Toronto, Ontario M5G 2P5

Dear Mr. Poon:

**Re: Information Request of Hydro One Networks Inc.  
EB-2011-0140**

We are writing on behalf of our client, AltaLink Ontario, L.P. ("AltaLink"), to request additional information from the incumbent transmitter, Hydro One Networks Inc. ("Hydro One"), in respect of the proposed East-West Tie line (EB-2011-0140).

Pursuant to the Hydro One protocol filed in this proceeding dated January 9, 2012 (the "Protocol"), and the associated Directive dated September 20, 2011, we understand that the Board will be involved in all information requests made to Hydro One related to the East-West Tie line. Consequently, we have copied the Board Secretary and Staff on this information request to Hydro One. We understand that by copying the Board Secretary, this request will be made part of the public record in the EB-2011-0140 proceeding.

In preparing its plan, AltaLink must consider and address the interconnection of the proposed East-West Tie line with the relevant Hydro One transformer stations (Wawa, Marathon, and Lakehead TS).

As part of its June 28, 2012 production of documents, Hydro One included at Tab 3(c) aerial images of each of the applicable Hydro One transformer stations showing *existing* station layouts including line entrances.

AltaLink is writing to request additional substation layout diagrams that clearly identify, for each of the relevant Hydro One transformer stations, all *existing and future* bays where the proposed East-West Tie line will be connected.

If Hydro One is not sure where the new circuits will terminate (i.e. the design is not yet done), please provide Hydro One's assumptions about the station design so that all registered transmitters can base their proposals on the same set of design assumptions.

AltaLink would benefit from the use of this information as an input into its planning process.

Sincerely,

*Original signed by John A.D. Vellone*
