ONTARIO ENERGY BD

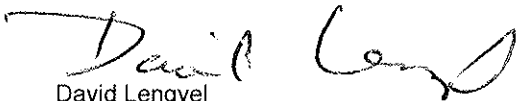

To Whom it May Concern.

I oppose Hydro One's Networks recent application(file EB-2009-0096) for an Electricity Distribution Rate Change. The per cent increases that they are asking for will be a detriment to the citizens on fixed income and others struggling to keep their heads above water.

I come from a small Northern community and talk with many people who are outraged at the delivery charges that accompany their consumption charges. This astronomical bill is ridiculous when you consider that the OPG's boss earned over 3 million dollars last year, not to mention the millions of dollars in bonuses, benefits and compensations for several executives.

We see first hand our seniors bundled up in blankets trying to keep warm because they can't afford their hydro bill. If these increases are allowed to continue, we will find them frozen to death!

Really, this is not acceptable!
