NOTICE OF APPLICATION AND HEARING FOR AN ELECTRICITY DISTRIBUTION RATE CHANGE

West Perth Power Inc.

West Perth Power Inc. has filed an application with the Ontario Energy Board, (the "Board") received on April 1, 2009 under section 78 of the *Ontario Energy Board Act*, 1998, S.O. 1998, c.15 (Schedule B), seeking approval for changes to the rates that West Perth Power Inc. charges for electricity distribution, to be effective May 1, 2009. The Board has assigned the application File No. EB-2008-0249. The Board's decision on this application may have an effect on all of West Perth Power Inc.'s customers.

Any change to West Perth Power Inc.'s distribution rates will cause West Perth Power Inc.'s delivery charges to change. Delivery charges are one of four regular items on residential and general service customers' electric bills and vary depending on the amount of electricity consumed.

In its application, West Perth Power Inc. is seeking approval of \$1,085,778 as the 2009 revenue requirement it requires to provide electricity distribution services. On an equivalent basis, this compares with a Board-approved level of \$1,141,489 for 2006, the last year the rates were reviewed on a cost of service basis. During the interim period, the Board has approved adjustments to distribution rates.

On May 1, 2009, in response to the Board's initial assessment that the application was incomplete, West Perth Power Inc. proposed and the Board has accepted that the review of the application will proceed in two phases. Phase I will review the proposed 2009 revenue requirement. This phase will proceed immediately. Phase II will review the cost allocation and rate design components of the application. This phase will commence at a time after West Perth Power Inc. files with the Board a cost allocation study and a set of rates designed on the basis of that study.

West Perth Power Inc. indicates that if the application is approved as filed, a residential customer consuming 1,000 kWh per month would experience an approximate 4.5%

increase in its current delivery charges. This is a \$5.28 per month increase on the bill. A general service customer consuming 2,000 kWh per month and having a monthly demand of less than 50 kW would experience an approximate 8.2% increase in its current delivery charges. This is an \$18.65 per month increase on the bill.
