
CME-TCPL 7

[REVISED: May 05, 2009](#)

Reference: Exhibit L, Tab 21 – General

Request:

Please provide TCPL's estimate of the approximate incremental costs in \$/GJ for a marketer to convert the TCPL Discretionary services, it currently uses, to FT services on TCPL.

Response:

TransCanada is not able to provide the requested information because the request contains insufficient information. The cost of converting from discretionary services to FT services is dependant on which services are utilized and their level of utilization. The current tolls are;

Service	<u>Eastern Zone Toll</u> (\$/GJ)
FT: 100% load factor	\$1.1900
STFT: biddable, floor price equals 100% load factor FT toll	\$1.1900 (floor price)
IT: biddable, floor price equals 1.10 times the 100% load factor FT toll	\$1.3090 (floor price)
