Subject: sale northern ontario wires

I am unhaappy with the process with regards to the sale of nortern ontario wires. I was speaking with one of your employees ,he said it was his job to put people like myself in contact with the person that could help me. I explained to this person that a petition had been circulated and that I was not aware of it untill a town council meeting in the afternoon ofjan. 27/09. I explained that if this were an omb hearing that a public meeting in the community would be held and a vote or plebisite held. The process in this case was town council proceeded with the sale regardless of input from community. I think a full hearing in the community is required in this case so all members of public get input to oeb so an informed decision is arrived at.
