ONTARIO ENERGY LTD

People these days are barely getting by. The idea of a 22.8% increase in delivery charges over the next two years is unacceptable! I am outraged with this plan. We are an average family of four living on one income and can barely afford end-meats. Why is it necessary to increase costs when Ontario power employees are making far more money than necessary to provide for their families. Nobody needs that much money to get by comfortably. Don't you realize the majority of seniors and a fair amount of families are living on fixed incomes and can't afford the cost of living already. Fixed income means income doesn't get raised when costs do. By implementing these increases you are totally screwing over the people of your province. I hope you reconsider the consequences of your proposed actions for the sake of everybody.
