Re:EB-2007-0050

Mr. Nettleton:

The following three documents, in my estimation, are entirely relevant and necessary to the understanding of the Intervenor, and the Board, of the Application and the Applicants preferred choice. As was determined at the Issues Day and Schedule Revision hearing [Feb.21, 2008], it is in the best interests of all parties, and the Application process, that these be made immediately available to the Intervenor and the Board for review and consideration. Also, at this time it was, apparently, determined that two of these documents were definitely produced with public availability understood, and that there was no matter of confidentiality for any of the three documents. There was, certainly, no objection from the Applicant, at that time.

As I understand, this request was, however, to be made as a part of the Interrogatory process, thus, as an Interrogatory. Given this, I ask you to consider the preceding as preamble and the following as the Interrogatory request/question. I will ask this as four separate parts, so that, if necessary, these four parts can be entertained and answered, individually.

- 1) Can, and will, the Applicant and it's Proponents [OPA, IESO] provide the Intervenor, and the Board, with the relevant documents, listed below?
- 2) Can, and will, the Applicant et al provide them immediately.
- 3) Will the Applicant et al provide them as a matter of the record?
- 4) Will the Applicant et al also provide them as hardcopy, so that they can be included in your Application binder with the other documentation relevant to this application, which you previously provided?

Following are the requested documents:

1.
IESO_REP_0245v2.0
10-Year Outlook
10-YEAR OUTLOOK:
An Assessment of the Adequacy
of Generation and Transmission
Facilities to Meet Future
Electricity Needs in Ontario
From January 2006 to December 2015
[release date: August 15, 2005]

2.

IESO_REP_0299

CONNECTION ASSESSMENT
& APPROVAL PROCESS

SYSTEM IMPACT ASSESSMENT REPORT

For the Proposed Installation of Series Capacitors in the 500kV Circuits
between the Bruce Complex & Nanticoke GS

Applicant: Hydro One Networks Inc.

CAA ID No. 2005-200

Transmission Assessments & Performance Department

FINAL Version

Date: 11th April 2006

3.

From: Pg. 38 of the SIA REPORT: INSTALLATION OF 500kV SERIES COMPENSATION
[#2, above]

The study, cited under: 16.2 Recommendations.

- The ABB Study that was commissioned by Hydro One.

I thank you for your consideration of this matter and hope for a speedy response.

Yours, respectfully,

Chris Aristides Pappas
