BOARD FILE # EB-2007-0050

Attn: Kirsten Walli
Board Secretary

We are responding to the letter that we received January 17, 2008. We were one of several households that received a prior empty envelope from hydro.

This letter is to advise you that we are applying for intervenor status and legal costs regarding the proposed hydro towers.

We chose to purchase our present property because it was not near any hydro lines. For this reason it is very frustrating to us to learn that hydro towers could be located next to our property. Carolyn has had several health issues the last three years and as a result we would feel uncomfortable living next to hydro lines. We raise and sell poultry and beef our whole business is centered around the fact we advertise that we sell a superior product that is normally unavailable for customers to buy. We are giving our customers a drug-free, hormone free, healthy alternate product. Located directly next to hydro towers would directly affect our business.

We ask you to reconsider locating the hydro lines next to our property. We will be attending the meeting on February 2, 2008.
