As a rural Thunder Bay phone and internet subscriber, and very unfortunately a Hydro One user, I object to the application by Hydro One to increase pole rental rates to this and other small providers. It will put many smaller providers out of business and drive up the costs to those that survive, passing these costs along, of course, to the already strapped customers. This company is ruining this province, and by the Energy Board approving all the rate increases for them when we already pay the highest rates in the country, and probably the continent, they are being given permission over and over again to screw their customers. Please stop enabling them by constantly approving their rate increases!!! Enough is enough!

Sincerely,
Erin Reid
