To whom it may concern, after reading the Toronto hydro app for an increase. as a consumer I was surprised to see it listed to pay for the remaining Smart Meter Costs...When we were told about the smart meters , we were told they were free , even offering us money if we put our air conditioner on one... I strongly disagree for an increase, we are paying for hydro given to the USA & also the debt retirement charge,, How much can seniors keep paying (last year all services inclusive went up 40%) but our income didn't . You want seniors to stay in our homes but you are rapidly making it impossible .NO NO
NO .Linda Jones
