

Burlington *hydro* inc.

Ontario Energy Board
2300 Yonge Street, Suite 2701
Toronto, ON M4P 1E4
Attn: Ms. K. Walli
Board Secretary

February 26, 2016

Dear Ms. Walli

Re: **EB-2015-0056**

Burlington Hydro has reviewed the Board's Draft Decision and Order in the above named matter and has identified two concerns:

- Page 5 of the draft Decision and Order displays amounts that do not match those calculated by the Board's Rate Generator model: the amount of \$29,784 should be \$59,568, as displayed on worksheet 7 at cell N44, while the amount of \$14,892 (that appears twice) should be \$29,784, as displayed at cell N46 of the same worksheet; and
- Page 9 of the draft Tariff of Rates and Charges refers to "specific charge for access to power poles" and could be amended per Burlington Hydro's distribution licence (EB-2003-0004) to clarify that wireless attachments are exempted from this regulated rate.

Please do not hesitate to contact me if you have any questions in this matter.

K. Farmer
Manager, Regulatory Affairs
