Dear Ms. Walli:

EB-2011-0140 – OEB East-West Tie Line – Hydro One Networks Inc. Submission

Hydro One Networks Inc. (“HONI”) makes this submission, pursuant to Procedural Order No. 7, solely on the basis of HONI’s role as the incumbent transmitter to whose transmission system the proposed East-West Tie transmission line will be connected.

HONI submits that there is insufficient detail in the materials filed to date to assess the full impact of the applications of the various Applicants on HONI’s transmission system. This is understandable, however, as the purpose of this proceeding is strictly to designate a transmitter to develop the proposed transmission line, and the level of detail of the evidence is therefore expected to be commensurate with that purpose.

Also, although HONI’s position is well-documented on the record in this proceeding, HONI takes this opportunity to re-confirm that, during this proceeding, HONI did not participate in the development of any costs, including station costs, that may have been included in any of the applications.

Sincerely,
