***Question:***

*In section 2.1, Determination of LRAM amounts; it states that Enersource has remained consistent with the Board's letter on input assumptions, dated January 27, 2009.*

*a) Please show in a table a listing of the program measures where Enersource has relied on the most recent OPA Measures and Assumptions List. In the same table, include a listing of the program measures that have relied on the OEB-approved Inputs and Assumptions List (dated March 28, 2008) as well as program measures for custom programs where published measures were not available.*

<sup>1</sup> Savings assumptions were derived by prorating savings for CFL-15W.

<sup>2</sup> EB-2009-0400 Tab B, Attachment A.

<sup>3</sup> The calculations were based on the same methodology and input assumptions as those that supported the LRAM amount which the Board approved in EB-2007-0706.
