**Re: Confirmation of Hydro Ottawa's Draft Tariff of Rates and Charges, Effective May 1, 2009
EB-2008-0188**

Hydro Ottawa Limited has reviewed the draft Tariff of Rates and Charges attached as Appendix A to the Ontario Energy Board's (the "Board") Decision and Order issued on March 16, 2009 for electricity distribution rates and other charges effective May 1, 2009.

Hydro Ottawa has determined that the draft Tariff of Rates and Charges is complete and accurate with the exception of one formatting error. The table for Dry Core transformer charges currently located on page 5 between the Total Loss Factors for Secondary Metered Customer > 5000 kW and Primary Metered Customer < 5,000 kW should be relocated after the title 'Dry Core Transformer Charges' and before the notes which start 'No Load and Load Losses' on page 6.

Hydro Ottawa also notes that the Price Cap Index for Low Voltage Charges (Sheet L3.1 of the 2009 3GIRM Rate Generator) was not adjusted from 0.98% to 1.18% in the rate model provided by the Board as part of the Decision and Order. However, Hydro Ottawa does not require this adjustment to be made, as the amount is immaterial.

If further information is required, please contact the undersigned at 613-738-5499 ext 7499 or janescott@hydroottawa.com.

Yours truly,
