Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
2300 Yonge Street
Suite 2700
Toronto, Ontario, M4P 1E4

Dear Ms. Walli:

**Re: EB-2009-0326 –Notice of a Proceeding to Determine A Just and Reasonable Rate to Recover the Costs Associated with Embedded Generators Having a Nameplate Capacity of 10 kW or Less – Interrogatories of the LPMA to CanSIA**

Please find attached the interrogatories of the London Property Management Association (LPMA) to CanSIA in the above noted proceeding.

Sincerely,

Randy Aiken
Aiken & Associates

cc      Elizabeth McDonald, CanSIA

IN THE MATTER OF the *Ontario Energy Board Act, 1998*,
S.O. 1998, c. 15, (Schedule B);

AND IN THE MATTER OF a proceeding initiated by the
Ontario Energy Board to determine and implement a distribution
rate for embedded generators having as nameplate capacity of 10
kW of less.

## INTERROGATORIES OF THE LONDON PROPERTY MANAGEMENT ASSOCIATION ("LPMA") TO CanSIA

### Interrogatory # 1

Please define what CanSIA means by the "minimal" costs to the LDC's associated with
billing, metering, administration and settlement. In particular, what level of a fixed
monthly charge to recover LDC costs would CanSIA consider minimal (i.e. $5 per
month, $10 per month)?

### Interrogatory # 2

Please explain why the LDC costs related to the MicroFit program should be socialized
only to electricity customers? Will society in general benefit from the adoption of
MicroFit generation?

### Interrogatory # 3

Please provide a detailed explanation of the precedents related to other elements of the
FIT program regarding transmission and distribution infrastructure expansion mechanism
referred to in the evidence.

### Interrogatory # 4

Does CanSIA believe it is appropriate for the owners of MicroFit generators to earn
income while socializing the costs associated with enabling them earn this income to all
other electricity consumers? If yes, please explain why.
