LETTER OF COMMENT

Comments:

To whom it may concern,

The current operating expenses of OPG and its subsidiaries, overhead staff and applied expense structure is currently out of skew. You are an arms length Crown Corporation, owed by the provincial government on behalf of the people of Ontario. Your mandate should include providing a responsible service to the province of Ontario and its people. Current pay scales of high level executives, private business ventures and the filling of provincial government coffers/accounts is unacceptable. The people of Ontario cannot afford another price increase and you are single handedly driving industry from our great province. Ontario electricity is the most expensive in North America and there is absolutely no REASONABLE explanation for it. You are sinking billion of dollars into nuclear power plant expansion and retrofits with no feasible environmental plan to responsibly manage the waste generated and yet you are paying wind power plants to stop producing renewable power - this is irresponsible and poor business sense from a forward thinking perspective in our great nation. Rate payers in the province are fed up, tired and broke. Stop wasting provincial revenue, get your financial house in order with a top down analysis and approach. Stop the rate hikes and hold internal stakeholders accountable for their mismanagement, their actions or lack there of.
