Company description
Enbridge Inc. operates the world's longest crude oil and liquids pipeline system, as well as natural gas transmission and distribution assets in Canada and the US. The company also owns interests in pipeline systems in Spain and Colombia, and is developing a large wind-powered generation project in Ontario.

www.enbridge.com

The Desjardins Takeaway

While 2Q07 EPS growth was marginal, Enbridge continues to lay the groundwork for massive earnings growth by the end of the decade as it expands its Liquids Pipelines business. We continue to consider Enbridge as an excellent way to play oil sands growth while avoiding commodity risk. We are updating our financial estimates to incorporate the benefits of AFUDC and other factors. There is no change to our Buy–Average Risk investment recommendation or C$41 price target.

Event

The company released 2Q07 earnings and held a conference call on Wednesday. Enbridge Inc. (Enbridge) announced 2Q07 results Wednesday morning. While headline earnings came in at C$146.5m compared with C$157.9m in 2Q06, adjusted 2Q07 earnings were C$129.5m vs C$118.7m in 2Q06. Earnings per share (EPS) came in at C$0.36 vs C$0.35 in 2Q06, representing a 2.9% growth rate, while consensus estimates for 2Q07 EPS stood at C$0.35.

Dividends declared by the board of directors. On July 31, 2007, Enbridge's board of directors declared quarterly dividends of C$0.3075 per common share and C$0.34375 per Series A preferred share. Both dividends are payable on September 1, 2007 to shareholders of record on August 15, 2007.

Implication

Details of the quarter. Adjusted earnings were up compared with 2Q06, primarily due to the following: (1) Enbridge Gas Distribution (EGD) earnings were up by C$12.9m due to improved expense management, customer growth and storage/transportation capacity transaction revenues; (2) Enbridge's share of Enbridge Energy Partners (EEP) earnings increased by C$3.7m, as Enbridge held a 15.0% interest in EEP vs 10.9% a year ago; (3) Aux Sable added C$2.2m to earnings (after adjusting for mark to market on derivatives); and (4) corporate segment expenses decreased by C$5.3m (after adjusting for the impact of tax rate changes) as a result of using proceeds from the recent equity issue to pay down debt. Cash provided by operating activities, before changes in working capital, was C$305.5m in 2Q07, compared with C$262.0m in 2Q06 (or C$0.86 vs C$0.77 on a per-share basis). Please see Exhibit 1 on the following page for further details on a segmented basis.

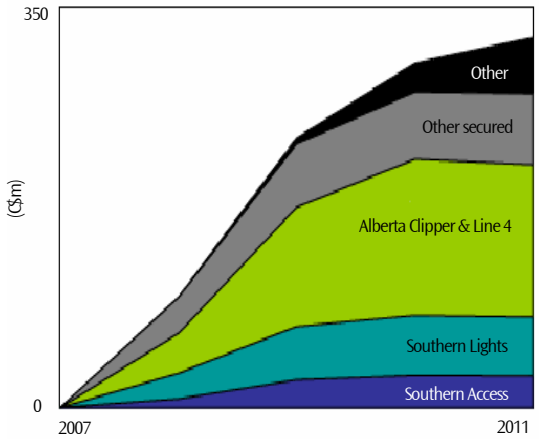
Developments during the quarter. During the quarter, Enbridge completed its open season for the Spearhead pipeline expansion project, slated for completion in 2009. Enbridge also received final governmental approvals from the Ontario Municipal Board and Ontario's Ministry of the Environment for its Bruce County wind-power project, expected to be in service toward the end of 2008 at an updated capital cost of C$440m (up by roughly 10%). EGD received a final decision from the Ontario Energy Board (OEB) regarding its 2007 rate application, with a 1% increase in the equity component of deemed capital structure (to 36%, up from 35%), as well as approval for a new 20-year trend method to calculate normal weather for the GTA region, and an order to cease the risk management program used to manage price volatility of natural gas. In addition, EGD expects to shift to incentive regulation (IR) starting January 2008 for its distribution operations, and will proceed with development of unregulated gas storage services following a favourable decision by the OEB.



Update on growth prospects. Enbridge's Liquids Pipelines segment continues to advance a number of large pipeline projects to be completed during 2009–10, with equity returns in the low-to-mid teens. The ramp-up in Liquids Pipelines earnings, though back-end loaded, should work out to earnings growth of roughly 16% over the 2006–11 timeframe according to management guidance. We agree, as this is consistent with the output from our financial model. Please refer to the exhibits below for more details of the Liquids Pipelines projects and the segment's resulting earnings growth profile.

Exhibit 2: Liquids Pipelines segment development projects

Projects (C$b)	Capital cost	Exp'd comp*	Full-life return
Southern Lights (US$b)	1.3	2010	12% + kicker
Southern Access extension (US$b)	0.4	2009	11% floating

Source: Enbridge Inc.

US Gulf Coast expansion—still trying. During the conference call, in response to a question posed by Desjardins Securities, management reiterated its strategic goal of connecting the growing Alberta crude oil supply to the refining capacity situated in the US Gulf Coast (USGC) PADD III market. With the expectation that current supply from Mexico and Venezuela will continue to decrease, the USGC will represent a significant amount of underused refining infrastructure, sufficient to absorb whatever incremental oil sands output can be delivered. Please refer to our *Morning Pulse* comment dated April 9, 2007 for additional details on proposed pipeline projects to the USGC region. In our view, Enbridge's proposed joint venture with ExxonMobil to connect Cushing, Oklahoma, to the USGC would be able to gather sufficient shipper interest in transporting crude from the Alberta oil sands as this would protect producer netbacks. Netbacks (the producer's margin net of the toll to transport oil to the market) would otherwise be pressured by a supply glut in the PADD II market, where Enbridge's mainline and TransCanada's proposed Keystone project currently terminate.

Capital cost inflation a modest positive? While most crude oil producers' returns are pressured by mounting capital costs, Enbridge is generally not significantly exposed to the risks associated with capital cost increases on regulated projects. Although costs have dramatically escalated for certain projects, such as the Southern Access expansion, given that Southern Access tolls will be mostly set under a regulated cost-of-service framework, Enbridge (and EEP) should actually see an increase in earnings, as prudently incurred growth capex is included in the rate base.

Exhibit 4: Southern Access capital cost estimates

Source: Desjardins Securities, Enbridge Inc.

Upcoming financings. During the conference call, management reiterated its expectation of a capital market financing to come sometime in 2008, of a size similar to 2007 (~C$600m). Given that management considers the entirety of the

current asset base as core, asset sales do not seem to be on the agenda, with the only possible exception being a sell-down of Enbridge's interest in Enbridge Income Fund (EIF), given the right market conditions. A reduction in Enbridge's interest in EIF is likely not imminent given the current market environment for income funds following recent changes in tax legislation. While the exact financing mix of the 2008 capital raise remains to be determined, management stated that hybrids and preferred shares are under consideration in addition to straight equity and debt.

A meagre dividend increase in 2008? Management does not have any plan to increase the dividend payout ratio (currently 60–70 %) at present. As a result, we believe that while the 2008 DPS increase will be modest (~C$0.08, or 6.5%) to ~C$1.31 per share, down from our previously expected ~C$1.34, 2009–10 DPS growth ought to look better.

Change in financial estimates. We have now incorporated in our financial model the benefit of the allowance for funds used during construction (AFUDC) for capital spending on the Alberta Clipper and Southern Lights pipeline projects, as well as a plethora of smaller changes in our assumptions concerning Enbridge's other assets. Please consult the exhibit below for details of the changes in our financial estimates.

Exhibit 5: Change in EPS estimates

Year-end Dec-31 (C$)	New	Previous	Change
2007E	1.79	1.86	-0.07
2008E	1.87	1.99	-0.12
2009E	2.11	2.01	0.10

Recommendation

Maintaining C$41 price target. We rely on our fundamental valuation work to set our price target, with backup support from relative valuation techniques. Our fundamental valuation work returns a range of C$39.80–41.66 from our DDM and DCF models, respectively. Our relative valuation work returns a value of C$39.32, based on sum-of-the-parts segment-by-segment analysis using 2007 estimated P/E multiples. Our C$41 12-month price target implies a forward P/E ratio of ~23x, which we feel is appropriate for Enbridge due to growth potential, the proven track record of the management team, earnings quality, cash flow stability, a solid capital structure and defensive stock characteristics.

Reiterating Buy recommendation. At a closing price of C$37.09 as of August 1, 2007, our price target represents a potential total return of 13.9%, inclusive of our 2007 dividend per share estimate of C$1.23. Given our Average Risk rating and a potential 12-month total return of 13.9%, Enbridge shares deserve a Buy recommendation at current valuation levels, in our view. **We are reiterating our Buy–Average Risk recommendation and C$41 price target.**

Risk factors. Our financial estimates, price target and investment recommendation are subject to various risk factors, including but not limited to the following: (1) Lower-than-expected oil sands output, a faster-than-expected decline in conventional production and/or a fall in crude oil prices could derail much of the Liquids Pipelines growth program; (2) regulatory risk in case of adverse decisions for regulated assets located in North America, South America and Europe; (3) operational risk for existing assets; (4) execution risk related to the large growth program; (5) competition from rival pipeline projects for expansion of currently permitted infrastructure; (6) financing risk for large external capital requirements; and (7) inverse interest rate risk (lower interest rates resulting in lower allowed ROEs for regulated assets, as offset by an increase in the stock price due to interest sensitivity).

RISK QUALIFIERS

Average Risk	Above-average Risk	Speculative
Risk represented by the stock is in line with its peer group* in terms of volatility, liquidity and earnings predictability	Risk represented by the stock is greater than that of its peer group* in terms of volatility, liquidity and earnings predictability	High degree of risk represented by the stock, marked by an exceptionally low level of predictability

* Peer group refers to all of the companies that an analyst has under coverage and does not necessarily correspond to what would typically be considered an industry group. Where an analyst's coverage universe is such that 'relative' performance against a 'peer group' is not meaningful, the analyst will benchmark the rating against the most appropriate market index

DESJARDINS SECURITIES INC. LEGAL DISCLAIMERS

Dissemination of Research

Desjardins Securities makes all reasonable effort to provide research simultaneously to all eligible clients. Research is available to our institutional clients via FirstCall Research Direct, Reuters and Bloomberg. In addition, sales personnel distribute research to institutional clients via email, fax and regular mail.

Analyst Certification

Each Desjardins Securities research analyst named on the front page of this research publication, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this publication and all other companies and securities mentioned in this publication that are covered by such research analyst, and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this publication.

Additional Disclosures

Desjardins Securities' equity research analysts are compensated from revenues generated by various Desjardins Securities businesses, including Desjardins Securities' Investment Banking Department. Desjardins Securities will, at any given time, have a long or short position or trade as principal in the securities discussed herein, related securities or options, futures, or other derivative instruments based thereon. The reader should not rely solely on this publication in evaluating whether or not to buy or sell the securities of the subject company. Desjardins Securities expects to receive or will seek compensation for investment banking services within the next three months from all issuers covered by Desjardins Securities Research.

Legal Matters

This publication is issued and approved for distribution by (i) in the US, Desjardins Securities International Inc., a member of the FINRA and SIPC, (ii) in Canada, Desjardins Securities Inc., a member of the IDA and CIPF (collectively, "Desjardins Securities").

This publication is provided for informational purposes only, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. The securities mentioned in this publication may not be suitable for all types of investors; their prices, value and/or income they produce may fluctuate and/or be adversely affected by exchange rates. This publication does not take into account the investment objectives, financial situation or specific needs of any particular client of Desjardins Securities. Before making an investment decision on the basis of any recommendation made in this publication, the recipient should consider whether such recommendation is appropriate, given the recipient's particular investment needs, objectives and financial circumstances. Desjardins Securities suggests that, prior to acting on any of the recommendations herein, you contact one of our client advisors in your jurisdiction to discuss your particular circumstances. Since the levels and bases of taxation can change, any reference in this publication to the impact of taxation should not be construed as offering tax advice; as with any transaction having potential tax implications, clients should consult with their own tax advisors. Past performance is not a guarantee of future results.

This publication may contain statistical data cited from third party sources believed to be reliable, but Desjardins Securities does not represent that any such third party statistical information is accurate or complete, and it should not be relied upon as such. All estimates, opinions and recommendations expressed herein constitute judgments as of the date of this publication and are subject to change without notice.

Although each company issuing this publication is a wholly owned subsidiary of Desjardins Group, each is solely responsible for its contractual obligations and commitments, and any securities products offered or recommended to or purchased or sold in any client accounts (i) will not be insured by the Federal Deposit Insurance Corporation ("FDIC"), the Canada Deposit Insurance Corporation or other similar deposit insurance, (ii) will not be deposits or other obligations of Desjardins Group, (iii) will not be endorsed or guaranteed by Desjardins Group, and (iv) will be subject to investment risks, including possible loss of the principal invested.

Ranking System

FirstEnergy's rating system reflects our outlook for expected performance of an issuer's equity securities relative to its peer group over the next 12 months.

- A *Top Pick* (Buy) rating represents a security expected to provide a return materially higher than the peer group average.
- An *Outperform* (Buy) rating represents a security expected to provide a return greater than the peer group average.
- A *Market Perform* (Hold) rating represents a security expected to provide a return in line with the peer group average.
- An *Underperform* (Sell) rating represents a security expected to provide a return less than the peer group average.
- A *Speculative Buy* (Buy) rating represents a security where the return potential is high, but the risk of a significant loss is material.

The author of this report hereby certifies that the views expressed in this report accurately reflect his/her personal views about the subject security and issuer.

The author of this report further certifies that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research report.

FirstEnergy Capital Corp. may receive or intends to seek compensation for investment banking services from all issuers under research coverage within the next three months.

Impact

- Enbridge reported first quarter 2007 results that were in line with our estimates.
- Earnings for the quarter improved 19% from the same period last year, benefiting from strong performance from all business units, particularly from *Enbridge Gas Distribution*.
- Our Outperform ranking and target price of $42.90 remain unchanged.

Analysis

- Earnings improved 19% from $190.9 Mm in Q1'06 to $227.2 Mm in Q1'07, in line with our estimate of $225.2 Mm. EPS advanced from $0.56 per share to $0.64 per share during the same period. This was in line with our expectation of $0.64 per share. This boost was largely due to increased contributions from *Enbridge Gas Distribution* and 2005 hurricane proceeds received by Enbridge Offshore Pipelines. The increase in earnings will greatly contribute to the Company achieving its 2007 earnings target of $1.75 to $1.85 per share. Our EPS-FD is unchanged at $1.80 per share.
- Earnings from *Liquids Pipelines* climbed 4% to $68.9 Mm in Q1'07, from the same period last year. Earnings were supported by a full quarter of contributions from the Spearhead and Olympic Pipelines. Gains were limited by lower earnings from the Enbridge System, due to higher labour costs and increased taxes in the Terrace component.
- *Gas Pipelines* earnings rose 61% year-over-year to $25.7 Mm in Q1'07, soundly beating our estimates by $7.9 Mm, due to one-time insurance payments from the 2005 hurricanes. Proceeds included $5.3 Mm towards the replacement of damaged infrastructure and $6.0 Mm for business interruptions.
- *Gas Distribution* earnings gained 27% to $109.4 Mm in Q1'07, from the same period last year. This improvement was the result of colder weather during the quarter. Gains were hindered by decreases from Energy Services and Aux Sable, due to losses on derivative instruments.
- *Sponsored Investments* tumbled 12% from Q1'06 to $17.8 Mm in Q1'07, due to Enbridge Energy Partners incurring $2.0 Mm in losses on derivative financial instruments.
- Dividends per share increased to $0.3075 in Q1'07, up from $0.2875 during the same quarter of 2006. We expect Enbridge will have sufficient earnings to maintain this dividend, and further increase it into 2008.

Enbridge Inc. - ENB $37.15 — May 3, 2007

- The successful conclusion of the Open Season for the Spearhead Expansion (65,000 additional Bbl/d from Chicago, IL to Cushing, OK) shows that Enbridge continues to turn prospects into projects.
- A portion of Line 3 is still operating at 80% of normal pressure after incurring a line break on April 15, 2007. Enbridge expects the line to continue operating at this pressure until at least Q3, until the cause of the break can be determined. This break is not expected to significantly hinder Enbridge's earnings.

Outlook

- Enbridge calls its growth that starts in 2009-2010 the "Big Prize"; these are attractive low-risk projects that are very accretive, based on its existing infrastructure. Southern Access, Spearhead and Line 4 Extension are expected to come on in 2009, while Southern Lights and Alberta Clipper are forecast to start-up in 2010. Near term growth expectations over 2007 and 2008 are relatively modest. Enbridge has secured line pipe for its upcoming projects at a price that is favorable, and has lined up contractors for these projects.
- The upcoming growth strategy will be primarily organic, with acquisitions in the near term unlikely. Enbridge believes that acquisition assets are highly valued. The Company's gas infrastructure offshore the U.S. Gulf Coast is also well positioned for further organic expansion.
- Enbridge continues to trade at a well-deserved premium EV/EBITDA multiple to its competitors in Canada and the U.S. We continue to rank Enbridge as Outperform with a target price of $42.90.

Ranking System

FirstEnergy's rating system reflects our outlook for expected performance of an issuer's equity securities relative to its peer group over the next 12 months.

- A *Top Pick* (Buy) rating represents a security expected to provide a return materially higher than the peer group average.
- An *Outperform* (Buy) rating represents a security expected to provide a return greater than the peer group average.
- A *Market Perform* (Hold) rating represents a security expected to provide a return in line with the peer group average.
- An *Underperform* (Sell) rating represents a security expected to provide a return less than the peer group average.
- A *Speculative Buy* (Buy) rating represents a security where the return potential is high, but the risk of a significant loss is material.

The author of this report hereby certifies that the views expressed in this report accurately reflect his/her personal views about the subject security and issuer.

The author of this reports further certifies that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in this research report.

FirstEnergy Capital Corp. may receive or intends to seek compensation for investment banking services from all issuers under research coverage within the next three months.

Enbridge Announces Second Quarter Results

Date Published: 2007-08-01 11:25:35

Company: Enbridge Inc. **Company Ticker:** ENB

Rating: Outperform **Target Price:** 43.40

Analyst: Steven I. Paget

Enbridge reported Q2'07 results that were slightly higher than our estimates. Earnings applicable to common shareholders were $146.5 Mm for the quarter, 15% higher than our estimate of $127.4 Mm. The Company reported diluted EPS of $0.41 per share, compared to our estimate of $0.36 per share. This is mainly the result of higher than expected earnings from *Gas Distribution* and *Sponsored Investments*. During the second quarter, *Gas Distribution* earnings were $23.7 Mm, $12.8 Mm higher than our estimate. The division benefited from customer growth and improved expense management. Earnings from *Sponsored Investments* were $33.4 Mm, $13 Mm higher than our expectations. *Sponsored Investments* was boosted by a dilution gain from Enbridge Energy Partners' issuance of more partnership units in Q2'07.

Earnings from *Liquids Pipelines* were $65.8 Mm, $6.4 Mm lower than our estimate. Earnings from the division were hindered by lower earnings from Enbridge Systems, due to increased compensation expense, higher pipeline integrity costs and increased taxes in the Terrace component. *Gas Pipelines* reported earnings of $13.4 Mm, $4.3 Mm lower than our estimate. Results from the division were impacted by the decline in natural gas production on deliveries to pipelines.

Construction is currently in progress for several pipelines and terminal projects, with a budget of $9 billion in liquids pipelines projects going forward. Management stated on the conference call that the crude oil pipelines will continue to be a key driver of growth for Enbridge.

Ranking System

FirstEnergy's rating system reflects our outlook for expected performance of an issuer's equity securities relative to its peer group over the next 12 months.

- A *Top Pick* (Buy) rating represents a security expected to provide a return materially higher than the peer group average.
- An *Outperform* (Buy) rating represents a security expected to provide a return greater than the peer group average.
- A *Market Perform* (Hold) rating represents a security expected to provide a return in line with the peer group average.
- An *Underperform* (Sell) rating represents a security expected to provide a return less than the peer group average.
- A *Speculative Buy* (Buy) rating represents a security where the return potential is high, but the risk of a significant loss is material.

Opinion: **OUTPERFORM**
12 MONTH TARGET PRICE **$43.40**
Analyst: Steven I. Paget

Impact

- Enbridge reported Q2'07 results that were slightly higher than our estimates.
- We continue to rank Enbridge as Outperform with a 12 month target price of $43.40 per share.

Analysis

- After adjusting for dilution gain on EEP unit issuance, Aux Sable unrealized derivative losses, and weather affecting Enbridge Gas Distribution, earnings were $0.36 per share, as forecast. Actual earnings applicable to common shareholders were $146.5 Mm for the quarter, or $0.41 per diluted share. This is mainly the result of higher than expected earnings from *Gas Distribution* and *Sponsored Investments*. This is still lower than the $157.9 Mm in earnings, or $0.47 per share, reported in Q2'06, due to impact of tax rate changes in Q2'06.

Business Environment

- Canada's National Energy Board (NEB) issued a report on July 27, 2007, that forecasted that Canadian crude oil pipelines may need to constrain oil shipments as soon as the fourth quarter of this year, due to faster than expected production from the oil sands. In the report, the NEB estimates that oil shipments from Western Canada may be constrained until late 2008. What happened to make crude capacity so tight? Our estimates from 2005 show that while conventional oil and synthetic crude production appears in line with our historical estimates, in-situ bitumen production is higher than we forecast in early 2005.
- This lack of spare pipeline capacity underscores the need for the service Enbridge provides – the Company is the leader in moving oil sands-based crude. The Company has a budget of $9 billion in liquids pipelines projects going forward.
- However more capacity is not enough. Oil sands crude also needs new markets if growth projections are to be met: the Company has formed a joint venture with ExxonMobil to consider opening the Texas Gulf Coast market for Canadian crude.
- Enbridge indicated it may not build the $30 billion proposed Alaska Pipeline. Management stated that it will not submit an application unless changes are made to how Alaska is soliciting applications to build the project. Currently the Alaska Gasline Inducement

firstfacts

Enbridge Inc. - ENB $36.27 — August 7, 2007

Act requires companies to submit project proposals by Oct. 1, 2007, but does not require producers to support any new pipeline. Enbridge stated it will not go ahead unless it has resource commitments from producers.

- Enbridge is our best idea among energy infrastructure names. We remain concerned that the equity value will lag in the short-term, with our forecast for a 5.00% yield on the Government of Canada 10-year bond.

Ranking System

FirstEnergy's rating system reflects our outlook for expected performance of an issuer's equity securities relative to its peer group over the next 12 months.

- A *Top Pick* (Buy) rating represents a security expected to provide a return materially higher than its peer group average.
- An *Outperform* (Buy) rating represents a security expected to provide a return greater than its peer group average.
- A *Market Perform* (Hold) rating represents a security expected to provide a return in line with its peer group average.
- An *Underperform* (Sell) rating represents a security expected to provide a return less than its peer group average.
- A *Speculative Buy* (Buy) rating represents a security where the return potential is high, but the risk of a significant loss is material.

1Q07 EPS beats expectations

ENB earned $0.65/share on a clean operating basis, above our estimate of C$0.60 and the consensus of $0.62. Including net negative special items of $2.4mm, ENB reported 1Q07 earnings of $0.64/FD share. ENB reaffirmed 2007 EPS guidance range of $1.75-1.85 and its long term EPS growth rate of 8-10%.

Details C$8 billion Liquids projects portfolio returns

On its conference call, ENB discussed its large oil pipelines project portfolio. ENB focused on the expected returns of the projects (low to mid teens returns on average), the near term earnings impact, and actions to manage capital costs. The 2007/2008 earnings impact is modest but a greater contribution kicks in during the 2009-2010 timeframe when major projects such as Southern Access, Alberta Clipper, and Southern Lights projects come online. ENB noted that it has already secured pipe for Southern Access, Alberta Clipper, the Line 4 Extension, Southern Lights, and Waupisoo pipeline projects as part of its long term strategy to manage capital costs and ensure solid project execution.

Successful Spearhead Pipeline Expansion Open Season

Recently, ENB announced the successful conclusion of the Spearhead Pipeline Expansion open season. ENB received binding commitments in excess of the available 30 mbd threshold. ENB proposes to add a number of pumping stations to increase the annual average capacity of the Spearhead pipeline further to 190mbd from 125mbd. Of the 65mbd increase, 30mbd will be available to committed shippers, while the other 35mbd will be available to spot shippers.

We still like ENB; Maintaining estimates

No change to our 2007 and 2008 EPS estimates of C$1.80 and C$1.95, respectively. We reiterate our Buy investment recommendation on ENB shares.

Company Description

Enbridge (ENB) is one of North America's largest pipeline and energy infrastructure operators. Its pipeline systems deliver more than 2 mmbbls/day of crude oil and liquids. ENB is involved in the natural gas transmission through the Alliance and Vector pipelines. ENB also operates Canada's largest natural gas distribution company, Enbridge Gas Distribution, which serves 1.7 million customers.

Stock Data

Average Daily Volume	708,042
Brokers Covered (FirstCall)	NA

Strong Organic Growth Projects

ENB earned $0.65/share on a clean operating basis, above our estimate of C$0.60 and the consensus of $0.62. Including net negative special items of $2.4mm, ENB reported 1Q07 earnings of $0.64/FD share. Gas Distribution and Services segment was above our estimate, while Liquids Pipelines was below. Corporate charges were lower than modeled. Most other segments were in line (see Table 2).

Results in Liquids Pipelines were below our estimate due to lower than expected results in the Enbridge System, Athabasca System, and Spearhead Pipelines. In Gas Distribution & Services, better than expected earnings at EGD and Noverco were the main reasons for the better than expected segment results.

ENB confirmed its 2007 EPS guidance range of C$1.75-1.85. Our existing EPS estimate is already within this range at $1.80, as is consensus at 1.79.

Items of Interest

ENB currently has the largest portfolio of organic growth opportunities in its history. A large number of projects will come into service over the next few years. On its conference call, the company highlighted a few key points:

- ENB continues to progress with the US$1.5 billion Southern Access Expansion which will have the capacity to transport 400mbd of crude from Alberta to Chicago by 2009.
- ENB and EEP continue to work on the C$2.4 billion Alberta Clipper project and the C$0.3 billion Line 4 Extension Project. Anticipated in service date for the Line 4 Extension pipeline is late 2009, while an in service date of 2010 is expected for the Alberta Clipper Project.
- ENB continues to progress with the US$1.3 billion Southern Lights Diluent line project. The US$1.3 billion project will provide 180mbd of diluent capacity from the US Midwest into Alberta.
- ENB continues to progress with its development of contract terminals especially at Hardisty, Stonefell, and Cushing. Also, it continues to work on regional oil sands infrastructure including Waupisoo, Long Lake, Surmont, and the Athabasca expansion.
- Though ENB Offshore has had a slow start over the last two years due to the 2005 Hurricane activity, volumes are expected to increase over the next year as long-delayed deepwater projects produce first hydrocarbons. ENB expects the Neptune project to come on line in 4Q07, with Atlantis in early 2008 and Thunder Horse in early 2009.
- In natural gas, ENB sees excellent long term opportunities for transporting Alaska gas, although they find the near term pace of development is somewhat frustrating. In the lower-48, ENB noted that drilling activity in North and East Texas (Barnett Shale) remains high and that new natural gas infrastructure will be needed over the next several years. ENB also continues to push forward on its Rabaska LNG efforts in Quebec.

Attachment 19

Investment Summary

We reiterate our Buy investment recommendation on ENB shares. We continue to regard ENB as one of the highest quality and best-managed companies in the energy industry.

We expect ENB will be able to grow EPS at an average annual rate of around 10% over a multi-year period, and this growth is largely unaffected by major swings in commodity prices. ENB is *the* major pipeline franchise serving one of the world's fastest growing energy infrastructure markets: the Canadian Oil Sands. ENB even offers a 3% yield.

No change to our 12 month price object of C$43/share. Though ENB shares trade at 21x, the company's EPS growth profile, track record, quality assets, and stability of earnings justifies the premium multiple, in our view.

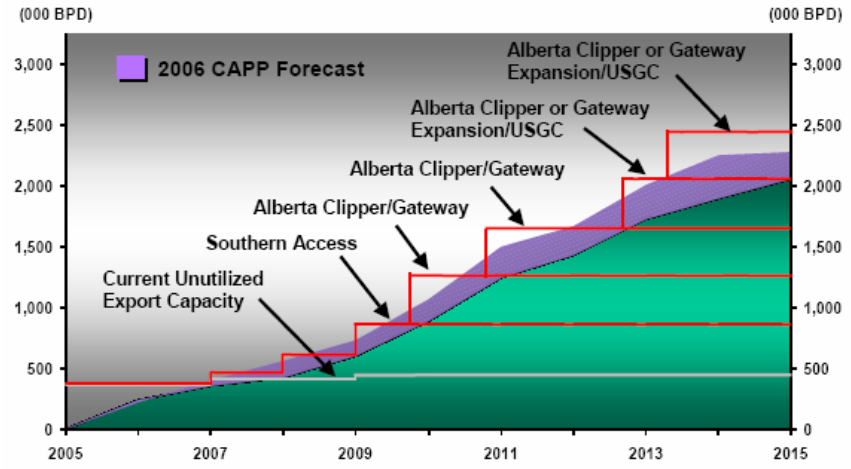

Table 1: Liquids Pipelines Project Risk/Return Portfolio

Project	Capital Magnitude	Expected Completion	Full Life Return	Return Profile	Volume Risk	Capital Cost Risk
Southern Lights	US$1.3	2010	12% + kicker	flat	none	partial
Southern Access Extension	US$0.4	2009	11% floating	flat	none	none
Southern Access Expansion (US) *	US$1.3	2009	11% floating + kicker	flat	none	none on 88%
Southern Access Expansion (Can)	0.2	2009	9% floating	flat	none	none
Waupisoo	0.5	2008	mid teens	tilted	partial	partial
Athabasca Laterals	0.2	2006	mid teens	tilted	partial	50/50
Contract Terminaling	0.8	2007-9	low teens	tilted	none	full
Spearhead Expansion	0.1	2009	mid teens	tilted	none	full
Alberta Clipper *	2.4 (2006 $)	2010	typical	typical	typical	typical
Line 4 Extension	0.3	2009	typical	typical	typical	typical

Source: Enbridge. Note: * Southern Access Expansion US and US portion of Alberta Clipper flow to ENB via EEP incentive distributions which further enhance return at ENB level.

ENB helps facilitate the rapid growth of the Canadian oil sands play with timely pipeline expansions.

Price Objective Basis & Risk

No change to our 12-month price objective to C$43/share. Our 12-month price objective reflects our DDM/DCF model's fair value assessment of ENB's long term cash flows, discounted at 7.0%, assuming a long term nominal growth rate of 5.0%. We have a high degree of confidence in this growth rate given ENB's extraordinary set of organic investment opportunities driven by the rapidly expanding oil sands play. While ENB is trading near all-time highs with the potential for some consolidation in the near term, we believe in the long term price potential of the shares.

Significant changes in North American energy supply or demand patterns, interest rates, and project delays could affect ENB's ability to achieve our financial estimates and price objective.

2Q07 EPS in line with expectations

ENB earned $0.36/share on a clean operating basis, above our estimate of C$0.33 and consensus of $0.35. Including net special items of $17mm, ENB reported 2Q07 earnings of $0.41/FD share. CFPS matched our est of $0.86/shr.

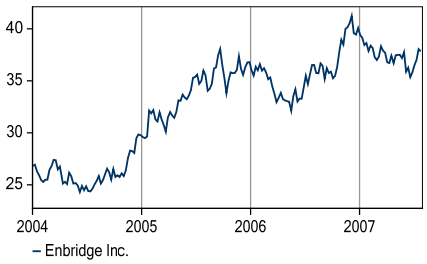
Liquids portfolio to drive strong earnings growth

Enbridge expects its C$9bn of oil ongoing pipeline projects to drive an annual earnings growth of 16% for ENB Liquids segment and 20% for the EEP Liquids segment in 2006-11. Management continues to target an average 5-year EPS growth of 8-10% for ENB corp, with the bulk of earnings growth occurring in 2009. See Charts 1, 2, and 5 for project by project details.

Alberta Clipper Project regulatory filing & capex revision

ENB in 2Q07 filed an application with the NEB to construct a 1,000 mile crude oil pipeline from Hardisty, AB to Superior, WI. It raised project capex estimates for the Canadian segment of the line to C$2bn and for the US segment to US$1.0bn to reflect skilled labor shortage and to incorporate added environmental and engineering costs. The project is expected to be completed by end-2009.

We still like ENB; Maintaining estimates



No change to our 2007 and 2008 EPS estimates of C$1.80 and C$1.95, respectively. We reiterate our Buy investment recommendation on low risk ENB shares, which we view as especially attractive in this volatile market environment.

Company Description

Enbridge (ENB) is one of North America's largest pipeline and energy infrastructure operators. Its pipeline systems deliver more than 2 mmbbls/day of crude oil and liquids. ENB is involved in the natural gas transmission through the Alliance and Vector pipelines. ENB also operates Canada's largest natural gas distribution company, Enbridge Gas Distribution, which serves 1.7 million customers.

Stock Data

Average Daily Volume	674,904
Brokers Covered (FirstCall)	NA
Shares / Common - Dual Listed	1.00

Strong Organic Growth Projects

ENB confirmed its 2007 EPS guidance range of C$1.75-1.85. Our existing EPS estimate and consensus is already within this range at $1.80. ENB also reiterated its medium-term goal of 8-10% average annual EPS growth over the next five years.

ENB earned $0.36/share on a clean operating basis, above our estimate of C$0.33 and the consensus of $0.35. Including special items of $17.0mm, ENB reported 2Q07 earnings of $0.41/FD share. Cash flow matched our estimate of C$0.86/FD share. The positive earnings surprise was driven by Gas Distribution & Services and International segments, which completely offset lower than expected results from Gas Pipelines and Liquids Pipelines segments. Corporate charges were also lower than modeled. Other segments were in line, Table 3.

Results from Liquids Pipelines were below our estimate given lower than expected earnings from the Enbridge and Athabasca System. In Gas Pipelines, earnings from Alliance pipelines and Enbridge Offshore were lower than expected. Gas Distribution & Services and International segments outperformed on better than expected earnings from EGD and CLH respectively.

Items of Interest

ENB currently has the largest portfolio of organic growth opportunities in its history. Management expects its C$9bn liquids portfolio to drive an annual earnings growth of 16% for the Liquids segment and 20% for the EEP Liquids segment in 2006-11. Management continues to target an average 5-year EPS growth of 8-10% with the steepest earnings growth occurring in 2009.

On its conference call, the company highlighted a few key points:

- For the **Alberta Clipper Project**, ENB filed a project application with the NEB. It raised capex for the Canadian segment to C$2.0bn and the U.S. segment to US$1.0bn to reflect the shortage of skilled labor and incorporate the cost of detailed environmental and engineering studies. The project is expected to be completed by the end of 4Q09.
- For the **Southern Access Expansion**, ENB raised its capex estimates to US$2.1bn (Enbridge US$0.3bn, EEP US$1.8bn) from US$1.5bn to reflect higher cost revisions for labor, materials, and rights-of-way. The 400mbd project is expected to be completed in 2009.
- For the **Southern Lights Pipeline**, ENB filed state and federal applications for the U.S. portion of the US$1.3bn project. The 180mbd diluent pipeline is expected to be in service in 2010.
- For the proposed **Gateway Pipeline**, Enbridge is sticking with its prior 2013-14 project start-up timetable despite some press reports regarding Petro-China's concerns about its ability to make Canadian investments. Project fundamentals remain strong as Canadian producers will ultimately need a Pacific Basin "relief valve" to deal with a potential bitumen oversupply in North America long term. Management attributed the slow project progress to the lack of significant oil sands deals from Asian refineries, but still thinks the project will eventually go.

Source: ENB

- ENB is in discussion with **ExxonMobil** for a new pipeline from Patoka, IL to the Gulf Coast. Management plans to transport 400mbd of Canadian crude to the Gulf Coast by 2010 as an additional 2.1mbd of oil sands production is expected to come on-stream by 2016.

- ENB received OEB approval to increase the equity component of its deemed capital structure to 36% from 35%. ENB also filed an application for rates commencing in 2008 based on an Incentive Regulation methodology with the OEB. The IR methodology will decrease the forecasting risk related to weather and provide incentives for ENB to improve service and obtain higher segment returns.

- ENB will proceed with the development of the natural gas storage services at EGD's Southwestern Ontario storage facility after OEB upheld its earlier decision to deregulate prices for new storage services. ENB signed a 2.6 Bcf daily service storage contract in April.

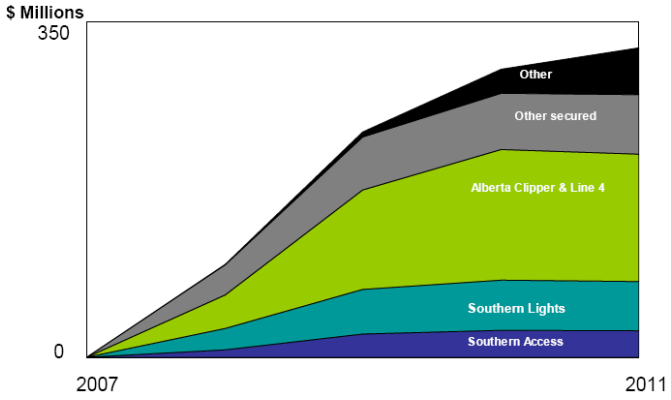
Investment Summary

No change to our 2007 and 2008 EPS estimates of C$1.80 and 1.95, respectively. No change to our 2009 EPS estimates of 2.10.

We reiterate our Buy investment recommendation on ENB shares. We continue to regard ENB as one of the highest quality and best-managed companies in the energy industry. We particularly like the low risk character of the ENB business model, which we view as especially attractive in this volatile market environment.

We expect ENB will be able to grow EPS at an average annual rate of around 10% over a multi-year period, and this growth is largely unaffected by major swings in commodity prices. ENB is *the* major pipeline franchise serving one of the world's fastest growing energy infrastructure markets: the Canadian Oil Sands. ENB even offers a 3% yield.

No change to our 12 month price object of C$43/share. Though ENB shares trade at 21x, the company's EPS growth profile, track record, quality assets, and stability of earnings justifies the premium multiple, in our view.



We are initiating coverage of Enbridge under the US interlisted symbol, ENB, in addition to our current coverage under the Canadian ticker, YENB.

Price objective basis & risk

Enbridge Inc. (YENB)

No change to our 12-month price objective to C$43/share. Our 12-month price objective reflects our DDM/DCF model's fair value assessment of ENB's long term cash flows, discounted at 7.0%, assuming a long term nominal growth rate of 5.0%. We have a high degree of confidence in this growth rate given ENB's extraordinary set of organic investment opportunities driven by the rapidly expanding oil sands play. While ENB is trading near all-time highs with the potential for some consolidation in the near term, we believe in the long term price potential of the shares.

Significant changes in North American energy supply or demand patterns, interest rates, and project delays could affect ENB's ability to achieve our financial estimates and price objective.

* Companies in respect of which MLPF&S or an affiliate has received compensation for investment banking services within the past 12 months.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium, and C - High. INVESTMENT RATINGS, indicators of expected total return (price appreciation plus yield) within the 12-month period from the date of the initial rating, are: 1 - Buy (10% or more for Low and Medium Volatility Risk Securities - 20% or more for High Volatility Risk securities); 2 - Neutral (0-10% for Low and Medium Volatility Risk securities - 0-20% for High Volatility Risk securities); 3 - Sell (negative return); and 6 - No Rating. INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure); 8 - same/lower (dividend not considered to be secure); and 9 - pays no cash dividend.

MLPF&S or one of its affiliates acts as a market maker for the securities recommended in the report: Enbridge Inc..

The company is or was, within the last 12 months, an investment banking client of MLPF&S and/or one or more of its affiliates: Enbridge Inc..

MLPF&S or an affiliate has received compensation from the company for non-investment banking services or products within the past 12 months: Enbridge Inc..

The company is or was, within the last 12 months, a non-securities business client of MLPF&S and/or one or more of its affiliates: Enbridge Inc..

In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: Enbridge Inc..

MLPF&S or an affiliate has received compensation for investment banking services from this company within the past 12 months: Enbridge Inc..

MLPF&S or an affiliate expects to receive or intends to seek compensation for investment banking services from this company within the next three months: Enbridge Inc..

MLPF&S together with its affiliates beneficially owns one percent or more of the common stock of this company. If this report was issued on or after the 10th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 10th day of a month reflect the ownership position at the end of the second month preceding the date of the report: Enbridge Inc..

MLPF&S or one of its affiliates is willing to sell to, or buy from, clients the common equity of the company on a principal basis: Enbridge Inc..

The company is or was, within the last 12 months, a securities business client (non-investment banking) of MLPF&S and/or one or more of its affiliates: Enbridge Inc..

The analyst(s) responsible for covering the securities in this report receive compensation based upon, among other factors, the overall profitability of Merrill Lynch, including profits derived from investment banking revenues.

Other Important Disclosures

UK readers: MLPF&S or an affiliate is a liquidity provider for the securities discussed in this report.

Company Profile:
Enbridge owns Canada's premier diversified petroleum pipeline system. As a pipeline of choice, it transports most of Canada's petroleum production to markets and accounts for most of Canada's petroleum imports by pipeline. Its 100%-owned subsidiary, Enbridge Gas Distribution, is Canada's largest natural gas distributor. Among numerous interests, ENB has a 50% interest in Alliance Pipeline, a 60% interest in Vector Pipeline, and a 42.7% interest in Aux Sable NGL plant.

Ramin Burney - (416) 869-7933

HIGHLIGHTS

- **Reported Q2 2007 earnings: $146.5 million or $0.41 per share vs. $157.9 million or $0.47 per share in Q2 2006 (y/y).**

- **Operational Q2 2007 earnings: $129.5 million or $0.36 per share vs. $118.7 million or $0.35 y/y. Operational EPS was in line with our estimate and was a penny higher than the Street.**

- **Operational earnings were higher y/y mostly because of improved operating margins and customer growth at…**
  …Enbridge Gas Distribution (EGD), higher earnings from Enbridge Energy Partners LP (NYSE-EEP) aided in part by increased ownership, as well as continued strong earnings at CLH in Spain.

- **ENB is still targeting 8% to 10% average annual EPS growth over the 2007-2011 period (mostly back-end weighted).**

- **We are maintaining our EPS estimates**
  Our target price moves to $40.00 from $38.40 as we have increased the P/E multiple to 21x from 20x and the REPS multiple to 18x from 16x, to reflect the expected strong multi-year EPS growth that will begin in 2009 as a result of the current large capital program. Our Sector Perform rating is sustained.

Stock Performance

NATIONAL BANK FINANCIAL

Assessment

If investors believe that Canada has a petroleum future, they must extend their belief to ENB, because we expect it to capture the majority of crude oil transportation projects, since it owns the oil pipelines of choice. ENB remains the premier client server to the Alberta oil sands producers.

ENB **reported Q2 2007 earnings** of $146.5 million or $0.41 per share compared with $157.9 million or $0.47 per share last year when it benefited from the impact of income tax rate reductions.

Q2 2007 operational earnings were $129.5 million or $0.36 per share vs. $118.7 million or $0.35 per share y/y after excluding some non-recurring items such as a $11.8 million dilution gain on an Enbridge Energy Partners LP (NYSE-EEP) unit issuance. Operational EPS was in line with our estimate and was a penny higher than the Street.

Operational earnings increased y/y at **Gas Distribution** (improved operating margins and customer growth at Enbridge Gas Distribution (EGD)), **Sponsored Investments** (increased ownership in Enbridge Energy Partners LP (NYSE-EEP) – averaged 16% in H1 2007 vs. 10.9% in H1 2006), and the **International** segment (CLH earnings increased to $16.7 million from $14.7 million aided by higher transportation tariffs, higher volumes and the impact of a stronger euro).

ENB is still targeting 8% to 10% average annual EPS growth over the next five years – 2007-2011 (mostly back-end weighted).

Earnings growth will start ramping up in a very meaningful way by 2009 once major crude oil mainline pipeline expansion projects currently under development, such as the Southern Access Pipeline Expansion or SAP (cost: US$2.1 billion vs. previous US$1.6 billion estimate), Alberta Clipper or AC (cost: Cdn$3.1 billion) and the Line 4 extension (cost: Cdn$300 million) start coming into service.

We expect common share dividend growth to be limited to not more than $0.02 per quarter ($0.08 annualized) for the next couple of years, as ENB preserves cash for its ongoing $9-billion capital program.

We are maintaining our EPS estimates for 2007 and 2008. Our target price moves to $40.00 from $38.40 as we have increased the P/E multiple to 21x from 20x and the REPS multiple to 18x from 16x, to reflect the expected strong multi-year EPS growth that will begin in 2009 as a result of the current large capital program. Our Sector Perform rating is sustained.

Q2 2007 Highlights

Reported Earnings ($Mln)	Q2 '07	Q2 '06
Liquids Pipelines	$65.8	$68.6
Gas Pipelines	$13.4	$15.9
Sponsored Investments	$33.4	$23.2
Gas Distribution and Services	$23.7	$34.0
International	$24.0	$21.3
Corporate	($13.8)	($5.1)
TOTAL	**$146.5**	**$157.9**

Source: ENB

Liquids Pipelines

Q2 Earnings: $65.8 million vs. $68.6 million y/y.

Earnings decreased y/y mostly owing to a reduction in **Enbridge System (ES)** earnings.

ES earnings decreased to $45.1 million from $48.9 million y/y, reflecting 1) higher compensation expense driven by the strong Alberta labour market, 2) higher pipeline

NATIONAL BANK FINANCIAL

integrity costs and 3) increased taxes in the Terrace component.

ENB's 65% interest in the **Olympic Pipe Line Company (Olympic)** (acquired on Feb. 1, 2006) contributed earnings of $1.5 million vs. $2 million y/y, while the Spearhead Pipeline (SP) (which began operations in early March 2006) contributed earnings of $3.1 million vs. $2.4 million y/y.

Gas Pipelines

Q2 Earnings: $13.4 million vs. $15.9 million y/y.

This segment includes **Alliance Pipeline (U.S.) (APUS), Vector Pipeline (VP)**, and **Enbridge Offshore Pipelines (EOP)**.

Gas Pipelines' earnings decreased y/y mostly due to lower earnings at EOP ($3 million vs. $6 million y/y) arising from the impacts of natural gas production declines on deliveries to the pipelines as well as the delay of expected start-ups of key production sources. ENB is not expecting significant earnings improvements at EOP until the 2008/09 timeframe when larger projects are scheduled to come into service (Atlantis, Thunderhorse, Shenzi). Earnings at VP and APUS increased y/y.

Sponsored Investments

Q2 Earnings: $33.4 million vs. $23.2 million y/y.

This segment includes results from ENB's interests in **Enbridge Energy Partners LP (NYSE-EEP)** (now 15%), and **Enbridge Income Fund (TSX-ENF.un)** (41.9% equity interest; 72% economic interest).

Earnings increased y/y mostly due to $11.8 million of dilution gains in EEP, higher ownership interest in EEP (averaged 16% vs. 10.9% last year), partially offset by tax rate changes at ENF.un.

EEP's earnings contribution increased to $12.2 million from $8.5 million y/y. EEP benefited from higher throughput on its principal natural gas and liquids systems driven by developments in the Bossier Sands and Barnett Shale plays, offset by higher operating expenses. During Q2, there were $11.8 million of EEP dilution gains resulting from unit offerings that ENB did not participate in. By 2009, we expect ENB to begin sharing in EEP's premium distribution.

ENF.un's Q2 earnings increased by $1 million y/y to $9.7 million. ENB is looking at a number of different options regarding its large stake in ENF.un now that Bill C-52 (the Canadian Federal government's Tax Fairness Plan) has become law. ENB has stated that it will not be rolling any more corporate assets into ENF.un for the time being.

Gas Distribution and Services

Q2 Earnings: $23.7 million vs. $34 million y/y.

Earnings decreased y/y mostly due to the positive impact of income tax reductions in Q2 2006 ($28.9 million).

EGD's earnings increased y/y mostly due to the impact of colder weather as well as improved operating margins and customer growth. For 2007, the Ontario Energy Board (OEB) has approved for EGD, a rate base of $3.7457 billion (vs. $3.6336 billion in 2006), a deemed common equity of 36% vs. the previous 35% (38% was requested), and a rate of return on common equity of 8.39% (vs. 8.74% in 2006). By 2008, EGD is expected to begin operating under a multi-year incentive regulation (IR) methodology, which should enhance returns.

Aux Sable (AS) incurred a loss of $5.9 million vs. earnings of $0.2 million y/y due to the recording of $8.3 million of unrealized fair value losses on derivative financial instruments during the quarter. Fractionation margins were positive throughout H1 2007 and AS recognized earnings under the upside sharing agreement during Q2 and expects to recognize more in Q3 and Q4.

NATIONAL BANK FINANCIAL

International

Q2 Earnings: $24.0 million vs. $21.3 million y/y.

ENB's 25% investment in **CLH** (Spain's largest refined products transportation and storage business) contributed earnings of $16.7 million vs. $14.7 million y/y. CLH earnings increased due to higher transportation tariffs, a 2% increase in volumes, lower operating costs and the impact of the stronger euro. CLH continues to benefit from continued strong demand for refined products and storage in Spain and we expect demand for more storage in Spain to continue. Earnings from **OCENSA/CITCol** (24.7% interest) were flat y/y at $8.1 million.

Corporate

Q2 Costs: ($13.8 million) vs. ($5.1 million) y/y.

Corporate costs increased y/y reflecting the $14 million of positive income tax rate changes in the prior year, partially offset by lower interest expense resulting from lower levels of corporate debt as well as the capitalization of interest on certain growth projects financed by corporate debt.

Major Projects Update	
Southern Access Pipeline Expansion (SAP)	Work continues on the multi-phase SAP with final completion slated for 2009. The capital cost has been revised to US$2.1 bln from US$1.6 bln.
Alberta Clipper (AC)	In Q2 2007, ENB filed an application with the NEB to build the Cdn portion of AC. EEP will file later this year a similar application with the FERC for the U.S. portion. The Cdn$3.1 bln AC is expected to be in service by mid-2010.
Line 4 Extension Project	In Q2 2007, ENB filed an application with the NEB to build the $0.3 bln project which is expected to be in service by early 2009.
Waupisoo Pipeline (WP)	In Q2 2007, ENB began construction on the $0.5 bln WP. It is expected to be in service by mid-2008.
Southern Lights Diluent Pipeline (SLDP)	In Q2 2007, ENB filed state & federal applications for the U.S. portion of the US$1.3 bln SLDP. ENB filed an application with the NEB to build the Cdn portion in Q1 2007. Construction activities are underway and the 180,000 b/d diluent line is expected to be in service by 2010.
Source: ENB	
For more detailed project descriptions please refer to our initiation of coverage report dated July 5, 2007.	

ENB-ExxonMobil Pipeline Proposal (Patoka, Illinois, to U.S. Gulf Coast)

On June 5, 2007, ENB and ExxonMobil (NYSE-XOM) announced that they were looking at jointly building a new pipeline that would transport crude oil (mostly Canadian heavy crude) from Patoka, Illinois, to Beaumont, Texas, and then finally to Houston and the Gulf Coast region. The proposed 30-inch pipeline would have a capacity of about 400,000 b/d and could be in service by the end of 2010 if the project is moved in a swift fashion. According to ENB, discussions with potential shippers have been so far very positive.

The pipeline would use the existing right-of-way (ROW) of XOM's recently reversed Pegasus Pipeline (65,000 b/d capacity), follow the Pegasus route to Beaumont, Texas, and then proceed further down to Houston. Crude oil would reach the Patoka area via ENB's Mainline through the Mustang Pipeline and perhaps the proposed SAP extension (Chicago to Patoka).

This new proposal is a more desirable way of bringing Canadian crude oil down all the way to

NATIONAL BANK FINANCIAL

the U.S. Gulf Coast as it will utilize existing ROW. If built, it would lessen the need for ENB's proposed bullet pipeline from Alberta to the Gulf Coast or even Altex Energy Ltd.'s proposed 250,000 b/d pipeline which also aims to transport Alberta crude to the Gulf Coast.

Gateway Project (GP)

PetroChina Co. recently abandoned plans to be part of ENB's $4.2 billion Gateway Project (GP). GP consists of a proposed 525,000 b/d crude oil pipeline from Alberta to the B.C. west coast and a 193,000 b/d diluent pipeline running parallel in the opposite direction. Last year, the original in-service date of late 2009/early 2010 was pushed back to the 2012-14 timeframe.

PetroChina had refused to renew the Memorandum of Understanding (MOU) which it signed with ENB in April 2005 wherein it agreed to commit to 50% of the originally proposed 400,000 b/d crude oil pipeline capacity (now 525,000 b/d). PetroChina cited very slow progress and lack of support from the Canadian producers and government to help bring crude oil to the Far East.

We are not surprised by these turn of events. It has been clear over the past year that Canadian crude producers were focusing on serving the growing U.S. demand for their crude oil instead of opening new markets in the Far East. Moving the Canadian crude oil down to the U.S. Midwest and ultimately to the Gulf Coast has been the main priority.

ENB has stated that despite the PetroChina pullout, it has seen a broadening of interest in Southeast Asia for GP and that the fundamentals remain quite strong. ENB is now looking to build GP in the 2013-14 timeframe and China, other Asia Pacific countries (i.e. Japan, South Korea, Singapore), as well as California could be potential markets for the Canadian crude. ENB believes that the main reason why GP has been delayed is that no Southeast Asian refining company has been able to make a significant investment in the oil sands so that the oil can be moved to Southeast Asia.

We believe that a post-2015 timeframe for GP is more likely and that down the road, PetroChina could reassess its position and eventually rejoin the project.

Financial and Outlook

Funds from operations in Q2 2007 increased to $305.5 million from $262 million y/y. During Q2 2007, ENB spent $457.8 million on capital expenditures, up from $247.2 million y/y.

At the end of Q2 2007, ENB's debt to total capitalization was about 59.7%, down from 62.2% at the end of Q2 2006, mostly due to the $566.4 million equity issuance in Q1 2007. In 2008, ENB plans to issue additional debt, common equity and possibly hybrids as a number of projects near completion. ENB could potentially look at asset sales to help fund its capital program.

ENB's adjusted 2007 EPS guidance remains in the $1.75 to $1.85 range while its target dividend payout is in the 60-70% range.

In 2007, ENB intends to spend about $2.5 billion on capital projects, financed through cash from operations, issuance of debt and equity.

VALUATION

We are using an average of P/E multiples and a dividend-based support/residual price approach to arrive at our 12-month target price.

Our target price of $40.00 is calculated by applying the following: 1) a 21x P/E multiple (previously 20x) to our estimated 2008 EPS of $1.93 giving us a $40.53 target price. 2) Using our dividend-based support/residual price approach: for the 2008 fiscal year, we are estimating EPS of $1.93, DPS of $1.31, and retained EPS (REPS) of $0.62. Our assumed long-term corporate bond yield of nominally 6.25% is tax-effected to 4.63% using a dividend-tax-credit divisor of 1.35. This generates a support price of $28.30 and using a REPS-multiple of 18x (previously 16x), a residual price of $11.16, for a target price of $39.46.

NATIONAL BANK FINANCIAL

DISCLOSURES:

Ratings And What They Mean:

PRIMARY STOCK RATING: NBF has a three-tiered rating system that is relative to the coverage universe of the particular analyst. Here is a brief description of each: **Outperform –** The stock is expected to outperform the analyst's coverage universe over the next 12 months;
Sector Perform – The stock is projected to perform in line with the sector over the next 12 months; **Underperform –** The stock is expected to underperform the sector over the next 12 months.

SECONDARY STOCK RATING: Under Review – Our analyst has withdrawn the rating because of insufficient information and is awaiting more information and/or clarification; **Tender** – Our analyst is recommending that investors tender to a specific offering for the company's stock; **Restricted** – Because of ongoing investment banking transactions or because of other circumstances, NBF policy and/or laws or regulations preclude our analyst from rating a company's stock.

INDUSTRY RATING: NBF has an Industry Weighting system that reflects the view of our Economics & Strategy Group, using its sector rotation strategy. The three tiered system rates industries as **Overweight**, **Market Weight** and **Underweight**, depending on the sector's projected performance against broader market averages over the next 12 months.

RISK RATING: NBF utilizes a four-tiered risk rating system, **Low**, **Average**, **Above Average** and **Speculative**. The system attempts to evaluate risk against the overall market. In addition to sector-specific criteria, analysts also utilize quantitative and qualitative criteria in choosing a rating. The criteria include predictability of financial results, share price volatility, credit ratings, share liquidity and balance sheet quality.

General

National Bank Financial (NBF) is an indirect wholly owned subsidiary of National Bank of Canada. National Bank of Canada is a public company listed on Canadian stock exchanges.

The particulars contained herein were obtained from sources which we believe to be reliable but are not guaranteed by us and may be incomplete. The opinions expressed are based upon our analysis and interpretation of these particulars and are not to be construed as a solicitation or offer to buy or sell the securities mentioned herein**.**

Research Analysts

The Research Analyst(s) who prepare these reports certify that their respective report accurately reflects his or her personal opinion and that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views as to the securities or companies.

NBF compensates its Research Analysts from a variety of sources. The Research Department is a cost centre and is funded by the business activities of NBF including, Institutional Equity Sales and Trading, Retail Sales, the correspondent clearing business, and Corporate and Investment Banking. Since the revenues from these businesses vary, the funds for research compensation vary. No one-business line has a greater influence than any other for Research Analyst compensation.

Canadian Residents

In respect of the distribution of this report in Canada, NBF accepts responsibility for its contents. To make further inquiry related to this report, Canadian residents should contact their NBF professional representative. To effect any transaction, Canadian residents should contact their NBF Investment advisor.

U.S. Residents

NBF Securities (USA) Corp., an affiliate of NBF, accepts responsibility for the contents of this report, subject to any terms set out above. Any U.S. person wishing to effect transactions in any security discussed herein should do so only through NBF Securities (USA) Corp.

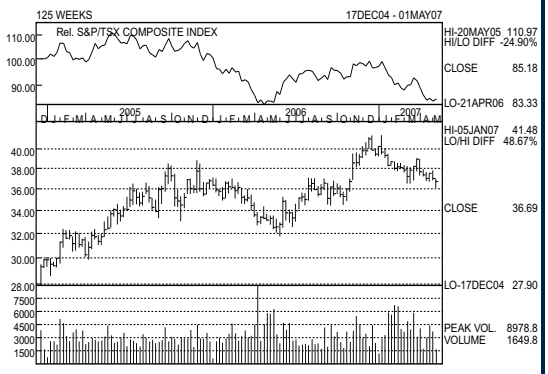
UK Residents

In respect of the distribution of this report to UK residents, NBF has approved this financial promotion for the purposes of Section 21(1) of the Financial Services and Markets Act 2000. NBF and/or its parent and/or any companies within or affiliates of the National Bank of Canada group and/or any of their directors, officers and employees may have or may have had interests or long or short positions in, and may at any time make purchases and/or sales as principal or agent, or may act or may have acted as market maker in the relevant securities or related financial instruments discussed in this report, or may act or have acted as investment and/or commercial banker with respect thereto. The value of investments can go down as well as up. Past performance will not necessarily be repeated in the future. The investments contained in this report are not available to private customers. This report does not constitute or form part of any offer for sale or subscription of or solicitation of any offer to buy or subscribe for the securities described herein nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

This information is only for distribution to non-private customers in the United Kingdom within the meaning of the rules of the Regulated by the Financial Services Authority.

Copyright

This report may not be reproduced in whole or in part, or further distributed or published or referred to in any manner whatsoever, nor may the information, opinions or conclusions contained in it be referred to without in each case the prior express written consent of National Bank Financial.



NBF is a member of CIPF

ENB - ADDITIONAL COMPANY RELATED DISCLOSURES

If a company specific disclosure is not found herein for a listed company, NBF at this time does not provide research coverage or stock rating for the company in question

In the past 12 months NBF acted as financial advisor, fiscal agent, or underwriter to the company that is the subject of this report and received remuneration for its services.

NBF is an indirect wholly owned subsidiary of the National Bank of Canada. From time to time the National Bank of Canada may enter into lending or financial arrangements with companies that are the subject of NBF Research Reports. At the date of this report, National Bank of Canada is a lender to the company which is the subject of this report. NBF and/or its Affiliates may have a position in the securities mentioned herein and may make purchases and/or sales of these securities from time to time in the open market or otherwise. On the last day of the month preceding the date of this report, NBF and its Affiliates held in the aggregate less than 1% of the outstanding shares (of any class of equity securities) of this issuer. Enbridge Inc. (TSX: ENB; 36.69; NYSE: ENB)

Q1/07 Results Generally In Line

Sector Perform
Average Risk

Impact

Neutral.

First Impression

- **Q1/07 Results.** Enbridge's normalized first quarter 2007 EPS was $0.64 compared to our estimate of $0.62, consensus of $0.62 and first quarter 2006 normalized EPS of $0.62. All of the segments were essentially in line except for Gas Distribution, which came in higher than expected. Part of this segment's better-than-expected results are from Enbridge Gas Distribution (EGD), which as a cost of service regulated entity could be attributable to a quarterly timing difference.
- **Conference Call.** A conference call will be held Wednesday, May 2, 2007 at 9:30 AM Eastern to discuss the first quarter results. The dial in number is 1-800-591-6945 (passcode: 86318585).

Company Description

Enbridge is involved in energy transportation and distribution in North America and internationally.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

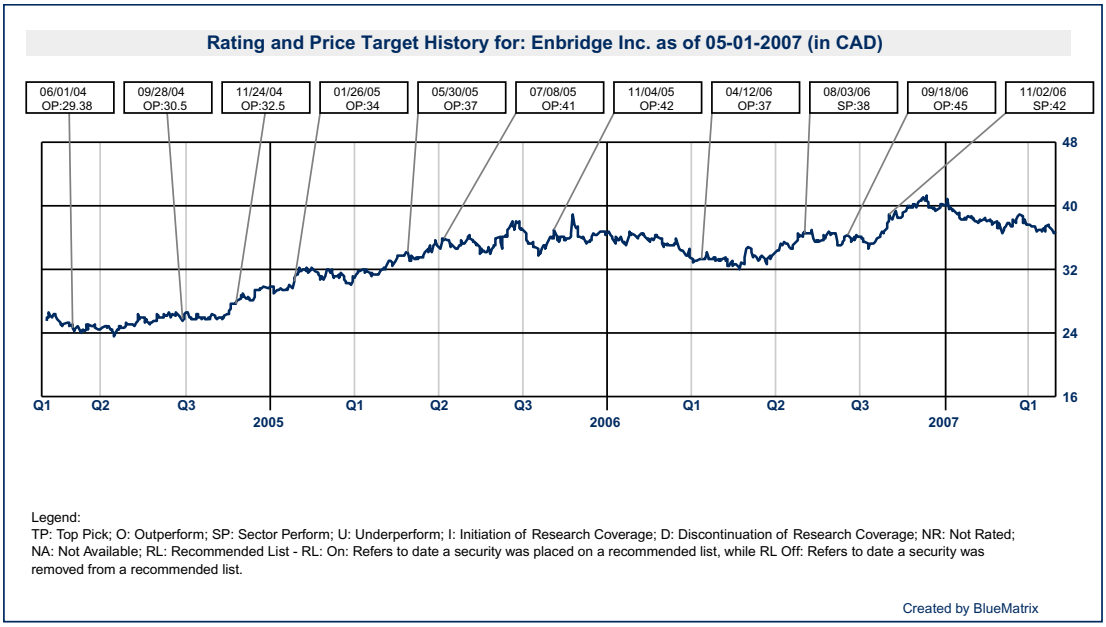
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.



Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For purposes of disclosing ratings distributions, regulatory rules require member firms to assign all rated stocks to one of three rating categories--Buy, Hold/Neutral, or Sell--regardless of a firm's own rating categories. Although RBC Capital Markets' stock ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings/IB Services
RBC Capital Markets

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	445	42.62	189	42.47

Float (MM):	332.3		

Strategic Ownership: Noverco - 9.5%

Event

Enbridge reported Q1/07 results.

Investment Opinion

- **Q1/07 Results Largely In Line.** Enbridge's Q1/07 normalized EPS was $0.64 compared to our estimate of $0.62, and $0.62 a year ago. All of the segments were essentially in line except for Gas Distribution, which came in higher than expected due to slightly better-than-expected results from Enbridge Gas Distribution and Energy Services.
- **Equity Issue Expected for 2008.** Management disclosed that it intends to issue equity sometime in 2008 to fund its capex program. The company is still evaluating its needs and potential financing sources, but management mentioned that the current thinking on size is similar to the amount issued in Q1/07 ($566 million). Further, management commented that it will also look at using hybrid equity securities as part of its financing mix.
- **On Pace to Meet 2007 EPS Guidance.** Management reiterated that it continues to expect 2007 EPS to fall within its $1.75 to $1.85 EPS range.
- **Modest Near-Term Growth; "Big Prize" Starts in 2009-2010.** Over the past three years, EPS has grown at a compound annual rate of about 7%. Management stated that it expects EPS growth to be "modest relative to recent past." However, with the slate of sizable projects expected to come on-stream beginning in 2009, management remains comfortable with its 5-year compound annual EPS growth target of 8% to 10%, which implies 2011 EPS of between $2.56 to $2.80.
- **Low End of 5-Year EPS Growth Target Appears Achievable.** Based on the project portfolio and expected returns set out by management in the Q1/07 presentation, it appears that the low-end of the 8% to 10% average annual compound EPS growth rate through 2011 is achievable.
- **Valuation.** Our target price for Enbridge of $42.00 (unchanged) is based on a 12-month dividend distribution one-year forward of $1.33 and a required dividend yield of 3.10%. We believe a required yield of 3.10% is appropriate based on expected interest rate levels, Enbridge's growth prospects and its risk profile.

Q1/07 Highlights

Enbridge's Q1/07 normalized EPS was $0.64 compared to our estimate of $0.62, and $0.62 a year ago. All of the segments were essentially in line except for Gas Distribution, which came in higher than expected due to slightly better-than-expected results from Enbridge Gas Distribution and Energy Services. A table that sets out the Q1/07 earnings compared to our estimate and Q1/06 earnings is shown in Exhibit 2 (next page).

Key Takeaways

- **Equity Issue Expected for 2008.** Management disclosed that it intends to issue equity sometime in 2008 to fund its capex program. The company is still evaluating its needs and potential financing sources, but management mentioned that the current thinking on size is similar to the amount issued in Q1/07 ($566 million). Further, management commented that it will also look at using hybrid equity securities as part of its financing mix.
- **On Pace to Meet 2007 EPS Guidance.** Management reiterated that it continues to expect 2007 EPS to fall within its $1.75 to $1.85 EPS range.
- **Modest Near-Term Growth; "Big Prize" Starts in 2009-2010.** Over the past three years, EPS has grown at a compound annual rate of about 7%. Management stated that it expects EPS growth to be "modest relative to recent past." However, with the slate of sizable projects expected to come on-stream beginning in 2009, management remains comfortable with its 5-year compound annual EPS growth target of 8% to 10%, which implies 2011 EPS of between $2.56 to $2.80.
- **Project-by-Project Information.** In the Q1/07 presentation, the company set out details regarding expected return, volume risk, return profile and capital cost risk on a project-by-project basis. We have shown this table in Exhibit 1.

Exhibit 1: Project Information (In C$ millions except as noted)

Project	Capital Magnitude ($ billions)	Expected Completion	Full Life Return	Return Profile	Volume Risk	Capital Cost Risk
Southern Lights	US$1.3	2010	12% + kicker	flat	none	partial
Southern Access Extension	US$0.4	2009	11% floating	flat	none	none
Southern Access Expansion U.S.	US$1.3	2009	11% floating + kicker	flat	none	none on 88%
Southern Access Expansion Can.	$0.2	2009	9% floating	flat	none	none
Waupisoo	$0.5	2008	mid teens	tilted	partial	partial
Athabasca Laterals	$0.2	2006	mid teens	tilted	partial	50/50
Contract Terminaling	$0.8	2007-9	low teens	tilted	none	full
Spearhead Expansion	$0.1	2009	mid teens	tilted	none	full
Alberta Clipper	$2.4	2010	typical	typical	typical	typical
Line 4 Extension	$0.3	2009	typical	typical	typical	typical

"Tilted" refers to lower initial returns increasing over time.

"Typical" refers to parameters consistent with other large projects (e.g. Southern Access)

Low-End of 5-Year EPS Growth Target Appears Achievable

Based on the project portfolio and expected returns set out by management in the Q1/07 presentation, it appears that the low-end of the 8% to 10% average annual compound EPS growth rate through 2011 is achievable. In Exhibit 3, we have set out our assumptions

regarding the achieved ROEs and equity components for the various projects that Enbridge is currently developing. The exhibit also contains our analysis that the low-end of the 5-year annual compound EPS growth target of 8% to 10% appears to be achievable.

Exhibit 3: Estimated Earnings Growth Through 2011 ($MM Except EPS)

	Enbridge Estimates		RBC Capital Markets Assumptions			
Project	Capital Magnitude ($ billions)	Full Life Return	Realized Return	ENB Portion	Equity Component	Earnings Impact (C$ MM)

Valuation

Our valuation for Enbridge is largely based on a dividend yield approach. When the current yield of the ten-year Government of Canada benchmark bond is below 6%, we believe that a dividend yield approach is an appropriate valuation method for Enbridge. Our target price for Enbridge of $42.00 is based on a 12-month dividend distribution one-year forward of $1.33 and a required dividend yield of 3.10%. We believe a required yield of 3.10% is appropriate based on expected interest rate levels, Enbridge's growth prospects and its risk profile.

Price Target Impediment

Our price target is based on the assumption that Enbridge can complete the list of projects that it is pursuing on time and on budget and that these projects will positively contribute to earnings. The target price further assumes that the company's risk profile does not materially change. There could be negative implications for Enbridge's target price if actual events differ from these assumptions.

Company Description

Enbridge is involved in energy transportation and distribution in North America and internationally.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

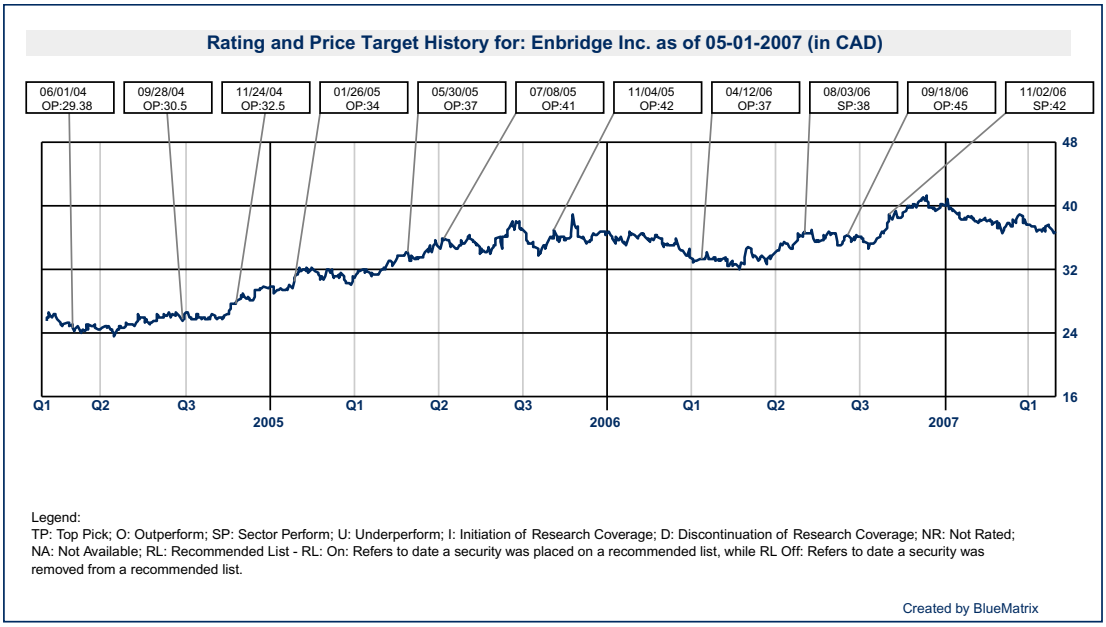
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.



Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For purposes of disclosing ratings distributions, regulatory rules require member firms to assign all rated stocks to one of three rating categories--Buy, Hold/Neutral, or Sell--regardless of a firm's own rating categories. Although RBC Capital Markets' stock ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Enbridge Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Enbridge Inc. in the past 12 months.

RBC Dominion Securities Inc. makes a market in the securities of Enbridge Inc. and may act as principal with regard to sales or purchases of this security.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Enbridge Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Enbridge Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Enbridge Inc.

RBC Capital Markets is currently providing Enbridge Inc. with non-securities services.

RBC Capital Markets has provided Enbridge Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Enbridge Inc. with non-securities services in the past 12 months.

Additional Disclosures

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets Corporation, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable

for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Strategic Ownership: Noverco - 9.5%

Event

Enbridge reported Q2/07 results; revision to our 2008 estimates and roll-out of 2009 estimates.

Investment Opinion

- **Q2/07 Results In Line.** Enbridge's Q2/07 normalized EPS was $0.36 compared to our estimate of $0.36 and Q2/06 normalized EPS of $0.35. The Thomson One consensus EPS estimate was $0.35. All of the company's segments were broadly in line with expectations.
- **About $600 Million of Common Equity Still the Likely Scenario.** There is an approximate $600 million equity funding gap that management needs to address in 2008. The company has a number of alternatives including common equity, hybrid securities, asset sales (e.g. Enbridge Income Fund (ENF) units, or rolldowns to either ENF or Enbridge Energy Partners), or any combination of the three. Although management indicated an interest on the Q1/07 call in issuing hybrid securities, our recent discussions, combined with comments on the Q2/07 call, lead us to believe that a common share issuance is currently the most likely scenario.
- **Increasing 2008 EPS Estimate; Rolling Out 2009 Estimate.** We have increased our 2008 EPS estimate to $1.85 (from $1.77) to primarily reflect the allowance for equity used during construction (AEDC) that we expect will be booked for both the Alberta Clipper and Southern Lights pipelines. We have also rolled out our 2009 EPS estimate of $2.20. We expect a sharp increase in 2009 earnings due to the commissioning of new projects (e.g. Southern Access, Waupisoo, contract terminals) coupled with increased AEDC from Alberta Clipper and Southern Lights.
- **Valuation.** Our $38.00/share price target (about US$36.00) is based on our belief that the company will be able to increase its dividend in 2008 from its current annual dividend of $1.23/share to $1.30/share based on a 70% payout ratio, and to $1.44/share in 2009 based on a 65% payout ratio, which is the mid-point of management's 60% to 70% target payout range. We continue to use a required yield of 3.60%, which is in line with both the 1-year and 3-year historical averages for the company. We estimate that a 10 bp change in our yield assumption changes our price target by approximately $1.00 per share.

Second Quarter Results

Enbridge's Q2/07 normalized EPS was $0.36 compared to our estimate of $0.36 and Q2/06 normalized EPS of $0.35. The Thomson One consensus EPS estimate was $0.35. Exhibit 1 provides a summary of Q2/07 earnings compared to our estimates and Q2/06 results.

Source: Company reports, RBC Capital Markets estimates

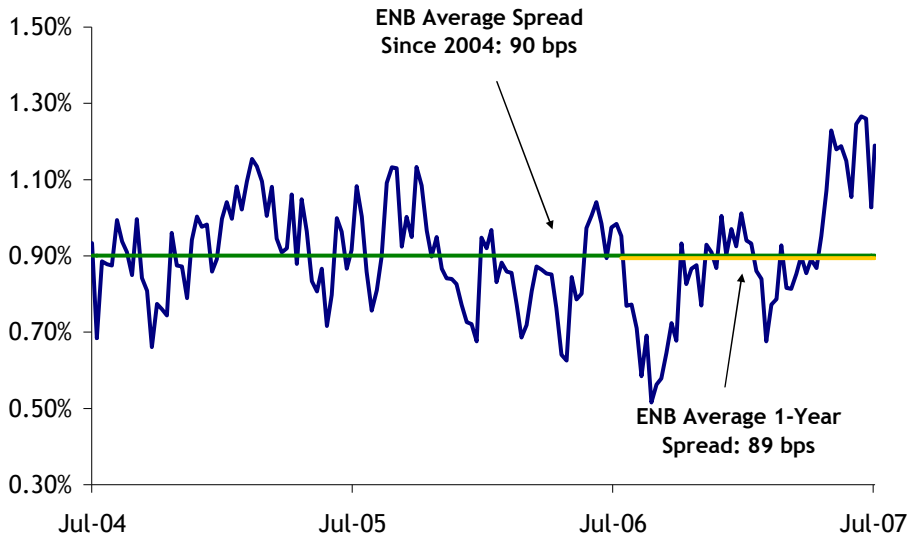
Second Quarter Highlights

- **Liquids Pipelines:** Earnings for the quarter were down $2.8 million primarily due to lower earnings on the Enbridge System. Higher compensation expense, higher maintenance costs and increased taxes on the Terrace component were cited as the key drivers for the lower year-over-year results. On the conference call, management noted that higher labour costs will likely continue to drag on earnings through the end of the current Incentive Tolling Settlement term (end of 2009). As such, it appears that 2006 results ($202 million in earnings) for the core Enbridge System might be the high mark through the current ITS term.
- **Gas Pipelines:** Earnings for Gas Pipelines were down $2.5 million as a result of a decline in earnings from Enbridge Gas Offshore; this was due to lower throughput as a result of the natural decline from existing Gulf of Mexico production coupled with delays bringing new production on stream due to Hurricanes Katrina and Rita. Looking forward, we expect new laterals coming into service to result in a modest improvement in earnings.
- **Sponsored Investments:** Increased earnings of $4.0 million primarily resulted from an increase in the company's interest in EEP compared to Q2/06 (average of about 16% in Q2/07 compared to 10.9% in Q2/06). Earnings are expected to continue to improve as a result of higher earnings at EEP primarily due to new projects.
- **Gas Distribution and Services:** Earnings increased by $4.1 million as a result of higher earnings at EGD, Aux Sable and Energy Services offset by lower results from Noverco and CustomerWorks. Over our forecast period, improved earnings for the entire segment are expected to be driven primarily from EGD due to continued customer growth and the likely move to incentive regulation beginning in 2008, and the commissioning of its 182 MW Ontario wind project in 2008.
- **International:** A $2.7 million increase in earnings was primarily attributable to an increased contribution from CLH as a result of a strong Euro, higher volumes and higher transportation tariffs.

Increasing 2008 EPS Estimate and Rolling Out 2009 Estimate

Although we remain comfortable with our 2007 EPS estimate, we have increased our 2008 EPS estimate to reflect the allowance for equity used during construction (AEDC) that we expect will be booked on Alberta Clipper and Southern Lights coupled with other minor revisions to our financial model. As such, our 2008 EPS estimate increases from $1.77 to $1.85.

We have rolled out our financial model resulting in a 2009 EPS estimate of $2.20. After fairly modest EPS growth in 2007 and 2008, Enbridge's earnings are expected to ramp up sharply as the company begins to bring into service a number of its liquids pipelines projects including Southern Access, Waupisoo, and contract terminals. However, the biggest driver behind the expected increase in earnings is a forecast AEDC for both the Alberta Clipper (about $75 million) and Southern Lights (about $60 million) projects. Enbridge should be able to book AEDC on Alberta Clipper as it is a rolled-in pipeline under the existing Mainline coupled with toll principles that explicitly provide for AEDC. On Southern Lights, management expects that it will be able to book AEDC as a result of its long-term shipper agreements. As such, we have included earnings from both projects during construction in our revised financial forecast.



Shares Appear Fairly Valued

In our yield-based valuation that results in our price target of $38.00/share, we are looking for an increase in the current $1.23/share annual dividend to $1.30/share for 2008, and $1.44/share in 2009. Our forecast dividends imply a payout ratio of 70% in 2008 and 65% in 2009. Management has stated that it is comfortable with a payout ratio at the high-end of its 60% to 70% target range in the near-term. As earnings begin to ramp up (i.e. 2009), we expect the payout ratio to move back to the mid-point of the target range.

Based on our dividend forecasts, we estimate that one-year from now, investors will be expecting $1.37/share in dividends to be paid over the following 12-months (i.e. from August 2008 to July 2009). In our valuation, we have used a required yield of 3.60%, which is composed of a 4.50% expected 10-year GOC bond yield (based on forward curve) and a 0.90% spread. Our selected 0.90% spread is similar to both the 1-year and 3-year historical average spreads. We estimate that a 10 basis point change in our spread assumption would change our price target by $1.00 per share.

In Exhibit 2, we have charted Enbridge's historical dividend yield spread compared to the 10-year GOC. Currently, Enbridge is trading near 3-year highs with respect to its dividend yield spread.

Exhibit 2: Historical Dividend Yield Spread (GOC 10-year yield less ENB forward dividend yield)

Source: RBC Capital Markets estimates

Valuation

Our valuation for Enbridge is largely based on a dividend yield approach. When the current yield of the ten-year Government of Canada benchmark bond is below 6%, we believe that a dividend yield approach is an appropriate valuation method for Enbridge. Our $38.00/share price target is based on our belief that the company will be able to increase its dividend in 2008 from its current annual dividend of $1.23/share to $1.30/share based on a 70% payout ratio, and to $1.44/share in 2009 based on a 65% payout ratio, which is the mid-point of management's 60% to 70% target payout range. We continue to use a required yield of 3.60%, which is in line with both the 1-year and 3-year historical averages for the company. A 10 bp change in our yield assumption changes our price target by approximately $1.00 per share.

Price Target Impediment

Our price target is based on the assumption that Enbridge can complete the list of projects that it is pursuing on time and on budget and that these projects will positively contribute to earnings. The target price further assumes that the company's risk profile does not materially change. There could be negative implications for Enbridge's target price if actual events differ from these assumptions.

Company Description

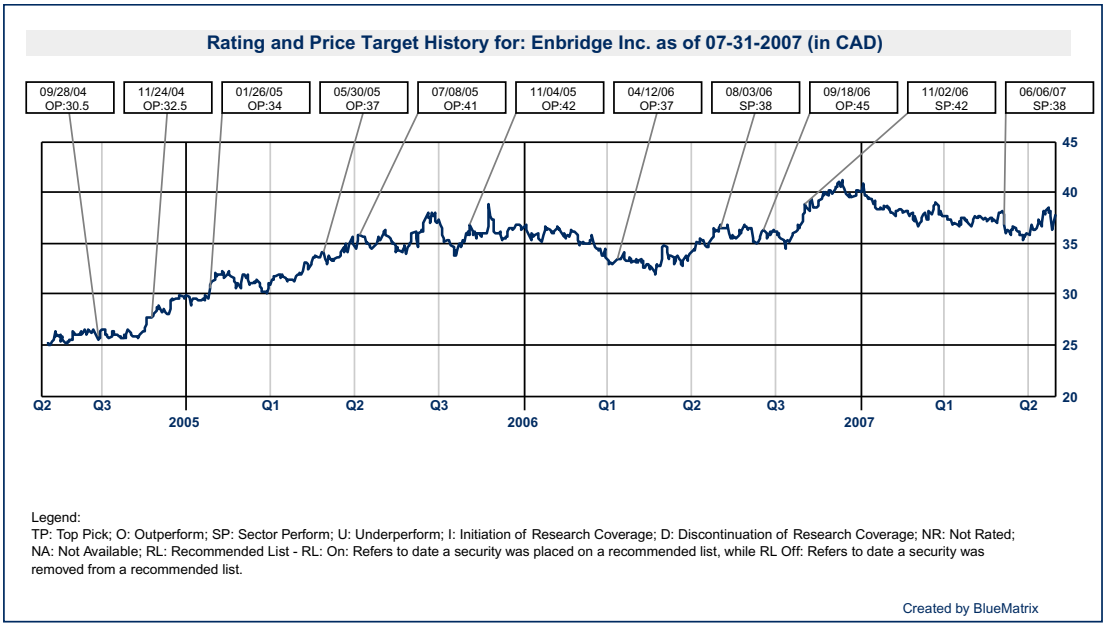
Enbridge is involved in energy transportation and distribution in North America and internationally.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector.

Ratings



Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For purposes of disclosing ratings distributions, regulatory rules require member firms to assign all rated stocks to one of three rating categories--Buy, Hold/Neutral, or Sell--regardless of a firm's own rating categories. Although RBC Capital Markets' stock ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Q1/F07 EPS A Slight/Mild Beat

Source: Global Insight, Inc.

Event

- Enbridge (ENB) reported Q1/F07 EPS of $0.65 that included $0.014 for a 2005 hurricane related insurance recovery. We were at $0.62 and the Q1/F07 Bloomberg consensus estimate was at $0.626. 2007 EPS guidance of $1.75-$1.85 was reaffirmed.

What It Means

- Q1/07 EPS: The quarter was relatively clean except for a minor hurricane insurance pick-up ($0.014/share positive) and unrealized non-cash hedge losses ($0.02/share negative).
- ENB articulated the shape of its 5-year unchanged 8%-10%/year average organic EPS growth profile. Growth will be skewed a bit lower in 2007-08 and higher in 2009-10-11 with another equity issue or equity hybrid 2008 to support growth.
- This caused us to shave $0.05 off 2008E EPS to $1.95 and $1 off our 1-Yr target to $43/share.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Valuation

- **Valuation: We chose to stay with our 22x P/E for now** but our P/E level bias is a little lower as interest rates creep up. Our 2008E EPS forecast is shaved by $0.05 to reflect ENB's shaping of its guided 5-year average 8%-10%/year EPS growth towards the back-end being higher and front-end lower. The 10-year Canada rate is forecast to increase to 4.40% by Q2/08 according to our economists, up from 4.15% forecast previously, on higher 2008 forecast Canadian and U.S. CPI. Our new 1-Yr target is $43/share, down by $1/share. ENB reconfirmed its 2007 recurring weather normalized EPS guidance at $1.75 to $1.85.
- **Sector Call: We downgraded to Market Weight** from Sector Overweight on January 2, 2007 as energy utility stock values turned fair after a 14% average total return in Q4/F06 and much better than expected U.S. and Canadian jobs growth data at that time. We maintain that view although Q1/F07 underperformance by the group against the S&P/TSX Composite was material due mainly to $3.5 billion of new equity issuance of which $0.5 billion was ENB's., and on higher Canadian and U.S. CPI.

Exhibit 1 – Pipelines' Price Performance 2007-YTD

Source: Bloomberg; Scotia Capital.

- **ENB Stock Performance:** As can be seen in Exhibit 1, **ENB has materially lagged TransCanada as well as the group as a whole** since it issued $0.5 billion of equity in February, 2007. There was some anger amongst ENB shareholders that were hoping (as we were at one time) that 2007 equity financing needs would be taken care of via selling down its 72% of Enbridge Income Fund interest. The Federal government nixed that with its Halloween taxation surprise for income trusts. The recent small oil spill appeared to have led to some further minor pressure on ENB's stock price event though it will have no bearing on earnings. ENB has traded at the highest P/E multiple in the group for many years due to its 50-year plus track record. Some investors have been doubtful that ENB could continue to trade at 20x plus P/E levels. With the LBO/go-private bid probability for BCE, there is a **fresh flow** of income oriented telco money with very few places in Canadian equities to go for yield. ENB is one home for that money that we believe will hold up ENB's P/E multiple unless interest rates keep climbing. **ENB committed to growing its dividend at its EPS growth rate on the call and keep its payout ratio in a 60%-70% range.**

Q1/F07 Results

- **Q1/F07 Earnings:** ENB reported EPS of $0.65 for Q1/F07 that came in a little above our EPS estimate of $0.62 as well as the Bloomberg consensus estimate of $0.626 in a tight $0.62-$0.64 range, **a slight/mild beat**.
- **Q1/F07 Liquids Pipelines:** Q1/F07 earnings of $68.9 million **were up 4%** from $66.3 million in Q1/F06 due to the Spearhead and Olympic Pipeline's contributions as they did not fully contribute to Q1/F06 earnings. The Athabasca System's earnings contribution grew 11% to $13.6 million but that was offset by slightly weaker Mainline contributions.
- **Q1/F07 Gas Pipeline:** Earnings from ENB's three U.S. investments (Alliance, Vector and Enbridge Offshore Pipelines) **increased by 60%** to $25.7 million from $16 million in Q1/F07. This was due mainly to $6 million of hurricane related business interruption insurance. Two years ago, ENB estimated a run rate of $30 million/year, moving to $40 million/year over time for the acquired Shell U.S. Gulf offshore gas pipeline assets. With the strengthening of the Canadian dollar, 2007 contributions will likely be flat with 2006 before

finally rising in 2008 as the Atlantis and Thunder Horse gas fields come on-stream. Some tag end insurance proceeds ($1 million to $2 million) are expected later in 2007.

- **Q1/F07 Sponsored Investments:** Earnings of $17.8 million were **down 12%** versus $20.2 million in Q1/F06 as Enbridge Energy Partners (EEP.N) had a weaker reported $8.2 million (net to Enbridge) in earnings vs. $10.9 million in Q1/F06. However, on an adjusted earnings basis, EEP's Q1/F07 earnings net of non-cash hedge adjustments that swung a negative $4.7 million year-over-year were $10.2 million or 25% higher than Q1/F06's recurring $8.2 million. The recurring strength was due to a slightly higher 16.6% EEP ownership interest as well as higher throughput on the Lakehead System. On April 2, 2007, Enbridge's 16.6% ownership interest was reduced to 15.7% due to an EEP private placement issuance.
- **Q1/F07 Gas Distribution and Services:** Earnings were $109.4 million, **up 27% year-over-year** versus $86 million in Q1/F06. Enbridge Gas Distribution (EGD) was up almost 50% to $86.2 million due mostly to **colder Q1/F07 weather** in Ontario versus Q1/F06. Aux Sable reported weak earnings of $0.5 million that excludes a $2.8 mark-to-market hedge-related loss. Aux Sable did not record any NGL marketing upside sharing earnings in Q1/F07, and will not report any until Q4/F07 even though ENB appears confident of its gains due to locking in non-cash fixed-floating 2007 short-term NGL product hedges.
- **Q1/F07 International:** Total International earnings were flat at $22 million as higher average transportation tariffs at CLH were offset by a $1.1 million negative swing in "Other".
- **Q1/F07 Corporate Loss:** Enbridge's corporate loss for Q1/F07 was $16.8 million compared to $19.4 million year-over-year due to lower interest expenses as a result of the $0.53 billion equity deal.
- **Financing:** Enbridge's debt to capitalization ratio dropped to 59% from 64.5% at December 31, 2006 due to equity issuance and earnings. **ENB stated that it would likely not sell** units in 72% owned EIF to fund 2008 capital requirements but did not elaborate further other than EIF has some growth project for its own that it is pursuing. Financing variations/permutations for its numerous proposed oil and condensate pipeline projects has not been fully determined other than ENB will need equity or equity hybrid some time in 2008. ENB will continue with maintain $1 billion plus in liquidity for economic/cyclical fluctuations. Some projects will require bridge financing prior to terming out near construction completion. ENB generates about $0.5 billion/year of free cash that makes up part of its 2008 financing requirements.
- **Credit Metrics:** Despite Moody's recent ENB credit rating downgrade to Baa1 from A3 (S&P maintained its A- rating with a Stable Outlook) ENB remains comfortable with its credit and financing profile that it admitted would be stretched during the peak of spending $8 billion on committed projects ($20 billion plus potential). Its issue with Moody's rating is therefore simply one of timing of peak debt to total capitalization relative to finished project FCF streams that will strengthen ENB's credit in the end.
- **Line 3 @ 80% Pressure**: We were told that the minor pipeline leak that occurred on ENB's Line 3 would (1) not impact earnings in 2007; and, (2) would not impact the company's expected incentive payment range of $8 million to $12 million for 2007.

Source: Enbridge.

Growth Developments

- **$20 Billion Plus:** With the recent announcement that Enbridge will explore a new oil pipeline from Alberta to the U.S. Gulf Coast, the company's project pipeline is now over $20 billion, as seen in Exhibit 2. On Liquid Pipelines projects, ENB provided a very interesting guideline of return estimates for each of the projects, which range from 9% ROE to the "mid teens" (Exhibit 3) for its various approved projects to date.
- **Oil Sands Oil Production:** ENB previously estimated that incremental Alberta oil sands production will reach 1.8 million bbl/day by 2015 plus 0.3 million bbl/day of condensate required for blending. This should allow **both** ENB's Alberta Clipper and TransCanada's Keystone proposals to proceed. ENB argues its Alberta Clipper's first expansion (2014?) will cost only 25% or US$0.5 billion for an additional 350,000bpd and should be chosen by CAPP over Keystone's potential expansion. ENB's initial 450,000 bpd Clipper project (expandable to 800,000 bpd) will be filed when the tolling methodology for the pipeline has been finalized with shippers. The line would run between Hardisty, Alberta and Superior, Wisconsin. EEP would build the U.S. portion of Alberta Clipper for about US$800 million paralleling ENB's mainline.
- **Southern Access Extension:** ENB previously announced that it will proceed with its Southern Access Extension project for 2009 to provide 400,000 bpd of crude oil delivery capacity to Patoka Ill. U.S. economics will follow the FERC formula of trended original cost (real return plus inflation) while the Canadian benefits of increased volume on the Terrace capacity will be split 50:50 with shippers. If there is no volume pick-up on Terrace, ENB will have nothing to share. There were $6 billion of proposed refinery spending modifications announced by BP and Marathon to use Canadian crude oil to now total about 800,000 bpd of new refiner demand in PADD II for Canadian crude exports.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

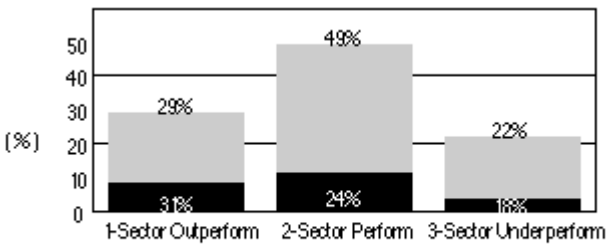
Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.



High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*

- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

*As at April 30, 2007.

Q2/07 EPS Matches, Street, Us

Source: Global Insight, Inc.

Event

- Enbridge (ENB) reported $0.41/share of which recurring Q2/07 EPS was $0.36. This matched the Q2/07 Bloomberg consensus estimate of $0.36 rounded and our $0.35/share estimate. 2007 EPS guidance of $1.75-$1.85 was reaffirmed again.

What It Means

- Q2/07 recurring EPS had no major features/variances worth noting up front. ENB restated its 8%-10%/year organic EPS growth profile skewed lower in 2007-08 and higher in 2009-10-11.
- We downgraded Energy Utilities to Underweight in mid-June on a material negative revision upwards to our 10-Yr Canada interest rate forecasts to 5.25% and 5.40% in Q3/08 and Q4/08, respectively. Given YTD weakness in both the major Canadian pipeline stocks, we continue to prefer them in this high yield equity space, especially with $78/bbl oil.
- ENB's $9B of liquids projects now underway should allow for 16%/year liquids earnings growth through 2011. The vast majority of cost overrun risk is outsourced to ENB's shippers. A 2H/08 equity or hybrid equity deal in the 600M area (less asset sales, if any) is likely to support overall 8%-9%-10%-11%/year organic EPS growth over the next four years.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2006A	$0.56 A	$0.47 A	$0.28 A	$0.50 A	$1.81	22.25
2007E	$0.65 A	$0.41 A	$0.29	$0.51	$1.86	19.94

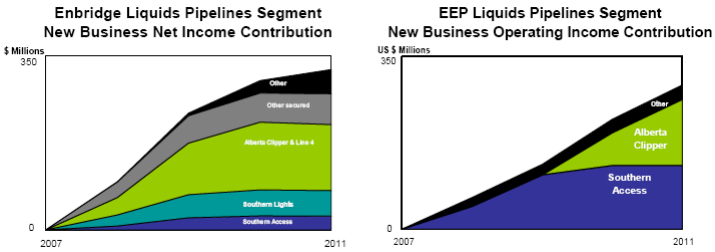
Valuation



- **Valuation:** We use a 20x P/E for ENB as it has the best sustainable organic growth in the group. We shaved 2x P/E in YTD 2007 as long interest rates rose, and are now forecast to go up further to 5.25% for Q3/08 and 5.40% by Q4/08 (was previously 4.40% by Q2/08) according to our economists. Given that ENB "remains comfortable" with its 2007 recurring weather normalized EPS guidance at $1.75 to $1.85, we kept our EPS/targets unchanged. On F/X, ENB stated on its conference call yesterday that a 1¢ C$ change impacts its earnings by $1.1 million.
- **Sector Call: We downgraded to Underweight in mid June 2007** and to Market Weight from Overweight on January 2, 2007. Materially higher interest rates and excellent performance in Q4/06 with no change in interest rates were behind our decisions. The $3.5 billion of new equity issuance in Q1/07 weighed on the sub-sector in YTD 2007 until the BCE LBO deal was announced.
- **ENB Stock Performance:** As can be seen in Exhibit 1, ENB has caught up somewhat with TransCanada as well as the group as a whole lately. Both ENB and TRP had a nice rally in early July/07 as fundamental BCE shareholders looked for a new equity income home while long interest rates rallied back about 25 points. The recent Burnaby B.C. oil spill will weigh on competitor Kinder Morgan and its westbound oil pipeline growth plans. ENB's westbound Gateway was already materially delayed (2013?) and taken out of ENB's stock earlier this year. Some BCE LBO money has sloshed over to ENB and TRP, most notably in early July/07. On its conference call, ENB committed to growing its dividend consistent with its EPS growth rate (8% - 11% over the next four years), and keeping its payout ratio in a 60%-70% range.

Exhibit 1 – Pipelines Price Performance 2007-YTD

Source: Bloomberg; Scotia Capital.

Exhibit 2 – ENB's Earnings Growth Acceleration.

Source: Enbridge.

Q2/07 Results

- **Q2/07 Earnings:** ENB had recurring EPS of $0.36 for Q2/07 net of a $0.05/share gain on EEP unit issuance dilution. This matched the Bloomberg consensus estimate of $0.36 in a tight $0.33-$0.37 range (we were at $0.35/share). There were no major variances.
- **Q2/07 Liquids Pipelines:** Q2/07 earnings of $65.8 million **were down 4.1%** from $68.6 million in Q2/06 due to lower year-over-year Enbridge System results (higher compensation expenses, higher pipeline integrity costs and increased taxes for the Terrace component). This was partially offset by increased throughput on the Spearhead Pipeline. The Athabasca System's earnings declined 6% to $13 million but volumes declined 25% on problems at Suncor's operations. Suncor has a take or pay agreement with Enbridge that mitigated the volume shortfall on earnings. **ENB stated that through 2010, its average earnings growth rate in Liquids Pipelines could be 16% per year (Exhibit 2). ENB also stressed that this growth is locked in commercially.**
- **Q2/07 Gas Pipeline:** Earnings from Alliance, Vector and Enbridge Offshore Pipelines **decreased by 16%** to $13.4 million from $15.9 million in Q2/06. This was due **solely** to a $3 million fall on normal gas production declines at Enbridge Offshore Gas Pipelines that were not offset by new gas production sources (Thunderhorse, Atlantis) coming on stream. The Alliance and Vector Pipelines both marginally increased their earnings.

- **Q2/07 Sponsored Investments:** Earnings of $33.4 million versus $23.2 million in Q2/06 were due solely to a non-recurring $11.8 million unit dilution gain at EEP. Enbridge Income Fund contributed $9.7 million recurring versus $8.7 million in Q2/06. Enbridge Energy Partners (EEP.N) reported $0.64/unit versus a $0.605/unit average forecast in a $0.55-$0.69/unit range on stronger natural gas processing. On April 2, 2007, Enbridge's 16.6% EEP interest was reduced to 15.7% due to EEP's private unit issue and further to 15.0% as noted.
- **Q2/07 Gas Distribution and Services:** Earnings were $23.7 million, **down 30% year over year** versus $34 million in Q2/06. Enbridge Gas Distribution (EGD) earnings of $17.6 million were up sharply over a Q2/06 loss of $5.1 million due to colder weather, improved expense management, customer growth, and higher storage revenues. CustomerWorks' contribution fell $2.2 million due to a regulatory decision to ban CustomerWorks from supplying services to Enbridge Gas. Aux Sable reported a $5.9 million loss versus Q2/06 earnings of $0.2 million due to the recognition of $8.3 million unrealized fair value losses on derivate financial instruments partly offset by an unknown amount of fractionation margin upside sharing. The segment as a whole reported a $28.9 million gain due to the revaluation of future income taxes due to tax rate changes and a $3.8 million gain in Q2/07 for lower 2011 corporate tax rates.
- **EGD's 2007 Rate Case Final:** On July 5, 2007, the OEB approved a 3.1% increase to EGD's rate base to $3.746 billion, as well as a 1% increase in the equity component of its deemed capital structure to 36%. The allowed 2007 ROE fell to 8.39% from 8.74% in 2006. Upon being questioned on why the Enbridge still holds the asset with such a low ROE ENB replied: (1) it is credit rating agency friendly with low risk and low volatility; (2) it generates significant free cash flow that will be used to fund future growth projects; and, (3) the asset could lead to strategic opportunities down the road.
- **Q2/07 International:** Total International earnings improved 13% to $24 million due to (1) higher transportation tariffs at CLH; (2) higher volumes at CLH; and, (3) a stronger €.
- **Q2/07 Corporate Loss:** Enbridge's corporate loss for Q2/07 was $13.8 million compared with a loss of $5.1 million year over year due to a $14 million realized gain in Q2/06 due to the revaluation of future income taxes. On a comparable basis, corporate costs improved by over 25% year over year on lower interest expenses due to lower corporate debt levels and $22 million of interest capitalized in Q2/07 (versus $7 million in Q2/06) on the company's $9 billion of liquids growth projects.
- **Financing:** Enbridge's debt to capitalization ratio dropped to 59.7% in Q2/07 from 62.2% one year earlier. Selling its 72% stake in EIF "still remains an objective" but not likely in 2008. ENB stated it would need about $600 million in equity or equity hybrid equivalents (less asset sales, if any) some time in 2H 2008 (previously announced but now more articulated). ENB will continue to maintain $1 billion plus in liquidity for adverse market conditions. It currently has $4 billion of available credit on a consolidated basis. Some projects will require bridge financing prior to terming out near construction completion. ENB generates about $0.5 billion/year of free cash.

- **Credit Metrics:** Moody's Q1/07 ENB credit rating downgrade to Baa1 from A3 (S&P maintained its A- rating with a Stable Outlook) was behind the widening of ENB's debt premium over TRP's but well below TransAlta's (See Exhibit 4). The larger spike in TransAlta's credit premium was due to the debt market believing (as the equity market still does to some degree) that TA could be an LBO candidate plus TA's debt being rated BBB. ENB remains comfortable with its credit and financing profile that it admitted would be stretched during the peak of spending $9 billion on committed projects ($20 billion plus potential overall). Moody's downgraded ENB primarily on financing and execution risks if its massive build out program.

Exhibit 4 – Credit Spread Deterioration

Source: PC Bond.

$20B of Growth Developments

- **ExxonMobil JV:** Enbridge recently announced a new JV' with ExxonMobil to explore a new oil pipeline project to the U.S. Gulf Coast from Patoka down to Beaumont Texas using most of ExxonMobil's right of way. On its Liquid Pipelines projects, ENB has provided a guideline of return estimates for each project ranging from 9% ROE to the "mid teens" (Exhibit 5).
- **Alberta Clipper:** A 15-year cost of service type agreement (NEB plus 2.25% ROE, indeed cost recover and no supply risk) was agreed to with shippers. The 36-inch pipe will allow for capacity to be increased to 800,000 bpd by adding pumping stations when required. The new oil pipeline will be put into an existing right of way to add 450,000 bpd between Hardisty Alberta and Superior Wisconsin by mid-2010. FERC approval filings are expected in August 2007, while NEB approval filings were completed in Q2/07. The cost estimates for the Canadian portion have increased to $2 billion from $1.4 billion previously. On the U.S. portion, ENB stated EEB's cost estimate has also increased, to US$1 billion, from US$0.8 billion previously. The higher cost estimates are due to a shortage of skilled labour.
- **EEP's Southern Access: This oil pipeline expansion from Superior to Chicago will be EEP's largest project at US$1.8 billion,** up from US$1.3 billion. We are told that 88% of the cost overrun is net to EEP's U.S. shippers and 12% is net to EEP. We assume ENB has similar features in all of its multi-year pipeline projects. Construction is now underway. EEP raised US$320 million via issuing 5.9 million Class C units and another US$310 million for 5.3 million Class C units plus expanded its credit facility to US$1.5 billion to support this project and others that total about US$5 billion. As U.S. throughput capacity is added, EEP's Lakehead oil pipeline system will shift to full cost of service tolls under a 30-year term that provides a 9% real ROE and assumes 55% equity. ENB will earn 50% of EEPs' incremental earnings that are forecast to grow at 20%/year prior to further EEP unit dilutions.

Exhibit 5 – Liquid Pipelines Project Risk/Return Portfolio

Project	Capital Magnitude ($ billions)	Expected Completion	Full Life Return	Return Profile	Volume Risk	Capital Cost Risk

* Southern Access Expansion U.S. and U.S. portion of Alberta Clipper flow to ENB via EEP incentive distributions which further enhances return at ENB level.

Source: Enbridge.

- **Southern Access Extension:** ENB is proceeding with its Southern Access Extension for 2009 to provide 400,000 bpd of crude oil delivery capacity to Patoka Ill. U.S. economics will follow the FERC formula of trended original cost (real return plus inflation) while the Canadian benefits of increased volume on the Terrace capacity will be split 50:50 with shippers. If there is no volume pick-up on Terrace, ENB will have nothing to share.
- **Spearhead Pipeline:** During Q2/07, ENB completed its Open Season for the pipeline that will see an increase of 65,000 bpd to Cushing, Oklahoma from Chicago. The 65,000 bpd increase will be split 30,000 bpd committed and 35,000 bpd for spot shippers.
- **Waupisoo Pipeline:** Following AEUB approval in Q1/07, ENB began construction of the $0.5 billion 30-inch crude oil pipeline that is still expected to be in service in mid-2008.
- **Oil Sands Oil Production Rising:** ENB estimates Alberta oil sands production will increase 2.1 million bpd by 2016 from 1.8 million bpd by 2015 last forecast 90 days ago. **Both** ENB's Alberta Clipper and TransCanada's expanded Keystone pipeline projects should proceed now. However, ENB stated that only 400,000 bpd would be available by 2010 for export to the U.S., so there is still a race as to who is first to build. ENB argues its Alberta Clipper's first expansion (2014?) will cost only 25% or US$0.5 billion for an additional 350,000 bpd and should be chosen by CAPP over TRP Keystone's potential expansion post 2010.
- **Possible East Coast Expansion**: ENB stated on its conference that it was in "very, very, very" early stages of considering a crude oil pipeline expansion from Buffalo to possibly Philadelphia.

Longer Term LNG, Gas Pipelines, Wind, Gateway

- **Quebec LNG:** ENB is happy with the progress made at its Rabaska Quebec LNG terminal. It may proceed to finalize construction permits but no construction will occur until long-term LNG supplies are contracted.
- **Frontier Gas Pipelines Delayed Further:** ENB is not happy with the new Governor's call for interest to construct the Alaska pipeline as ENB believes there will be no project until the Alaska gas producers agree to it and long-term shipper contracts are established**.** On MacKenzie, ENB does not have a direct active role at this stage but stated that both will eventually be required in North America.
- **Ontario Wind Project A Go:** The 50% owned 182 MW Bruce County wind farm received approval on July 20, 2007 to proceed from the Ontario government's OMB and the Ministry of the Environment. ENB stated that the cost overrun appears to be about 10% or $440 million versus $400 million budgeted. Construction has started.
- **Gateway Not Dead:** ENB stated the project was not dead as there has been a broadening of interest from South Korean, Japanese and Singapore refineries for Canadian crude lately. The hold-up has been, in part, due to no Chinese oil refining major buying into a significant play in the Alberta oil sands to date.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

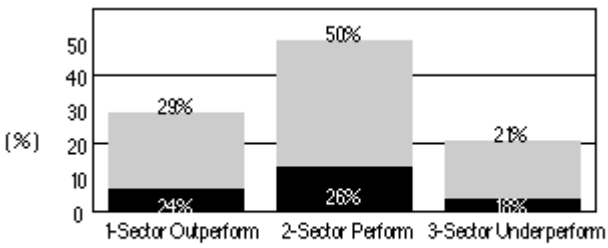
Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.



High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*

- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

*As at July 31, 2007.

Q2/07 EPS Matches, Street, Us

Source: Global Insight, Inc.

Event

- Enbridge (ENB) reported $0.41/share of which recurring Q2/07 EPS was $0.36. This matched the Q2/07 Bloomberg consensus estimate of $0.36 rounded and our $0.35/share estimate. 2007 EPS guidance of $1.75-$1.85 was reaffirmed again.

What It Means

- Q2/07 recurring EPS had no major features/variances worth noting up front. ENB restated its 8%-10%/year organic EPS growth profile skewed lower in 2007-08 and higher in 2009-10-11.
- We downgraded Energy Utilities to Underweight in mid-June on a material negative revision upwards to our 10-Yr Canada interest rate forecasts to 5.25% and 5.40% in Q3/08 and Q4/08, respectively. Given YTD weakness in both the major Canadian pipeline stocks, we continue to prefer them in this high yield equity space, especially with $78/bbl oil.
- ENB's $9B of liquids projects now underway should allow for 16%/year liquids earnings growth through 2011. The vast majority of cost overrun risk is outsourced to ENB's shippers. A 2H/08 equity or hybrid equity deal in the 600M area (less asset sales, if any) is likely to support overall 8%-9%-10%-11%/year organic EPS growth over the next four years.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2006A	$0.56 A	$0.47 A	$0.28 A	$0.50 A	$1.81	22.25

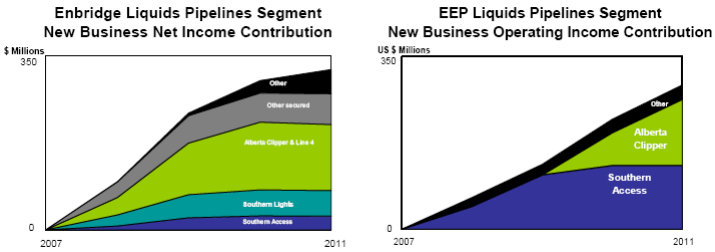
Valuation



- **Valuation:** We use a 20x P/E for ENB as it has the best sustainable organic growth in the group. We shaved 2x P/E in YTD 2007 as long interest rates rose, and are now forecast to go up further to 5.25% for Q3/08 and 5.40% by Q4/08 (was previously 4.40% by Q2/08) according to our economists. Given that ENB "remains comfortable" with its 2007 recurring weather normalized EPS guidance at $1.75 to $1.85, we kept our EPS/targets unchanged. On F/X, ENB stated on its conference call yesterday that a 1¢ C$ change impacts its earnings by $1.1 million.
- **Sector Call: We downgraded to Underweight in mid June 2007** and to Market Weight from Overweight on January 2, 2007. Materially higher interest rates and excellent performance in Q4/06 with no change in interest rates were behind our decisions. The $3.5 billion of new equity issuance in Q1/07 weighed on the sub-sector in YTD 2007 until the BCE LBO deal was announced.
- **ENB Stock Performance:** As can be seen in Exhibit 1, ENB has caught up somewhat with TransCanada as well as the group as a whole lately. Both ENB and TRP had a nice rally in early July/07 as fundamental BCE shareholders looked for a new equity income home while long interest rates rallied back about 25 points. The recent Burnaby B.C. oil spill will weigh on competitor Kinder Morgan and its westbound oil pipeline growth plans. ENB's westbound Gateway was already materially delayed (2013?) and taken out of ENB's stock earlier this year. Some BCE LBO money has sloshed over to ENB and TRP, most notably in early July/07. On its conference call, ENB committed to growing its dividend consistent with its EPS growth rate (8% - 11% over the next four years), and keeping its payout ratio in a 60%-70% range.

Exhibit 1 – Pipelines Price Performance 2007-YTD

Source: Bloomberg; Scotia Capital.

Exhibit 2 – ENB's Earnings Growth Acceleration.

Source: Enbridge.

Q2/07 Results

- **Q2/07 Earnings:** ENB had recurring EPS of $0.36 for Q2/07 net of a $0.05/share gain on EEP unit issuance dilution. This matched the Bloomberg consensus estimate of $0.36 in a tight $0.33-$0.37 range (we were at $0.35/share). There were no major variances.
- **Q2/07 Liquids Pipelines:** Q2/07 earnings of $65.8 million **were down 4.1%** from $68.6 million in Q2/06 due to lower year-over-year Enbridge System results (higher compensation expenses, higher pipeline integrity costs and increased taxes for the Terrace component). This was partially offset by increased throughput on the Spearhead Pipeline. The Athabasca System's earnings declined 6% to $13 million but volumes declined 25% on problems at Suncor's operations. Suncor has a take or pay agreement with Enbridge that mitigated the volume shortfall on earnings. **ENB stated that through 2010, its average earnings growth rate in Liquids Pipelines could be 16% per year (Exhibit 2). ENB also stressed that this growth is locked in commercially.**
- **Q2/07 Gas Pipeline:** Earnings from Alliance, Vector and Enbridge Offshore Pipelines **decreased by 16%** to $13.4 million from $15.9 million in Q2/06. This was due **solely** to a $3 million fall on normal gas production declines at Enbridge Offshore Gas Pipelines that were not offset by new gas production sources (Thunderhorse, Atlantis) coming on stream. The Alliance and Vector Pipelines both marginally increased their earnings.

- **Q2/07 Sponsored Investments:** Earnings of $33.4 million versus $23.2 million in Q2/06 were due solely to a non-recurring $11.8 million unit dilution gain at EEP. Enbridge Income Fund contributed $9.7 million recurring versus $8.7 million in Q2/06. Enbridge Energy Partners (EEP.N) reported $0.64/unit versus a $0.605/unit average forecast in a $0.55-$0.69/unit range on stronger natural gas processing. On April 2, 2007, Enbridge's 16.6% EEP interest was reduced to 15.7% due to EEP's private unit issue and further to 15.0% as noted.
- **Q2/07 Gas Distribution and Services:** Earnings were $23.7 million, **down 30% year over year** versus $34 million in Q2/06. Enbridge Gas Distribution (EGD) earnings of $17.6 million were up sharply over a Q2/06 loss of $5.1 million due to colder weather, improved expense management, customer growth, and higher storage revenues. CustomerWorks' contribution fell $2.2 million due to a regulatory decision to ban CustomerWorks from supplying services to Enbridge Gas. Aux Sable reported a $5.9 million loss versus Q2/06 earnings of $0.2 million due to the recognition of $8.3 million unrealized fair value losses on derivate financial instruments partly offset by an unknown amount of fractionation margin upside sharing. The segment as a whole reported a $28.9 million gain due to the revaluation of future income taxes due to tax rate changes and a $3.8 million gain in Q2/07 for lower 2011 corporate tax rates.
- **EGD's 2007 Rate Case Final:** On July 5, 2007, the OEB approved a 3.1% increase to EGD's rate base to $3.746 billion, as well as a 1% increase in the equity component of its deemed capital structure to 36%. The allowed 2007 ROE fell to 8.39% from 8.74% in 2006. Upon being questioned on why the Enbridge still holds the asset with such a low ROE ENB replied: (1) it is credit rating agency friendly with low risk and low volatility; (2) it generates significant free cash flow that will be used to fund future growth projects; and, (3) the asset could lead to strategic opportunities down the road.
- **Q2/07 International:** Total International earnings improved 13% to $24 million due to (1) higher transportation tariffs at CLH; (2) higher volumes at CLH; and, (3) a stronger €.
- **Q2/07 Corporate Loss:** Enbridge's corporate loss for Q2/07 was $13.8 million compared with a loss of $5.1 million year over year due to a $14 million realized gain in Q2/06 due to the revaluation of future income taxes. On a comparable basis, corporate costs improved by over 25% year over year on lower interest expenses due to lower corporate debt levels and $22 million of interest capitalized in Q2/07 (versus $7 million in Q2/06) on the company's $9 billion of liquids growth projects.
- **Financing:** Enbridge's debt to capitalization ratio dropped to 59.7% in Q2/07 from 62.2% one year earlier. Selling its 72% stake in EIF "still remains an objective" but not likely in 2008. ENB stated it would need about $600 million in equity or equity hybrid equivalents (less asset sales, if any) some time in 2H 2008 (previously announced but now more articulated). ENB will continue to maintain $1 billion plus in liquidity for adverse market conditions. It currently has $4 billion of available credit on a consolidated basis. Some projects will require bridge financing prior to terming out near construction completion. ENB generates about $0.5 billion/year of free cash.

Source: Company reports; Scotia Capital estimates.

- **Credit Metrics:** Moody's Q1/07 ENB credit rating downgrade to Baa1 from A3 (S&P maintained its A- rating with a Stable Outlook) was behind the widening of ENB's debt premium over TRP's but well below TransAlta's (See Exhibit 4). The larger spike in TransAlta's credit premium was due to the debt market believing (as the equity market still does to some degree) that TA could be an LBO candidate plus TA's debt being rated BBB. ENB remains comfortable with its credit and financing profile that it admitted would be stretched during the peak of spending $9 billion on committed projects ($20 billion plus potential overall). Moody's downgraded ENB primarily on financing and execution risks if its massive build out program.

Exhibit 4 – Credit Spread Deterioration

Source: PC Bond.

$20B of Growth Developments

- **ExxonMobil JV:** Enbridge recently announced a new JV' with ExxonMobil to explore a new oil pipeline project to the U.S. Gulf Coast from Patoka down to Beaumont Texas using most of ExxonMobil's right of way. On its Liquid Pipelines projects, ENB has provided a guideline of return estimates for each project ranging from 9% ROE to the "mid teens" (Exhibit 5).
- **Alberta Clipper:** A 15-year cost of service type agreement (NEB plus 2.25% ROE, indeed cost recover and no supply risk) was agreed to with shippers. The 36-inch pipe will allow for capacity to be increased to 800,000 bpd by adding pumping stations when required. The new oil pipeline will be put into an existing right of way to add 450,000 bpd between Hardisty Alberta and Superior Wisconsin by mid-2010. FERC approval filings are expected in August 2007, while NEB approval filings were completed in Q2/07. The cost estimates for the Canadian portion have increased to $2 billion from $1.4 billion previously. On the U.S. portion, ENB stated EEB's cost estimate has also increased, to US$1 billion, from US$0.8 billion previously. The higher cost estimates are due to a shortage of skilled labour.
- **EEP's Southern Access: This oil pipeline expansion from Superior to Chicago will be EEP's largest project at US$1.8 billion,** up from US$1.3 billion. We are told that 88% of the cost overrun is net to EEP's U.S. shippers and 12% is net to EEP. We assume ENB has similar features in all of its multi-year pipeline projects. Construction is now underway. EEP raised US$320 million via issuing 5.9 million Class C units and another US$310 million for 5.3 million Class C units plus expanded its credit facility to US$1.5 billion to support this project and others that total about US$5 billion. As U.S. throughput capacity is added, EEP's Lakehead oil pipeline system will shift to full cost of service tolls under a 30-year term that provides a 9% real ROE and assumes 55% equity. ENB will earn 50% of EEPs' incremental earnings that are forecast to grow at 20%/year prior to further EEP unit dilutions.

Exhibit 5 – Liquid Pipelines Project Risk/Return Portfolio

Project	Capital Magnitude ($ billions)	Expected Completion	Full Life Return	Return Profile	Volume Risk	Capital Cost Risk

* Southern Access Expansion U.S. and U.S. portion of Alberta Clipper flow to ENB via EEP incentive distributions which further enhances return at ENB level.

Source: Enbridge.

- **Southern Access Extension:** ENB is proceeding with its Southern Access Extension for 2009 to provide 400,000 bpd of crude oil delivery capacity to Patoka Ill. U.S. economics will follow the FERC formula of trended original cost (real return plus inflation) while the Canadian benefits of increased volume on the Terrace capacity will be split 50:50 with shippers. If there is no volume pick-up on Terrace, ENB will have nothing to share.
- **Spearhead Pipeline:** During Q2/07, ENB completed its Open Season for the pipeline that will see an increase of 65,000 bpd to Cushing, Oklahoma from Chicago. The 65,000 bpd increase will be split 30,000 bpd committed and 35,000 bpd for spot shippers.
- **Waupisoo Pipeline:** Following AEUB approval in Q1/07, ENB began construction of the $0.5 billion 30-inch crude oil pipeline that is still expected to be in service in mid-2008.
- **Oil Sands Oil Production Rising:** ENB estimates Alberta oil sands production will increase 2.1 million bpd by 2016 from 1.8 million bpd by 2015 last forecast 90 days ago. **Both** ENB's Alberta Clipper and TransCanada's expanded Keystone pipeline projects should proceed now. However, ENB stated that only 400,000 bpd would be available by 2010 for export to the U.S., so there is still a race as to who is first to build. ENB argues its Alberta Clipper's first expansion (2014?) will cost only 25% or US$0.5 billion for an additional 350,000 bpd and should be chosen by CAPP over TRP Keystone's potential expansion post 2010.
- **Possible East Coast Expansion**: ENB stated on its conference that it was in "very, very, very" early stages of considering a crude oil pipeline expansion from Buffalo to possibly Philadelphia.

Longer Term LNG, Gas Pipelines, Wind, Gateway

- **Quebec LNG:** ENB is happy with the progress made at its Rabaska Quebec LNG terminal. It may proceed to finalize construction permits but no construction will occur until long-term LNG supplies are contracted.
- **Frontier Gas Pipelines Delayed Further:** ENB is not happy with the new Governor's call for interest to construct the Alaska pipeline as ENB believes there will be no project until the Alaska gas producers agree to it and long-term shipper contracts are established**.** On MacKenzie, ENB does not have a direct active role at this stage but stated that both will eventually be required in North America.
- **Ontario Wind Project A Go:** The 50% owned 182 MW Bruce County wind farm received approval on July 20, 2007 to proceed from the Ontario government's OMB and the Ministry of the Environment. ENB stated that the cost overrun appears to be about 10% or $440 million versus $400 million budgeted. Construction has started.
- **Gateway Not Dead:** ENB stated the project was not dead as there has been a broadening of interest from South Korean, Japanese and Singapore refineries for Canadian crude lately. The hold-up has been, in part, due to no Chinese oil refining major buying into a significant play in the Alberta oil sands to date.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

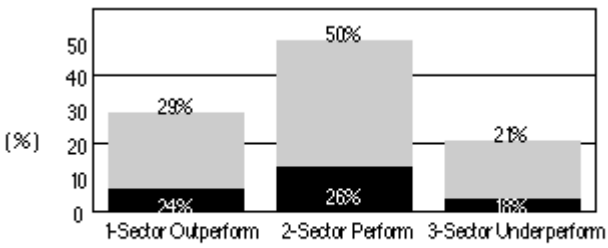
Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.



High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*

- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

*As at July 31, 2007.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

Enbridge Inc.

(ENB-T, ENB-N) C$37.15

Q1 Earnings Flat Year-Over-Year, But the Focus Remains Long-Term

Event

Enbridge's Q1/07 normalized EPS of $0.61 was two pennies shy of our estimate and in-line with Q1/06 normalized EPS.

Impact

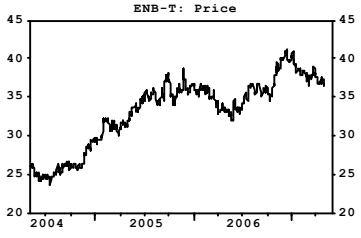
Neutral.

Details

Liquids Pipelines Q1/07 earnings of $68.9 million increased $2.6 million vs. Q1/06 mainly due to the full quarter contributions from the Olympic and Spearhead pipelines, partially offset by slightly lower Enbridge System earnings (Exhibit 1). Enbridge System earnings declined $2.9 million primarily due to the impact of a strong labour market on compensation expenses as well as increased taxes in the Terrace component.

Gas Pipelines earnings of $14.4 million declined 10% year-over-year primarily due to lower normalized contribution from Enbridge Offshore Pipelines (EOP).

Sponsored Investments earnings of $19.8 million increased $2.3 million mainly due to a higher ownership interest in Enbridge Energy Partners (EEP), gains from gas storage and lower operating costs on the Lakehead System.



Gas Distribution and Services earnings of $108.0 million were in-line with Q1/06 levels. Higher earnings at Enbridge Gas Distribution (EGD) and Noverco were offset by unrealized fair value losses on derivative instruments and a transition of EGD customer care services from Customer Works to a third party service provider.

International earnings of $22.0 million were in-line year-over-year.

Corporate expenses declined $2.6 million to $16.8 million during the quarter primarily due to a decreased interest expense from lower corporate debt.

Company Profile

Enbridge Inc. (ENB-T, N) owns and operates: 1) the world's longest crude oil and liquids pipeline system; 2) Canada's largest gas distribution network in Ontario; and 3) additional oil & gas transmission, gathering, storage and processing assets.

Please see the final pages of this document for important disclosure information.

Exhibit 1. Segmented Earnings Analysis ($mm unless otherwise stated)

	Q1/07	Q1/06	YOY Change	YOY % Change
Liquids Pipelines	$68.9	$66.3	$2.6	4%

Outlook

Earnings Guidance Reiterated: Management reiterated its 2007 EPS (basic) guidance range of $1.75-1.85, which appears to include $0.02 of business interruption insurance proceeds that are excluded from our estimate. We note that our estimate is towards the bottom of this range. Longer term, management expects Enbridge to achieve an EPS CAGR of 8-10% over a five-year period. The majority of this growth is forecasted to be back-end loaded as the bulk of Enbridge's large capital projects such as Southern Access, Alberta Clipper and Southern Lights are expected to enter service and start contributing to earnings in 2009 and 2010 (Exhibit 2).

Dividend Growth Expected to Decelerate: Management indicated it would not increase dividends to the point where the payout ratio is above its targeted range of 60-70%. Given that Enbridge is now near the top end of this range, by our calculations, suggests that dividend growth might decelerate in 2008 in sympathy with muted near-term EPS growth.

Equity Offering a Possibility for 2008: The company expects to install permanent financing for its projects shortly before they enter service. Therefore an equity financing in 2008, similar to the approximately $560 million offering in Q1/07, could be expected. Management is also exploring hybrid securities as an alternative or complement to an equity financing.

Well Positioned for Next Export Pipeline Tranche: Management believes that additional pipeline capacity, beyond Southern Access, Alberta Clipper and TransCanada's Keystone, will be needed around 2012. Enbridge believes that it could cost effectively expand Clipper to meet this demand possibly followed in a year or two by its Gateway or US Gulf Coast proposals.

Large Capital Program Update: Enbridge provided an update and additional disclosure relating to the expected returns as well as capital and volume risks of some its capital projects. Full life or DCF returns on equity are expected to range from 9%, on the Canadian portion of Southern Access, to the mid-teens on Waupisoo and the Spearhead Expansion. The amount of capital cost risk assumed by Enbridge also varies from none, as in fully contracted or regulated pipelines, to full, which is rare and only utilized when the company believes they can control capital costs and the expected returns are substantial. We provide a large capital project overview in Exhibit 2.

Exhibit 2. Summary of Enbridge's Large Capital Projects

Name	Capacity	Potential In-Service Date	Estimated Cost	Full Life Return	Capital Cost Risk	Status
Firm Shipper Support Exists						
Southern Access (1)	124 kbpd	Q1/09 (Phases 1-3)	US$1.6 billion (Phases 1-3)	US - 11% + Floating	US - None on 88%	Under Construction

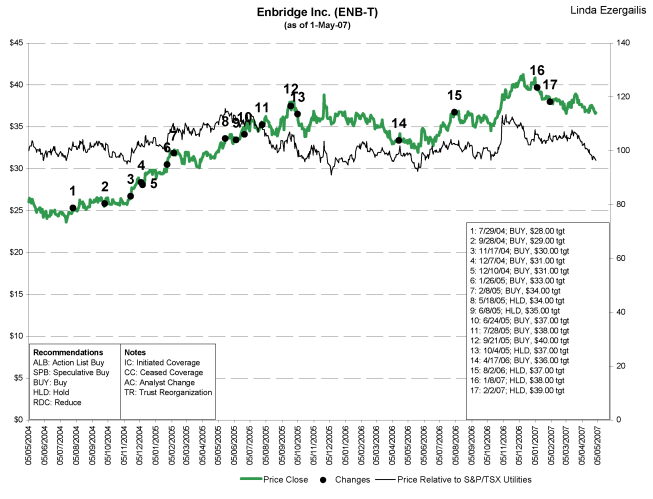
Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $39.00 target price is predicated on 2008 financial estimates as follows: 1) 50% relative earnings yield of 114% (vs. historical average of 118%), 2) 25% relative dividend yield of 81% (vs. historical average of 71%), and 3) 25% P/B ratio of 2.4x (vs. historical average of 2.4x). We believe Enbridge will trade at a premium versus the sector due to its leverage to growing volumes in the oil sands, favourable negotiated settlements with its shippers, above average profitability, and operational diversification.

Key Risks to Target Price

1) Higher than expected long bond yields; 2) acquisitions that do not create shareholder value; 3) operational disruptions; 4) potential reduction in historical valuation premium to sector; 5) tougher than expected competition for new oil transmission pipeline capacity; 6) regulatory surprises; 7) substantial delays and/or cancellations of oil sands projects; and 8) WCSB risk.



Investment Conclusion

This quarter's results reaffirm our view that Enbridge will be challenged to grow earnings in 2007 and 2008, as many of its capital projects are not expected to be in-service until later this decade. We believe Enbridge shares have underperformed the sector in April and year-to-date partially due to a growing recognition of earnings growth being muted in the near-term. Longer term however, we believe Enbridge's large portfolio of growth projects, including higher return crude oil storage terminals and diluent import lines, will help Enbridge achieve above average EPS growth. Give the recent pullback, the shares may be interesting for more patient investors with a long-term horizon, but at this time total returns are not sufficient to warrant a buy recommendation. While our bias is increasingly positive as Enbridge continues to make progress on its projects, we continue to recommend investors HOLD Enbridge.

Enbridge Inc.

(ENB-T, ENB-N) C$37.09

Large Capital Program Remains On-Track; Q2 In-Line

Event

Enbridge reported normalized Q2/07 EPS of $0.34. When further adjusted for $8.5 million ($0.02 per share) of unrealized derivative fair value losses, which we keep in our operating earnings, the EPS of $0.36 met our expectations and was up a penny year-over-year.

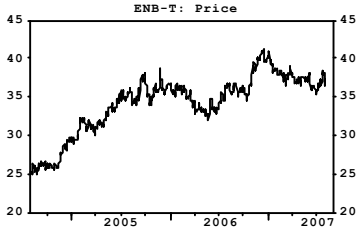
Impact

Neutral.

Details

Liquids Pipelines Q2/07 earnings of $65.8 million declined $2.8 million vs. Q2/06 (Exhibit 1). This was mainly a result of a lower Mainline System contribution due to the impact of a strong labour market on compensation expense, higher pipeline integrity costs, and increased taxes in the Terrace component.

Gas Pipelines earnings of $13.4 million declined 16% year-over-year primarily due to continuing natural production declines on deliveries to Enbridge Offshore Pipelines.



Sponsored Investments earnings of $21.5 million increased 23% mainly due to a higher ownership interest in Enbridge Energy Partners (EEP). We note that Enbridge has an approximate 15% ownership interest in EEP.

Gas Distribution and Services earnings of $10.1 million declined 30% year-over-year. The decline is mainly attributable to an $8.3 million unrealized fair value losses on derivative instruments at Aux Sable, which was partially offset by a $3.5 million increase in Enbridge Gas Distribution (EGD) earnings as a result of improved expense management, customer growth, and higher storage and transportation capacity transaction revenues.

International earnings of $24.0 million increased 13% year-over-year, mainly a result of higher transportation tariffs, higher volumes and the impact of a stronger Euro at CLH.

Company Profile

Enbridge Inc. (ENB-T, N) owns and operates: 1) the world's longest crude oil and liquids pipeline system; 2) Canada's largest gas distribution network in Ontario; and 3) additional oil & gas transmission, gathering, storage and processing assets.

Corporate expenses declined $5.3 million to $13.8 million during the quarter primarily due to a lower interest expense as a result of a lower level of corporate debt and increased capitalized interest.

Exhibit 1. Segmented Earnings Analysis ($mm unless otherwise stated)

	Q2/07	Q2/06	YOY Change	YOY % Change
Liquids Pipelines	$65.8	$68.6	($2.8)	-4%
Gas Pipelines[1]	13.4	15.9	(2.5)	-16%
Sponsored Investments[1, 2, 4, 5]	21.5	17.5	4.0	23%

Average Shares Outstanding - Diluted (mm)	356.7	342.5	14.2	4%
Operating EPS - Weather Normalized	$0.34	$0.35	($0.01)	-2%
Reported EPS	$0.41	$0.46	($0.05)	-11%

Note: Reported earnings have been normalized to reflect the following:

1) $11.8 million of dilution gains in Q2/07 related to an EEP unit issuance.

2) Non-cash derivative fair-value losses/(gains) of ($0.4) million in Q2/07 and $0.3 million in Q2/06 at EEP.

3) $9.8 million effect of colder than normal weather on EGD in Q2/07 as well as $9.4 million effect of warmer than normal weather in Q2/06.

4) $3.5 million future income tax benefit in Q2/07 of which $3.8 million relates to Gas Distribution and Services and ($0.3) million relates to Sponsored Investments.

5) $48.9 million future income tax benefit in Q2/06 of which $6 million relates to Sponsored Investments, $28.9 million relates to Gas Distribution and Services and $14 million relates to Corporate.

Source: Company reports, TD Newcrest.

Increased Southern Access Capital Costs: Southern Access Mainline Expansion costs have increased to US$2.1 billion from US$1.6 billion, with the bulk of the cost increase occurring within EEP. Labour, material and rights-of-way inflation were all cited as reasons for the increase.

Capital Cost Risk of Growth Projects: Management believes Enbridge's growth projects have a relatively small amount of capital cost risk as the majority of the risk is passed through to its customers. For instance, 88% of Southern Access Mainline Expansion US' capital cost overruns, mentioned above, are borne by the

shippers and not the company, which mitigates the effect on shareholders. We note however, that Enbridge bears full capital cost risk on certain projects, such as terminaling or the Ontario Wind Project, whose capital costs we expect have increased to $440 million from the original $400 million estimate.

Operating Cost Risk Could Affect Existing Assets: Inflationary pressure could have a negative effect on systems that do not have operating cost pass-throughs or are under performance agreements. For example, we believe Mainline earnings, under the Incentive Tolling Settlement (ITS), could continue to come under pressure from high compensation costs until the ITS is reset in 2010.

Positive Outlook For Enbridge Gas Distribution: Our expectation is that EGD will benefit from 1) the 1% increase in equity thickness to 36% it was recently awarded by the regulator, and 2) Incentive Regulation beginning 2008 for a period of five years, which should allow it to earn higher returns.

Equity Offering Expected in 2008: Enbridge expects to install permanent financing for its projects shortly before they enter service. We assume a $500 million equity offering in each of 2008 and 2009. Management is also exploring hybrid securities and asset sales as alternatives or complements to equity financing.

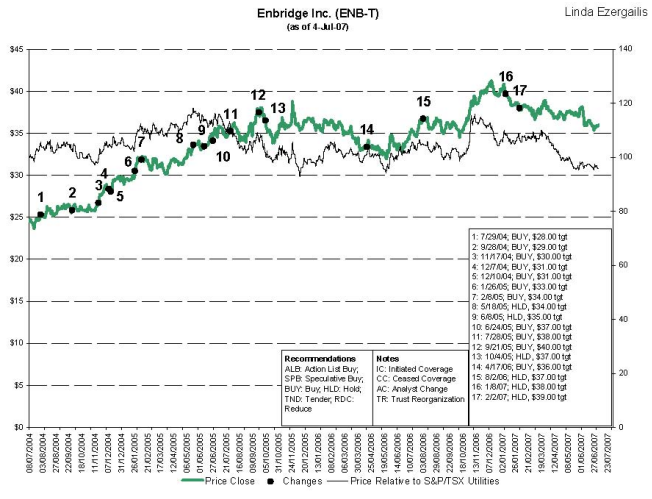
Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $38.00 target price is predicated on 50% of our 2008 & 50% of our 2009 financial estimates as follows: 1) 50% relative earnings yield of 116% (vs. historical average of 118%), 2) 25% relative dividend yield of 80% (vs. historical average of 71%), and 3) 25% P/B ratio of 2.2x (vs. historical average of 2.5x). We believe Enbridge will trade at a premium versus the sector due to its leverage to growing volumes in the oil sands, favourable negotiated settlements with its shippers, above average profitability, and operational diversification.

Key Risks to Target Price

1) Higher than expected long bond yields; 2) acquisitions that do not create shareholder value; 3) operational disruptions; 4) potential reduction in historical valuation premium to sector; 5) tougher than expected competition for new oil transmission pipeline capacity; 6) regulatory surprises; 7) substantial delays and/or cancellations of oil sands projects; and 8) WCSB risk.



Investment Conclusion

Although the quarter was neutral, we view Enbridge's progress on its large capital program, including $9 billion of pipeline projects that are proceeding, positively. We believe Enbridge's large portfolio of growth projects and incumbency in liquids pipelining in Canada will help it achieve above average EPS growth in the long-term. Our bias remains positive, although given the stock's current valuation, at this time we continue to recommend investors HOLD Enbridge.

COMPANY UPDATE

Enbridge Inc. (ENB.TO)

Neutral

Lack of near-term catalyst and capital overhang overshadow results

What's changed

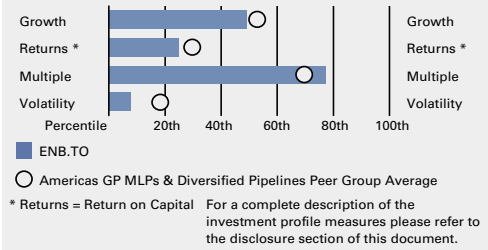
Enbridge Inc. reported 2Q2007 EPS of C$0.36 – in line with our estimate and consensus – as better-than-expected results in its International segment and lower interest costs offset modest underperformance in its Liquids segment. Unrelated to 2Q2007 results, we are decreasing our 2009 EPS forecasts as we have applied more conservative assumptions to Enbridge's major capital projects slated to commence service in 2009. Our 2007-2008 estimates are unchanged.

Implications

We maintain our Neutral rating on Enbridge, in the context of an Attractive Diversified Pipelines coverage view, as current valuation fairly balances the lack of a near-term catalyst with favorable long-term fundamentals, in our view. Enbridge trades at a premium to Buy-rated TransCanada Corp (TRP) despite equally extensive capital expansion portfolios and a similar asset base – Enbridge trades at a 9.5X EV / EBITDA multiple on 2008 versus 8.5X for TransCanada. Furthermore, we expect Enbridge's capital expansion program to require material funding over the next 24 months before cash flow realization and foresee a major overhang on valuation.

Valuation

We are lowering our 12-month target price to C$40 (11% total return potential) from C$41 due to our moderately lower Liquids earnings forecast. Our Diversified Pipelines valuation methodology utilizes a (1) Dividend Discount Model, (2) normalized EV/EBITDA relative cash flow comparable analysis, and (3) sum-of-the-parts implied value.



Key risks

(1) Sharp declines in commodity prices could slow the production of infrastructure projects that are tied to incremental commodity supply. (2) Increased federal or state regulation, or changes to the current regulation, could have negative implications.

Increasing Alberta oil sands production key to long-term outlook

The Canadian Association of Petroleum Producers (CAPP) expects overall crude oil production in 2020 to be 113% greater than 2005 levels – of which most is derived from the Oil Sands – and we estimate material opportunities exist for long-distance pipeline companies if the export ratio holds constant, as detailed in Exhibit 1, a very conservative assumption considering the trend has been upwards and incremental demand from crude is likely to be from North America.

Exhibit 1: Canadian crude oil imports to the US is likely to increase
in thousands of barrels per day

	1990	1995	2000	2005	2010	2015	2020

Enbridge Inc.'s capital expansion portfolio is heavily concentrated on building out its Liquids segment, and more specifically to increase capacity to meet the demands of this north-to-south directional flow. The company's ability to execute on its extensive capital project program is key to its long-term growth profile and supports our favorable fundamental long-term view. A list of its major organic growth projects is detailed in Exhibit 2.

Exhibit 2: Long-term growth focused on increases to Canadian crude oil production
Enbridge's capital expansion portfolio

Project Name	Project Specs	Estimated Cost	Estimated Completion	Project Goal
Waupisoo	240 miles of 30-inch diameter crude oil pipeline; initial capacity expected to be 350,000 barrels per day	C$500 million	to commence service in mid-2008	provide takeaway capacity for increasing oil sands production
Southern Access Expansion*	454 miles of 42-inch diameter pipeline from Superior, WI to Flanagan, IL; increases system capacity to 400,000 barrels per day	US$2.1 billion	partial startup in 2008, fully operational by 2009	increase capacity on existing system to meet increasing demand for Canadian crude oil
Southern Access Extension	175 miles of 36-inch diameter pipeline from Flanagan, IL to Patoka, IL; initial extension capacity to be 400,000 barrels per day	US$400 million	to commence service in 2009	extends existing Southern Access system to major interconnects in Patoka, IL
Southern Lights	674 miles diluent pipeline from Chicago, IL to Clearbrook, MN; 313 miles of 20-inch diameter crude oil pipeline from Cromer, Manitoba to Clearbrook, MN	US$900 million	to be phased in over time with full operations expected in mid-2010	targets demand for diluent in Canada to transport heavy crude oil while increasing crude oil capacity on same system
Alberta Clipper	1,000 miles of 36-inch diameter pipeline from Hardisty, Alberta to Superior, WI; initial capacity to be 450,000 barrels per day	US$2.8 billion	to commence service in mid-2010	to deliver Alberta oil sands-derived product to markets in the U.S.
Gateway	transport oil from Strathcona County, Alberta to a new marine terminal in Kitimat, British Columbia	N / A	still in preliminary stage	to open access of heavy crude to Pacific Ocean markets via marine transportation
Potential Patoka, IL to Houston, TX crude oil pipeline	will jointly assess, with ExxonMobil (XOM), potential commercial development	N / A	still in preliminary stage	adds input capacity to Houston refining market while completing the link between Canadian crude oil expansion and Gulf Coast refining

Decreasing 2009 estimates, 2007-2008 forecasts unchanged

We are decreasing our 2009 EPS estimates by C$0.05 to C$2.15 as we have moderately lowered our expectations for potential returns on capital projects slated to commence service in 2009. Our 2007-2008 estimates and 2007-2009 dividend forecasts are unchanged following 2Q2007 earnings that were in line with our expectations.

Reg AC

I, David Chiaro, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Investment profile

The Goldman Sachs Investment Profile provides investment context for a security by comparing key attributes of that security to its peer group and market. The four key attributes depicted are: growth, returns, multiple and volatility. Growth, returns and multiple are indexed based on composites of several methodologies to determine the stocks percentile ranking within the region's coverage universe.

The precise calculation of each metric may vary depending on the fiscal year, industry and region but the standard approach is as follows:

Growth is a composite of next year's estimate over current year's estimate, e.g. EPS, EBITDA, Revenue. **Return** is a year one prospective aggregate of various return on capital measures, e.g. CROCI, ROACE, and ROE. **Multiple** is a composite of one-year forward valuation ratios, e.g. P/E, dividend yield, EV/FCF, EV/EBITDA, EV/DACF, Price/Book. **Volatility** is measured as trailing twelve-month volatility adjusted for dividends.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

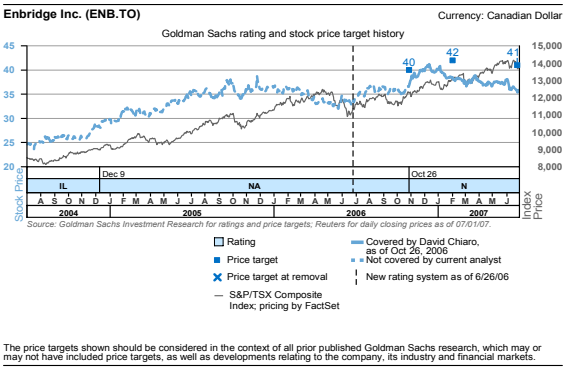
Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Enbridge Inc. (C$37.09)



Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	28%	59%	13%	40%	33%	27%

As of July 1, 2007, Goldman Sachs Global Investment Research had investment ratings on 2,631 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by NASD/NYSE rules. See 'Ratings, Coverage groups and views and related definitions' below.

Price target and rating history chart(s)

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; market making and/or specialist role.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director, advisory board member or employee of any company in the analyst's area of coverage. **Distribution of ratings:** See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at http://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act. **Canada:** Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research in Canada if and to the extent it relates to equity securities of Canadian issuers. Analysts may conduct site visits but are prohibited from accepting payment or reimbursement by the company of travel expenses for such visits. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited; **Japan:** See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company. **Korea:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in Russian law, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian Law on Appraisal. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **United Kingdom:** Persons who would be categorized as private customers in the United Kingdom, as such term is defined in the rules of the Financial Services Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 4 (1) (d) and Article 6 (2) of the European Commission Directive 2003/126/EC is available at http://www.gs.com/client_services/global_investment_research/europeanpolicy.html

Ratings, coverage groups and views and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's return potential relative to its coverage group as described below. Any stock not assigned as a Buy or a Sell on an Investment List is deemed Neutral. Each regional Investment Review Committee manages various regional Investment Lists to a global guideline of 25%-35% of stocks as Buy and 10%-15% of stocks as Sell; however, the distribution of Buys and Sells in any particular coverage group may vary as determined by the regional Investment Review Committee. Regional Conviction Buy and Sell lists represent investment recommendations focused on either the size of the potential return or the likelihood of the realization of the return.

Return potential represents the price differential between the current share price and the price target expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage groups and views: A list of all stocks in each coverage group is available by primary analyst, stock and coverage group at http://www.gs.com/research/hedge.html. The analyst assigns one of the following coverage views which represents the analyst's investment outlook on the coverage group relative to the group's historical fundamentals and/or valuation. **Attractive (A).** The investment outlook over the following 12 months is favorable relative to the coverage group's historical fundamentals and/or valuation. **Neutral (N).** The investment outlook over the following 12 months is neutral relative to the coverage group's historical fundamentals and/or valuation. **Cautious (C).** The investment outlook over the following 12 months is unfavorable relative to the coverage group's historical fundamentals and/or valuation.

Not Rated (NR). The investment rating and target price, if any, have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Ratings, coverage views and related definitions prior to June 26, 2006

Our rating system requires that analysts rank order the stocks in their coverage groups and assign one of three investment ratings (see definitions below) within a ratings distribution guideline of no more than 25% of the stocks should be rated Outperform and no fewer than 10% rated Underperform. The analyst assigns one of three coverage views (see definitions below), which represents the analyst's investment outlook on the coverage group relative to the group's historical fundamentals and valuation. Each coverage group, listing all stocks covered in that group, is available by primary analyst, stock and coverage group at http://www.gs.com/research/hedge.html.

Definitions

Outperform (OP). We expect this stock to outperform the median total return for the analyst's coverage universe over the next 12 months. **In-Line (IL).** We expect this stock to perform in line with the median total return for the analyst's coverage universe over the next 12 months. **Underperform (U).** We expect this stock to underperform the median total return for the analyst's coverage universe over the next 12 months.

Coverage views: Attractive (A). The investment outlook over the following 12 months is favorable relative to the coverage group's historical fundamentals and/or valuation. **Neutral (N).** The investment outlook over the following 12 months is neutral relative to the coverage group's historical fundamentals and/or valuation. **Cautious (C).** The investment outlook over the following 12 months is unfavorable relative to the coverage group's historical fundamentals and/or valuation.

Current Investment List (CIL). We expect stocks on this list to provide an absolute total return of approximately 15%-20% over the next 12 months. We only assign this designation to stocks rated Outperform. We require a 12-month price target for stocks with this designation. Each stock on the CIL will **automatically** come off the list after 90 days unless renewed by the covering analyst and the relevant Regional Investment Review Committee.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs, and pursuant to certain contractual arrangements, on a global basis. Analysts based in Goldman Sachs offices around the world produce equity research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy.

This research is disseminated in Australia by Goldman Sachs JBWere Pty Ltd (ABN 21 006 797 897) on behalf of Goldman Sachs; in Canada by Goldman Sachs Canada Inc. regarding Canadian equities and by Goldman Sachs & Co. (all other research); in Germany by Goldman Sachs & Co. oHG; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs JBWere (NZ) Limited on behalf of Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman, Sachs & Co. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International, authorised and regulated by the Financial Services Authority, has approved this research in connection with its distribution in the European Union and United Kingdom; Goldman, Sachs & Co. oHG, regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht, may also be distributing research in Germany.

General disclosures in addition to specific disclosures required by certain jurisdictions

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than some industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division.

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, our proprietary trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives (including options and warrants) thereof of covered companies referred to in this research.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of the investments referred to in this research and the income from

them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Current options disclosure documents are available from Goldman Sachs sales representatives or at http://www.theocc.com/publications/risks/riskchap1.jsp. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Our research is disseminated primarily electronically, and, in some cases, in printed form. Electronic research is simultaneously available to all clients.

Disclosure information is also available at http://www.gs.com/research/hedge.html or from Research Compliance, One New York Plaza, New York, NY 10004.

SEC INTERROGATORY #25

INTERROGATORY

Issue 1.3 Should weather risk continue to be borne by the shareholders, and if so what other adjustments should be made?

[B/1/1/20] Please advise what rules, if any, Enbridge proposes should be applicable to their forecasting of volumes and customer numbers.

RESPONSE

Consistent with previous rate cases, the Company always uses either the latest Board Approved or proposed new degree day forecasting methodology in generating the test year volume budget. As stated in EB-2006-0034's Decision with Reasons, the Board accepted the Company's amended proposal to apply the 20-Year Trend method in the Central region, the Energy Probe method in the Eastern region and the 50/50 method in the Niagara region based upon recent years actual data. Therefore, these are the appropriate degree days methodologies to be used for forecasting volumes.

SUPPLEMENTAL RESPONSE

As this interrogatory is requested under Issue 1.3 regarding the weather risk, the response of this interrogatory is written in the context of the degree day forecasting methodology. The purpose of this supplemental response is to provide a descriptive summary of methodologies used in forecasting non-weather component of volumes and customers numbers. The full description of these methodologies or assumptions can be found from the Gas Volume Budget evidence as filed at Exhibit C, Tab 2, Schedule 1, the Average Use Forecasting Model and Economic Assumptions evidence as filed at Exhibit C, Tab 2, Schedule 3, and the Customer Additions evidence as filed at Exhibit C, Tab 3, Schedule 1.

On page 14 of EB-2006-0034's Decision with Reasons, the Board notes that no intervenor has challenged the accuracy of the volumes put forward by the Company or the assumption imbedded in the average use model on page 14 of Decision of Reasons. The regression model approach has been embraced by the Company since RP-2000-0040 in order to address the Board's concern as mentioned in RP-1999-0001's Decision with Reasons. This methodology has been accepted by all intervenors and approved during the Settlement Conference for the past several rate proceedings

Witnesses: I. Chan
T. Ladanyi

prior to EB-2006-0034. As stated on page 4 of Exhibit C, Tab 2, Schedule 1, Average in-sample forecast error for both Rate 1 and Rate 6 regression models is still less than 1 percent on average during 2001-2006 as demonstrated at Exhibit C, Tab 2, Schedule 3. Overall, the regression model has continued to be a good predictor of general service average use.

As stated on page 16 of EB-2006-0034's Decision with Reasons, there are no intervenors made submissions about the non-weather sensitive component of the contract market volume forecast that is developed via a grass roots approach that has been utilized by the Company for more than ten years. As stated on page 20 of Exhibit C, Tab 2, Schedule 1, other than the unexpected and historic high natural gas prices that occurred in 2001 and 2006 along with unexpected rate switching occurred starting Fall 2006 and plant closures that increased volumetric variances significantly, the average normalized percentage error variance between 2002 and 2005 was merely 0.3% or 13 $10^6 m^3$. Specifically, regression models cannot predict when a particular plant will be closed or production shift will be reduced. For instance, one of the Company's large industrial customers has recently announced a temporary plant shut down in consequence of an unexpected operational difficulty.

Customer additions forecast as filed at EB-2006-0034, Exhibit B3, Tab 2, Schedule 3, which underpin total customer forecast is not even on the EB-2006-0034's issue list. Consistent with previous rate proceedings for more than ten years, customer additions forecast is generated via a grass roots approach which has incorporated the best and the latest available information from both regional operational employees and builders.

Similar to the previous filed responses to this Interrogatory and consistent with previous rate cases, the Company also always uses either the latest Board Approved or proposed forecasting methodology in generating the test year volume and customer budget. As stated in EB-2006-0034's Decision with Reasons, the Board accepted the Company's general service and contract market volume budget that is comprised of general service average use-per-customer forecast, customer forecast and contract market volumetric forecast.

In view of these considerations, general service average use forecast developed via regression models, total customer forecast developed via grass roots customer additions forecast and contract market volume generated via grass roots approach are the appropriate forecasting methodology to be used for forecasting volumes and customers in this rate proceeding.

SEC INTERROGATORY #26

INTERROGATORY

Issue 3.1 How should the X factor be determined?

[B/1/1/21, B/3/1/33, and many other places] Please provide the annual O&M and capital spending of Enbridge for each year from 1997 through 2006, eliminating therefrom all items that Enbridge proposes should be Y factors or Z factors during the IR period.

RESPONSE

The annual O&M and capital spending for the period 1997-2006 are in the attached table. Y Factors and Z Factors do not apply to a cost of service environment.

Witness: T. Ladanyi

Enbridge Gas Distribution
Historical O&M and Capital Spending
1997-2006

Line No.	Particulars ($ millions)	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006
1	Annual O&M	$261.3	$242.2	$259.7	$232.7	$253.5	$246.4	$289.0	$303.0	$312.5	$341.0

INTERROGATORY

Issue 3.1 How should the X factor be determined?

[B/1/1/21] Please calculate and provide, for each year from 1997 through 2006, the revenue requirement per customer, and then recalculate and provide the same, but excluding therefrom the impact of all items that Enbridge now proposes should be Y factors or Z factors during the IR period.

RESPONSE

The chart below calculates the distribution revenue requirement per customer for 1997 to 2006.

Board Approved Distribution Revenue Requirement
"Approved Gross Margin"
Total Company

Year	Revenues ($000)	Total Customers	Revenue Requirement per Customer ($)
2006	941,000	1,792,615	525
2005	884,500	1,718,766	515
2004	839,682	1,676,380	501
2003	825,900	1,615,036	511
2002	783,300	1,565,017	501
2001	789,500	1,514,710	521
2000	769,900	1,468,915	524
1999	750,300	1,417,832	529
1998	707,900	1,353,178	523
1997	698,200	1,309,752	533
1996	622,300	1,262,815	493

The items which the Company has proposed for treatment as Y factors are for elements and levels of costs which the Company has never had the opportunity to include within

Witnesses: K. Culbert
A. Kacicnik

SEC INTERROGATORY #29

INTERROGATORY

Issue 3.1 How should the X factor be determined?

[B/3/1/2] Please explain why historical data on which X factor calculation is based should be Board-approved figures rather than actual figures. Please confirm the intention of paragraph 3 that the baseline for future Enbridge productivity should be the productivity levels built into past cost of service decisions by the Board.

RESPONSE

Using historical Board-approved revenues is a relevant guidepost on which to test the reasonableness of the X-Factor estimate on an annual basis. For one, the historical cost of service decisions are the only source of information that discretely measured, weighed, and ultimately ruled on the Company's revenues. The relevance of the data is increased when measured over a long time period since short term revenue variations can be smoothed out to gain an appreciation for the long term average annual change. Using actual data, on the other hand, would require data manipulation in order to sort out any unusual revenue events or one-time gains/losses.

Furthermore, as stated in paragraph 86 of Exhibit B, Tab 1, Schedule 2, the Company was responding to PEG's analysis since they chose to test the reasonableness of their recommendation against historical rate escalations over a limited time period.

The intention of paragraph 3 in Exhibit B, Tab 3, Schedule 1, is not that the baseline for future Enbridge productivity should be the productivity levels built into past cost of service decisions by the Board. The intent of incentive regulation is to "incent" the Company to invest in productivity-enhancements. The Company's ability to invest in productivity enhancements will be compromised, if revenues do not increase at a sustainable rate. Otherwise, the final result could be little productivity enhancement and little long-term customer benefit. Historically, this sustainable rate has averaged 3.86% (4.05% excluding the 2004 Test Year). /c

SEC INTERROGATORY #30

INTERROGATORY

Issue 3.1 How should the X factor be determined?

[B/3/1/4] Please provide the full set of data behind Table 1, on an annual basis, as set forth in the original source. Please explain why there is an overlap in years between the 1988-1997 period and the 1996-2005 period. Please confirm that the CSLS data includes both 1987 and 2006. Please include that data in your response. Please confirm that Table 1 uses "Hours Worked" as the labour input. Please confirm that CSLS also uses "Employment" as the labour input. Please provide the full set of CSLS data for utilities' total factor productivity for 1987-2006 using "Employment" as the labour input. Please confirm that pages S10 and S11 in the attached document entitled "CSLS Summary Data" are the CSLS summaries of total factor productivity for the twenty- year period 1987 – 2006 inclusive, and they show Ontario utility TFP at 0.23 or 0.24 depending on how labour is input.

RESPONSE

The table on the next page shows the calculations that underlie the data in Table 1. For the full data set, please see the Attachment 1.

Witness: M. Lister

The November dataset that was used reported data up to 2005. A variety of time periods were selected for presentation so that a complete picture could be developed. Growth rates were calculated for the full time period as well as for 10-year periods calculated using the first year (1988-1997) and ending with the final year (1996-2005). In addition, since the indexes calculated for the Company are over the period 2000-2005, the Company believed it would be useful to see the changing 5 year time periods (1991-1995, 1996-2000, 2001-2005).

The choice to begin the sample period at 1988 was due to the fact that the Company originally calculated growth rates as the annual year over year growth rate, which precluded the use of 1987 growth. For final presentation, and comparability with PEG's study, the growth rates were changed to annual average logarithmic form, and the sample was inadvertently left as 1988-2005.

The Company did not know that the CSLS dataset was updated in July 2007, until after the Company had already filed evidence. For the full data set, please see Attachment 2". The updated dataset includes both 1987 and 2006.

Table 1 in the Company's evidence at Exhibit B, Tab 3, Schedule 1 represents TFP calculated with the labour input as "Hours Worked".

The CSLS also calculates TFP with the labour input as "Employment". The choice to represent the TFP growth rates using "Hours Worked" to represent the labour input was on the basis of the following excerpt from Rao, Tang, and Wang:

> Another issue in computing labour productivity is the concept of labour input. One could use either employment or hours as the labour input. Because of large and growing differences in average hours worked per employed person across firms, industries, countries and time, a labour productivity measure based on persons employed will not necessarily accurately reflect true labour productivity differences and could lead to misleading conclusions. Hence, in this paper we use total hours worked as the labour input.[1]

The intention of Table 1 was to illustrate the reality of historical productivity for Canada's Utilities and Natural Gas Utilities sectors, and this is accomplished whether using "Hours Worked" or "Employment" as the labour input. The tables below present the updated CSLS data using both "Hours Worked" and "Employment" as the labour inputs over the full data set (1987-2006), the 10-year periods with a start date at the beginning

[1] Rao, Someshwar, Tang, Jianmin, and Wang, Weimin, Micro-Economic Policy Analysis Branch, Industry Canada, Measuring the Canada-U.S. Productivity Gap: Industry Dimensions, International Productivity Monitor, Number 9, Fall 2004, p. 5-6.

of the sample period and with an end date at the end of the sample period (1987-1996, 1997-2006), and for 5-year periods such that the last period ends at the end of the sample period (1992-1996, 1997-2001, 2002-2006). Finally, the TFP growth rates are shown for the period over which the Company and PEG estimate TFP (2000-2005).

[1]Disaggregated provincial data for Natural Gas Utilities is not available
[2]The Total Utilities category includes electricity generation, transmission and distribution, natural gas distribution, and water & sewage utilities

It is confirmed that pages S10 and S11 in SEC's attached document entitled "CSLS Summary Data" are the CSLS summaries of total factor productivity for the twenty- year period 1987 to 2006 inclusive, and they show that the combination of electricity generation, transmission and distribution, natural gas distribution, and water & sewage utilities have seen collective average annual logarithmic TFP growth of 0.23% using "Hours Worked" and 0.24% using "Employment" over the period 1987-2006.

The comparable numbers for Canada's Natural Gas Utilities are 0.0%, and 0.7%, respectively for the period 1987-2006. It can be seen from the tables above that productivity for Canada's Natural Gas Utilities has slowed markedly over the past decade relative to the previous decade, whichever labour input is used.

For the period used by PEG and the Company to estimate the X-Factor (2000-2005), the corresponding annual average TFP growth for Canada's Natural Gas Utilities was -3.9% and -1.8%, respectively.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada
unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain
weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not
available or cannot be released by Statistics Canada for confidentiality
reasons.Estimates from the Labour Force Survey at the four-digit NAICS level
should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005
Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2005

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Table 9: Labour Shares for Total Factor Productivity Tables, Canada (1997, NAICS based)

Industry Title	GDP, million, 1997$	Employment	Average Weekly Earnings, 1997$	Labour Share	Capital Share
All industries	816,756	11,641,467	624	46.22%	53.78%
Agriculture, forestry, fishing and hunting	20,426	na	na	46.22%	53.78%
Crop and animal production	12,767	na	na	46.22%	53.78%
Forestry and logging	5,564	56,319	793	41.74%	58.26%
Fishing, hunting and trapping	847	na	na	46.22%	53.78%
Support activities for agriculture and forestry	1,248	na	na	46.22%	53.78%
Mining and oil and gas extraction	33,936	138,972	1,047	22.30%	77.70%
Oil and gas extraction	21,203	34,457	1,253	10.59%	89.41%
Mining (except oil and gas)	8,700	64,337	999	38.41%	61.59%
Coal mining	1,209	9,730	1,046	43.77%	56.23%
Metal ore mining	5,027	35,511	1,053	38.69%	61.31%
Non-metallic mineral mining and quarrying	2,464	19,095	874	35.21%	64.79%
Support activities for mining and oil and gas extraction	4,032	40,178	948	49.14%	50.86%
Utilities	26,684	106,593	929	19.29%	80.71%
Electric power generation, transmission and distribution	22,417	83,692	950	18.45%	81.55%
Natural gas distribution, water and other systems	4,268	na	na	46.22%	53.78%
Natural gas distribution	2,985	12,525	938	20.48%	79.52%
Water, sewage and other systems	1,283	10,376	741	31.16%	68.84%
Construction	42,995	467,110	787	44.46%	55.54%
Manufacturing	142,274	1,855,391	752	51.02%	48.98%
Food manufacturing	13,862	219,833	603	49.70%	50.30%
Animal food manufacturing	680	10,108	655	50.61%	49.39%
Sugar and confectionery product manufacturing	1,000	8,984	744	34.74%	65.26%
Fruit and vegetable preserving and specialty food manufacturing	1,858	26,673	626	46.72%	53.28%
Dairy product manufacturing	1,961	20,793	660	36.40%	63.60%
Meat product manufacturing	2,650	51,744	606	61.55%	38.45%
Seafood product preparation and packaging	721	na	na	51.02%	48.98%
Miscellaneous food manufacturing0	4,992	72,297	580	43.66%	56.34%
Grain and oilseed milling	1,542	9,560	861	27.76%	72.24%
Bakeries and tortilla manufacturing	1,954	40,100	506	53.95%	46.05%
Other food manufacturing	1,496	22,637	592	46.61%	53.39%
Beverage and tobacco product manufacturing	4,919	32,068	810	27.45%	72.55%
Beverage manufacturing	3,399	26,778	758	31.03%	68.97%
Tobacco manufacturing	1,521	5,290	1,075	19.44%	80.56%
Textile and textile product mills	2,204	48,434	576	65.82%	34.18%
Textile mills	1,414	28,594	587	61.73%	38.27%
Fibre, yarn and thread mills	201	na	na	51.02%	48.98%
Fabric mills	998	15,328	620	49.55%	50.45%
Textile and fabric finishing and fabric coating	215	6,229	534	80.49%	19.51%
Textile product mills	790	19,840	560	73.12%	26.88%
Clothing manufacturing	3,266	88,574	462	65.11%	34.89%
Clothing knitting mills	488	14,942	440	70.01%	29.99%
Cut and sew clothing manufacturing	2,650	70,533	467	64.59%	35.41%
Clothing accessories and other clothing manufacturing	129	na	na	51.02%	48.98%
Leather and allied product manufacturing	422	1,891	481	11.20%	88.80%
Footwear manufacturing	296	na	na	51.02%	48.98%
Leather and allied products (excluding footwear) manufacturing	125	na	na	51.02%	48.98%
Wood product manufacturing	9,198	124,299	717	50.35%	49.65%
Sawmills and wood preservation	6,240	66,148	785	43.29%	56.71%
Veneer, plywood and engineered wood product manufacturing	1,405	22,227	743	61.13%	38.87%
Other wood product manufacturing	1,554	35,923	573	68.92%	31.08%
Paper manufacturing	10,837	104,098	922	46.06%	53.94%
Pulp, paper and paperboard mills	8,294	66,966	1,026	43.07%	56.93%
Converted paper product manufacturing	2,543	37,131	735	55.78%	44.22%
Printing and related support activities	4,324	76,948	696	64.43%	35.57%
Petroleum and coal products manufacturing	1,657	19,875	1,007	62.79%	37.21%
Chemical manufacturing	12,837	88,774	884	31.80%	68.20%
Basic chemical manufacturing	3,477	19,909	1,031	30.70%	69.30%
Resin, synthetic rubber, and artificial and synthetic fibres and filaments manufacturing	2,503	8,490	1,012	17.85%	82.15%
Pesticide, fertilizer and other agricultural chemical manufacturing	1,347	6,538	841	21.24%	78.76%
Pharmaceutical and medicine manufacturing	2,075	19,882	846	42.15%	57.85%
Miscellaneous chemical product manufacturing	3,435	na	na	51.02%	48.98%
Paint, coating and adhesive manufacturing	945	na	na	51.02%	48.98%

Table 9: Labour Shares for Total Factor Productivity Tables, Canada (1997, NAICS based)

Industry Title	GDP, million, 1997$	Employment	Average Weekly Earnings, 1997$	Labour Share	Capital Share
Soap, cleaning compound and toilet preparation manufacturing	1,343	na	na	51.02%	48.98%
Other chemical product manufacturing	1,146	11,596	870	45.78%	54.22%
Plastics and rubber products manufacturing	7,066	111,773	708	58.25%	41.75%
Plastic product manufacturing	4,905	81,222	691	59.53%	40.47%
Rubber product manufacturing	2,162	30,551	753	55.33%	44.67%
Non-metallic mineral product manufacturing	3,787	48,554	766	51.08%	48.92%
Cement and concrete product manufacturing	1,773	22,012	758	48.92%	51.08%
Miscellaneous non-metallic mineral product manufacturing	2,014	26,542	773	52.97%	47.03%
Clay product and refractory manufacturing	282	4,096	723	54.60%	45.40%
Glass and glass product manufacturing	838	11,958	782	58.06%	41.94%
Lime and gypsum product manufacturing	407	3,466	872	38.61%	61.39%
Other non-metallic mineral product manufacturing	488	7,022	737	55.17%	44.83%
Primary and fabricated metal products manufacturing	18,912	256,458	820	57.80%	42.20%
Primary metal manufacturing	9,586	98,828	964	51.66%	48.34%
Iron and steel mills and ferro-alloy manufacturing	3,142	29,073	1,016	48.89%	51.11%
Steel product manufacturing from purchased steel	1,192	13,314	934	54.26%	45.74%
Alumina and aluminum production and processing	2,088	16,521	910	37.45%	62.55%
Non-ferrous metal (except aluminum) production and processing	1,865	20,914	1,020	59.47%	40.53%
Foundries	1,299	19,007	889	67.65%	32.35%
Fabricated metal product manufacturing	9,326	157,630	729	64.10%	35.90%
Forging and stamping	873	12,626	741	55.72%	44.28%
Cutlery and hand tool manufacturing	208	5,435	715	97.13%	2.87%
Architectural and structural metals manufacturing	2,370	42,891	751	70.70%	29.30%
Boiler, tank and shipping container manufacturing	1,083	12,813	811	49.90%	50.10%
Hardware manufacturing	661	7,055	725	40.24%	59.76%
Spring and wire product manufacturing	567	8,520	694	54.27%	45.73%
Machine shops, turned product, and screw, nut and bolt manufacturing	1,489	34,539	680	81.97%	18.03%
Coating, engraving, heat treating and allied activities	775	16,283	718	78.41%	21.59%
Other fabricated metal product manufacturing	1,301	17,469	740	51.65%	48.35%
Machinery manufacturing	9,833	131,837	809	56.40%	43.60%
Agricultural, construction and mining machinery manufacturing	2,039	25,001	754	48.06%	51.94%
Industrial machinery manufacturing	1,274	17,424	852	60.61%	39.39%
Commercial and service industry machinery manufacturing	605	9,439	775	62.88%	37.12%
Ventilation, heating, air-conditioning and commercial refrigeration equipment manufacturing	738	11,692	704	57.98%	42.02%
Metalworking machinery manufacturing	1,725	25,117	872	66.03%	33.97%
Engine, turbine and power transmission equipment manufacturing	963	8,677	847	39.68%	60.32%
Other general-purpose machinery manufacturing	2,488	34,489	817	58.86%	41.14%
Computer and electronic product manufacturing	7,629	91,747	817	51.06%	48.94%
Computer and peripheral equipment manufacturing	933	13,386	756	56.44%	43.56%
Electronic product manufacturing	6,696	na	na	51.02%	48.98%
Communications equipment manufacturing	3,291	23,613	852	31.78%	68.22%
Semiconductor and other electronic component manufacturing	1,460	24,094	795	68.23%	31.77%
Manufacturing and reproducing magnetic and optical media	328	na	na	51.02%	48.98%

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.
Notes:
Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2006

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2006

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.

Sources: National Accounts, Labour Force Survey, Statistics Canada unpublished data, Centre for the Study of Living Standards.

Notes:

Real GDP is based on a Laspeyres index up to 1996, and on a Fisher chain weighted index from 1997 to 2006

Entries marked as "na" are not available because the underlying data are not available or cannot be released by Statistics Canada for confidentiality reasons.Estimates from the Labour Force Survey at the four-digit NAICS level should be used withprudence, as their level of sampling variability is high.
