**Re: Ontario Energy Board Notice EB-2015-0003**

Recently I read in the Liberal Newspaper a Board Notice of an increase in rate for Powerstream customers.

I would like to give you, the Board, my comments. Our energy prices in the Province of Ontario are completely "out of control". When I read that people cannot afford to pay their electric bills because they are so high it is worrisome to say the least.

Instead of the Board approving increasing for these companies why not try to have the companies "live within their means".

Electricity rates are surpassing our inflation rate and have been for some time. When will someone rain in these exorbitant prices and put the taxpayers first.

To add insult to injury I just heard on the radio that the Government is giving obscene increases to the Hydro One employees.

Yours truly,

*MButt*
