Dear Ms. Walli:

Re: EB-2008-0003 Revised Proposed Amendments to the Transmission System Code for Connecting Generation Facilities that Form Part of Renewable Resource Clusters

The Electricity Distributors Association (EDA) is the voice of Ontario's electricity distributors.

The EDA has reviewed the further revised proposed amendments to the Transmission System Code issued on September 11, 2009. In previous submissions on December 1, 2008, and May 6, 2009, the EDA supported the OEB proposed amendments to the Transmission System Code regarding cost responsibility associated with enabler facilities for renewable resources. The most recent revisions address an enabler screening criteria for OPA identified clusters, the removal of line length as a cost allocator, and settlement of line losses for enabler facilities behind a delivery point. The EDA has no issues with these proposed revisions.

Yours truly,

“original signed”

Maurice Tucci
Policy Director, Distribution & Regulation
