Another increase?!!

How could you ever think such a move would be tolerated and accepted without people reacting ?  
Hydro which most people need to survive should be kept affordable for everyone no matter  
what your income.

How can you justify freezing elderly people or low income families  
so your big executives can squander such elaborate salaries and benefits?  
Haven't we the customer paid enough yet ?  
We've had to pay off your debts which we did not acquire.  
Now we have a delivery charge that either is as much as or exceeds the cost of the actual electricity.  
When does the gouging stop?

I personally think its time to stop it now.  
No more increases and no more big salaries and big bonuses off the hard working customers.

Sincerely,

*Brenda Honan*
