

**IN THE MATTER OF Board Staff Discussion Paper
on an Electricity Distributors' Deferral and Variance
Account Review Initiative**

**NOTICE OF INTERVENTION
OF THE
SCHOOL ENERGY COALITION**

1. The School Energy Coalition applies for intervenor status in these proceedings.

General Interest of the Intervenor

2. The School Energy Coalition is a coalition established to represent the interests of all Ontario publicly-funded schools in matters relating to energy regulation, policy, and management. It is made up of all seven of the major school-related organizations, representing all of the school boards, and all levels of school management, and through them representing the approximately 5000 schools in Ontario.

3. The primary goal of the coalition's member organizations is to promote and enhance public education for the benefit of all students and citizens of Ontario. The School Energy Coalition's mission as intervenor in this matter is to be an advocate on behalf of the publicly-funded school system of the province, and therefore the interests of more than two million elementary and secondary students and more than half a million adult learners.

4. The intervenor's members have a significant interest in the activities of regulated electricity distributors and their affiliates in the province, including the applicant in this matter (the "Utility") due to the severe financial implications those activities have on school boards, their students and the people of the province of Ontario. Utility costs are one of the most significant cost pressures facing school boards. The cost of energy to the intervenor's members is currently in excess of \$370 million per annum, and has increased rapidly over the last five years. To produce balanced budgets in the face of ever increasing energy costs, school boards have repeatedly been forced to cut essential programs and services to the detriment of the students and the public of the province of Ontario.
