Toronto ON M4P 1E4

**Re: Clean Air Partnership's EB-2019-0003 Participation Request Letter**

Clean Air Partnership is a charitable environmental organization whose mission is to collaborate with municipal governments and their stakeholders in order to enable communities to reduce their greenhouse gas emissions (GHGs) and air pollution, increase their resiliency to extreme weather and make advancements towards a low carbon economy. We serve as the secretariat for the Clean Air Council, which is a network of 28 municipalities in the Greater Toronto, Hamilton and Southwest Ontario region working collaboratively to implement and transfer clear air and climate change actions across their jurisdictions. We also serve as the Ontario Region facilitator for Federation of Canadian Municipalities and ICLEI's Local Governments for Sustainability's Partners for Climate Protection Program which includes 105 Ontario municipalities in its network. We also serve as the facilitator of a Municipal Corporate Energy Managers' Community of Practice where corporate energy managers from the above two networks come together to share best practices and experiences on the development and implementation of their Municipal CDM Plans.

My apologies for my tardy submission, but I only heard about this consultation yesterday. However, CAP and municipal staff from the above networks would like to engage in this consultation to help shape the principles, goals and objectives, and scope of the post-2020 DSM framework.

As such, CAP would like to participate in person in the Stakeholder Meeting being held on Thursday, June 13th. CAP will not be requesting cost eligibility.

Thank you for your consideration in reviewing our request to participate in this consultation.

Sincerely,

Gabriella Kalapos  
Executive Director  
Clean Air Partnership
