- a) Which rate class or classes will the incremental \$1.4 million cost associated with the solar thermal water heat program be recovered?
- b) Has EGD executed any legal agreements to date with the federal and provincial governments that enable them to direct the rebate dollars back to the utility? If not, when does EGD expect such agreements to be executed?
- c) If EGD has written confirmation related to the federal and provincial rebate dollars flowing back to the utility before the Board approves the 2010 rate changes as proposed in EB-2009-0172, would EGD adjust the Y-factor related to DSM expenditures down by the \$0.5 million noted on page 4? If not, why not?
- d) How has the gas savings of 379 m³ been estimated? In particular, please provide the assumptions used.
