RE: BRUCE TO MILTON TRANSMISSION PROJECT.

ONT. ENERGY BO. APPLICATION FILE # EB 2007-0050

In 1975 I paid dearly for a little bit of heaven. So that I could get back to the farm and have a safe place to raise my children. My wife was expecting in Oct. so we bought this classy true gentlemen's stone house set back 1/4 mile for serenity & privacy. The setting of the house beside the bush with Jed Clampsits, "CEMENT POND" inbetween was and is breath taking!

I have yet to recover from the mental and financial impact of the first transmission line at our back door. I do suffer from it each and every day.

I am very upset and disappointed that no one has contacted me! They say that it WILL NOT IMPACT ME

Sorry, but I disagree. Therefore I must intervene and will be seeking costs from the applicant.

Respectfully

A. R. McFee
