Ontario Energy Board
P.O. Box 2319
27th Floor
2300 Yonge Street
Toronto ON M4P 1E4

Attention: Ms. K. Walli, Board Secretary

Dear Ms. Walli:

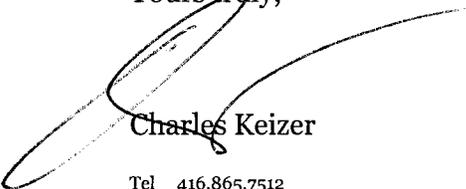

Re: Comments from Great Lakes Power Transmission LP on Proposed Uniform Transmission Rates Effective January 1, 2010 (File No. EB-2008-0272)

We are counsel to Great Lakes Power Transmission LP ("GLPT"), intervenor in the above-noted proceeding. Subject to the Board's determination of the January 5, 2010 motion by Hydro One for a review and variance of the Board's decision and order of December 16, 2009 regarding the cost of capital, GLPT does not object to the proposed calculations of the Uniform Transmission Rates, charge determinants and revenue shares as filed.

The Board is reminded that on November 30, 2009 GLPT filed an application for 2010 transmission rates (EB-2009-0408). In GLPT's application, GLPT is seeking approval for updated Uniform Transmission Rates so as to permit GLPT to recover its forecasted revenue requirement. GLPT's application further requests that its current rates be made interim as of January 1, 2010 and that GLPT's proposed rates be made effective as of January 1, 2010.

In light of the Board's indication that the proposed Uniform Transmission Rates may be authorized as interim rates pending the results of Hydro One's motion for review and variance, GLPT seeks clarification as to how the Board plans to deal with GLPT's request in EB-2009-0408 that GLPT's rates be made interim.

Yours truly,

Charles Keizer
