Toronto ON M4P 1E4

Dear Ms Walli:

Re: LEAP Implementation Working Groups/EB-2008-0150

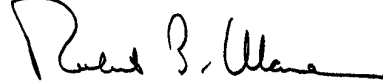

I am counsel to the Consumers Council of Canada (the "Council"). By letter dated May 21, 2009, I advised you that the Council was nominating Julie Girvan for the Financial Assistance working group. I neglected to include, in that letter, a statement that Ms Girvan requests cost eligibility for her participation in the working group.

The Council is a non-profit, public interest group which does not have funds to support Ms Girvan's participation in the working group. In the absence of a cost award, Ms Girvan would not be able to participate in the working group. The Council represents the interests of an important constituency, namely the broad array of residential consumers of natural gas and electricity. In all Board proceedings, whether in the nature of rate applications or policy-making matters, the Council has been found to be eligible to receive a cost award.

I would appreciate your considering this letter a supplement to our letter of May 21, 2009.

Yours very truly,

WeirFoulds LLP
