point, the cost-of-  
11 service application from start to finish is well over a  
12 year.

13 MR. WARREN: But if I've got the numbers right, panel,  
14 if I look from 2009 to 2011, we have costs increasing in  
15 salaries alone in the regulatory department by some  
16 \$400,000, and we have five new people in that department.  
17 Have I just got those numbers correctly?

18 MR. BASILIO: That's correct.

19 MS. BUTANY-DESOUZA: That's about right.

20 MR. WARREN: Five new people, an additional \$400,000  
21 in salaries, and this when you don't have any additional  
22 customers. Have I got that correctly?

23 [Witness panel confers]

24 MS. BUTANY-DESOUZA: Yes, you do have that correct.  
25 However, from 2009 through to the current day, the level of  
26 activity that Horizon's regulatory team has been  
27 participating in and absorbing, as well as supporting  
28 through the other business units in the organization, has

1 been significant and has increased from 2009 to 2011.

2 MR. WARREN: Help me out on this, briefly, panel.

3 Between 2009 and 2011, you had an application to this Board  
4 to - I will use a colloquial term - come in early, and then  
5 you have this application. What else is there, panel, that  
6 I am missing?

7 MS. BUTANY-DESOUZA: In 2009 we had an IRM  
8 application; we had an LRAM/SSM application; we had a smart  
9 meter funding adder application.

10 And at the end of 2009, we had the beginning of the Z-  
11 factor application. Also at the end of 2009 we had the  
12 beginning of the preparation of this application.

13 In 2010, we closed out the Z-factor application. We  
14 had an IRM -- no, we had this application and we had a  
15 smart meter funding adder application.

16 In 2011, we've begun the smart meter funding adder  
17 application. We are continuing to defend this application.  
18 We've put forward a CDM strategy that was the closeout of  
19 2009. We also included in the CDM strategy the potential  
20 for Horizon to bring forward a CDM tier 2 application.

21 We have an upcoming IRM application for the 2011 rate  
22 year. We also have the potential for an LRAM/SSM  
23 application in the 2011 rate year, and out of the smart  
24 meter funding adder decision, the potential to bring  
25 forward the smart meter rate basing application.

26 MR. WARREN: Now, you are proposing, as I understand  
27 it, to amortize the legal and consulting costs, for which  
28 the total is -- have I got the total, 724,000, for this

1 application?

2 MS. BUTANY-DESOUZA: For the application, I believe  
3 that we had included \$960,000.

4 MR. WARREN: And you are proposing to amortize that  
5 over two years, is that correct, or three?

6 MS. BUTANY-DESOUZA: No. We are proposing -- we  
7 answered this in our interrogatory responses. And we're  
8 proposing to amortize it over four years. Most recently,  
9 in the revised evidence, and then the -- I am going to use  
10 the word "revised" more than once, for which I apologize,  
11 but then the revised response to VECC 37(e), which was  
12 filed earlier this week, we indicated that one of the  
13 changes to the response to 37(e) is the amortization of the  
14 regulatory costs.

15 And we noted, in that response, that the amortization  
16 period is four years.

17 MR. WARREN: Thank you. I wonder if I could impose on  
18 Mr. Buonaguro to work his magic and turn up an exhibit that  
19 was up before. It is Exhibit 4, tab 2, schedule 1, page 2.

20 That's it. I have just a couple of questions on this  
21 schedule. If you could look in, under administrative and  
22 general expenses, at the category -- it is 5620, office  
23 supplies and expenses.

24 If I read this correctly, in 2007 there was a total of  
25 375,000 spent, and the proposal for this year is  
26 \$2.6 million. Have I got those numbers right?

27 MS. HUGHES: The numbers are correct, yes.

28 MR. WARREN: I don't mean to be facetious, but it

1 seems like an awful lot of extra pencils.

2 MS. HUGHES: So as we've filed particularly in the  
3 evidence, we did provide an OM&A variance analysis year  
4 over year.

5 And one of the things that I should bring to your  
6 attention is, back in 2008, we undertook a significant ERP  
7 implementation. Part of that implementation resulted in us  
8 remapping some of the categories in terms of where some of  
9 our operating expenditures were directed.

10 And, in particular, with respect to office supplies  
11 and equipment, what I can advise is that, in fact, what is  
12 going in this category currently, and since the latter part  
13 of 2008, is all of our costs with respect to the IT  
14 department.

15 So, in fact, all of those costs are being directed to  
16 this particular category.

17 MR. WARREN: And may I presume they're coming out of  
18 some other category so that it is a wash?

19 MS. HUGHES: So I would say that there is not a -- a  
20 direct wash. We've also provided, in evidence, a number of  
21 drivers that are increasing the information technology  
22 costs. So there have been increases in IT costs.

23 MR. WARREN: Are these just hardware and software  
24 costs, or are they salaries, as well?

25 MS. HUGHES: So these would be salaries of the entire  
26 IT group. It would include licence fees with respect to  
27 one -- certainly our ERP system, as well as any other  
28 licensing and maintenance costs associated with the

1 equipment.

2 MR. WARREN: 5630, two lines further down, outside  
3 services employed, you are proposing to spend roughly  
4 \$3 million in 2011.

5 What does that cover?

6 MS. HUGHES: So part of the costs in 2011 reflect some  
7 of the initiatives that we have identified in the evidence  
8 around enterprise -- sorry, planning and scheduling.

9 The -- sorry, I've just -- I have a list. My  
10 apologies. It is escaping me for the moment.

11 So the anticipated --

12 MS. HARE: Microphone, please.

13 MS. HUGHES: Sorry.

14 For those particular projects would involve outside  
15 consultants. I am just trying to find the list of  
16 initiatives that would be directed there.

17 So planning, the planning and scheduling initiative is  
18 one of those items. The enterprise risk management  
19 framework is another one.

20 [Witness panel confers]

21 MS. HUGHES: Sorry. My apologies. I am just looking  
22 for --

23 MR. WARREN: Please don't. I want to ask the  
24 question.

25 MS. HUGHES: I know.

26 MR. WARREN: Are they all IT-related, generically?

27 MS. HUGHES: For the most part, yes. I would say yes.

28 MR. WARREN: Okay. So --

1 MS. HUGHES: Yes. I would say yes.

2 MR. WARREN: So we have an increment from 2010 of 2011  
3 of roughly a million dollars, by and large IT-related.

4 Can you remind me, panel, have I got the number right  
5 that you are proposing to add, in addition to that, 13 new  
6 people in the IT department?

7 It is my recollection of the note I made of the number  
8 of the people in that category.

9 MR. BASILIO: I believe your comment was in reference  
10 to 2008, additions since 2008.

11 MR. WARREN: Fair point, but you've added --

12 MR. BASILIO: So they're not additions to our relative  
13 -- our complement today, but since 2008.

14 MR. WARREN: Okay. You have added 13 people since  
15 2008, and you are still proposing to spend an additional  
16 \$1 million on outside consulting in the IT field?

17 MR. BASILIO: Sorry, if we could --

18 MR. WARREN: Have I got that right?

19 MS. HUGHES: So perhaps I could review the increase in  
20 the IT department, in terms of the 13 headcount.

21 Since -- so we have added 13 headcount, including the  
22 2011, whereby we are proposing an increase of four in 2011.

23 So in fact, we've added nine since 2008, primarily in  
24 the area of -- we've added -- with the implementation of  
25 our ERP, we did see an incremental headcount of three,  
26 related to the operation of that ERP. It is a significant  
27 investment, and obviously requires ongoing staff to support  
28 that ERP.

1 significant driver, in terms of an initiative that we've  
2 been deferring.

3 And so that is an initiative that, you know, we do  
4 require to spend some money on now.

5 MR. WARREN: Mr. Basilio, how much, if any, of your  
6 time is spent on the solar project?

7 MR. BASILIO: I would say less than 10 percent, less  
8 than five percent of my time on a weekly basis.

9 MR. WARREN: And if I were to add any other non-  
10 regulated entities' activities, what would the total be, of  
11 your week's time?

12 MR. BASILIO: It's not very much at all, really.

13 With respect to solar, we have a separate management  
14 team.

15 The other non-regulated activities are a meter  
16 services business, of which I have no management  
17 involvement, other than reviewing results from time to  
18 time, and a water heater rental business, which we're  
19 proposing to sell this year. It's really a benign  
20 business, about 2,700 heaters, largely an amortizing  
21 portfolio, really.

22 I don't spend much, if any, time, other than reviewing  
23 financial statements and results and offering commentary,  
24 as necessary. But those businesses really operate without  
25 my direct involvement.

26 MR. WARREN: So is it the case, then -- would I be  
27 fair in saying that between five and 10 percent of your  
28 time each week is spent on the non-regulated activities?

1 MR. BASILIO: No, I would say it is really -- it's  
2 tough to estimate. I would say less than five. Sometimes  
3 none.

4 MR. WARREN: May I ask the same question of each of  
5 the panel members in turn, just to give me a rough estimate  
6 of what percentage of their time on a weekly basis is spent  
7 on the non-regulated activities?

8 MS. LERETTE: I don't spend any time.

9 MS. HUGHES: So I would be probably between one and  
10 two percent of my time, based on the financial accounting.

11 MR. WARREN: Thank you.

12 MS. SPOEL: Ms. Hughes, can I -- sorry to interject.

13 But one percent, if you work -- let's say you worked  
14 50 hours a week. One percent is half an hour.

15 You really only spend half -- I mean, when people talk  
16 -- it sounds like -- and I know it is probably a small  
17 amount of time, but one percent is a very -- that means  
18 really you are doing nothing, because half an hour a week  
19 or 20 minutes a week is not something you can even -- you  
20 couldn't even open the documents and find them on your desk  
21 and put them away again afterwards in 20 minutes, I would  
22 think?

23 MR. WARREN: I take it, Ms. Spoel, you have never kept  
24 dockets.

25 [Laughter]

26 MS. SPOEL: I have, and thankfully I don't have to  
27 anymore.

28 [Laughter]

1 MR. BASILIO: I'm sorry, was that --

2 MS. SPOEL: That's why I can ask.

3 MR. BASILIO: Did I say one percent?

4 MS. SPOEL: No, Ms. Hughes said one percent. You said  
5 five percent.

6 But the same comment in a way. I mean, five percent  
7 is not -- is a very -- that is one-twentieth.

8 That is like -- that's literally an hour or two a  
9 week, an hour, two hours a week, which isn't very much.  
10 Which is a very small amount of time to do you know -- I  
11 just wonder whether you are being sort of reasonably  
12 accurate in your estimation of how much time a small thing  
13 might actually take up.

14 Well, I ask the question of Ms. Hughes, actually,  
15 because she said one percent, and I thought that was just  
16 really getting a bit unrealistic.

17 MS. HUGHES: I guess perhaps when I am trying to give  
18 an estimate, I am mindful that this is specifically -- you  
19 asked about, I guess, my time.

20 And so I obviously have a team underneath, who is  
21 doing the majority of the preparation of the financial  
22 statements and the transactional activities.

23 So my time really is spent, on a monthly basis, you  
24 know, a review of the financial statements that have been  
25 prepared, certainly from my experience.

26 MR. WARREN: So there is a group of people under you  
27 who would be spending more time, I take it, than  
28 one percent on the non-regulated businesses?

1 MS. HUGHES: Yes. I mean, yes, it is possible, in  
2 terms of each of the businesses.

3 However, the service level agreements that we have  
4 with our affiliates, from the accounting and finance area,  
5 is they actually, the affiliates, particularly Hamilton  
6 Utilities and HCE, have their own finance staff.

7 We are actually providing the transactional piece. So  
8 where it makes sense to leverage the transactions, we are  
9 actually doing the transactions.

10 So, for example, an accounts payable clerk, we would  
11 have a full-time accounts payable clerk. In terms of the  
12 number of invoices, the percentage of the number of  
13 invoices for the non-regulated as compared to the LDC is  
14 very small. And so that is the basis on which I would make  
15 the --

16 MR. WARREN: And the other panel members?

17 MS. BUTANY-DESOUZA: None of my time is spent on the  
18 non-regulated.

19 MS. CAMPBELL: I would estimate probably around  
20 5 percent of my time is spent on non-regulated activities,  
21 particularly around the water billing for the City of  
22 Hamilton.

23 MS. GALLI: I would suggest the same, less than  
24 5 percent.

25 MR. WARREN: Those are my questions. Thank you very  
26 much.

27 MS. HARE: Thank you. Mr. Shepherd.

28 MR. WARREN: I have a couple of questions in camera.

*ASAP Reporting Services Inc.*

*(613) 564-2727*

*(416) 861-8720*

1 MS. HARE: Yes, I understand.

2 **CROSS-EXAMINATION BY MR. SHEPHERD:**

3 MR. SHEPHERD: Thank you, Madam Chair.

4 I just wanted to do a couple of follow-up things, and  
5 I promised myself I wouldn't ask any questions about  
6 regulatory costs, but Mr. Warren has forced me to change  
7 that.

8 Am I right that -- am I right that in 2008, your total  
9 salary and bonus cost was about \$533,000? And I am looking  
10 now at the same reference that he had before --

11 MS. BUTANY-DESOUZA: I'm not at it yet.

12 MR. SHEPHERD: -- for regulatory. You are proposing  
13 in this application --

14 MR. SIDLOFSKY: Sorry, Madam Chair, if Mr. Shepherd  
15 could just let Mr. Butany find that? She is just looking  
16 for the reference right now.

17 MR. SHEPHERD: Same reference you were looking at  
18 before.

19 MS. BUTANY-DESOUZA: I just don't remember what the  
20 reference was.

21 MR. SHEPHERD: Sorry, it was CCC No. 20.

22 MS. BUTANY-DESOUZA: I'm sorry, go ahead.

23 MR. SHEPHERD: So in 2008, it was 533,000 salary and  
24 bonus. And if I am correct, in 2011 you are proposing  
25 1.8 million; right? Those are comparable numbers; right?  
26 We're comparing apples to apples.

27 MS. BUTANY-DESOUZA: Yes.

28 MR. SHEPHERD: So that is almost doubled. And the

1 reason for that is you have added a full-time vice  
2 president in the department; right?

3 MS. BUTANY-DESOUZA: Yes.

4 MR. SHEPHERD: And you have added four analysts?

5 MS. BUTANY-DESOUZA: Three.

6 MR. SHEPHERD: I thought you said you added three in  
7 2010 and you're adding --

8 MS. BUTANY-DESOUZA: I'm sorry, we added three in  
9 2010.

10 MR. SHEPHERD: Then you are adding another one in  
11 2011?

12 MS. BUTANY-DESOUZA: My proposal in this application  
13 is an addition of one rates analyst, yes.

14 MR. SHEPHERD: So that is four.

15 MS. BUTANY-DESOUZA: We would be at four in total,  
16 yes.

17 MR. SHEPHERD: Four more. You had some already;  
18 right?

19 MS. BUTANY-DESOUZA: Sorry, in 2008?

20 MR. SHEPHERD: Yes.

21 MS. BUTANY-DESOUZA: Yes.

22 MR. SHEPHERD: Okay. Then the other part of this that  
23 I just wanted to make sure I understand is if you look --  
24 go back to 2008, you see legal fees and consulting total  
25 \$289,000 in 2008. Then I go to 2011 and I see legal fees  
26 and consulting is \$774,000.

27 Is that rate case related, or is that something else?

28 [Witness panel confers]

1 MR. SHEPHERD: I am not looking for the little pieces.  
2 I am just sort of -- what are the big drivers of that?

3 MS. BUTANY-DESOUZA: No, I understand. Do you mind  
4 repeating the question, though?

5 MR. SHEPHERD: Sure. 2008 legal fees and consulting,  
6 \$289,000; 99.9 plus 189,000. 2011, same two categories,  
7 460 plus 314; \$774,000.

8 That is about, what, triple or something like that,  
9 almost?

10 MS. BUTANY-DESOUZA: So to be clear, the increase that  
11 you see splits the legal and consulting costs, in  
12 particular, related to the cost-of-service application,  
13 over 2010 and 2011 for budget purposes. So it is included  
14 in both.

15 MR. SHEPHERD: So you had -- so you have legal and  
16 consulting in 2010 of \$631,000, and you have legal and  
17 consulting in 2011 of \$774,000.

18 So I get about 1,410,000 or so in legal and consulting  
19 over those two years. That's the rate case?

20 MS. BUTANY-DESOUZA: The legal and consulting that you  
21 see in 2011, like I said, reflects the cost-of-service  
22 application. That is included for budget purposes in 2010  
23 and 2011. Included in 2011 are related legal and  
24 consulting costs for other applications, many of which I  
25 mentioned in response to Mr. Warren's earlier question.

26 MR. SHEPHERD: Your CDM application?

27 MS. BUTANY-DESOUZA: I mentioned, I think, five other  
28 applications so --

1 MR. SHEPHERD: Five other applications this year?

2 MS. BUTANY-DESOUZA: Pardon me.

3 MR. SHEPHERD: Five other applications this year?

4 MS. BUTANY-DESOUZA: The potential for -- we have at  
5 least before this Board the IRM application, the CDM tier 2  
6 application, an LRAM/SSM application potentially included  
7 in the IRM application, and a smart meter rate basing  
8 application.

9 MR. SHEPHERD: And you are going to use outside  
10 lawyers and consultants for those? I looked back at your  
11 applications. It looks to me like, generally speaking, you  
12 don't use outside counsel or consultants for most of these  
13 small applications. You have a fairly substantial  
14 regulatory staff, and so you do them internally, don't you?

15 MS. BUTANY-DESOUZA: It depends on -- we do have a  
16 strong regulatory team. However, for the purpose of some  
17 applications, particularly the CDM tier 2 application and  
18 an LRAM/SSM application, we have used previously Seeline  
19 for -- Seeline is a group of consultants for those  
20 applications.

21 So by way of example, we do use outside support when  
22 necessary.

23 MR. SHEPHERD: Okay, thank you.

24 Mr. Basilio, you were being asked earlier today about  
25 executive compensation. I think it was Mr. Buonaguro. One  
26 of the things you said is that you just read Toronto's 2010  
27 disclosure for their five named executives, \$1.9 million,  
28 average of \$375,000 each. Do you recall that?

1 MR. BASILIO: Yes, I do.

2 MR. SHEPHERD: All right. So I wonder if you could  
3 undertake to give us similar disclosure for your top five  
4 executives, exactly like that.

5 MR. BASILIO: Certainly.

6 MR. SHEPHERD: Okay, thank you.

7 MS. HELT: So it is similar disclosure. Mr. Shepherd,  
8 can you just reiterate --

9 MR. SHEPHERD: Yes. There is a mandated disclosure  
10 required under the Securities Act for reporting issuers;  
11 right?

12 MR. BASILIO: The annual information form, yes.

13 MR. SHEPHERD: That's right. So I am asking if they  
14 will provide the same thing, exactly that way, for Horizon,  
15 so we will have an apples-to-apples comparison.

16 MS. HELT: Thank you, Mr. Shepherd. That will be  
17 undertaking J2.6.

18 **UNDERTAKING NO. J2.6: TO PROVIDE SALARY DISCLOSURE**  
19 **FOR HORIZON TOP FIVE EXECUTIVES.**

20 MR. SHEPHERD: Thank you.

21 Now, I wonder if you could turn to this -- what I  
22 thought was a very useful exhibit, 4, tab 1, schedule 1.

23 It is actually included at pages 21 and 22 of the  
24 Staff compendium, which is where I am looking from, but I  
25 know Mr. Buonaguro cannot help himself. He will have to  
26 put it up on the screen, and on the screen it will be more  
27 readable.

28 I just have a few questions about this. Do you have

1 that?

2 MR. BASILIO: Sorry, would you please read us the  
3 reference again?

4 MR. SHEPHERD: Sorry. Exhibit 4, tab 2, schedule 1.  
5 This is the OM&A costs by uniform system of accounts.

6 MR. BASILIO: Thank you.

7 MR. SHEPHERD: So I am on page 1, actually, first.

8 So let me understand something. You remapped your  
9 accounts in 2008; right?

10 MS. HUGHES: In September of 2008.

11 MR. SHEPHERD: So does that mean that all of your 2007  
12 and 2008 Board-approved data is simply not comparable to  
13 2011?

14 MS. HUGHES: Generally speaking, it's not all  
15 comparable. Yes, that's a fair statement.

16 MR. SHEPHERD: So we can't look at trends in any  
17 category? This information is not going to allow us to  
18 look at trends in any categories?

19 MS. HUGHES: So what we offered, as part of the OM&A  
20 variance analysis within the application, was where we  
21 could provide a grouping that might assist with a year-  
22 over-year comparison, we did, in fact, try to do that.

23 And I will give an example. One of the areas,  
24 obviously, is with respect to labour, because we did, in  
25 our mapping in previous years, for example, our supervisors  
26 and managers in our sort of outside operations group would  
27 have previously been mapped into the G&A category.

28 And so as part of our mapping, we mapped them into the

1 O or the M, based on the work where they were located.

2 MR. SHEPHERD: Sorry, let me just stop you, because I  
3 was okay for about two-thirds of the way and then you lost  
4 me. They were in where?

5 MS. HUGHES: So they were part -- they would have been  
6 part of G&A in 50...

7 MR. SHEPHERD: 5610?

8 MS. HUGHES: 5610.

9 MR. SHEPHERD: And you moved them to 5005?

10 MS. HUGHES: They could be in 5005, or they could also  
11 be in 5105. And so we -- I am trying to -- if I could  
12 perhaps...

13 MR. SHEPHERD: Well, 5105 went down, so I assume there  
14 is nothing material in 5105. But there is a big jump in  
15 5005, \$3 million.

16 MS. HUGHES: There is. I am trying to find within the  
17 application where we did -- I was using that as an example.  
18 We can come back to that.

19 But generally speaking, we did have a remapping. We  
20 have tried to, throughout the evidence, collect those and  
21 tried to provide a trending analysis and explain the  
22 variances.

23 And the example that I gave Mr. Warren earlier with  
24 respect to IT was one of those items that we did, in fact,  
25 document in our evidence.

26 MR. SHEPHERD: So for example, we will see, if we look  
27 add 2008 Board-approved and 2008 actual, there is some huge  
28 differences between them.

1           Those differences are as a result of reallocations;  
2 generally speaking, those are not a result of spending  
3 differently than you told the Board?

4           MS. HUGHES: Well, what I would offer is there  
5 obviously could be a difference in how we expended the  
6 money between the Board-approved and the actuals. That  
7 would be one component.

8           The other component would be that we would have four  
9 months of 2008 done on a new mapping basis, versus how the  
10 2008 EDR was approved.

11           So I think where we certainly tried in our evidence to  
12 provide year-over-year, we did have to do it at a much  
13 higher level, in looking at our O, like, our operations  
14 category, our distribution categories, our G&A categories  
15 in total.

16           MR. SHEPHERD: All right. That certainly simplifies a  
17 lot of my questions, because I can't ask them.

18           Well, let me ask you this, then. Let me start with  
19 5005, account 5005, the first one on the first page of this  
20 exhibit.

21           Your Board-approved was \$768. So you basically had  
22 one hour a year of supervision in this category, and in  
23 your remapping, you then determined that was too low;  
24 right?

25           MS. HUGHES: That's correct.

26           MR. SHEPHERD: Do I take it that an appropriate base  
27 to look at is 2009, the \$2 million?

28           That is all under the new mapping; right?

1 MS. HUGHES: Yes. I would say yes.

2 MR. SHEPHERD: Okay. So you have then increased  
3 operation and supervision from 2009 to 2011 by, it looks  
4 like, about 60 percent.

5 Why is that?

6 MS. HUGHES: So I do know that we've increased our  
7 headcount in the operators, and I know that that is  
8 accounting for a change, as well as --

9 MR. SHEPHERD: Sorry, let me stop you to make sure I  
10 understand you.

11 MS. HUGHES: Sorry.

12 MR. SHEPHERD: I wasn't asking about the operators; I  
13 was asking about -- this is operations supervision and  
14 engineering, so this is not the actual operators; right?  
15 This is the supervisors?

16 MS. HUGHES: Sorry, yes. But I believe there is one.

17 MS. LERETTE: There is one manager.

18 MS. HUGHES: One manager, one operator manager.

19 I also believe the grid supervisor is in here, as  
20 well.

21 MS. LERETTE: For 2011.

22 MS. HUGHES: For 2011. So I know that that -- I know  
23 that there is at least two headcount there.

24 MR. SHEPHERD: Those two people aren't, together,  
25 making \$1.1 million?

26 MS. HUGHES: No. They're not.

27 MR. SHEPHERD: They wish, maybe, but they're not.

28 MS. HUGHES: I am sort of trying to think back, in

1 terms of that specific category.

2 MR. SHEPHERD: Okay. Well, let me ask you about  
3 another one, then. I have a little bit of a sense of that  
4 one.

5 Let me go down to 5020, which is operation labour,  
6 overhead distribution lines and feeders.

7 So after all of your remapping, your 2009 actual is  
8 \$2 million, but you are proposing to spend only 700,000 in  
9 the test year.

10 Why is that? Is that not as important this year? Or  
11 what -- changed priorities?

12 I am just trying to understand.

13 [Witness panel confers]

14 MS. HUGHES: In terms of -- I guess what I could offer  
15 in terms of the preparation of our budgets and how these  
16 numbers roll up, it very much relates to the activities  
17 that have been planned underneath at the detailed level.

18 So we do do our budgets based on an activity base.  
19 And I believe that the categories will change based on  
20 that.

21 I am not particularly able to answer that particular  
22 category in terms of what is driving it, but...

23 MR. SHEPHERD: All right. Well, who's -- somebody on  
24 this panel is responsible for operations, aren't they? Who  
25 was it?

26 MS. LERETTE: I am.

27 MR. SHEPHERD: So this is -- this is your people;  
28 right?

1 MS. LERETTE: If you could just give me one second. I  
2 just want to look up something.

3 MR. SHEPHERD: Would you like to do this by way of  
4 undertaking? Would that be easier?

5 MS. HUGHES: Yes. Perhaps if I could ask that we  
6 could do that.

7 MS. HELT: Mr. Shepherd, just for the record, could  
8 you articulate your undertaking, please?

9 MR. SHEPHERD: Yes. I would like an explanation of  
10 the variance in account 5020 from 2009 to 2011.

11 MS. HELT: That will be Undertaking J2.7.

12 **UNDERTAKING NO. J2.7: TO EXPLAIN VARIANCE IN ACCOUNT**  
13 **5020 FROM 2009 TO 2011.**

14 MR. SHEPHERD: The next area I would like to ask you a  
15 question about is 5065, which is meter expense.

16 Now, this is not an accounting change; right? This is  
17 because smart meters were not in, and now they're going to  
18 be in; right?

19 MS. HUGHES: So the way in which smart meters are  
20 included in this exhibit would be the operations account.  
21 The operations around smart meters would, in fact, be in  
22 the meter -- "OEB" category.

23 The corresponding contra-account, actually,  
24 interestingly enough falls under G&A. So if you go to  
25 account 5695, the OM&A contra-account, that is the area in  
26 which the smart meter-related expenditures actually come  
27 out of OM&A.

28 So they're in meter expenses, and then contra-out

1 under 5695.

2 MR. SHEPHERD: So the net would be your meter expense  
3 for non-smart meters?

4 MS. HUGHES: That is correct.

5 MR. SHEPHERD: And were there any remapping changes in  
6 this account?

7 MS. HUGHES: My recollection -- sorry, you go ahead.

8 [Witness panel confers]

9 MS. HUGHES: So before the mapping, the meter  
10 supervisors and the meter -- I think it was meter manager,  
11 were previously mapped into G&A, and they are now mapped  
12 into the meter expense.

13 MR. SHEPHERD: Oh, so this is another supervisory cost  
14 that has been moved out of G&A and into operations?

15 MS. HUGHES: That is correct. We felt these were  
16 better placed, better information in terms of the OEB  
17 mappings.

18 MR. SHEPHERD: So your original number is for 2008 --  
19 sorry, for 2008 Board-approved, rather, is a net of  
20 1,831,000. You have now -- you are asking for just over  
21 3 million.

22 So that change from your 2008 Board approved to today  
23 is because you moved supervisors over, because I would have  
24 thought meter expense is something that is relatively the  
25 same every year. In fact, it should be going down because  
26 of smart meters; right?

27 [Witness panel confers]

28 MS. HUGHES: I'm sorry, I may have misspoke. I

1 believe it was all of the meter staff have now been  
2 reallocated to the meter expense line, but I would have to  
3 check that, subject to check, whereas -- yes.

4 MR. SHEPHERD: As of when? As of which year?

5 MS. HUGHES: The end of 2008.

6 MR. SHEPHERD: As of the end of 2008 --

7 MS. HUGHES: Correct.

8 MR. SHEPHERD: -- meter staff are now in this line  
9 5065?

10 MS. HUGHES: Yes.

11 MR. SHEPHERD: Okay, thank you.

12 Then one of the things you have here is miscellaneous  
13 distribution expense. There are several miscellaneous  
14 categories, but this one is of particular interest, because  
15 it increased from 2008 to 2011 by double in actual terms.

16 Is this because of an accounting change, or is this  
17 because you just spent more money in this area? First of  
18 all, what is miscellaneous distribution expense?

19 MS. HUGHES: Sorry, could you give me the OEB number  
20 that you are looking at? My apologies.

21 MR. SHEPHERD: Yes, 5085.

22 [Witness panel confers]

23 MS. HUGHES: I'm sorry, I'm having difficulty in  
24 recollecting what is in that particular category, but I am  
25 happy to provide information on that.

26 MR. SHEPHERD: Okay. Well, let me come back to it,  
27 because there is some more miscellaneous. Maybe we will  
28 deal with them altogether.

1           The next section, the 5100 accounts, are all  
2 maintenance accounts; right?

3           MS. HUGHES: That's correct.

4           MR. SHEPHERD: And what was really striking is, in  
5 2008, you discovered that your system was in much worse  
6 shape than you thought it was, but your maintenance costs  
7 go way down from 2008 to 2009. I don't get that. Why  
8 would you drop your maintenance costs once you discovered  
9 that the system is in worse shape than you thought?

10          MS. HUGHES: If you look at account 5135, one of the  
11 areas you will see that there has been a significant drop  
12 is with respect to the tree trimming, the right-of-way. It  
13 says right-of-way, but that is in fact where our tree  
14 trimming costs are.

15          So in 2008, our approved tree trimming was  
16 \$2.8 million, and in 2009, it is \$1.1 million. And I know  
17 that Ms. Lerette can speak to the drop in the tree  
18 trimming.

19          MR. SHEPHERD: Okay.

20          MS. LERETTE: So, yes, we have seen a drop in the tree  
21 trimming costs since 2008, and it is based on a few things.

22          We've moved to a full three-year trim cycle now, and  
23 now we are on our second way through the three-year cycle.

24          Our procurement process --

25          MR. SHEPHERD: Sorry, let me just stop you for a  
26 second. So because you are on the second cycle -- and it  
27 is a shorter cycle than your previous; right?

28          MS. LERETTE: Well, in 2008, when our costs were

1 \$2.4 million, we were moving from a cycle that was anywhere  
2 from ten years down to three years in the suburbs. We had  
3 an issue in the core City of Hamilton. Where the city was  
4 doing our tree, it trimming was way behind and we were in  
5 catch-up mode.

6 So that 2.4 million was really to look after the  
7 backlog, which did continue a little bit into 2009, but  
8 that 2.4 was getting to a three-year cycle and cleaning up  
9 the backlog of trees that hadn't been trimmed in a  
10 significant amount of time.

11 MR. SHEPHERD: And now when it is in better shape, the  
12 three-year cycle costs you less, because there is basically  
13 less trimming to do?

14 MS. LERETTE: That's right.

15 MR. SHEPHERD: Okay, go on.

16 MS. LERETTE: In addition to the three-year cycle,  
17 which reduces your costs, we also updated our procurement  
18 process and we are adding new approved contractors to the  
19 list, and this increased competition has driven the cost  
20 down a little bit, too.

21 MR. SHEPHERD: Okay, wonderful. Now, what about the  
22 other \$1.1 million in reduction in maintenance costs from  
23 2008 to 2009? What I am looking for is I would have  
24 thought you have an extra \$1.3 million from tree trimming.

25 Given the state of your system, you should have been  
26 spending it on more maintenance, and I don't understand why  
27 not only did you not spend that, but you took out another  
28 1.1 million.

1 MS. LERETTE: So as your assets age, increased  
2 maintenance becomes sometimes not the right thing to do.  
3 The right thing to do when assets reach the end of their  
4 age is replace the assets.

5 So our capital costs are going up. We do have an  
6 increase in maintenance in aged assets that we know are not  
7 going to be replaced imminently.

8 And I think overall, our maintenance costs have gone  
9 up, with the exception of tree trimming, which has gone  
10 down.

11 So we're not reducing maintenance costs. Our costs  
12 have increased in some areas of maintenance, but they are  
13 offset significantly by the reduction in tree trimming  
14 costs.

15 MR. SHEPHERD: Well, what it looks like is, if you  
16 compare 2008 actual to 2011 actual, they're basically the  
17 same except for the tree trimming difference; right?

18 MS. LERETTE: Yes.

19 MR. SHEPHERD: But in 2009, when you were trying to  
20 keep costs down, because otherwise you would make less  
21 money, the place you decided to keep costs down was  
22 maintenance, which seems like the last place you should do  
23 it. Get rid of a vice president if you need to, but don't  
24 get rid of your maintainers.

25 Sorry, you are all vice presidents, I know. Don't  
26 take it personally. I am trying to understand how you set  
27 that priority; that's all.

28 [Witness panel confers]

1 MS. HUGHES: One of the explanations that I would  
2 offer in terms of the maintenance, in discussions with Ms.  
3 Lerette, you know, the programs and the maintenance  
4 programs and the activities that we are doing have not  
5 changed significantly.

6 What I could offer is that, in fact, the costs that go  
7 into these categories are fully burdened costs of our  
8 people. And there are areas that we have deferred, in  
9 terms of training dollars and those sort of discretionary  
10 costs, that we could defer related to those.

11 So it is quite possible that, you know, that is a part  
12 of the costs that we're not seeing specifically in these  
13 accounts.

14 MR. SHEPHERD: Thank you. I just have one other  
15 question on this exhibit, and it is on the next page. It is  
16 page 2 of Exhibit 4, tab 2, schedule 1, same table. This  
17 is account 5340, miscellaneous customer accounts expenses.

18 Can you just tell me what that is? It seems like all  
19 of your customer accounts are in that - expenses are in  
20 that category.

21 MS. HUGHES: Yes, that is our -- the expenses related  
22 to our customer services department.

23 MR. SHEPHERD: So that is interesting, because in all  
24 your operational stuff, you break it out in some detail.  
25 You did a remapping in 2008.

26 Is this just a function of how the USA works?

27 MS. HUGHES: I would say yes, in terms of this is the  
28 category that we felt was -- it was appropriate and

1 consistent, and so that that is where we've included it,  
2 yes.

3 MR. SHEPHERD: Okay. Thank you.

4 Madam Chair, that is all of the questions that I have  
5 on the non-confidential material.

6 MS. HARE: Good. Thank you.

7 Does the Panel have any questions?

8 The Panel has no questions, so anything for redirect,  
9 Mr. Sidlofsky?

10 MR. SIDLOFSKY: No. Thank you, Madam Chair.

11 MS. HARE: Okay. We are going to take a break before  
12 we go into the in-camera session.

13 We will come back at 20 to 3:00.

14 --- Recess taken at 2:20 p.m.

15 --- On resuming at 2:45 p.m.

16 MS. HARE: Please be seated.

17 We are now going to start the in camera session. I  
18 would just like to remind everybody that the only people  
19 that are allowed in the room are those that have signed the  
20 confidentiality declaration.

21 MS. HELT: Madam Chair, just to interrupt, Mr.  
22 Sidlofsky indicated that a member of the witness panel is  
23 able to answer one of the undertakings given earlier.

24 MS. HARE: Very good. Thank you.

25 MR. SIDLOFSKY: Thank you. Actually, sorry, it is not  
26 an undertaking, Madam Chair. It was a question that Mr.  
27 Warren had asked of Ms. Hughes, and I understand that --  
28 well, at the time, Ms. Hughes wasn't able to provide an

1 answer, but there was no undertaking given. But she does  
2 have an answer to the question now.

3 MS. HARE: Thank you, yes.

4 MS. HUGHES: Thank you. So this was a question  
5 regarding what was in the outside services account.

6 So I just wanted to make reference to a response to  
7 the Energy Probe Interrogatory No. 25. We've provided a  
8 table which outlines the main drivers of that account in  
9 terms of the increases.

10 So I can go through the list, or just provide the  
11 reference at this point.

12 MR. WARREN: Reference is fine with me.

13 MS. HARE: Thank you. Are there any other preliminary  
14 matters? Okay. So we will go in camera now.

15 --- In camera session commencing at 2:46 p.m.

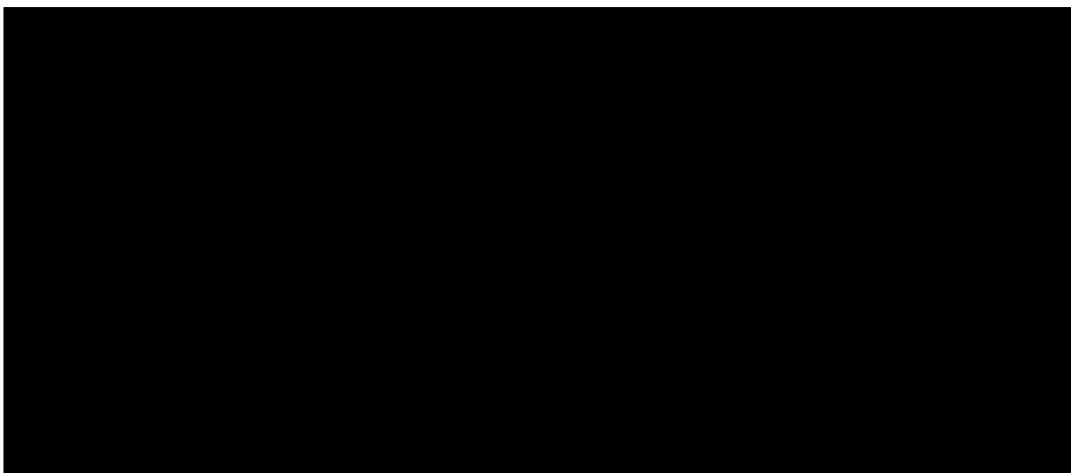

16 MS. HARE: We will just wait a minute for Mr. Ritchie  
17 to confirm we are off. Mics on, okay.

18 MS. HARE: Mr. Warren, I understand you will go first?

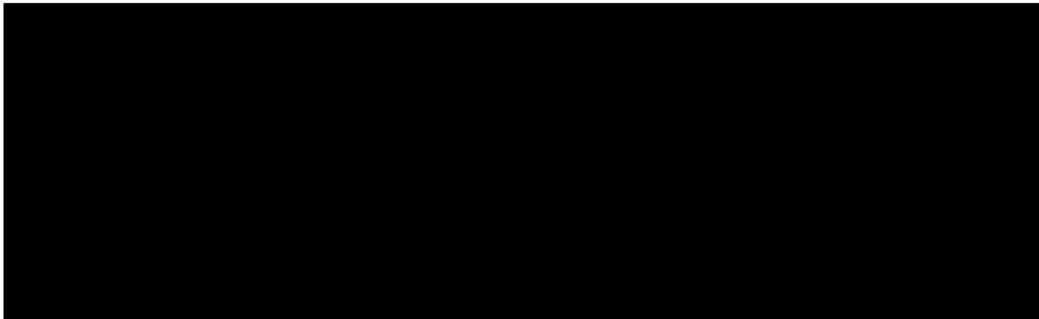

19 MR. WARREN: Thank you.

20 **CONTINUED CROSS-EXAMINATION BY MR. WARREN:**

And the final document I am going to be referring to is not a confidential document, but it is for comparison purposes. It is Exhibit 4, tab 2, schedule 8, page 1 of 1. It is the one I referred to earlier. It is entitled, "OM&A Costs Per Customer".

MS. HELT: Perhaps if Mr. Buonaguro is still here, he could put that on the screen for us.

[Laughter]

MS. HELT: Thank you.

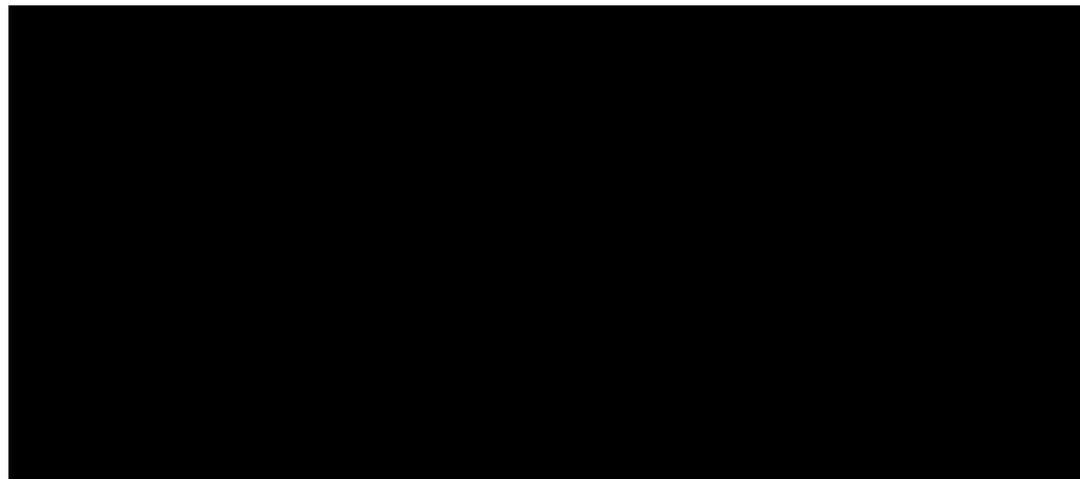

MR. WARREN: Thank you, Mr. Potter.

Does the witness panel have the three documents?

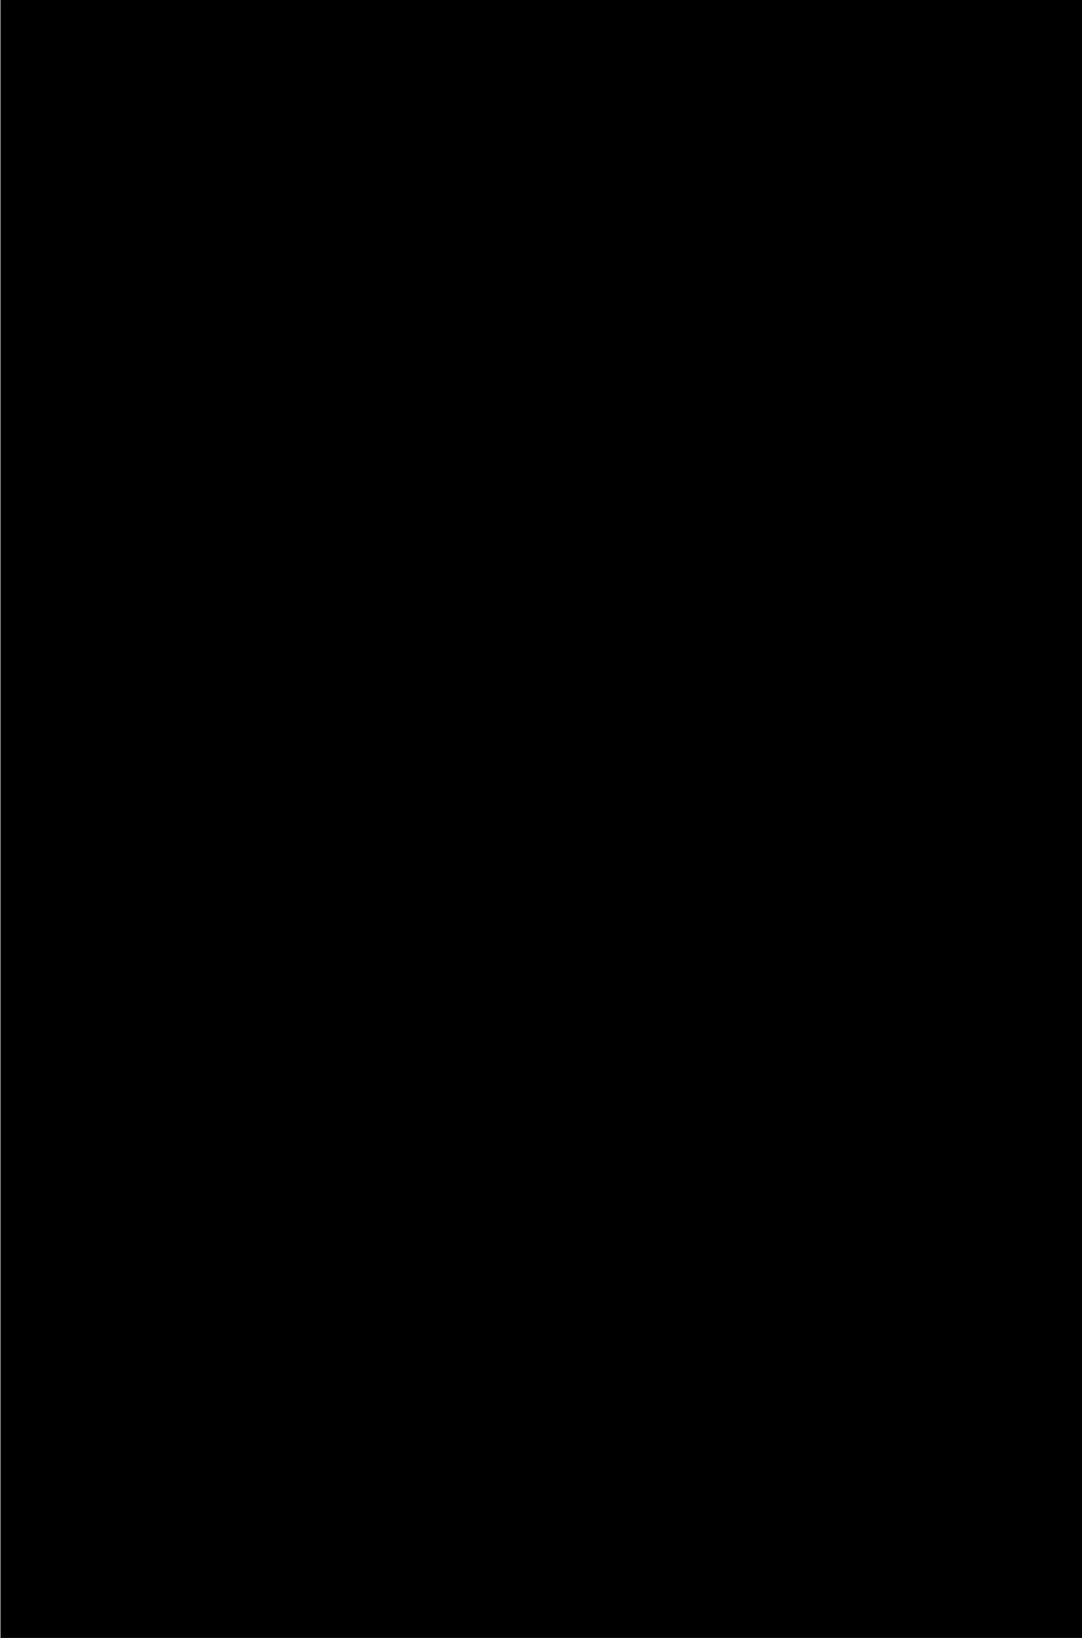

MS. BUTANY-DESOUZA: Yes.

MR. BASILIO: We do.

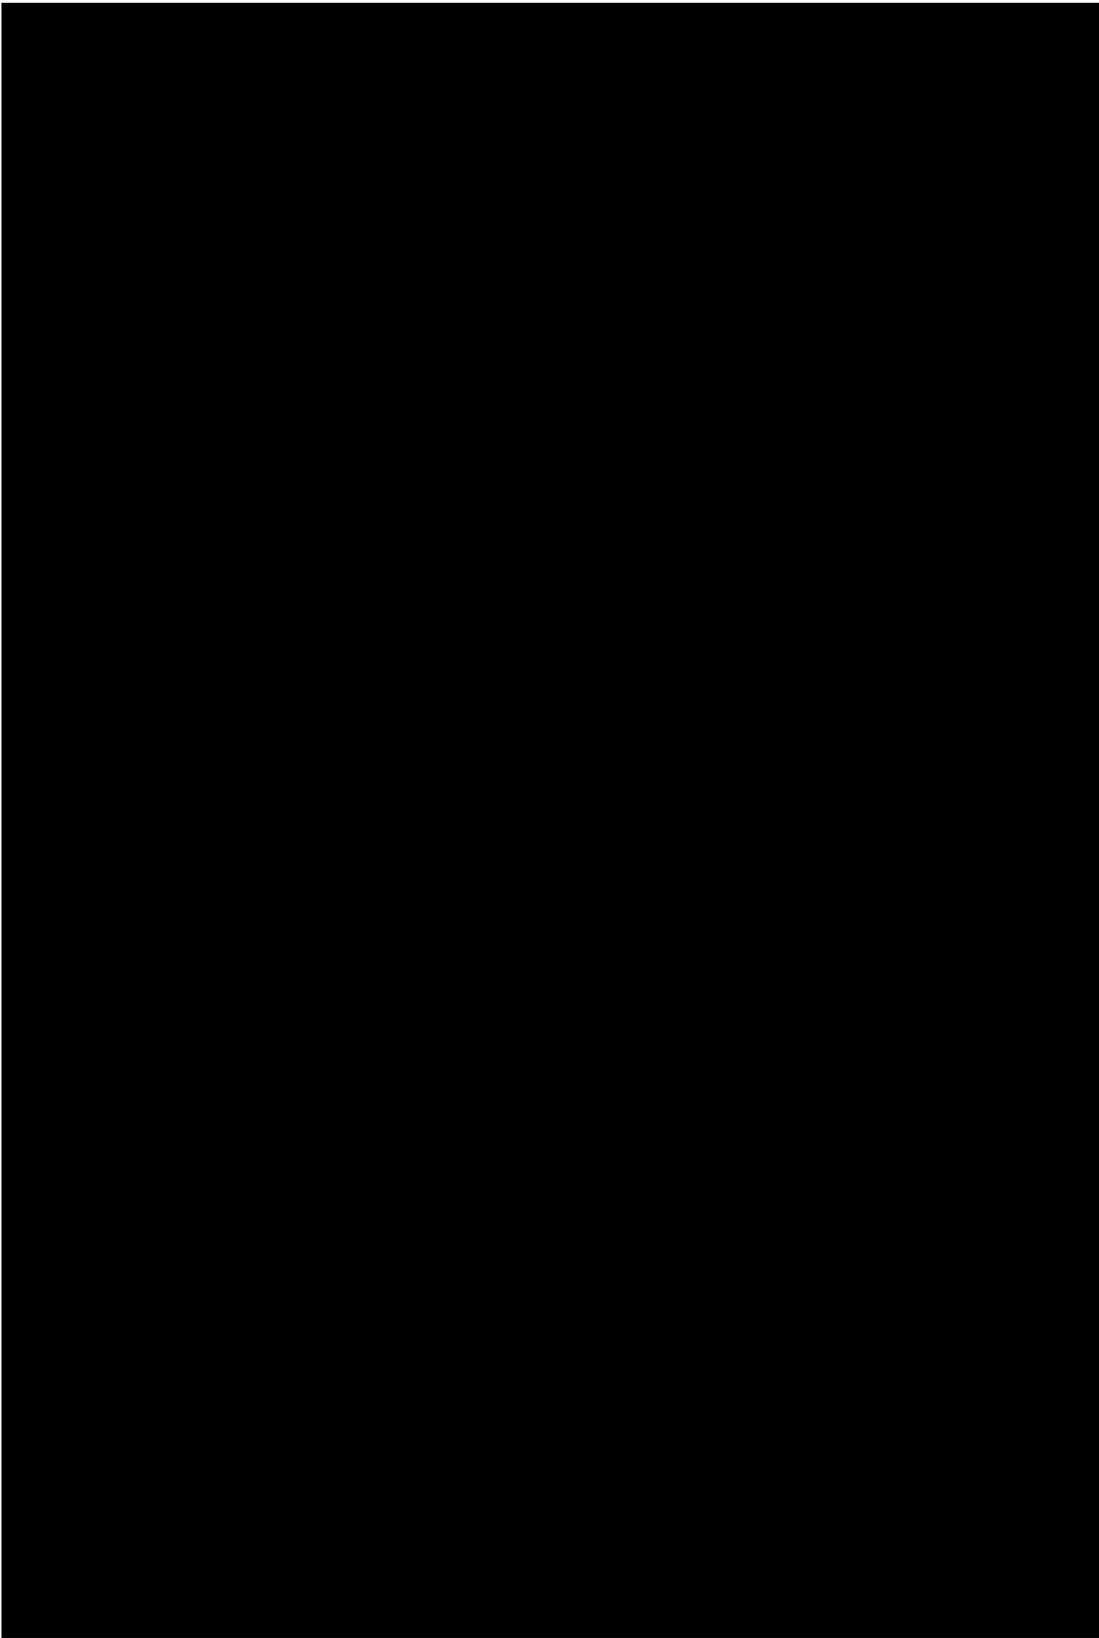

MR. WARREN: And there is no magic to this, panel. I just want to understand three sets of numbers.

MR. WARREN: Okay. Now, the third document I want to take you to, in is an OM&A cost per customer only.

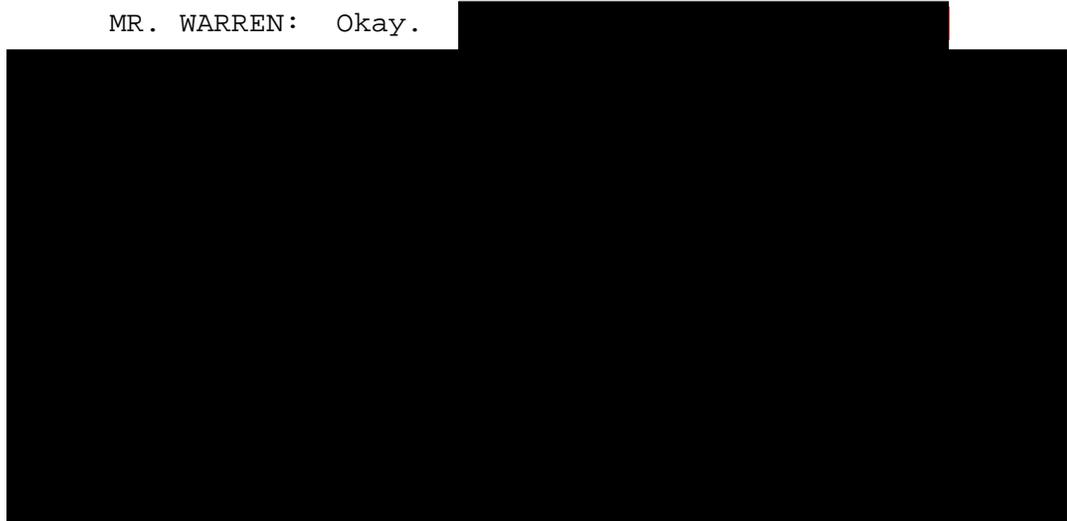

What is the cost per customer overall that is before the Board in this case?

MR. BASILIO: For which year?

MR. WARREN: For 2011.

MR. BASILIO: It is 202.29 in the document.

MR. WARREN: Okay.

20 Does that have anything to do with the failure to  
21 convince the Board on the Z-factor application?

22 MR. BASILIO: I... Well, I think it's more, again,  
23 just managing to what our means were in that period.

24 Had we been successful in the Z-factor application, I  
25 think as we provided in evidence, that would have provided  
26 opportunity to address some of the deferrals that were  
27 discussed in evidence during that application.

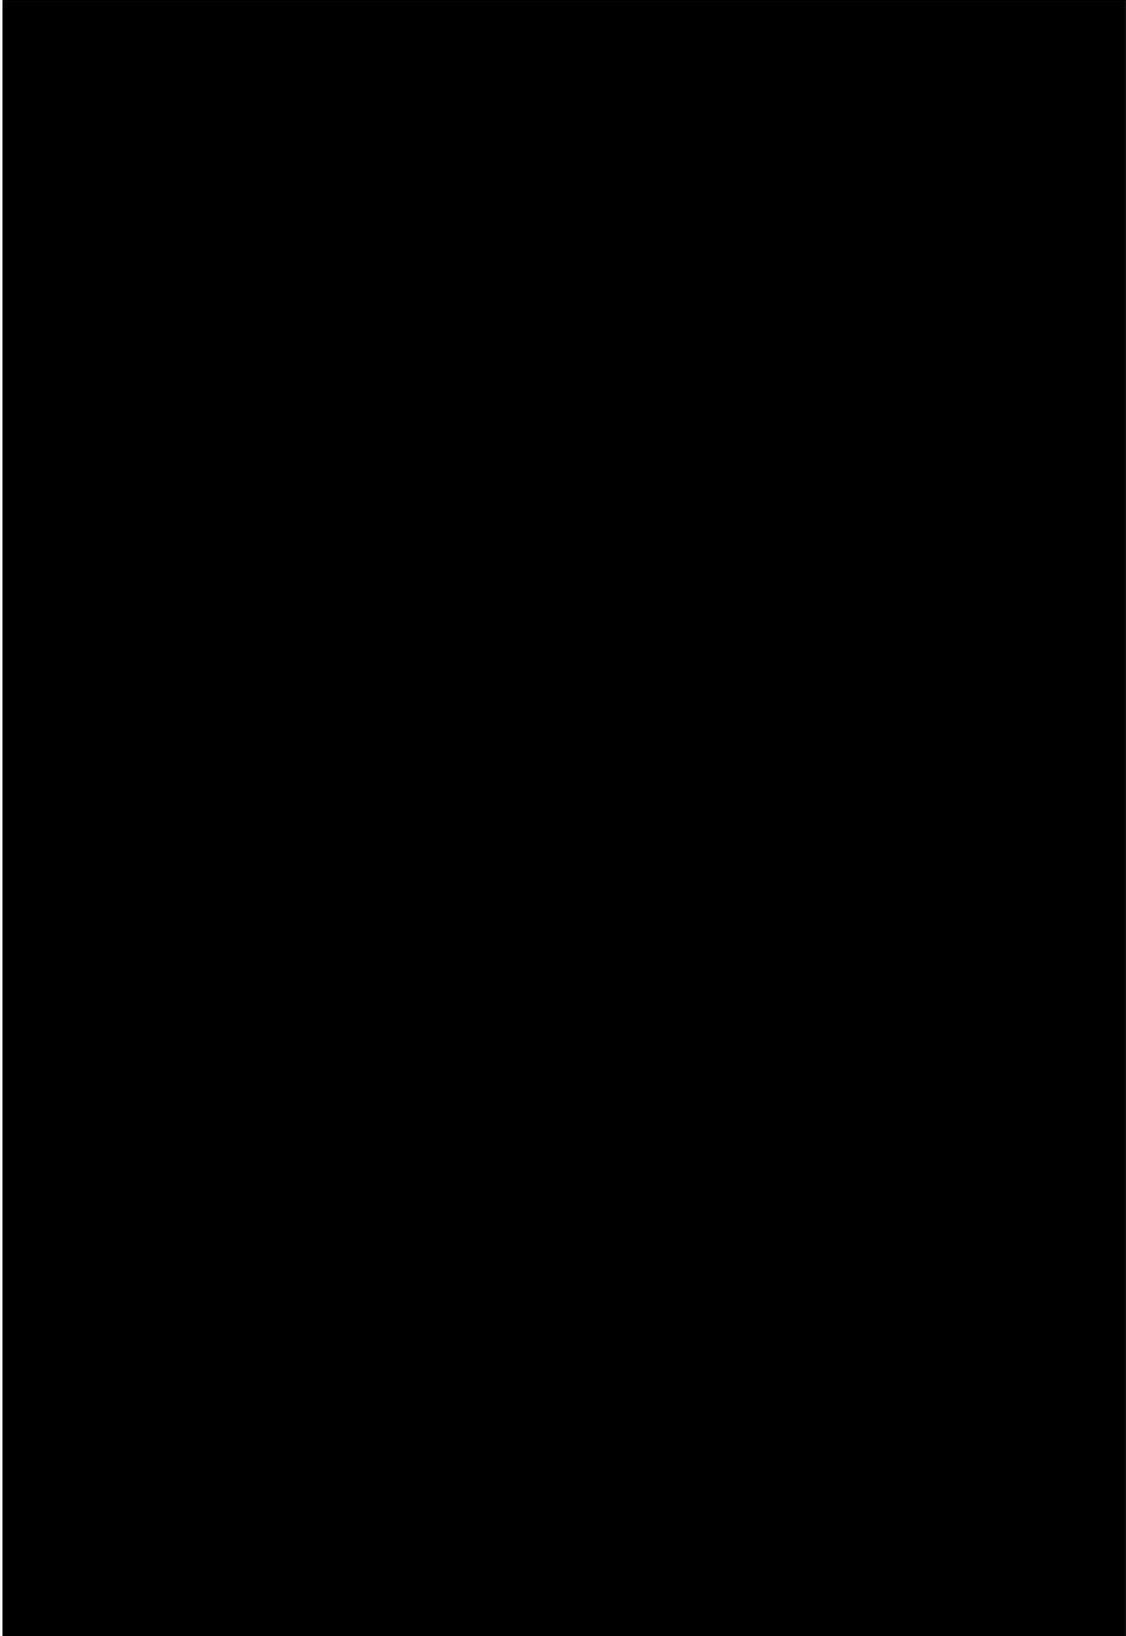

28 So costs would likely have been higher had the Z-

1 factor application been approved, but if I might just -- I  
2 just want to -- the difficulty is, of course, your ability  
3 to react once an application is approved, and, addressing  
4 shortfall, you've basically got to move the machine very  
5 quickly if you achieve additional funding to address  
6 shortfalls and deficiencies and those sort of things. That  
7 does take a little bit of time.

8       So I think, generally speaking, had the Z-factor  
9 application been approved - I can't remember exactly when  
10 we got that decision - it would have likely resulted in  
11 additional expenditure, OM&A expenditure.

12

27  
28

1           Again, in any given year, I think we would do our best  
2 to manage the utility, but over the course of a number of  
3 years -- and this was the point of advancing our  
4 application. It is becoming more and more uncomfortable.

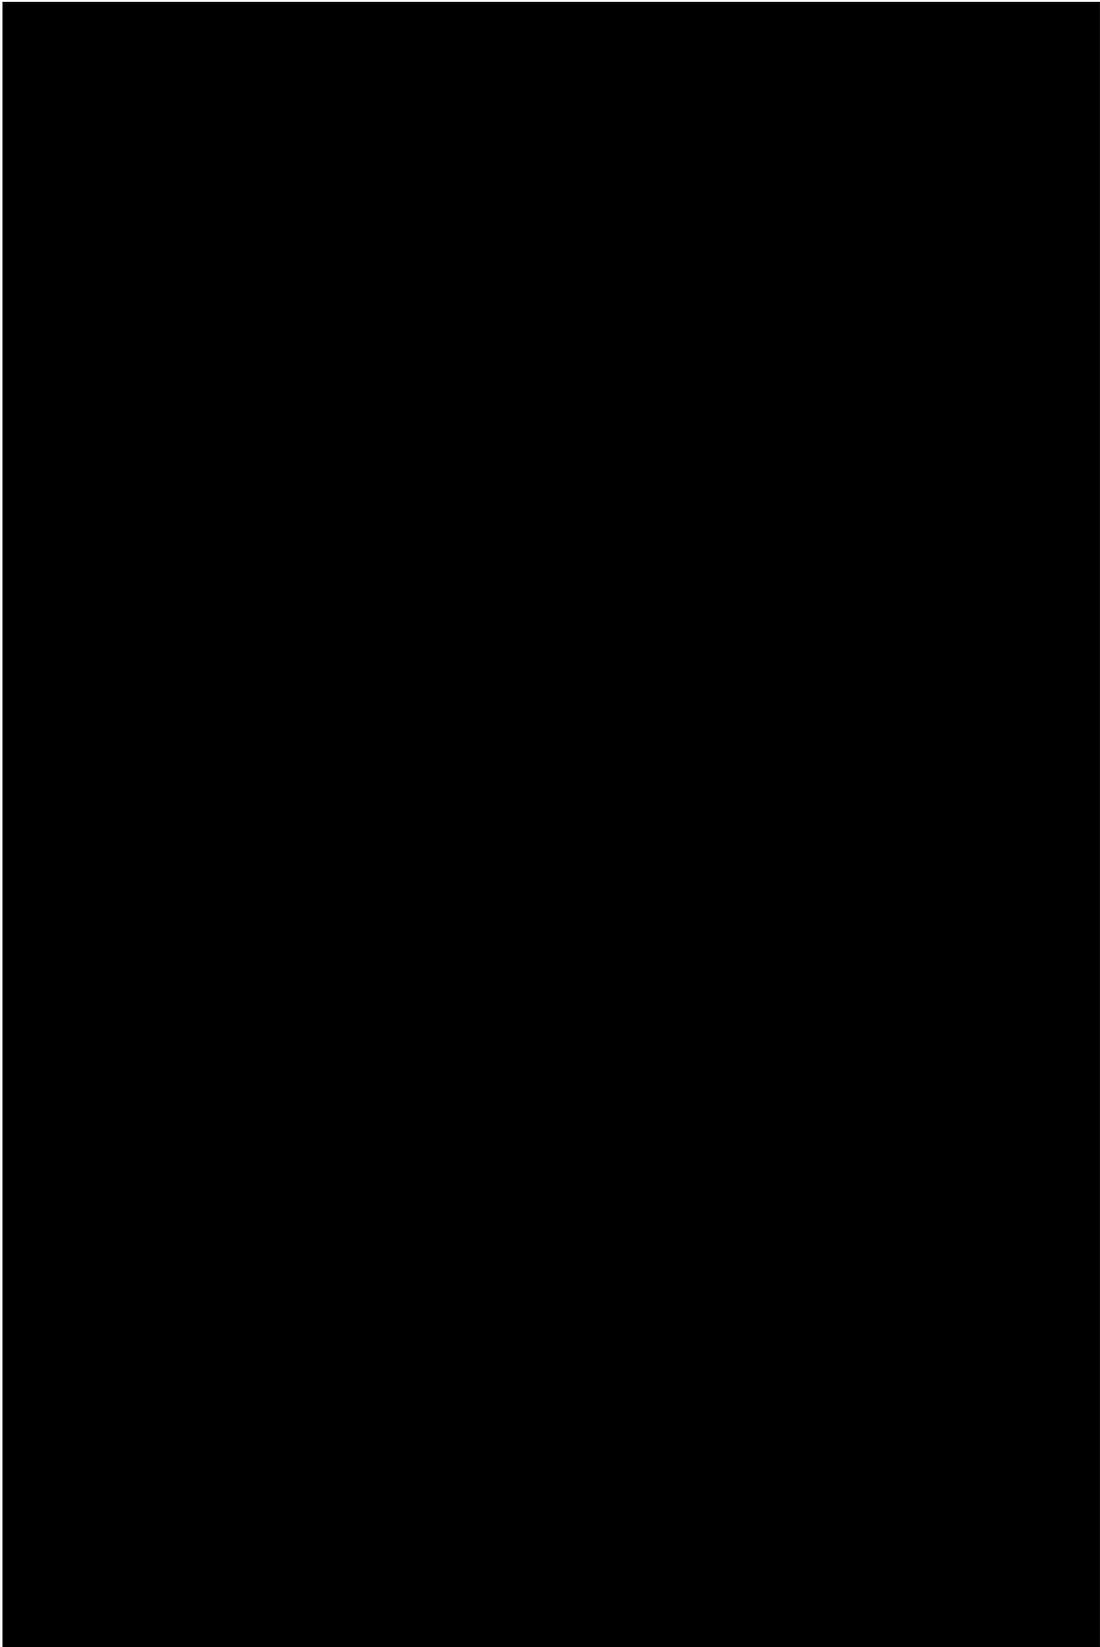

5           So as we move through 2011 and 2012, under these  
6 circumstances, it is certainly becoming very uncomfortable.  
7 Our only opportunity to address that level of comfort is to  
8 address revenue, which is -- of which this process is very  
9 important to, obviously.

10           MR. SHEPHERD: Because your billing determinants  
11 aren't going up, the only way to increase your revenue is  
12 to get higher rates; right?

13           MR. BASILIO: Exactly.

14  
15

16  
17  
18  
19  
20  
21  
22

23 MR. BASILIO: I am -- sorry. Of course in 2011 what  
24 we're asking for, from a cost per customer perspective, it  
25 is in Exhibit 4, tab 2, schedule 8, page 1. It is the  
26 202.29 as it relates to this application; excludes smart  
27 meters and MDM/R.

28 The bridge year was a forecast at a time of 170. The

1 delta is \$30. I just want to make sure we're working with  
2 the correct statistics.

3  
4  
5  
6  
7  
8  
9  
10  
11  
12  
13  
14  
15  
16

17 MR. BASILIO: Yes, we did. We're very much aware -- I  
18 mentioned this in my opening statements. I think I stated  
19 explicitly that we are very concerned about the impact to  
20 our customers, but believe that this is in the best  
21 interests of delivering, on a sustainable basis, the -- on  
22 their expectations.

23 I would also say that this is a sharp increase, and it  
24 certainly doesn't diminish my comment on concern.

25 But in a nutshell, we've been operating at somewhat of  
26 a deficit, in terms of our capacity to deliver our service  
27 to customers, and I believe our rates and our costs per  
28 customer leave us in a very competitive position in this

*ASAP Reporting Services Inc.*

*(613) 564-2727*

*(416) 861-8720*

1 sector. And we have been very competitive on a cost per  
2 customer basis historically.

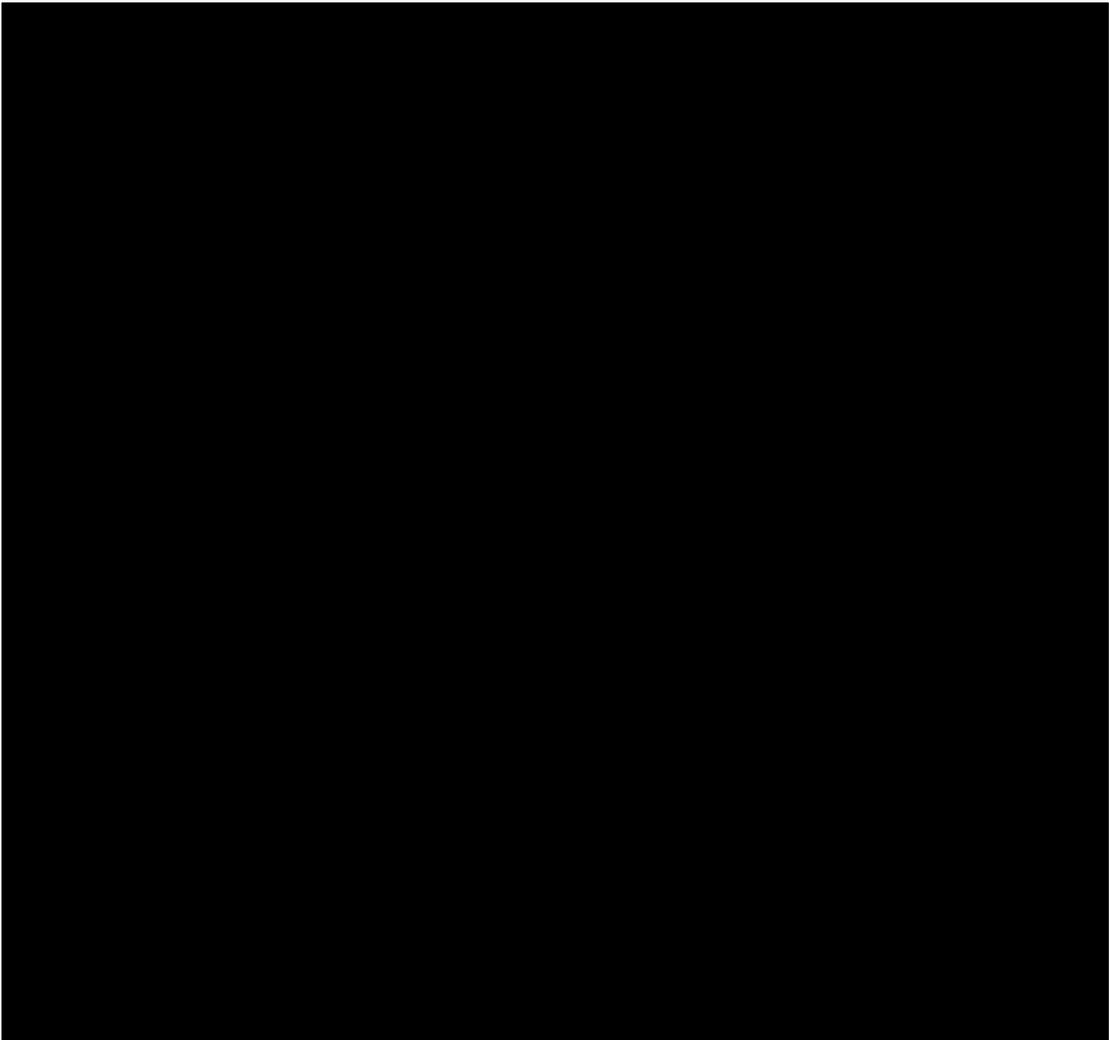

3 MR. SHEPHERD: Is that in the evidence somewhere?

4 MR. BASILIO: I believe it is in the OEB yearbook,  
5 which you provided, I believe.

6 MR. SHEPHERD: I am asking about the evidence in this  
7 proceeding.

8 MR. BASILIO: I thought -- sorry, if I am giving  
9 testimony, that is additional -- oh. Well, yes, we did  
10 provide evidence. 

11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28

1  
2  
3  
4

5 and of course this is historical information, but I think  
6 it is indicative of our past performance, and that from  
7 2006 to 2008, Horizon Utilities is shown as \$160 per  
8 customer on average. The 10 largest LDC average is \$191.

9 I am trying to do the math, but that's almost  
10 20 percent higher than the Horizon average.

11 Golden Horseshoe LDC average is \$216. That is \$56  
12 higher, approximately 33 percent higher.

13 And the Ontario LDC average is \$243.00 per customer,  
14 or approximately 50 percent higher than Horizon Utilities.

15 So that's in evidence. That is indicative of our past  
16 performance, I would offer. And it is conjecture of course  
17 but I don't think for the most part that other LDCs will be  
18 reducing their costs dramatically through their next couple  
19 of rounds of cost-of-service applications.

20 So I would suggest it is my view that we'll remain in  
21 a very competitive position relative to other LDCs with the  
22 requests in this application.

23 MR. SHEPHERD: Well, so if I can paraphrase what  
24 you're saying, compared to the 10 largest LDCs, your normal  
25 comparables, you were \$30 per customer lower.

26 And in this application, you are catching up and you  
27 are going to be on that average; is that right?

28 MR. BASILIO: No. That is not what you're hearing at

1 all. This is an average from 2008.

2 Even if we can -- I think -- I mean, I have done this  
3 myself, but if we apply to the Ontario LDC average a rate  
4 of, I don't know, let's say three percent a year -- I don't  
5 know exactly how much on average LDC costs and applications  
6 have gone up -- and moved the 160 to 202, if we move the  
7 160 to 202, sure, we will catch up to the 10 largest LDCs  
8 back in 2008, but I am sure this is a much higher statistic  
9 in 2011.

10 MR. SHEPHERD: Sorry, I --

11 MR. BASILIO: That is conjecture, of course.

12 MR. SHEPHERD: I didn't make my question clear.

13 In that period, your comparable number to the 10  
14 largest LDCs was \$31 lower; right?

15 MR. BASILIO: That's correct.

16 MR. SHEPHERD: You are asking to make up that  
17 difference today, \$31; right? Roughly?

18 MR. BASILIO: Well, the difference -- really \$42, if  
19 we look at the 2011 test year.

20 MR. SHEPHERD: I am asking apples-to-apples.

21 You were cheaper; now you are not going to be; right?

22 MR. BASILIO: No, I believe we will continue to be  
23 cheaper.

24 MR. SHEPHERD: Okay. I want to turn to some questions  
25 about employee costs, and the first thing I want to do is I  
26 want to see if I can perhaps correct something that you  
27 have on the record, that is actually probably to your  
28 advantage to correct, so I am going to see if we can do

1 that.

2 Can you first take a look at VECC Exhibit K2.1? This  
3 is the Toronto 2K filing.

4 MR. BASILIO: That was the -- sorry, that was the  
5 table that Mr. Buonaguro provided --

6 MR. SHEPHERD: Yes.

7 MR. BASILIO: -- this morning?

8 MR. SHEPHERD: And it is on the screen. Magically it  
9 is here.

10 MR. BASILIO: I have -- we have that, of course.

11 MR. SHEPHERD: So take a look at line 36 -- no, line  
12 33 is the easiest one. Okay?

13 Line 33 is their "Executive compensation, average  
14 yearly base wages."

15 Do you see that?

16 MR. BASILIO: I do.

17 MR. SHEPHERD: Okay. That line is line 15 divided by  
18 line 2.

19 Do you see that?

20 MR. BASILIO: Yes.

21 MR. SHEPHERD: Okay. Now, let's go to your 2K and go  
22 to the same line, "Executive average yearly base wages."  
23 And actually, the one on the screen is the non-confidential  
24 one. So let's look at 2010.

25 That is 214,206; right?

26 MR. BASILIO: Correct.

27 MR. SHEPHERD: And if you divide 3,118,631 by 17, you  
28 don't get that, do you?

1 MR. BASILIO: No, you don't.

2 MR. SHEPHERD: Okay. So the reason I am raising this  
3 is because you've agreed to do an undertaking to provide  
4 some numbers, which we are then going to be comparing.

5 And I think that you have overstated your average  
6 yearly base wages numbers in this entire chart.

7 MS. HARE: Mr. Shepherd, I think Ms. Galli wants to  
8 answer.

9 MS. GALLI: Yes.

10 Yes, in fact we have. What we have done in terms of  
11 calculating that figure is included the "total benefits"  
12 line --

13 MR. SHEPHERD: No, I understand that.

14 MS. GALLI: -- to calculate the average.

15 MR. SHEPHERD: You have divided what would be, in the  
16 Toronto one, line 27 by line 2, instead of line 20 -- 15 by  
17 line 2.

18 So they're not comparable numbers. The correct way to  
19 do it, actually, is the way Toronto has done it.

20 And so I am asking you, in your undertaking response,  
21 can you also make that correction, so that we will have  
22 apples-to-apples comparison?

23 MS. HUGHES: Yes, we can.

24 MR. SHEPHERD: Thank you. It helps you.

25 MS. HELT: Sorry, Mr. Shepherd, just to be clear, that  
26 was the undertaking with respect to J2.4 that dealt with  
27 the table 2K?

28 MR. SHEPHERD: We'll have to ask Mr. Buonaguro what

1 number it was.

2 MR. BUONAGURO: I think that is right. Thanks.

3 MS. HELT: And Horizon understands the nature of this  
4 specific aspect of that undertaking? Or it would help --  
5 would it help to clarify?

6 MS. BUTANY-DESOUZA: Can we repeat it?

7 MS. HELT: Mr. Shepherd?

8 MR. SHEPHERD: Sure. In Undertaking 2.4, can you  
9 ensure that the calculation under average yearly base wages  
10 is only base wages, and is not all -- total compensation?

11 MS. BUTANY-DESOUZA: Yes. Got it.

12 MR. SHEPHERD: While you are at it, if you could add  
13 to that the original appendix 2K corrected, that would be  
14 good too. Just so we don't have this incorrect one lying  
15 around.

16 You have -- your table 4-25 is incorrect.

17 So since you are going to correct it anyway, if you  
18 can correct it on the original, that would be good too.

19 MS. HUGHES: Okay.

20 MS. HARE: Ms. Galli, is that clear?

21 MS. GALLI: Yes, that's fine. Thank you.

22 MR. SHEPHERD: Now, I am looking at your appendix --  
23 sorry, your table 4-25. I am looking at the unredacted  
24 version of that, so it has the 2011 numbers in it. Do you  
25 have that?

26 MS. HELT: Mr. Shepherd, perhaps you could just  
27 indicate what exhibit number that is, page number?

28 MR. SHEPHERD: Exhibit 4, tab 2, schedule 10, page 11,

1 unredacted.

2 MR. BUONAGURO: I think this is exactly what is on the  
3 screen, except no blackout.

4 MR. SHEPHERD: That's right.

5 MR. BASILIO: We have it, yes.

6 MR. SHEPHERD: Do you have that? The Panel Members'  
7 copies should be marked, I think.

8 MS. HELT: Yes. We did mark the Panel Members'  
9 copies, if you can find it.

10 MS. HARE: Is it in this binder?

11 MS. HELT: It is in the -- is it a technical  
12 conference? It's not a technical conference question. So  
13 then it is in the confidential interrogatory response --  
14 volume 2 of 2, sorry.

15 MR. BUONAGURO: I put it on the screen, but I kept all  
16 of the redacted stuff out of my computer copy. Sorry.

17 MR. SHEPHERD: So I just want to ask you a couple of  
18 brief questions about this. I am right, am I not, that  
19 since your last rebasing year, 2008, you are proposing your  
20 compensation increase by about 35 percent, total  
21 compensation bill?

22 MR. BASILIO: Yes, that is pretty close. That is  
23 pretty close, subject to check, but that's correct.

24 MR. SHEPHERD: And that's not -- that's not a  
25 business-as-usual sort of increase, it seems to me, because  
26 the compensation charged to OM&A is going up 27 percent,  
27 right, but the compensation charged to capital is going up  
28 57 percent?

1 MR. BASILIO: That's correct.

2 MR. SHEPHERD: And this is because of your expanded  
3 capital program?

4 [Witness panel confers]

5 MR. BASILIO: Sorry, I just wanted to confer on the --  
6 could you repeat your question, please?

7 MR. SHEPHERD: So the difference between the increase  
8 in compensation charged to OM&A and the increase in  
9 compensation capitalized is because of your increased  
10 capital program; right? What I am trying to get at is it  
11 is not because of your remapping or any other accounting  
12 changes?

13 MR. BASILIO: That's correct.

14 MS. HUGHES: That's correct.

15 MR. SHEPHERD: So the 2008 numbers, the 2011 numbers,  
16 they're apples-to-apples numbers; right?

17 MS. HUGHES: Yes.

18 MR. SHEPHERD: Okay, good.

19 MS. HUGHES: Yes.

20 MR. SHEPHERD: So the reason I wondered about that is  
21 you had a discussion earlier about the capital program,  
22 and, you know, the increases in your capital program for  
23 stuff on the ground were nothing like this \$4.6 million  
24 increase. Your increases in capital programs for stuff on  
25 the ground were pretty much business as usual.

26 But you do have some substantial increases in capital  
27 programs for IT projects and things like that; right?

28 MR. BASILIO: We do have increases related to IT, but

1 we have provided is we in aggregate -- our distribution  
2 capital expenditures are going up in aggregate and on a net  
3 basis at approximately \$2 to \$3 million a year.

4 But as we've shown in the evidence, when you dissect  
5 that between what we're actually spending that distribution  
6 system capital on, renewal is taking a big jump.

7 We do have IT expenses, again, IT expenses that aren't  
8 for the sake of IT. They're IT expenses for the sake of  
9 supporting distribution system planning -- other things, of  
10 course, but supporting distribution system planning. And I  
11 think we gave some testimony on that with respect to the  
12 enterprise data warehouse earlier.

13 So we delineate between distribution capital and other  
14 capital, but much of IT expenditure, in fact, supports  
15 distribution system capital planning, tracking, and of  
16 course customer service.

17 MR. SHEPHERD: I understand that, and this is not the  
18 time to be discussing that, anyway.

19 What I am really trying to get at here is: Is any  
20 significant component of this increase in capitalized  
21 compensation an increase in the number of people working on  
22 those non-distribution, non-system projects, like the IT  
23 projects and the mobile computing and all of those sorts of  
24 things?

25 MS. HUGHES: So what I would say is that we actually  
26 don't capitalize labour with respect to IT, generally  
27 speaking, on these projects.

28 MR. SHEPHERD: So this whole \$4.7 million increase is

1 on the ground?

2 MS. HUGHES: Yes.

3 MR. SHEPHERD: Okay. Well, that's interesting,  
4 because then I wonder if you could go to the next page in  
5 this -- well, it's actually not the next page, I guess.

6 It is page 14 of the same document, also the  
7 unredacted version. So it is three pages along in Exhibit  
8 4, tab 2, schedule 10. So we were looking at page 11, and  
9 now we are looking at page 14.

10 Do you have that? And you can actually look at the  
11 unredacted one, if you want, because I don't care about the  
12 salaries. I am only concerned with the list. So you have  
13 it on the screen?

14 MS. HUGHES: Yes.

15 MR. SHEPHERD: Okay. I looked -- there's 58 positions  
16 listed here; right? I counted.

17 MS. HUGHES: Yes.

18 MR. SHEPHERD: Would you take that subject to check?

19 MS. HUGHES: Yes.

20 MR. SHEPHERD: Okay. And I looked at this list -- do  
21 you know what the concept of a tool-in-hand job is?

22 MS. HUGHES: No. No.

23 MR. SHEPHERD: A tool in hand is a person in a utility  
24 who actually goes out and does things, goes out and repairs  
25 a line or works on a substation. It is your trades, okay?  
26 Do you understand the concept?

27 MS. HUGHES: Mm-hm, yes.

28 MR. BASILIO: We are more familiar with the term

1 "trades", yes.

2 MR. SHEPHERD: Okay. I heard "tool in hand" from  
3 somebody a lot older than you are, Mr. Basilio.

4 MR. BASILIO: I will take that as a compliment.

5 MR. SHEPHERD: And I looked on this list for tool-in-  
6 hand type jobs, trades, and I found 12 of the 58. The  
7 first one I can find is the last one listed in 2010, line  
8 maintainer, cable splicer, not yet hired, and then I found,  
9 in the last four listed at the bottom, three of those  
10 appear to be -- that is, line maintainer, line maintainer,  
11 substation apprentice all appear to be trades-type jobs.

12 Is that right? Those are the trades we have on this  
13 list?

14 MS. HUGHES: So those would be the new -- yes, those  
15 would have been new hires for trades, yes.

16 MR. SHEPHERD: Okay. So what I don't understand is --  
17 let's start with you have a system that is not in good  
18 shape, and yet all of the people you are hiring in that  
19 period are people who can't fix anything.

20 Why would you be hiring those people, instead of  
21 hiring the people that can fix the system that is broken?

22 [Witness panel confers]

23 MS. HUGHES: Sorry. I just wanted to collect the  
24 information.

25 In terms of the new hires, you know, we've clearly  
26 indicated that in 2011, I believe, 13 of the total new  
27 hires of 27 are, in fact, skilled trades, and not just in  
28 terms of the construction, but there are other positions on

1 this list that are really required to operate the entire  
2 distribution system.

3 You know, we do have planners, grid operators. I  
4 mean, so those are, you know, required to operate the  
5 distribution plant.

6 I wanted to draw some attention to --

7 MR. SHEPHERD: Let me just -- let me just stop you  
8 there. I want you to continue, but I just want to  
9 understand.

10 You said 13?

11 MS. HUGHES: I believe we have identified 13, 13 trade  
12 new hires in 2011.

13 MR. SHEPHERD: Okay. But that would include people  
14 like network operators that -- this is not out -- people  
15 out in the field?

16 MS. HUGHES: That's correct. It doesn't include the  
17 operators, yes.

18 MR. SHEPHERD: Go on. Sorry to interrupt you.

19 MS. HUGHES: In response to CCC Interrogatory No. 32,  
20 we did, in fact, provide a table where we provided the  
21 continuity of our full-time by department.

22 And in 2008, on this table, we had 132 employees in  
23 the construction and maintenance department.

24 And I think this will help tie in the change in the  
25 amount of capitalized labour that you can see, is in 2008  
26 we had a number of vacancies in the trades, and I think Ms.  
27 Galli would be able to provide some information on that.

28 So when you are looking at the compensation for 2008

1 and looking at the amount capitalized, and then comparing  
2 it to 2011, we, in fact, had 132 in the construction and  
3 maintenance, growing to 147 in 2011, based on the business  
4 plan.

5 So we, in fact, have grown that by 15 employees.

6 MR. SHEPHERD: Sorry, I didn't want to interrupt you  
7 again, but I didn't hear the reference.

8 MS. HUGHES: Sorry.

9 MR. SHEPHERD: I thought you said 32.

10 MS. HUGHES: It is Consumers Council.

11 MR. SHEPHERD: Yeah?

12 MS. HUGHES: IR No. 32.

13 MR. SHEPHERD: So I am looking at 32.

14 MS. HUGHES: It is a January 24th IR.

15 MR. SHEPHERD: Okay. And 32 is FTEs per customer.

16 Oh, no, this is VECC. Sorry. My apologies. That's  
17 why I couldn't find it.

18 MR. BUONAGURO: I am trying to find it, but for some  
19 reason the electronic copy bookmarked CCC 32, actually, as  
20 VECC 32.

21 MR. SHEPHERD: Oh, that's right.

22 MR. BUONAGURO: It is a labelling problem in the  
23 computer. I didn't do it.

24 MR. SHEPHERD: Yeah, that's right. They're all CCC  
25 except for that one.

26 MR. BUONAGURO: Yes.

27 MR. SHEPHERD: All right.

28 Just give me a second to see if I can find it. It is

1 not where it should be.

2 I am going to have to give up. I'm not going to find  
3 it.

4 MR. BASILIO: We would be pleased to provide you with  
5 a copy.

6 MR. SHEPHERD: I will look at it later. Thanks.

7 MR. BASILIO: Okay.

8 MR. SHEPHERD: Sorry. All right. Actually, could you  
9 give me a copy to look at? Thank you.

10 [Ms. Butany-DeSouza passes document to Mr. Shepherd]

11 MR. SHEPHERD: The file document does not have it  
12 where it should be. Thanks very much.

13 So you are referring to which line, "construction and  
14 maintenance"?

15 MS. HUGHES: Yes.

16 MR. SHEPHERD: And you're saying that in construction  
17 and maintenance, you are going from 132 to 147.

18 MS. HUGHES: That's correct.

19 MR. SHEPHERD: And that includes the supervisors;  
20 right?

21 MS. HUGHES: Yes, it would.

22 MR. SHEPHERD: All right. So when we said that your  
23 58 hires included 12 that were tool-in-hand, you're saying  
24 no, that's wrong; it is 15?

25 MS. GALLI: If I could also add, in table 4-26, in  
26 Exhibit 4, tab 2, schedule 10?

27 MR. SHEPHERD: Sure.

28 MS. GALLI: The last line of 2010, where we have "line

1 maintainer cable splicer"?

2 MR. SHEPHERD: Yes.

3 MS. GALLI: Unfortunately, it is redacted, so you  
4 can't see the total amount. But that actually should read  
5 "seven positions."

6 MR. SHEPHERD: "Seven positions"?

7 MS. GALLI: Yes.

8 MR. SHEPHERD: Well, see, that is interesting that you  
9 should say that, because then what we have on this list is  
10 more positions in total than on your 2K.

11 In fact, in Staff Interrogatory No. 30, which is also  
12 a confidential document, you got another five.

13 So are these numbers on your 2K, the additions, not  
14 right?

15 MR. BASILIO: I think we're having trouble following  
16 your math, which I am sure is correct. We are just having  
17 trouble following it.

18 MR. SHEPHERD: If you add up all of the positions on  
19 table 4-26, you get 58. You just added another six; that  
20 is 64, but I thought we already established you are only  
21 adding 60 people.

22 And then you have -- on Staff 30, you have another  
23 five; is that wrong?

24 MS. GALLI: In table 4-26?

25 MR. SHEPHERD: Yes.

26 MS. GALLI: We have a total of 61 positions.

27 MR. SHEPHERD: Okay. Well, I counted it and I got 60  
28 -- I got 58, plus you just added six more. All right --

1 MS. GALLI: I have...

2 MR. SHEPHERD: Let's not fuss around about that.

3 Of those tool-in-hand positions, how many of them have  
4 been hired so far? Let's go down the list, and tell me how  
5 many have you hired so far.

6 So as of August 26th, you said that none of the line  
7 maintainers and cable splicers from 2010, which were listed  
8 as January of 2010, that those weren't yet hired; right?

9 MS. GALLI: Correct.

10 MR. SHEPHERD: Presumably, some of them have been  
11 hired now; how many?

12 MS. GALLI: They have all been hired.

13 MR. SHEPHERD: Okay. All.

14 Then you have -- on the fourth-last line, you have  
15 line maintainer apprentice, four positions, listed as  
16 January 2011.

17 Have any of those been hired yet?

18 MS. GALLI: No, they have not.

19 MR. SHEPHERD: And of course, the ones -- the  
20 additional one for September would not have been hired yet;  
21 right?

22 MS. GALLI: No, we have not.

23 MR. SHEPHERD: And what about the substation  
24 apprentices, those three? Have any of those been hired  
25 yet?

26 MS. GALLI: No, they have not.

27 MR. SHEPHERD: So in this period where you are adding  
28 60 people, you have added seven tool-in-hand positions? Am

1 I right?

2 [Witness panel confers]

3 MS. GALLI: Could you repeat the question, Mr.  
4 Shepherd, so I answer correctly?

5 MR. SHEPHERD: Yes. In that period where you say  
6 you're going to add 60 people, so far you've added seven  
7 tool-in-hand positions; is that right?

8 MS. GALLI: The table would represent new additional  
9 prehire types of positions, but we have, in fact, in 2008,  
10 2009, 2010 and 2011 also hired apprentices in each of those  
11 years. They aren't reflected in this table, because these  
12 represent new, but, in fact, because there have been  
13 vacancies in line maintainers, we have hired apprentices to  
14 replace them.

15 MR. SHEPHERD: Oh, okay. Well, that actually is a  
16 wonderful segue into my next area of questions, my last  
17 area of questions, which is if you could turn to Energy  
18 Probe Interrogatory No. 26, also a confidential document?

19 Keep the exhibit table 4-25 out, because we need to do  
20 some comparisons.

21 So do you have that table?

22 MS. GALLI: Yes, we do.

23 MR. SHEPHERD: Okay. So this is an update of the 2K  
24 to record 2010 actuals; right?

25 MS. GALLI: We've provided a Q3 forecast for 2010.

26 MR. SHEPHERD: But we just heard earlier that the Q3  
27 forecast actually turns out to be accurate, because your  
28 actual as of the end of the year was 384; right?

1 MS. GALLI: Yes, that's correct.

2 MR. SHEPHERD: Okay. So am I right in understanding,  
3 then, that for 2010, although you planned to have 401 FTEs,  
4 you ended up at 384 FTEs, 17 less; right?

5 MS. GALLI: That's correct.

6 MR. SHEPHERD: And that's because your 2K - that is,  
7 table 4-25, which we were looking at earlier - includes  
8 vacant positions; right?

9 MS. GALLI: Yes, for 2010 we've provided a budget  
10 figure, and that would include vacancies.

11 MR. SHEPHERD: Okay. So let's go back to the table 4-  
12 25 for a second.

13 So 2010, those numbers are wrong. The correct number  
14 would be 17 lower, right, 384?

15 MS. GALLI: That's correct.

16 MR. SHEPHERD: Okay. So for 2009, does that also  
17 include vacant positions?

18 MS. GALLI: 2009 is an actual.

19 MR. SHEPHERD: All right. And for 2008, does that  
20 include vacant positions?

21 MS. GALLI: 2008 is also an actual.

22 MR. SHEPHERD: Okay. So let's come back to what you  
23 just told us, then. We're talking about these 60 positions  
24 or 61 or 64, or however many there are in this next page,  
25 table 4-26, and you said, Oh, no, no, no, there's some more  
26 people we hired because of vacant positions; right? But  
27 this is all the additions you have.

28 So if the vacancies weren't included in 2008 and 2009,

1 where did you put those people? Where are they on this  
2 thing? It doesn't add up. We have the whole 60, and there  
3 aren't any tool-in-hand jobs until the end of 2010, none of  
4 them.

5 MS. GALLI: So the 60 would represent new positions  
6 added to the organization over that period. When I say  
7 we've hired, that is because positions existing in those  
8 previous counts would have been vacated, and we have filled  
9 to replace current existing positions.

10 MR. SHEPHERD: Okay. The 368 in 2008, does that  
11 include any vacancies?

12 MS. GALLI: No, it does not.

13 MR. SHEPHERD: Okay. So then as some of those people  
14 left that you had in 2008, some of those people left and  
15 you replaced them; right?

16 MS. GALLI: That's correct.

17 MR. SHEPHERD: Ah, okay. So that is different than,  
18 for example, from 2010 to 2011 where you are actually  
19 adding 44 people; right?

20 MS. GALLI: We are adding, in 2010, 15 and in 2011,  
21 27.

22 MR. SHEPHERD: Well, actually, it looks like in 2010  
23 you lost two people, net.

24 MS. GALLI: Oh, sorry, you are looking at actuals?

25 MR. SHEPHERD: Yes.

26 MS. GALLI: Yes, that is correct.

27 MR. SHEPHERD: Then you are adding -- in 2011, you are  
28 adding 44; right?

1 MS. HUGHES: So if I could just step back for a  
2 minute, we have proposed the hiring of 26 new positions in  
3 2011.

4 In 2010, we had planned to hire 15 employees. We  
5 hired those 15. I believe one of our responses to the  
6 interrogatories provided, for those positions that were  
7 budgeted in 2010 as new hires, they have in fact now all  
8 been filled except for one, which is a manager of treasury  
9 position in my area that I currently have on contract and  
10 don't have a full time.

11 Where we have a difference between the 2010 budget of  
12 the 401 employees versus the 384 at year end are normal  
13 vacancies, just vacancies throughout the organization,  
14 where people have just left the position, but that -- so,  
15 you know, we are showing that as actual.

16 But, in fact, the complement, approved complement,  
17 that we have in our organization is 401 employees.

18 MR. SHEPHERD: Understood. But I guess from the  
19 ratepayers' point of view, you are not assuming that you  
20 are going to have 15 or 20 vacancies, the same percentage  
21 of vacancies in the test year, are you?

22 MR. BASILIO: No. The test year assumes a full  
23 establishment of strength in the organization.

24 MR. SHEPHERD: Exactly. So whereas for 2010 you  
25 actually paid 17 FTEs less than what you said in your 2K,  
26 but for 2011 you are asking for a budget for 44 more  
27 people, right, than you actually paid in 2010?

28 MS. HUGHES: Well, that would assume that you didn't

1 have 17 throughout the 2010, but I would say that those  
2 positions would have come in and out through 2010.

3 MR. SHEPHERD: It is FTEs, isn't it?

4 MS. HUGHES: It is FTEs, yes.

5 MR. SHEPHERD: That means that each one of those 17 is  
6 a full-time equivalent; right?

7 MS. HUGHES: Yes.

8 MR. SHEPHERD: No? So these are not FTEs?

9 MS. HUGHES: Oh, sorry.

10 MS. GALLI: I'm sorry. The 384 would have been the  
11 year end number. It represents the year end number of  
12 employees.

13 And for the purposes of this, at any point in time  
14 during the year, we may have had a different complement.

15 MR. SHEPHERD: So none of these figures are FTEs? You  
16 had this discussion earlier, and I thought you were saying,  
17 yes, they do equate to FTEs.

18 MR. BASILIO: Just for clarification, do you mean a  
19 weighted average number of employees for the year?

20 MR. SHEPHERD: FTE -- well, you are a trained person,  
21 Mr. Basilio. You know that an FTE is the equivalent of one  
22 person for one year; right?

23 MR. BASILIO: Yes.

24 MR. SHEPHERD: So 401 people should be 401 people for  
25 a full year; right?

26 MR. BASILIO: That's correct, but in reporting an  
27 actual result -- again, I am a little confused by the line  
28 of questioning.

1 MR. SHEPHERD: Well, I guess here is my problem.  
2 Your previous -- all of your results include students;  
3 right?

4 MS. GALLI: Students are not included in the table.

5 MR. SHEPHERD: Why not?

6 MS. GALLI: Appendix 2K?

7 MR. SHEPHERD: Yes. Why not?

8 [Witness panel confers]

9 MR. SHEPHERD: I seem to recall all of your  
10 departmental business plans there were, I don't know, 20,  
11 30 students in total, maybe more. They're not in here  
12 anywhere?

13 [Witness panel confers]

14 MS. HUGHES: So we have prepared this table on the  
15 basis that these are full-time positions, and so we have  
16 not included students on that basis.

17 MR. SHEPHERD: So your compensation costs are actually  
18 higher than this?

19 MS. HUGHES: Yes, they would be higher by the  
20 compensation paid to the students, yes.

21 MR. SHEPHERD: This is, like, 7 or \$800,000 a year,  
22 something like that? Am I in the right range?

23 MS. HUGHES: No. No, I believe the 2011 budget for  
24 students is less than \$300,000.

25 MR. SHEPHERD: Fine.

26 Thanks very much. I have no further questions.

27 MS. HARE: Thank you.

28 Do any other parties have any questions? Mr. Crocker?

1 Mr. Aiken? Mr. Buonaguro? Mr. MacIntosh? No?

2 The Panel has no questions.

3 Mr. Sidlofsky, any redirect?

4 MR. SIDLOFSKY: No. Thank you, Madam Chair.

5 MS. HARE: Thank you. We will go back on air, then.

6 --- Resuming public session at 3:54 p.m.

7 **PROCEDURAL MATTERS:**

8 MS. HARE: Given that it is almost 4:00 o'clock, I  
9 think that we will not start panel 3 today, but if we could  
10 start Monday at 9:00 o'clock, that would be helpful, so  
11 that we can make up some time.

12 Is that all right with everybody?

13 MR. SIDLOFSKY: That would be fine. Do we have a  
14 sense at this point of how long panel -- the cross-  
15 examination might take on panel 3?

16 MS. HELT: I have had a chance to speak with some of  
17 the intervenors.

18 I believe Mr. Aiken may have half an hour, 40 minutes.  
19 Mr. Buonaguro, perhaps an hour. Mr. Crocker, I believe,  
20 indicated he would be an hour or so. Board Staff will  
21 likely be half an hour. And then Mr. Warren indicated he  
22 wouldn't be very long, 15 minutes.

23 MS. GIRVAN: Ten.

24 MS. HELT: Ten, 15 minutes. Then there is Mr.  
25 Shepherd, who will let us know himself.

26 MR. SHEPHERD: Thirty minutes, I think.

27 MS. HARE: So is it possible we will be done on  
28 Monday?

1 MS. HELT: Oh, I think we will be done on Monday. We  
2 were hoping, in talks at the break, that we would be done  
3 by lunch on Monday, had we started today with panel 3.

4 So that won't happen.

5 The only one -- one potential preliminary issue, or  
6 not preliminary issue but issue, is I am not sure if Mr.  
7 Aiken is available on Monday morning. Is he here?

8 MS. HARE: Yes, he is here.

9 MR. AIKEN: Yes. I can be available Monday morning.

10 MS. HARE: Okay. I do want to leave some time, in the  
11 event there are any questions about the undertaking  
12 responses.

13 The panel is excused. Thank you very much for your  
14 assistance. I see that some of the panel members are back,  
15 but Ms. Lerette and Ms. Campbell, you are done. Thank you  
16 very much.

17 MS. BUTANY-DESOUZA: Ms. Campbell might be back.

18 MR. BASILIO: Thank you very much.

19 --- Whereupon the hearing adjourned at 3:58 p.m.
